

## Set write Protection

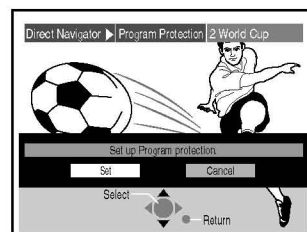

Programs can be write-protected so that they will not be erased by mistake. The write protection function can also be released.

- Proceed after performing steps 1 to 3 on p. 70.

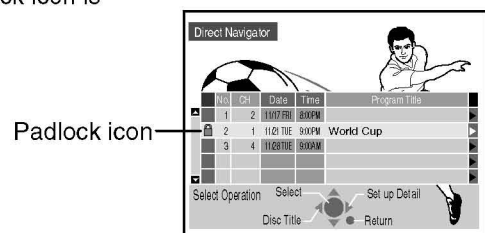

**4** Select “Set Protection” using [▲] and [▼], and press [SELECT].

**5** Select “Set” using [◀], and press [SELECT].

- The padlock icon is shown.

## ■ Canceling the program protection

1. Repeat above procedure.
2. Select “Cancel Protection” in step 5.
  - The padlock icon is now cleared.

### Note:

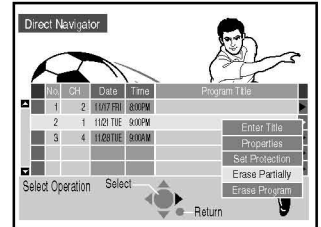

- Protected programs will be erased if the disc is formatted.

## Direct navigator program functions (continued)

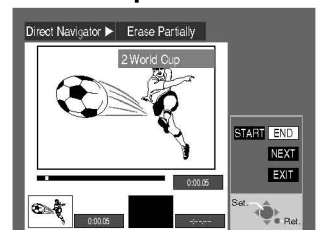

### Erasing programs partially

- Proceed after performing steps 1 to 3 on p. 70.

- 4 Select “Erase Partially” using [▲] and [▼], and press [SELECT].

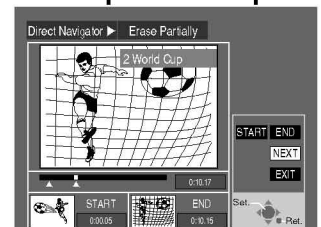

- 5 Perform forward (or reverse) search, slow playback, etc. to locate the **START** point of the part to be erased.

Once the **START** point has been located, press [SELECT].

- 6 Perform forward (or reverse) search, slow playback, etc. to locate the **END** point of the part to be erased.

Once the **END** point has been located, press [SELECT].

- 7 When there is no other part to be erased in the same program: Select “EXIT” using [▼], and press [SELECT].
