# Important Safeguards and Precautions

## INTRODUCTION

Careful attention has been given to this Video product to assure a quality standard devoted to your safety and enjoyment. This quality standard together with your personal responsibility for the safety of yourself and others, will contribute to your enjoyment. This Video product uses electrical energy and requires proper handling at all times.

## CAUTION

READ AND RETAIN THE SAFETY AND OPERATING INSTRUCTIONS. To make full use of the safeguards incorporated in this unit, read and follow this basic guide, adopted in part from Underwriter's Laboratories Standard 1409, Second Edition, before operating this Video product.

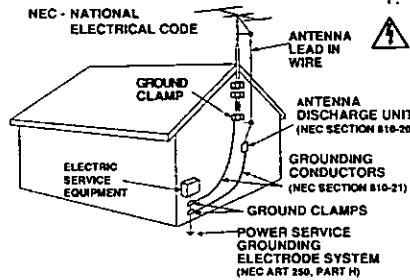

FOLLOW THE INSTRUCTIONS AND BE SURE TO HEED ALL WARNINGS on unit and in the manual, for easy maintenance, proper and trouble free operation of this Video product.

## INSTALLATION

- OPERATE FROM A POWER SOURCE INDICATED** on this Video product, or in this Manual. Your Electric Utility Service Company or Video Products Dealer will be happy to verify the power source in your home.
- THE GROUNDED OR POLARIZED PLUG IS A SAFETY FEATURE** This Video product may be equipped with either a polarized 2-wire AC line plug or a 3-wire grounding type plug. The two wire polarized plug (having one blade wider than the other) will fit into the power outlet only one way. If it is a three wire grounding type plug (having a third pin), it will fit into a grounding type outlet.  
DO NOT DEFEAT THE SAFETY PURPOSE OF THE GROUNDED OR POLARIZED PLUG by tampering with it. If the plug does not fit fully into the socket, try reversing it. If you should still be unable to fully insert the plug into the socket, you may find that a proper outlet is needed to meet today's Electrical Standards. An electrician will replace your outlet safely.
- POWER SUPPLY CORDS SHOULD BE PROTECTED** and routed so that they are not likely to have anything rest on them, roll over them, or be subject to walking traffic or abuse: particularly at plug-ins, convenience receptacles, or cord exit points from the unit. Where an extension is needed, use a grounded or polarized cord.  
**HAZARDOUS FRAYED CORDS OR DAMAGED PLUGS SHOULD BE REPLACED BY A QUALIFIED SERVICE TECHNICIAN.**  
**OVERLOADED WALL OUTLETS AND EXTENSION CORDS PRESENT DANGEROUS RISKS OF FIRE OR ELECTRICAL SHOCK.**
- AVOID BLOCKING VENTILATION HOLES**  
Your video unit has ventilation openings in its cabinet to release heat generated during operation. Blocking these openings can cause heat build-up inside the unit, causing failure that may result in a fire hazard or heat damage to cassettes. For protection:
  - Never cover the bottom ventilation slots or the unit with soft material, or operate the unit placed on a bed, sofa, rug, or soft accessory.
  - Avoid built-in installations, such as a bookcase or rack, unless proper ventilation is provided.
- AVOID EXTREMELY HOT LOCATIONS OR SUDDEN CHANGES IN TEMPERATURE** such as placing the unit near or over a radiator, in direct sunlight, closed vehicles, or transporting it suddenly between areas of extreme temperature variation.  
If the unit is suddenly moved from a cold place to a warm place, moisture may form on the tape and inside the unit.
- TO AVOID INJURY TO A CHILD, ADULT; OR COSTLY DAMAGE:**
  - Do not place unsecured equipment on a sloping surface or any heavy object or unit.  
(Use the unit in a horizontal position and do not place anything heavy on it.)
  - Support for the unit should be adequately firm, level, and strong. Replace any unstable cart, table or support. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
  - Carefully follow all operating instructions and use the manufacturer's recommended accessories when operating this unit or connecting it to any other equipment.

