SAFTY INFORMATION

A This service manual is intended for qualified service technicians ; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

B ————— WARNING ! —————

THE AEL (ACCESSIBLE EMISSION LEVEL) OF THE LASER POWER OUTPUT IS LESS THAN CLASS 1 BUT THE LASER COMPONENT IS CAPABLE OF EMITTING RADIATION EXCEEDING THE LIMIT FOR CLASS 1.

A SPECIALLY INSTRUCTED PERSON SHOULD DO SERVICING OPERATION OF THE APPARATUS.

C ————— LASER DIODE CHARACTERISTICS —————

FOR DVD : MAXIMUM OUTPUT POWER : 5 mW
WAVELENGTH : 650 nm

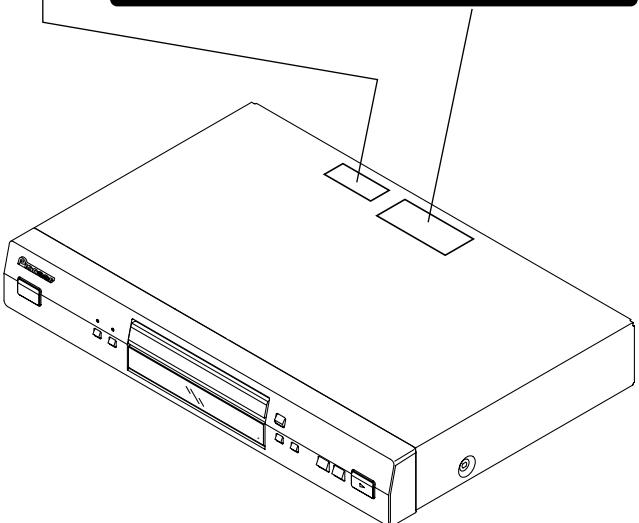

FOR CD : MAXIMUM OUTPUT POWER : 5 mW
WAVELENGTH : 780 nm

D LABEL CHECK

CLASS 1
LASER PRODUCT

CAUTION	: VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN. AVOID EXPOSURE TO BEAM.
VORSICHT	: SICHTBARE UND UNSICHTBARE LASERSTRÄHLUNG, WENN ABDECKUNG GEÖFFNET NICHT DEM STRAHL AUSSETZEN!
ADVARSEL	: SYNLED OG USYNLED LASERSTRÅLING VED ÅBNING LINDGÅ UDSÆTTELSE FOR STRÅLING.
WARNING	: SYNLIG OCH OSYNLIG LASERSTRÅLNING NÅR DENNA DEL ÄR ÖPPNAD BETRAKTA ELSTRÅLEN.
VAROII	: AVATTESA ALTISTUT NÄKYVÄ JA NÄKYMÄTTÖMÄLLE LASERSATEIL YLLE. ÄLÄ KATSO SÄTEESÄN.
CUIDADO	: RADIAÇÃO LASER VISÍVEL E INVISÍVEL AO ESTAR ABERTO. EVITAR EXPOSIÇÃO AL RAYO.

VRW1872

E Additional Laser Caution

1. Loading-status detection switch (S101 on the LOAB assy) are detected by the microprocessor (IC601 in the DVDM assy).
 - To permit the laser diode to oscillate, it is required to set the loading-status detection switch for the clamp position (the center terminal of S101 is shorted to +3V). When the voltage of IC101-pin 20 is +3V, IC601 (microprocessor)-pin 83 is +3V and IC601-pin 84 is +3V, 650nm laser diode for DVD oscillates in the DVDM Assy.
 - When the voltage of IC101-pin 20 is +3V, IC601 (microprocessor)-pin 83 is 0V (GND) and IC601-pin 84 is +3V, 780nm laser diode for CD oscillates in the DVDM Assy.

In the test mode *, the laser diode oscillates when microprocessor detects a PLAY signal, or when the PLAY key is pressed (S104 ON in the FLKY assy), with the above requirements satisfied.
2. When the cover is open, close viewing through the objective lens with the naked eye will cause exposure to the laser beam.

* : See page 61.

[Important symbols for good services]

In this manual, the symbols shown below indicate that adjustments, settings or cleaning should be made securely. When you find the procedures bearing any of the symbols, be sure to fulfill them:

1. Product safety

You should conform to the regulations governing the product (safety, radio and noise, and other regulations), and should keep the safety during servicing by following the safety instructions described in this manual.

2. Adjustments

To keep the original performances of the product, optimum adjustments or specification confirmation is indispensable. In accordance with the procedures or instructions described in this manual, adjustments should be performed.

3. Cleaning

For optical pickups, tape-deck heads, lenses and mirrors used in projection monitors, and other parts requiring cleaning, proper cleaning should be performed to restore their performances.

4. Shipping mode and shipping screws

To protect the product from damages or failures that may be caused during transit, the shipping mode should be set or the shipping screws should be installed before shipping out in accordance with this manual, if necessary.

5. Lubricants, glues, and replacement parts

Appropriately applying grease or glue can maintain the product performances. But improper lubrication or applying glue may lead to failures or troubles in the product. By following the instructions in this manual, be sure to apply the prescribed grease or glue to proper portions by the appropriate amount. For replacement parts or tools, the prescribed ones should be used.

2. EXPLODED VIEWS AND PARTS LIST

A NOTES: • Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
 • The \triangle mark found on some component parts indicates the importance of the safety factor of the part.
 Therefore, when replacing, be sure to use parts of identical designation.
 • Screws adjacent to ∇ mark on product are used for disassembly.
 • For the applying amount of lubricants or glue, follow the instructions in this manual.
 (In the case of no amount instructions, apply as you think it appropriate.)

3.12 POWER SUPPLY UNIT

G POWER SUPPLY UNIT (VWR1352)

« NOTE OF SPARE PARTS IN POWER SUPPLY (SYPS) UNIT »

- In case of repairing, use the described parts only to prevent an accident.
- Please write the red ✓ mark on the board when the primary section of POWER SUPPLY (SYPS) Unit is repaired.
- Please take care to keep the space, not touching other parts when replacing the parts.

