# Philips DVD Recorder - the Best Choice!

Only DVD+RW Recorders are based entirely on the established world-wide DVD Video standard: No new standard was invented – just the existing standard made recordable. Recordings made on rewritable discs – the most commonly used disk type popular format – are created in real DVD Video format so they instantly play in most DVD Video players. Thanks to a combination of advanced technologies, they deliver outstanding digital picture and sound quality and are easy to use.

## Only DVD+RW Recorders:

1. Always make compatible\* rewritable DVD discs
2. Have just one mode of operation: always offering all features while at the same time always compatible
3. Always put a helpful visual overview of the recordings on the disc this 'Index Picture Screen' shows an easy to recognize image of every recording and provides easy navigation and instant access, not only when playing the disc on the recorder but also when playing the disc in a DVD Player
4. Record on rewritable discs that can play in other DVD Players without finalising
5. Give the consumer convenience and ease of use to create picture perfect recordings – no expertise needed!

\* DVD+RW discs are fully compatible with most existing DVD players

## Product Highlights

### • Two-way compatibility

The Philips DVD Video Recorder plays your existing library of pre-recorded DVD and CD discs, while the DVD discs you record play on existing DVD Video players.

### • Naked disc

With a Philips DVD Video Recorder there is no hassle with disc cartridges – neither for recordable nor for pre-recorded discs.

### • i.LINK DV

You can connect DV and D8 camcorders and PCs with digital video editing facilities via the Digital Video input for the best possible video quality.

### • RGB Component Video Input

With RGB Component Video you can record analog video at the highest quality level, exceeding not only CVBS but also S-Video.

### • Disc bar

The display instantly shows you an overview of the disc contents, the current position and the play mode, so you always know where you are.

### • Index Picture Screen

The recorder automatically creates a screen menu with an index picture of each recording, so you can immediately see what's on the disc, navigate to the title you want to see, and start to play – or record.

### • Favourite Scene Selection

With FSS, you can select the scenes you want to see and the DVD Video Recorder will skip the unwanted scenes at your command. You can view the selection on existing DVD players, too. Easy, single-disc, single-device editing.

### • PC compatibility

The Philips DVD Video Recorder uses the same discs as DVD+RW drives in PCs. What's more, the discs you record will play on existing DVD-ROM drives. And with the right software/hardware package for your PC, you can make sophisticated video edits on your DVD+RW discs.