## OUTSIDE ANTENNA, EQUIPMENT, AND POWERLINE EXPOSURE

- INSURE SAFE ANTENNA AND CABLE CONNECTIONS**  
If an outside antenna or cable system is connected to the equipment, be sure the antenna or cable system is grounded so as to provide some protection against built up static charges and voltage surges. Part 1-of the Canadian Electrical Code, in USA Section 810 of the National Electrical Code, ANSI/NFPA 70, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes and requirements for the grounding electrode.
- ELIMINATE ANTENNA PROXIMITY TO HIGH VOLTAGE POWER SOURCES, OR CHANCE OF ACCIDENTAL CONTACT BY INSTALLER**  
An outside antenna system should be located where it will never be reached by power lines, electric light or power circuits and where it will never contact these power sources if it falls. Installer should use extreme care to avoid possible fatal contact by touching power lines, circuits or other power sources when installing an outside antenna.

## USE

AFTER STORING OR WHEN MOVING THE UNIT, REFER TO THE INSTALLATION SECTION OF THE SAFEGUARDS.

- DO NOT USE THIS VIDEO UNIT NEAR WATER:** around bathtubs, sinks, laundry, wet basement, swimming pool or any water source.
- USE ACCESSORIES RECOMMENDED ONLY BY THE MANUFACTURER** to avoid risk of fire, shock or other hazards.
- UNPLUG ALL EQUIPMENT EXPOSED TO RAIN, MOISTURE, OR STRONG IMPACT AND GET A QUALIFIED INSPECTION**  
If your unit has been exposed to rain, water, excessive moisture, or subjected to strong impact, unplug it and have it inspected by a service technician before use.
- UNPLUG UNUSED UNIT, AND ALL EQUIPMENT DURING A STORM**  
During a lightning storm, when indoors or outdoors, or before leaving unit unused for extended periods of time, disconnect all equipment from power source, antenna and cable system.
- UNPLUG ALL EQUIPMENT BEFORE CLEANING.** After unit has been unplugged use a dry, clean, chemically untreated cloth. Use no cleaning fluids, aerosols, or forced air that could over-spray, or soak into the unit, and cause electrical shock. Any substance such as wax, adhesive tape, etc. may affect the cabinet surface. Exposure to greasy, humid, or dusty areas may affect internal parts.
- WHEN PLUGGED-IN: KEEP WATER AWAY; NO FINGERS INSIDE NOR ANY OBJECTS INSIDE; AND NO MAGNETS OR ELECTRICAL INTERFERENCE NEARBY.**
  - Never operate the unit if liquid has been spilled into it. Immediately unplug the unit, and have it inspected by a service technician. Fire and shock hazards can result from electrical shorts caused by liquid contact inside.
  - Caution the children about dropping or pushing objects into the unit. Some parts inside carry hazardous voltages and contact can cause electric shock. Objects dropped in electrical equipment can cause fire hazards.
  - Separate the unit from any interference causing appliances. Placing the unit directly above or below your TV set may cause electrical interference. Keep all magnets away from electronic equipment.

## SERVICE

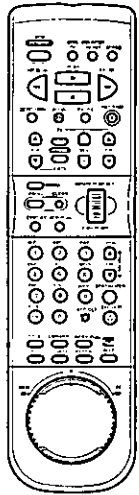

- DO NOT ATTEMPT TO SERVICE THIS PRODUCT YOURSELF.** If this Video product does not operate as described, when the detailed Operating Instructions are followed, do not attempt to open or remove covers, or make any adjustments not described in the manual. Attempting to service this unit yourself may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
- CHECK ON REPLACEMENT PARTS REQUIRED.** Be sure the service technician has used replacement parts specified by the manufacturer or having the same characteristics as the original part. Unauthorized substitutes may result in fire, electric shock or other hazards.
- HAVE TECHNICIAN PERFORM SAFETY CHECK** described in the manufacture's service literature, after any service or repairs, to determine that the Video unit is in safe operating order.

## Cleaning Care for Video Heads

Clogged Video Head Picture

or

Blue Back (During playback of pre-recorded tape)

Blue Back Screen

### Clogged Video Heads

While your VCR will not normally require head cleaning, however the heads may become clogged when playing an old or damaged tape. If the image on your screen resembles the illustration on the left or the screen becomes solid blue when playing back a pre-recorded signal on the tape, the heads probably require cleaning.