3.13 WAVEFORMS [DVDM ASSY]

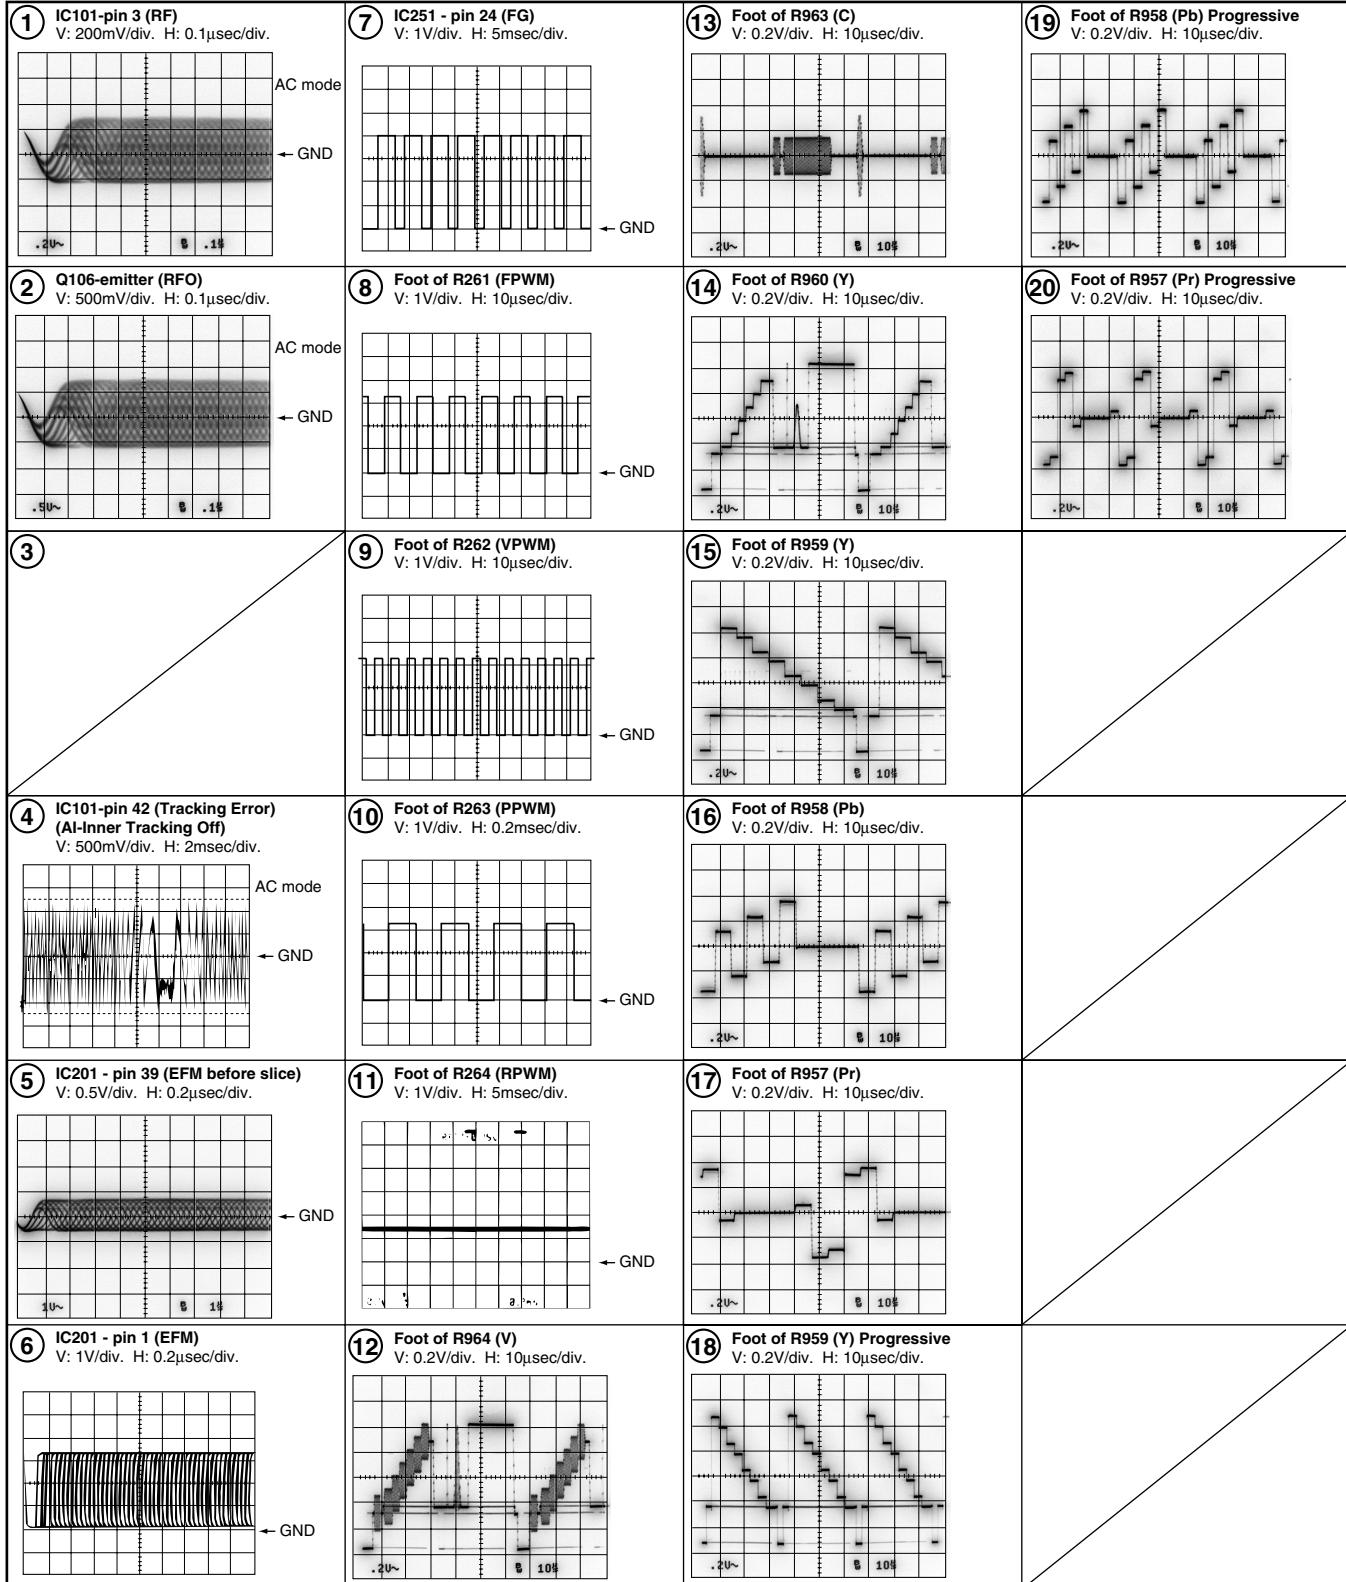

WAVEFORMS

Note : The encircled numbers denote measuring point in the schematic diagram.

B DVDM ASSY

Measurement condition : No. 1 to 4 and 6 to 11 : MJK1, Title 1-chp 1
No. 5 : CD, ABEX-784 Track 1

No. 12 to 14 : DVD-REF-A1, T2-Chap.1
No. 15 to 20 : DVD-REF-A1, T2-Chap.19

4. PCB CONNECTION DIAGRAM

4.1 LOAB ASSY

NOTE FOR PCB DIAGRAMS :

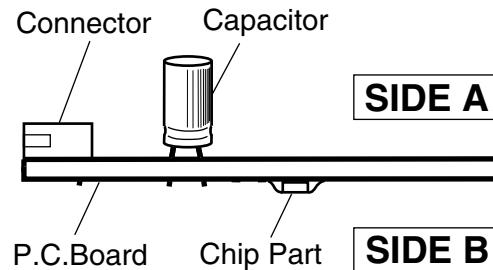

1. Part numbers in PCB diagrams match those in the schematic diagrams.
2. A comparison between the main parts of PCB and schematic diagrams is shown below.

Symbol In PCB Diagrams	Symbol In Schematic Diagrams	Part Name
		Transistor
		Transistor with resistor
		Field effect transistor
		Resistor array
		3-terminal regulator

3. The parts mounted on this PCB include all necessary parts for several destinations.

For further information for respective destinations, be sure to check with the schematic diagram.

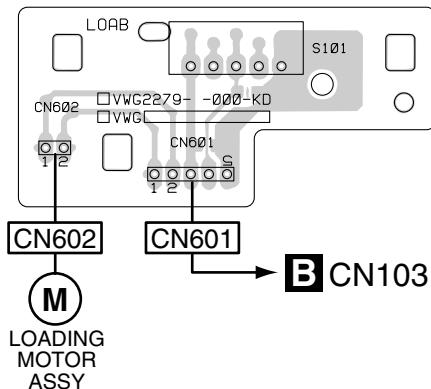

4. View point of PCB diagrams.

5. PCB PARTS LIST

- NOTES:**
- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
 - The \triangle mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
 - When ordering resistors, first convert resistance values into code form as shown in the following examples.
- Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560 Ω	\rightarrow	56 $\times 10^1$	\rightarrow	561	RD1/4PU [5 6 1]J
47k Ω	\rightarrow	47 $\times 10^3$	\rightarrow	473	RD1/4PU [4 7 3]J
0.5 Ω	\rightarrow	R50			RN2H [R 5 0]K
1 Ω	\rightarrow	IRO			RS1P [I R 0]K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω	\rightarrow	562 $\times 10^1$	\rightarrow	5621	RNI/4PC [5 6 2 1]F

6. ADJUSTMENT

6.1 ADJUSTMENT ITEMS AND LOCATION

■ Adjustment Items

[Mechanism Part]

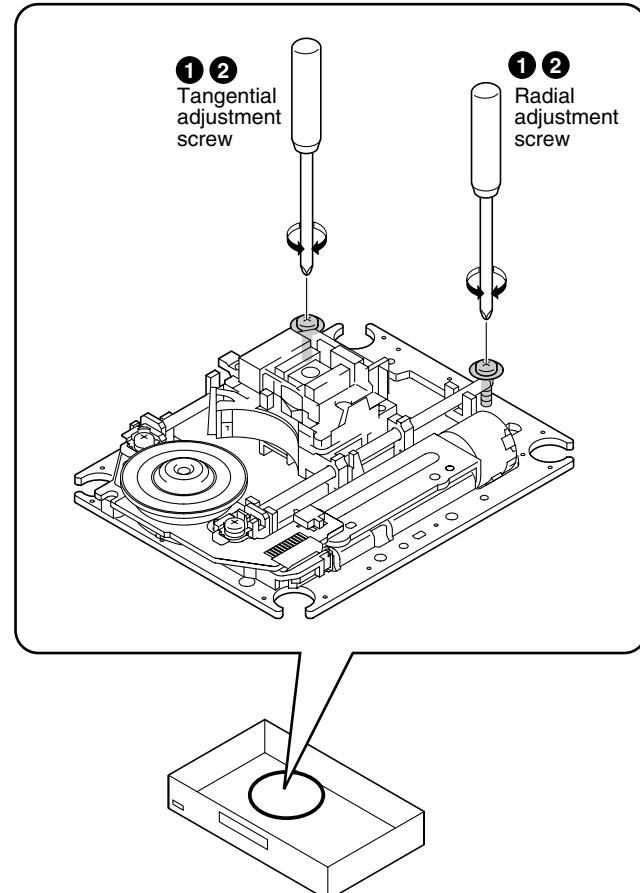

- ① Tangential and Radial Height Coarse Adjustment
- ② DVD Jitter Adjustment
- ③ Initialize the Focus Sweep Setting

[Electrical Part]

Electrical adjustments are not required.

■ Adjustment Points (Mechanism Part)

Cautions: After adjustment, adjustment screw locks with the Screw tight.

6.2 JIGS AND MEASURING INSTRUMENTS

 + Screwdriver (large)	 + Screwdriver (medium)	 TV monitor	 Test mode remote control unit (GGF1067)
 + Precise screwdriver	 DVD test disc (GGV1025)	Screw tight (GYL1001)	

6.3 NECESSARY ADJUSTMENT POINTS

When

Adjustment Points

■ Exchange Parts of Mechanism Assy

Exchange the Pickup

Mechanical point

①, ②, ③

* After adjustment, screw locks with the Screw tight.

