### CORRECTION TO SERVICE MANUAL

Below are corrections to the circuit diagram & parts list:

#### COMBI BOARD

\* Delete 2405 and 3456 (Not required)

3681	4822 116 52276	3k3 5% 0,5W
3682	4822 116 52276	3k3 5% 0,5W

#### CHANGES DURING PRODUCTION

##### MPEG BOARD

\* From wk0134 onwards a new pt. 2 board is introduced to solve MP3 playback noise (see newsletter SNL2001.03.13) problem by adding:

3234	4822 050 21002	1k 5% 0,1W
3235	4822 050 21003	10k 5% 0,1W
7209	3198 010 42310	BC547BW

Note: 7209 base-emitter is shorted to function like a diode.

\* From wk0147 onwards a new Servo IC7212 (software version 6) is introduced to improve CD playability. The new IC is recognized by printing mark "MPEG01BS06" and is available under service code: 9352 701 41518

\* From wk0152 onwards the Video CD Processor IC 7201 is replaced by ES3800FL. Because of this replacement the following changes are made to:

- adapt supply voltage from 3,5V to 2,7V
- adapt audio output level to 550mV

2250	2020 552 94427	100pF 50V
2251	2020 552 94427	100pF 50V
2266	2020 552 94427	100pF 50V
2267	2020 552 94427	100pF 50V

3258	4822 051 30333	33k 5% 0,1W
3261	4822 051 30563	56k 5% 0,1W
3262	4822 051 30333	33k 5% 0,1W
3265	4822 051 30563	56k 5% 0,1W

3266	4822 051 30333	33k 5% 0,1W
3267	4822 051 30333	33k 5% 0,1W
3281	4822 051 30563	56k 5% 0,1W
3282	4822 051 30563	56k 5% 0,1W

7201	9322 178 33671	ES3880FL
7211	9322 178 32668	LF27CDT

\* From wk0218 onwards a new pt. 4 board is introduced to solve picture jerking & cracking noise problem by adding:

2286	4822 122 33761	22pF 50V NPO 0603
------	----------------	-------------------

Note: The pt. 3 board is not published because it has minor track shifting to prevent short-circuit to MPEG shield casing.

New pt 4 board layouts & circuits are enclosed.

#### FRONT BOARD

\* From production wk0152 onwards a mask 3 version of the Front microprocessor IC7401 is introduced due to deletion of the Cue/Review features.

The service code for the equivalent OTP versions read:		
7401	9965 000 10681	OTP version 25 for FW-V220
7401	9965 000 10680	OTP version 25 for FW-V320

**It is very important that these OTPs are used only on sets without Cue/Review feature!**

The mask ICs used in production can be recognized by their printing mark:

- V220S53051 for FW-V220 and
- V320S53061 for FW-V320

#### ETF BOARD

\* From production wk0139 onwards the following changes are made to improve current handling & reliability:

7612	4822 130 11201	PMBT2907
7613	4822 130 11201	PMBT2907
7614	4822 130 11201	PMBT2907