### Cleaning the Heads

It is recommended that head cleaning be performed by a qualified service technician. Please contact your nearest Panasonic Service Center. An alternate solution is to obtain a head cleaning cassette. Be sure to follow the cleaning instructions carefully. Excessive use of a cleaning cassette could shorten head life.

Use this cassette only when symptoms occur.

## Reset all VCR Memory Functions

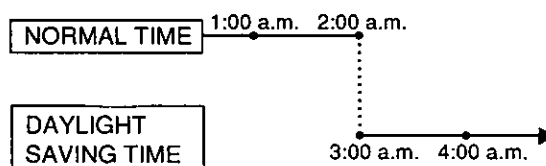

This operation is convenient when moving the VCR to a new location, or if a mistake was made in the One Time VCR Setup section. Make sure a tape is not inserted in the VCR.

- 1) Turn VCR Power on.
- 2) Press and hold both Play and Rewind buttons on the VCR for more than 5 seconds.
  - The power will shut off.
- 3) Perform the One Time VCR Setup section on page 12.

# INDEX Plus+ System

INDEX Plus+ allows you to display the title, length, and recording speed of all the programs recorded on a tape. There is also a Library feature, so you can store and retrieve the contents of your tapes. You can even receive and display special information, such as a program line-up for up to 25 broadcast stations, statistics for sports programs, and more. INDEX Plus+ requires some setup (pages 17 ~ 19).

The purpose of INDEX Plus+ setup is to allow you to have your VCR's Program Guide memory updated on a daily basis for stations received in your area. The flowchart below explains what you will be doing in the setup section.

**Steps 1~5**  
Page 17

You will be entering your zip code and time zone. The VCR can then determine what broadcast and cable stations you receive and the local time programs are broadcast.

**Step 6**  
Page 17

The VCR automatically searches for the local broadcast station (Host Channel) which is designated to load a daily Program Guide update for up to 25 local stations.

**Step 7**  
Page 18

VCR Plus+ channels are automatically programmed. This is necessary to use the VCR Plus+ feature on page 42 to 43.

**Steps 8~9**  
Page 18

You will be selecting up to 25 off air broadcast or cable stations or the VCR will automatically select them for you. A Program Guide will be loaded daily for each selected station.

**Steps 10~12**  
Page 19

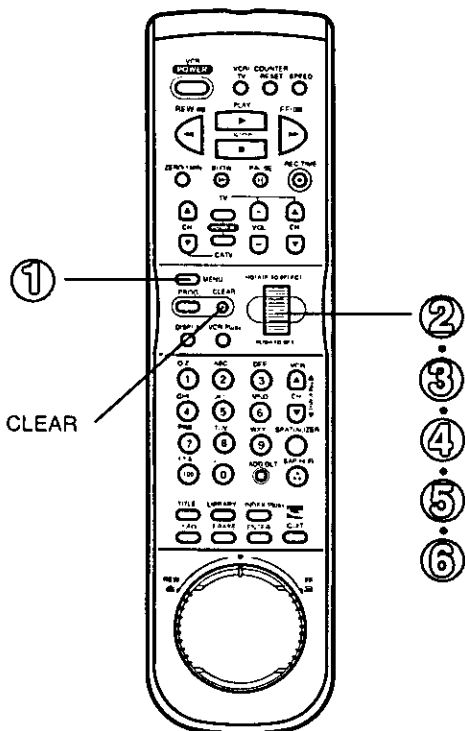

You will be selecting the time frame that the daily Program Guide updates are loaded. Once local stations are loaded into the VCR, you can select a station to display its daily program guide. The guide displays the name of a program along with its air time.

You are now ready to proceed with INDEX Plus+ setup starting on page 17. Please be sure to follow setup steps carefully and to read all accompanying notes.

In order for the VCR to read this special code, some set up is required. A Guide (VCR Plus+) channel number is assigned to each local broadcast and cable station. Because this guide number sometimes may differ from the channel your TV receives the broadcast or cable station on, it is necessary to program the VCR with local channel information.

Then, rotate the **Wheel** to change **CATV** or **TV CH** number.