Electric point

Exchange the Traverse Mechanism

Mechanical point

③

Electric point

Exchange the Spindle Motor

Mechanical point

②, ③

* After adjustment, screw locks with the Screw tight.

Electric point

■ Exchange PCB Assy

Exchange PC Board

Mechanical point

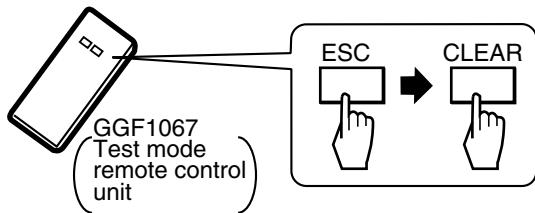

LOAB, DVDM ASSY

Electric point

*

Purpose: To set the sweep which was correct with the individual Traverse mechanism.

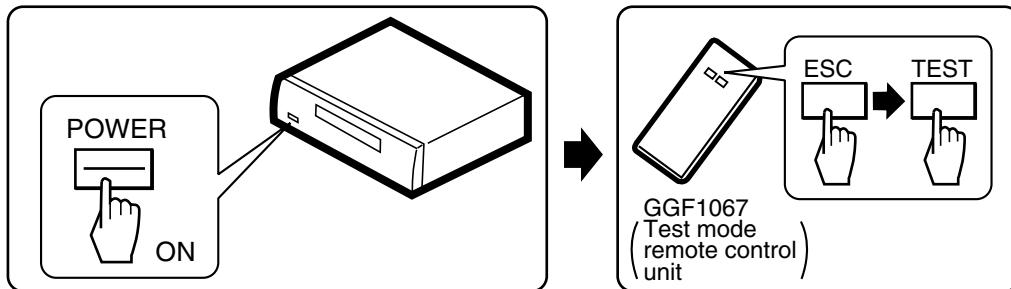

Be sure to perform the following step finally when replaced Pickup, Traverse Mechanism and Spindle Motor.

(It is necessary when performed adjustment procedure ②.)

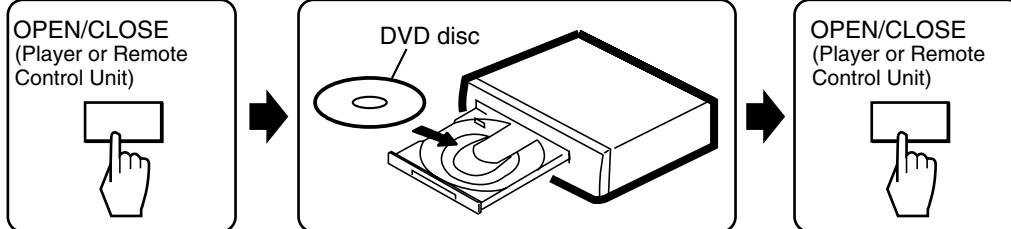

6.4 TEST MODE

TEST MODE: ON

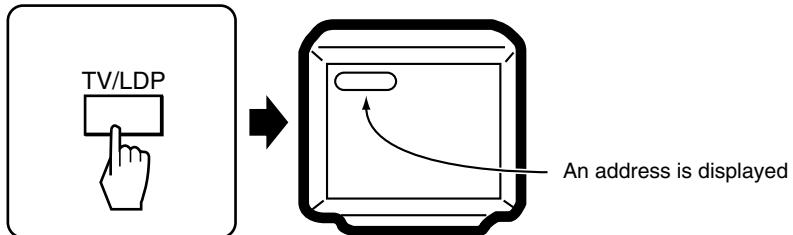

TEST MODE: DISC SET

<TRAY OPEN>

TEST MODE: PLAY

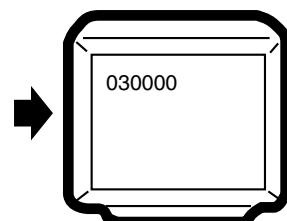

<PLAY>

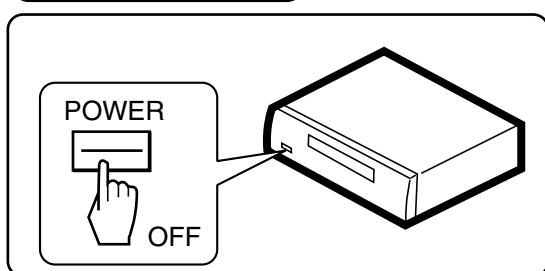

< When playback with the target address of disc (DVD) >

For example, when playback with # 30000

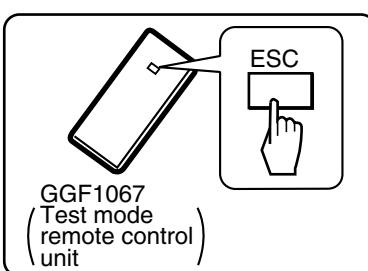

During PLAY +10 → 3 → 0 → 0 → 0 → 0 → CHP/TIM Press keys in order

TEST MODE: OFF

OR

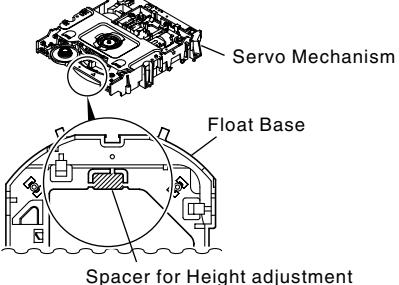

6.5 MECHANISM ADJUSTMENT

1 Tangential and Radial Height Coarse Adjustment

START

- Remove the servo mechanism.
- Remove a Spacer for height adjustment attached to the back side (shaded area) of the Servo Mechanism (Float Base) with nippers.

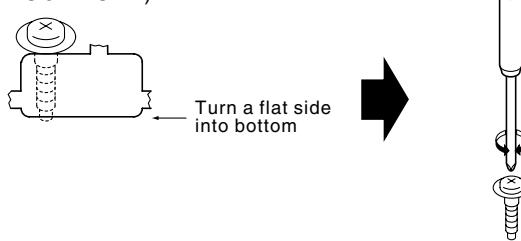

Note:
Turn the Short switch to Short side when removing the Pickup Flexible Cable.
(Refer to "7.1.9 DISASSEMBLY".)

Cautions:

Because there is not a Spacer for height adjustment in adjustment after the second time, will keep it at need.
(This parts is Traverse mechanism exclusive use of a model for 2001 years)

Put a spacer between a Tangential (or Radial) adjustment screw and Mechanism Base and turn each screw to adjust the height. (Refer to "6.1 ADJUSTMENT ITEMS AND LOCATION".)

2 DVD Jitter Adjustment

- Playback method of inner and outer address for the purpose is referred to "6.4 TEST MODE".
- Jitter indication of the monitor is referred to "7.1.3 TEST MODE SCREEN DISPLAY".

Use disc: GGV1025

START

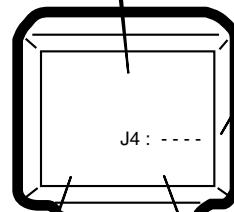

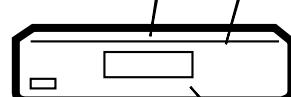

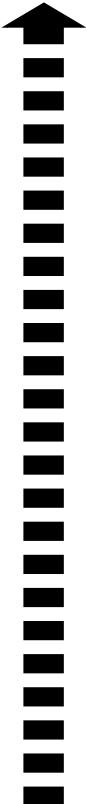

- Test mode
- Play the DVD test disc at outer track (around #200000)

Mechanism Assy

Adjust the Tangential Adjustment Screw so that jitter becomes minimum.

J4 : Min

- Play the DVD test disc at inner track (around #30000)

Player

Monitor

CHECK

Confirm the error rate that is displayed "OK"

(Example ER (av): 2.5e - 5-*OK)

Turn the POWER OFF in case of NG once, and perform the adjustment once again.

NG

Mechanism Assy

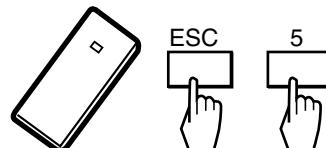

Readjust the Tangential Adjustment Screw so that jitter becomes minimum.

J4 : Min

If error rate is OK, locks a root of tangential and radial adjustment screws with the Screw tight, and go to step ③.

Screw tight: GYL1001

Disc playback normally.
• The measurement of block error rate

Test mode end

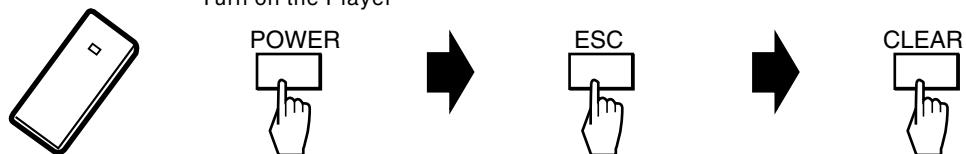

OK

③ Initialize the Focus Sweep Setting

A **Purpose:** To set the sweep which was correct with the individual Traverse mechanism.

Turn on the Player

B **Note:** Be sure to perform this step when replaced the Pickup or Traverse mechanism.

C

D

E

F

7. GENERAL INFORMATION

7.1 DIAGNOSIS

7.1.1 ID NUMBER AND ID DATA SETTING

■ Entering the ID Number and ID Data for Players with DVD-Audio and DVD-RW Compatibility

It is necessary for a player with DVD-audio and DVD-RW compatibility to set an individual number (ID number) and ID data. If the number and data are not set correctly with the following procedure, operations in the future may not be guaranteed. You will find the ID number to be set on the yellow label on the rear panel.

Important: If no yellow label is found on the rear panel, write down the specified ID number by checking it according to "How to confirm the ID number" shown below.

■ The Input is Necessary When:

- Downloading FLASH-ROM is finished. (The latest version must be downloaded when a repair is made.)
- "No ID Number" is displayed on the screen or FL display immediately after the power is turned on or in Stop mode.
- If "No ID DATA" is displayed, the ID data must be entered.

Note:

Be sure to enter the ID number in Stop mode.

Use the service remote control (GGF1067) for operations. Only opening/closing of the tray are performed from the player.

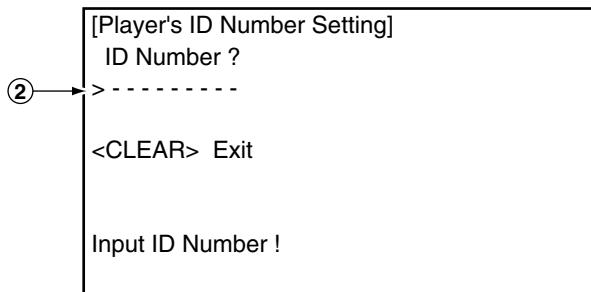

Use Disc No. : GGV1084

■ How to Input the ID Number and ID Data

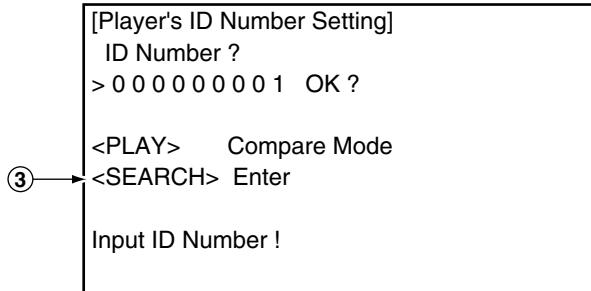

- ① To enter the input mode, press [ESC]+[STEREO] in a status with no ID number set, such as after FLASH-ROM downloading.

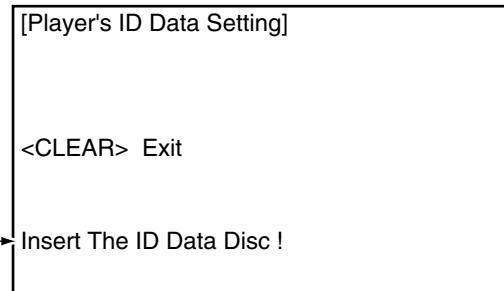

- ② As number input is enabled when the unit enters the input mode, input the 9-digit ID number.
(The entered number is also displayed on the FL display.)

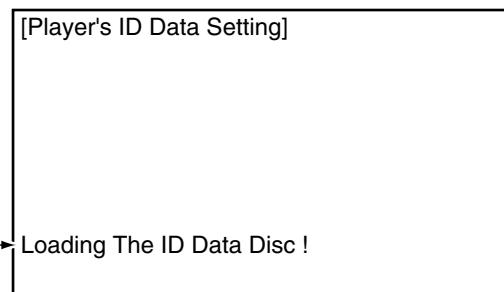

- ③ After inputting the number, press [SEARCH] to register the ID number.

- ④ When the ID number has been registered, the unit enters the ID data input mode. (The FL display indicates "NO ID DATA.") In this condition, place the ID data disc on the tray and close the tray using the CLOSE key "■▲" on the player.

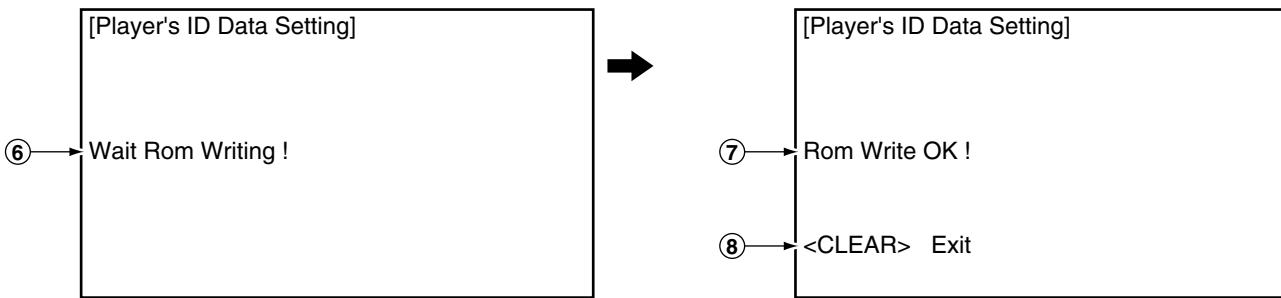

- ⑤ While the data are being read, the message shown in the figure at left is displayed on the screen.
(The FL display indicates "RD ID DATA.")

- ⑥ When the ID data have been read, the data are written to the FLASH-ROM.
(The FL display indicates "WR ID DATA.")

- ⑦ When the ID data have been written to the FLASH-ROM, the message "Rom Write OK" is displayed on the screen.
(The FL display indicates "ID DATA OK.")

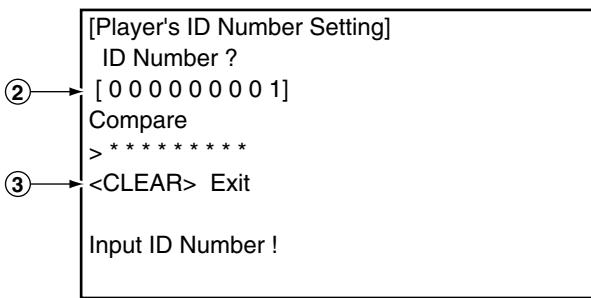

- ⑧ After confirming this message, press **CLEAR** to exit the input mode.

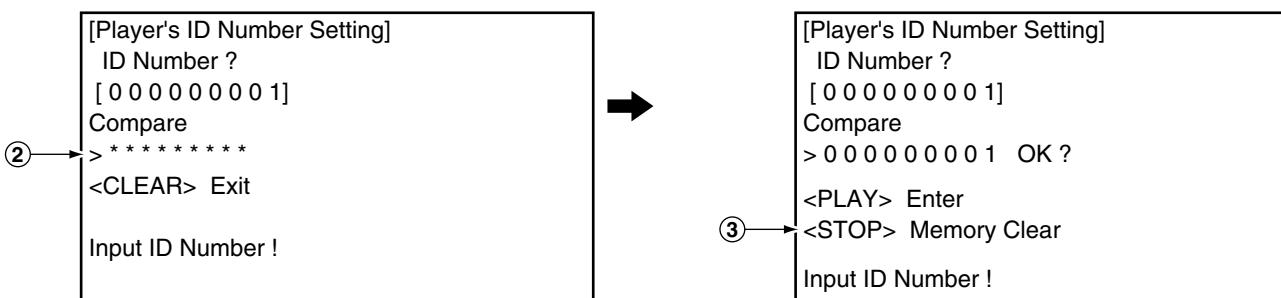

■ How to Confirm the ID Number

- ① Press **ESC**+**STEREO** with an ID number set, and the unit enters the ID number confirmation mode.
- ② The set ID number is displayed on the screen (and on the FL display), permitting you to confirm it.

③ To exit this mode, press **CLEAR**.

- ③ After inputting the number, press **STOP**. Only when the entered number matches the set ID number, the ID number is cleared and the unit exits this mode. If the numbers do not match, you must return to step 2. (**STOP** is not accepted until 9 digits are entered.)

7.1.2 SELF-DIAGNOSIS FUNCTION OF PICKUP DEFECTIVE

This unit can confirm the laser diode current value (DVD: 650nm, CD: 780nm) of pickup on the Test Mode screen.
(Press the [ESC] → [TEST] keys in order on the test mode remote control unit (GGF1067) to enter the test mode.)

It's effective in case of the following condition.

Symptom

- Indicates "No Disc" in FL display.
- Player does not playback, etc..

Procedure of Self-Diagnosis

- ① Enter the Test mode.
- ② When diagnosing the 650nm laser diode:
Press the [TEST] → [1] keys in order, and turn on the laser diode (It light-up for nine seconds.).
- When diagnosing the 780nm laser diode:
Press the [TEST] → [4] keys in order, and turn on the laser diode (It light-up for nine seconds.).

When let it turn on once again after performed ② once,
After pressed [REP.B] key once
650nm: Press the [TEST] → [1] keys in order
780nm: Press the [TEST] → [4] keys in order

- ③ Confirm the indicated value of the laser diode current (LDI). (Refer to following figure.)

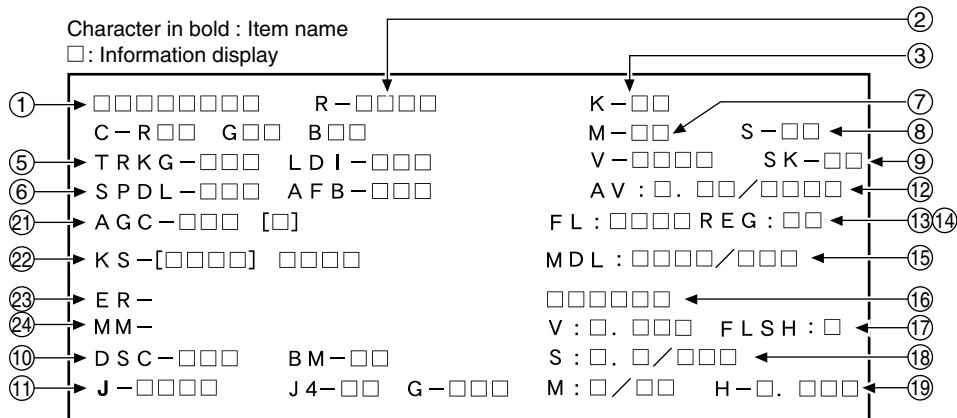

- ④ **When indicated value is more than 100, pickup is defective. → Replacement is necessary**
Replace the Traverse Mechanism Assy or Pickup.

Note : When a DVD disc or a CD disc is played in the test mode, this function is effective.

7.1.3 TEST MODE SCREEN DISPLAY

■ Display Specification of the Test Mode

- ① Address indication**
The address being traced is displayed in number.
(as for the DVD, indication of decimal number is possible.)
DVD : ID indication (hexadecimal number, 8 digits)
[* * * * * * *]
CD : A-TIME (min. sec.) [0 0 0 0 * * *]

② Code indication of remote control unit [R – * * * *]
In case of double code, display a 2nd code.

③ Main unit keycode indication [K – * *]

④ Background color indication [C – R G** B**]**

⑤ (1) Tracking status [TRKG – * * *]
Tracking on : [ON]
Tracking off : [OFF]

(2) Laser diode current value [LDI – * * *]

⑥ (1) Spindle status [SPDL – * * *]
Spindle accelerator and brake, free-running [A/B]
FG servo [FG]
Rough, velocity phase servo [SRV]
Offset addition, rough, velocity phase servo [O_S]

(2) AFB status [AFB – * *]
ON [ON]
OFF [OFF]

⑦ Mechanism (loading) position value [M – * *]
Unknown : [01] or [41]
Open state : [04]
Close state : [08]
During opening : [12]
During closing : [22]

⑧ Slider position [S – * * * *]
CD TOC area : [IN]
CD active area : [CD]

⑨ Output video system [V – * * * *]
NTSC system : [NTSC]
PAL system : [PAL]
Automatic setting : [AUTO]

Scart terminal output [SK – * *]
(Display only the WY model which can do the output setting of scart terminal.)

VIDEO : [00]
S-VIDEO : [01]
RGB : [02]

⑩ (1) Disc sensing [DSC – * * *]
The type of discs loaded is displayed.
[DVD], [CD], [VCD], []

(2) CD 1/3 beam switch [BM – * *]

⑪ Jitter value [J – * * * *]
Make the jitter four times, and renew it in every 0.5 second.
[J4 – * *]

⑫ Version of the AV-1 chip / version of firmware [AV: * * / * * * * * *]

⑬ Version of the FL controller [FL: * * * *]

⑭ Region setting of the player [REG: *]
Setting value : [1] to [6]

⑮ Destination setting of the FL controller [MDL: * * * * / * * *]
Four characters in the front represent the type of model.
Three characters in the back represent the destination code.
J: /J, K: /KU, /KC, /KU/KC, R: /RAM/RL/RD, LB: /LB,
WY: /WY

⑯ Part number of the flash ROM and system controller [* * * * * / * * * * *]

**⑰ Version of the flash ROM [V: * . * * *]
Flash ROM size [FLSH = *]**

⑱ Revision of the system controller [S: * . * / * * *]

⑯ (1) Revision of the DVD mechanism controller

[M: * / * *]

(2) Part number of the GUI-ROM (OEM model)

[GUI: * * *]

(3) HOST conversion [HOST: * * *]**⑰ AGC setting [AGC - * * * [*]]**

AGC on : [AGC-ON]

AGC off : [AGC-OFF]

[1] : RFAGC on [0] : RFAGC off

⑲ FTS servo IC information

DSP coefficient indication [KS - [* * * *] * * * *]

Displays the address (four digits) of the specified coefficient and the setting value (four digits) with [TEST] and [9] keys.

⑳ Error rate indication

① C1 error value of CD [ER - C1 * * * *]

② C1 error value of DVD [ER - * * * * * * * *]

㉑ Internal operation mode of mechanism controller

[MM - * * : * *]

Internal mechanism mode (2 digits) and internal mechanism step (2 digits) of the mechanism controller

A

B

C

D

E

F

7.1.4 SELF-DIAGNOSIS FUNCTION

When enter the service mode, self diagnosis mode operates with the "ESC"+"CHP/TIM" keys automatically.

A ① Mechanism Error History (past eight times of error is displayed)

Two columns of the beginning display the error status for mechanism controller.

(the details of error contents refer to "7.1.4 Error Display".)

Eight columns of the back display the count UP value (turned count up every 20msec) from the power-up.

Example) 32h ≈ 1 sec, BB8h ≈ 1 min, 2BF20h ≈ 1 hour

In addition, when there was error after power-up immediately (till initial setting is completed), turn the most significant bit to ON.

B ② Check Item Display of Self Diagnosis Function

a) AV1 Host Bus check (possible the check only during stop) (Read & Write process of an internal specific register)

AV_1 : OK	
: —	⇒ not yet check
: HOST BUS NG	⇒ HOST bus NG

b) Bus check between AV1 SDRAM (possible the check only during stop) (Read & Write process to the SDRAM)

AV_2 : OK	
: —	⇒ not yet check
: AV1-SDRAM BUS NG	⇒ Bus NG between AV1 and SDRAM

c) DMA transfer port check from F.E. to AV1 (during stop, possible the check only in DVD or NO DISC)
(writing from F.E to SDRAM and reading of SDRAM)

AV_3 : OK	
: —	⇒ not yet check
: FE-AV1 DMA NG	⇒ Bus NG between F.E and SDRAM installed outside of AV1

d) Video encoder (ADV****) check (Read of the specific register)

VE : OK	
: NG ADV,	⇒ ADV register reading NG
: NG > ADV,	⇒ ADV communication NG of FR to video encoder
: NG > PRO	⇒ Communication NG from EBY to progressive decoder

e) DSP check (Read of the specific register)

DSP : OK	
: NG	⇒ DASP NG

f) SACD check (Read of the specific register)

SACD : OK	
: NG	⇒ SACD NG

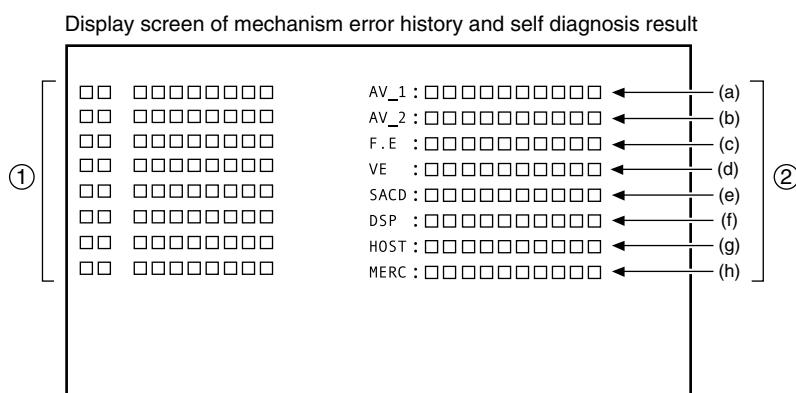

g) 1394 relation HOST controller check

HOST : OK	
: NG	⇒ HOST controller NG

h) 1394 relation Mercury CHIP check

MERC : OK	
: NG	⇒ Mercury CHIP NG

Display the mechanism error history and self diagnosis result by pressing the "CHP / TIM" key once again.
Afterwards press the "CHP / TIM" key with toggle and change the display.

7.1.5 FUNCTION SPECIFICATION OF THE SERVICE MODE

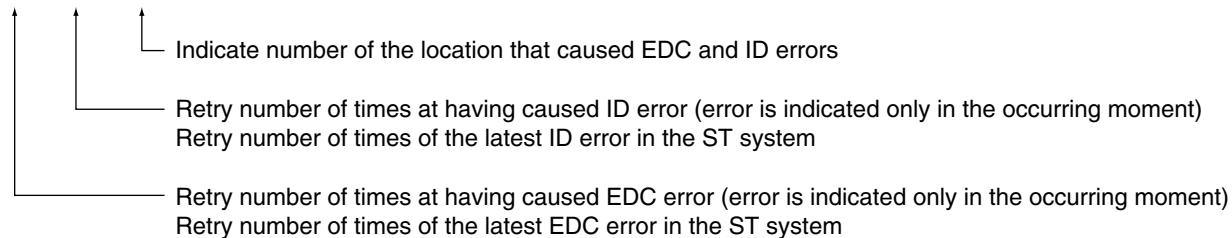

• FL indication of EDC / ID error (short cut function)

Indicate it in FL with the "ESC"+"CX" keys (LD remote control unit).

Indication is released with the "ESC" key during display.

FL indication contents

0 0 / 0 0 / 0 1 *

* Mark: When even once causes AV1 error, lights.

• Screen display of the service mode

Indicate to the screen with the "ESC"+"CHP/TIM" keys.

Release the indication with the "ESC" key.

Indication contents

① ID Address

② DVD in playback: Error rate regular indication and exponent indication

CD/VCD in playback indicates the number of correct frame of C1 error /5 seconds.

③ Self diagnosis indication

Indicate the self diagnosis result whether the F.E is normal.

Self Check : During FE checks

Self Check OK : Abnormality is not found in F.E.

Self Check Error : Abnormality is found in F.E.

Indicate the mechanism error history and self diagnosis result by pressing the "CHP / TIM" key once again.

Afterwards press the "CHP / TIM" key with toggle and change the display.

Indication of the mechanism error history and self diagnosis result refer to "7.1.1 self diagnosis function".

④ Error information indication of the AV decoder

(a)

When a retry occurred in reading from the disc, a history indicates the occurrence location and the occurrence reason. History is indicated to past seven times.

Eight columns of the beginning show the physical address which occurred of retry.

As for four columns of next, bitmap indicates EDC status. LSB shows the first sector during a block and MSB shows a last sector.

Following field indicates the retry number of times.

One digit in front of " / " shows number of times of the retry by EDC Error which occurred in the same block in succession.

One digit after " / " shows number of times of the retry by ID

Check Error which occurred in the same block in succession.

" * " of last one digit shows the EDC Check NG Count Over.

" # " shows the ID Check NG Count Over.

When " * " and " # " are not indicated, show that data were rightly readable by retry process.

(b)

Indicate the error information that detected with the Audio/Video Decoder. When error occurred, a history indicates the occurrence time and the occurrence reason. History is indicated to past seven times.

Field in front of ":" indicates the error information of Audio/Video Decoder.

(Indication information is different from Fujitsu Decoder with Mitsubishi Decoder)

02 model is 656 series and 757 series is Mitsubishi model.

• Specification for the Audio/Video Decoder (M65773FP) model of Mitsubishi

bit7: VLD Fatal Error detection

bit6: VLD Not Fatal Error detection

bit5: Number of Macro Block mismatch

bit4: Decode error

bit3: VLD Sequence Layer Fatal Error detection

bit2: VLD Picture Layer Fatal Error detection

bit1: VLD Slice Layer Fatal Error detection

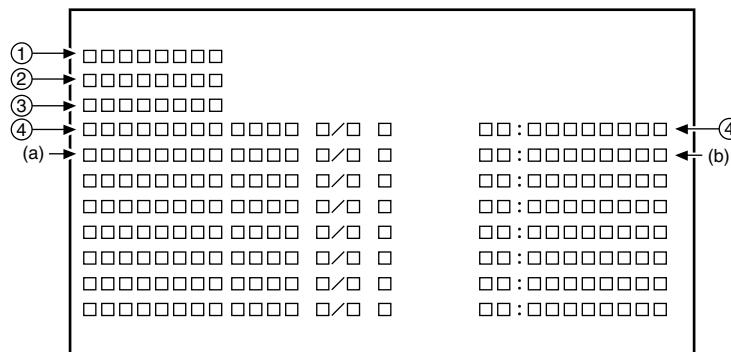

bit0: Start-up Sequence Time-out Error detection

Following field in ":" indicates a value of STC (System Time Clock) which detected the above Audio/Video Decoder error.

* When often perform the switch of debug screen, an error history will be increased.

As for this, CPU power is used for update of OSD drawing, symptoms occur so that control of VBR Buffer is not in time.

Indication contents

7.1.6 ERROR DISPLAY

Error codes that are displayed on the FL display without using the remote control unit

A	FL Display	Possible causes	Operation of the unit
	AV1 VER	AV-1 chip is not a match with the program of system controller	The sound may not out with the specific audio.
	CPU AERR	CPU address error (Hardware is unusual.)	No operation
	DMA AERR	DMA address error (Hardware is unusual.)	No operation
	FLASH ID	Difference in versions of the internal ROM of the system controller and of the flash ROM, or bus line failure or reverse installation	No operation
	FLASH WRP	Write protect error of the flash ROM	No operation
	FLASH SIG	Difference in part number of the flash ROM (When the ROM which could't be used was used.)	No operation
B	FLASH SUM	Check sum error of the flash ROM (It exceeds the regular size.) or reverse installation (Hardware is unusual.)	No operation
	FLASH SIZ	Size error of the flash ROM (Use 4 or 8 M-bit.)	No operation
	GUI ROM ERROR	Difference in version of GUI ROM and system controller software.	Operate as the OSD model
	ILLGAL	The system controller fetched a code other than an operation code (Hardware is unusual.)	No operation
	MECHA CPU	Difference in version of the internal ROM of the mechanism controller and of the flash ROM.	No operation
	RESERVE	Undefined interrupt (Hardware is unusual.)	No operation
	SLOT	Inappropriate slot command issued (Hardware is unusual.)	No operation

Error codes that are displayed on the FL display by using the remote control unit

(Mechanism controller error)

To display: ESC + DISPLAY + DISPLAY; Location of the display: At the two digits of center of the FL display

To display the error history: ESC + DISPLAY + One shot; Location of the display: TV screen

C	FL	Description of Error	Causes if with a DVD	Causes if with a CD	Operation of the Unit
D	11	Search timeout	Search could not be complete within 7 seconds.	Search could not be complete within 7 seconds, and it could not enter the target area within 7 seconds by VCD scan.	CD : Stops, DVD: Continues operation
	12	Search retry error	More beyond the target while the read-in search was converging. A search could not be completed after 3 retries while the unit was tracing 11 tracks. A search could not be completed after retry when timeout occurs at read-in.		CD: Stops, DVD: Continues operation
	19	Tracing timeout while converging	Timeout (10.5 seconds) while tracing at the stage of convergence of a search.		Stop
E	1B	Index 0 search error		During Track (Index) Search, the search for the beginning of a program could not be completed within 3 seconds (20 seconds in the case of Index Search) after positioning based on the TOC data was completed.	Stop
	1C	Embossment plunge error (only a model corresponding to RW)	Plunged into unreadable embossment of DVD-RW player.		1. In wobble nothing (error distinction) : search to address 2E400h 2. In wobble existence: Tray open
	22	Timeout of slider inner circumference	Inside switch could not ON within 3 seconds.		Stop
	23	Timeout of slider outer circumference	Inside switch could not OFF within the following times: at ATB: 2 seconds, at Backup: 2 or 2.02 seconds.		Stop
F	33	No FOK pulse during playback	When the focus was deviated continuously 20 times.		Adjusts focus at the innermost circumference and tries to return to its position where the error was generated (for 3 times),then opens. If the same error persists after one retry, the tray opens. (No FOK pulse)
	38	Disc-type-sensing error	Were not able to playback from the disc distinction process. PLAY or STOP was not completed by backup operation of the disc distinction. Distinguished it from the blank disc in the ATB process completion.		Open

FL	Description of Error	Causes if with a DVD	Causes if with a CD	Operation of the Unit
39	SGC converge timeout	SGC could not converge during detects the peak		Open
41	Spindle timeout	The unit did not enter Stop mode within 10 seconds of issuance of a Stop command. Disc distinction is not completed even if passes for 10 seconds after the spindle turned.		Stop
48	Spindle FG transition timeout	Did not reach to the rotating speed that ATB was possible for less than 10 seconds. Did not reach aim CAV lock speed (high: 10%, low: 50%) for less than 10 seconds. CAV process passed more than 5 seconds or abnormal speed was detected. Spindle does not lock for less than 3 seconds in the BCA read start or end.		Stops. (FG timeout)
49	Spindle PLL transition timeout	CAV process passed more than 5 seconds. Abnormal speed was detected.		Stops. ("73" is displayed during starting process.)
4A	Spindle lock timeout	Spindle could not lock more than 1.5 seconds before start the AFB.		Stops. ("73" is displayed during starting process.)
51	Auto sequence timeout of peak detection	ABUSY did not return within 1 second after the DDTCT (peak detection) command was sent.		Stop
52	Auto sequence timeout of focus jump down	ABUSY did not return within 30 mS after the FJMPD (Focus jump 1 to 0) command was sent.		Open
53	Auto sequence timeout of focus jump up	ABUSY did not return within 30 mS after the FJMPU (Focus jump 0 to 1) command was sent.		Open
54	Auto sequence timeout of play AGC	ABUSY did not return within 50 mS after the GSUMON (play-AGC-measuring) command was sent.		Stop
55	Auto sequence timeout of disc-type-sensing	ABUSY did not return within 2 seconds after the DJSRT (disc-sensing) command was sent.		Stop
56	Auto sequence timeout of ATB2	ABUSY did not return within 1 second after the TBLOFS (Internal ATB after the completion of external ATB) command was sent.		Stop
57	Auto sequence timeout of tracking servo ON	ABUSY did not return within 0.5 sec. after the TSON (tracking servo ON) command was sent.		Stop
58	Auto sequence timeout of ATB1	ABUSY did not return within 0.2 sec. after the TBL (external ATB) command was sent.		Stop
59	Auto sequence timeout of focus gain adjustment	ABUSY did not return within 2 seconds after the FGN (focus gain adjustment) command was sent.		Stop
5A	Auto sequence timeout of tracking gain adjustment	ABUSY did not return within 2 seconds after TGN (tracking gain adjustment) command was sent.		Stop
5B	Auto sequence timeout of offset adjustment	ABUSY did not return within 1 second after the AVE (offset adjustment) command was sent.		Stop
5C	Auto sequence timeout of modulation factor measurement	ABUSY did not return within 200 mS after the ADJMIR (modulation factor measurement) command was sent.		Stop
5D	Auto sequence timeout of auto focus bias	ABUSY did not return within 2 seconds after the AFB (auto focus bias) command was sent.		Stop
5F	Auto sequence already busy	A command could not be sent because ABUSY was low. ABUSY did not return within 200 mS after TLV command was sent.		Stop
62	Pause retry error	Pause mode could not be restored within three retries after it had been released.		Continues operation
71	ID reading check during playback	An ID could not be read for 1 second or more.		Stop
72	Subcode check failure during playback		No frame could be read for 3 seconds or more.	Stop
73	ID can not read during startup	An ID could not be read within 1 second after the AFB tracking on.		Opens (ID readout failure)

FL	Description of Error	Causes if with a DVD	Causes if with a CD	Operation of the Unit
A	74 Subcode check failure during startup		Subcode could not be read within 1 second after the tracking on.	Opens (Subcode readout failure).
	A1 Communication timeout of DSP command	A command could not be issued to DSP because Command Busy (XCBUSY) was in force (XCBUSY = L) for a specified time (about 200 µS).		Open
	A2 Communication timeout for reading DSP coefficient	Command Busy (XCBUSY) was in force for a specified time (about 200 µS) before and after a coefficient read command was issued to DSP, or the address echo-back after command issuance did not match the setup address.		Open
B	A4 Communication timeout for continuously writing DSP coefficient	Command Busy (XCBUSY) was in force for 200 µS during continuous coefficient writing, or before and after a continuous write command was issued to DSP.		Open
	B1 Timeout error for backup	In the backup sequence, codes could not be read for fixed time.		Stops
	B2 Retry error for backup	Cannot close tracking even if performs backup fixed number of times.		Stops
	B3 Retry error for trace	During tracing, do not restore after the runaway detection backup was performed several times.		Stops
C	C3 Detection of tracking overcurrent	During playback, the overcurrent detection port was at L for 300 ms or more continuously.		Stops (the mechanical controller operates independently).
	(C5) Short-circuit test corresponding error	After the overcurrent detection (C3 error), furthermore the overcurrent detection port was at L for 300 mS or more continuously.		Turns off the power instantly (No indication on the FL display and no writing to flash memory)
	F5 Tray being pushed	The tray switch that had been Open mode was forcibly changed to a mode other than Open by an external force.		Closes
	F6 Code reading NG		(PH code nothing) When Philips code is not readable during LD starting, and a code was not readable after the slider moved to FWD and REV directions slowly each for five seconds. (PRD) In the CD starting, when a subcode of TOC part was not readable, but the subcode of the program area was readable.	Search, scan and special playback prohibition, Playback as playback CD-R (PRD mode) as it is.
D	F8 Loading timeout	Loading or unloading could not be completed within a specified time (about 10 seconds). Though a portable cover is opening, when a close command was issued from the system controller.		Reverses the loading direction. If timeout is repeated upon retry, the unit stops.
	FC Focus	<ul style="list-style-type: none"> Focus ON sequence could not be completed more than two seconds. Auto sequence command was finished, actually focus ON was not completed. Focus did not enter even if retried it eight times. 		Stops wherever possible then opens (stops in the case of side B).

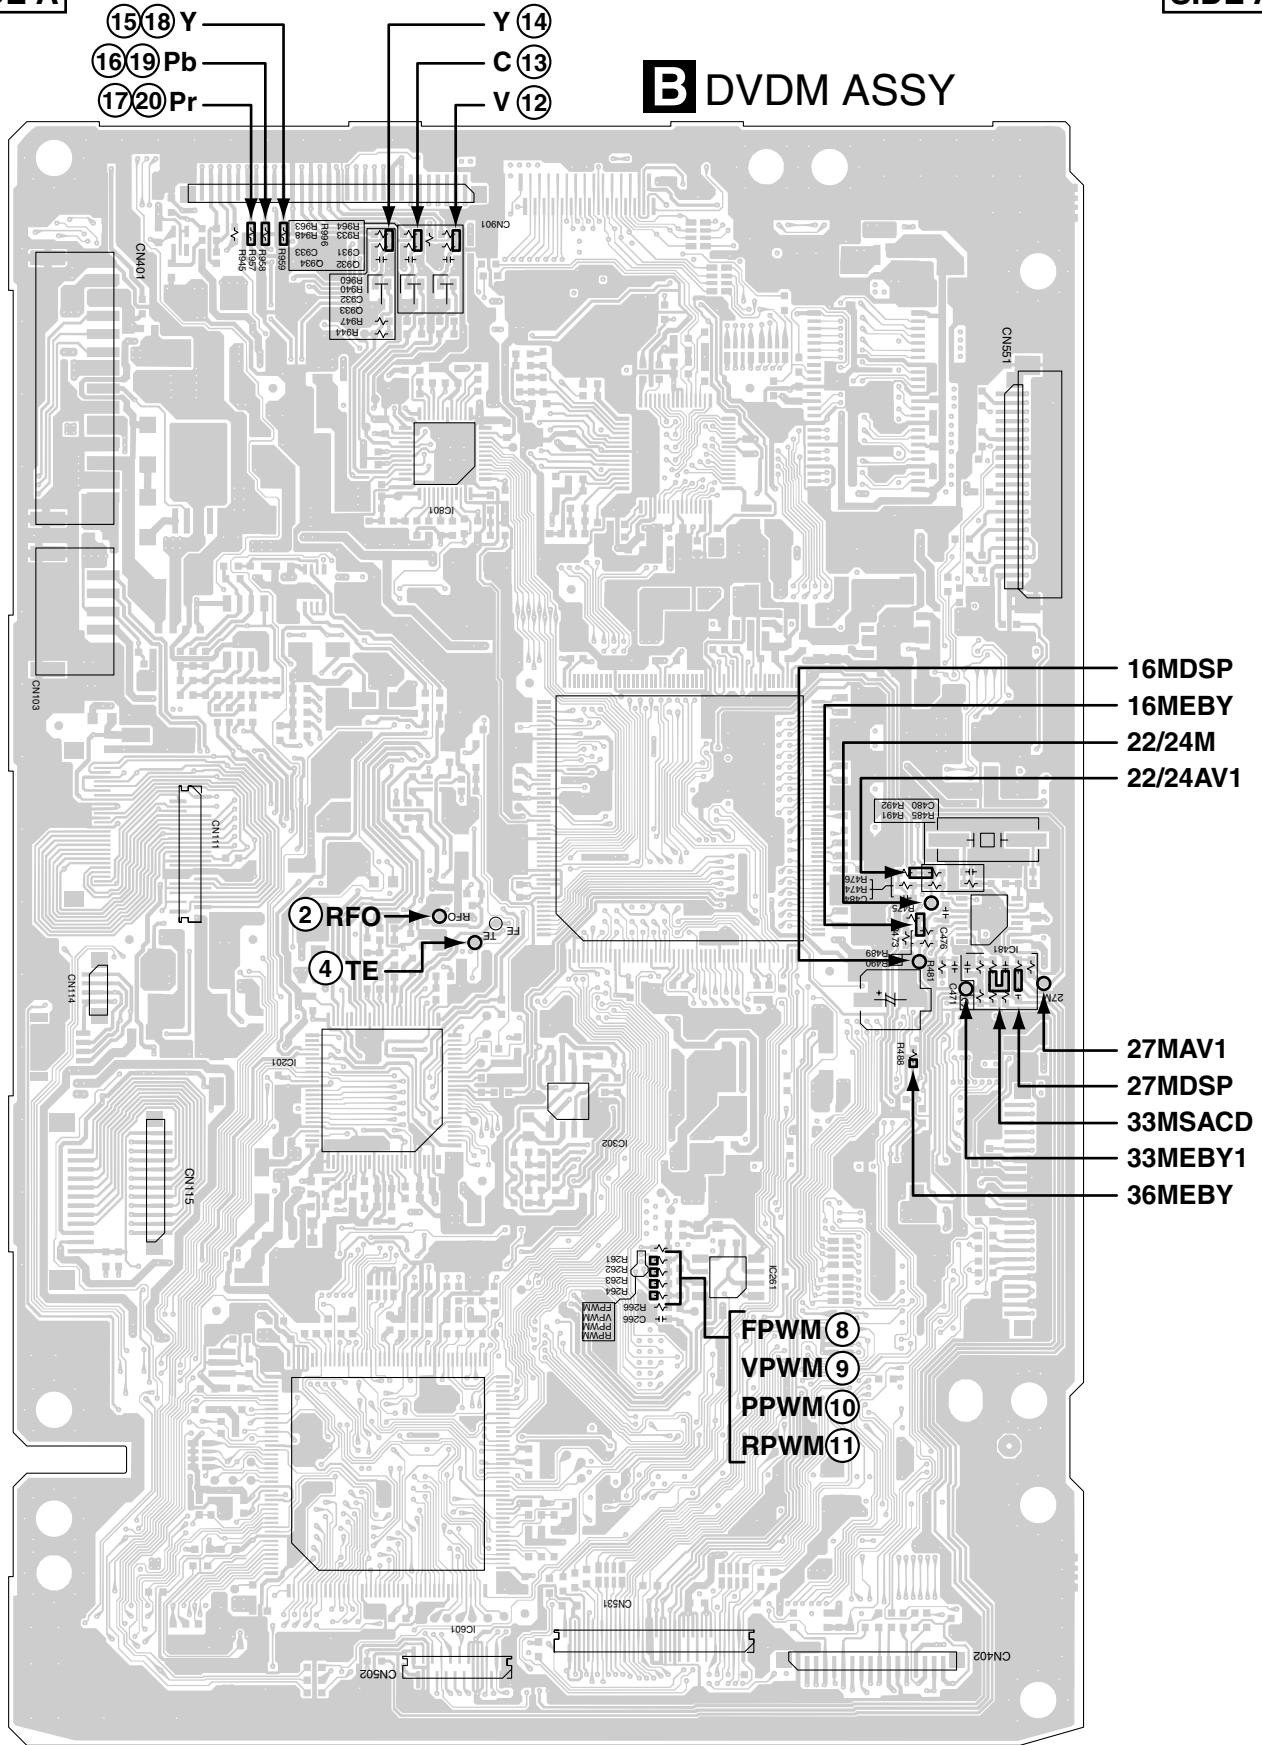

Error codes that are displayed on the FL display by using the remote control unit (Device error)
To display: ESC + DISPLAY + DISPLAY; Location of the display: At the two digits of left of the FL display

FL	Description of Error	Causes if with a DVD	Causes if with a CD	Operation of the Unit
bit4=1 10 etc.	Mechanism controller RAM check sum error			
bit3=1 08 etc.	AV1 access error (read, write NG)			No operation or it becomes debugging indication if the power is able to ON.
bit2=1 04 etc.	LSI11 access error			
bit0=1 01 etc.	SRAM access error			

7.1.7 TEST POINTS LOCATION & WAVEFORMS

SIDE A

SIDE A

■ WAVEFORMS

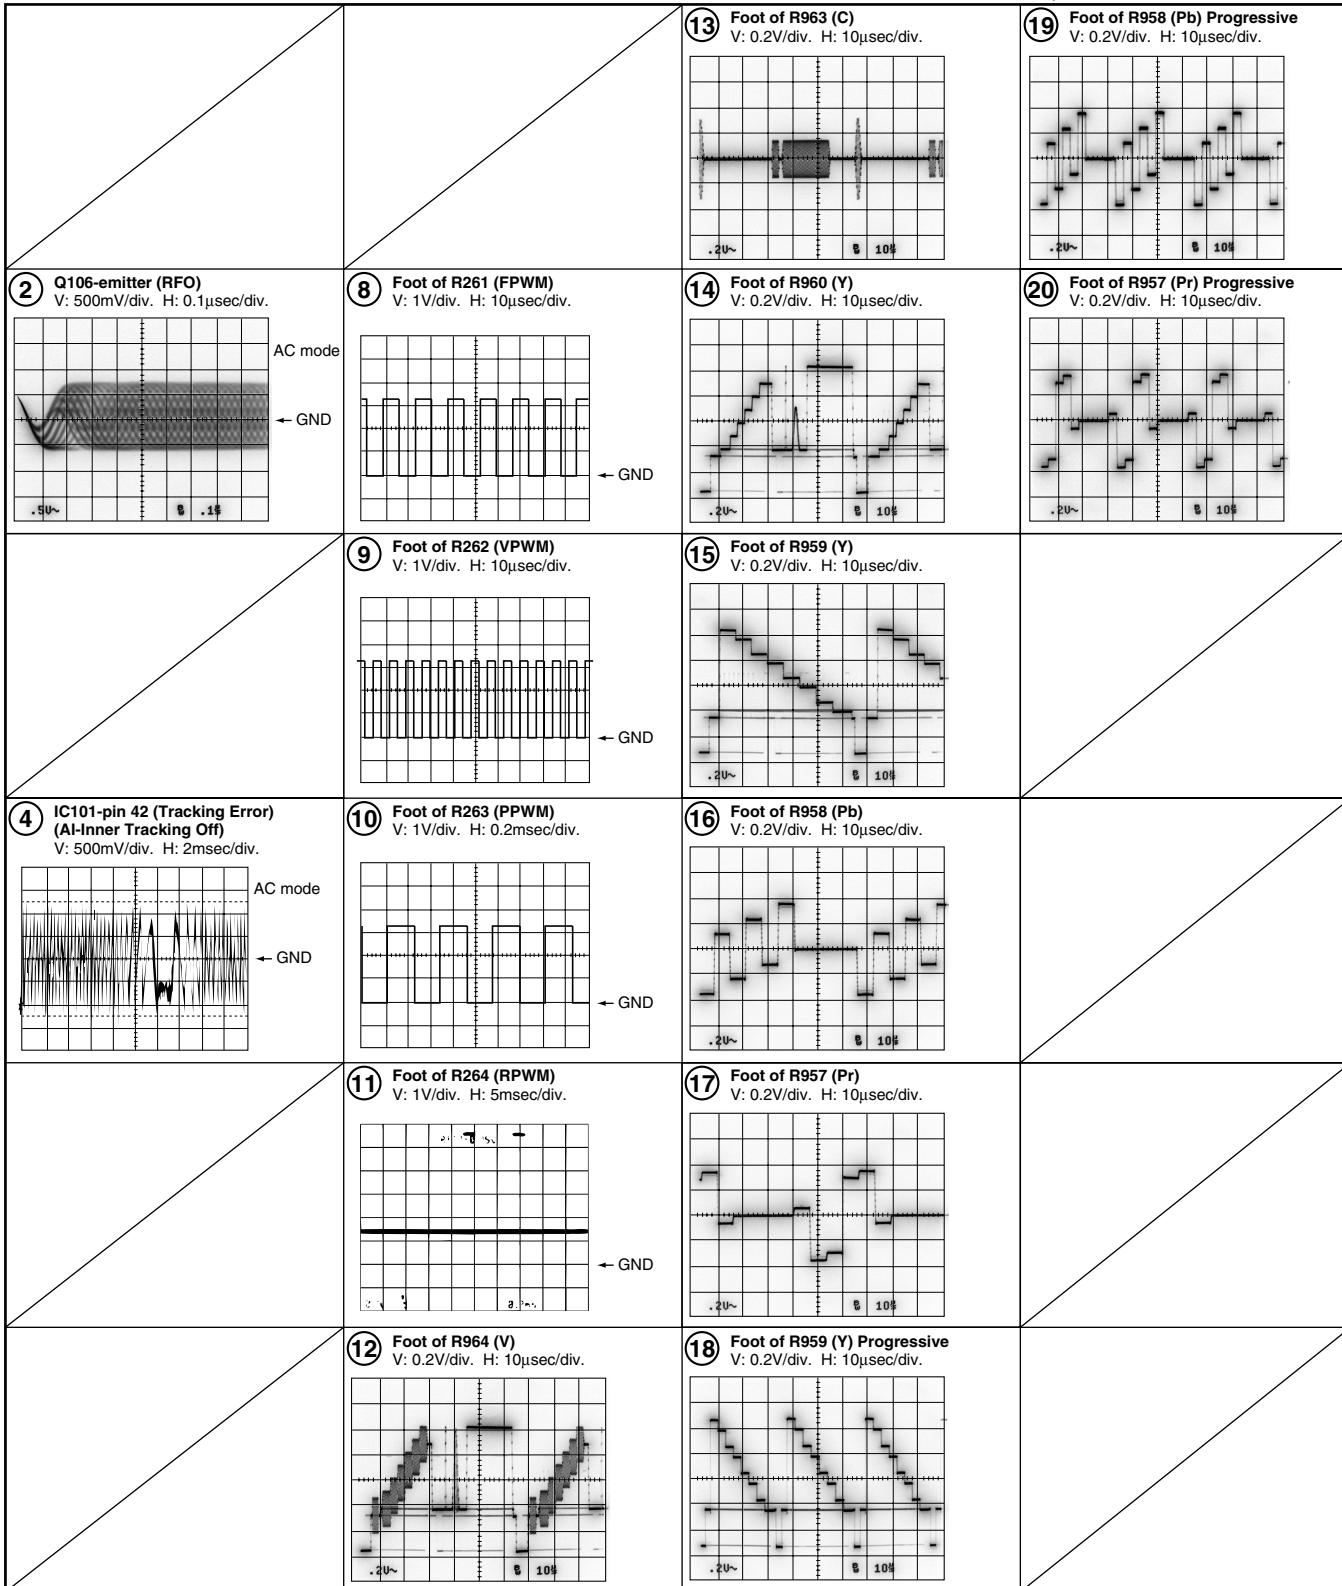

Note : The encircled numbers denote measuring point in the schematic diagram.

A

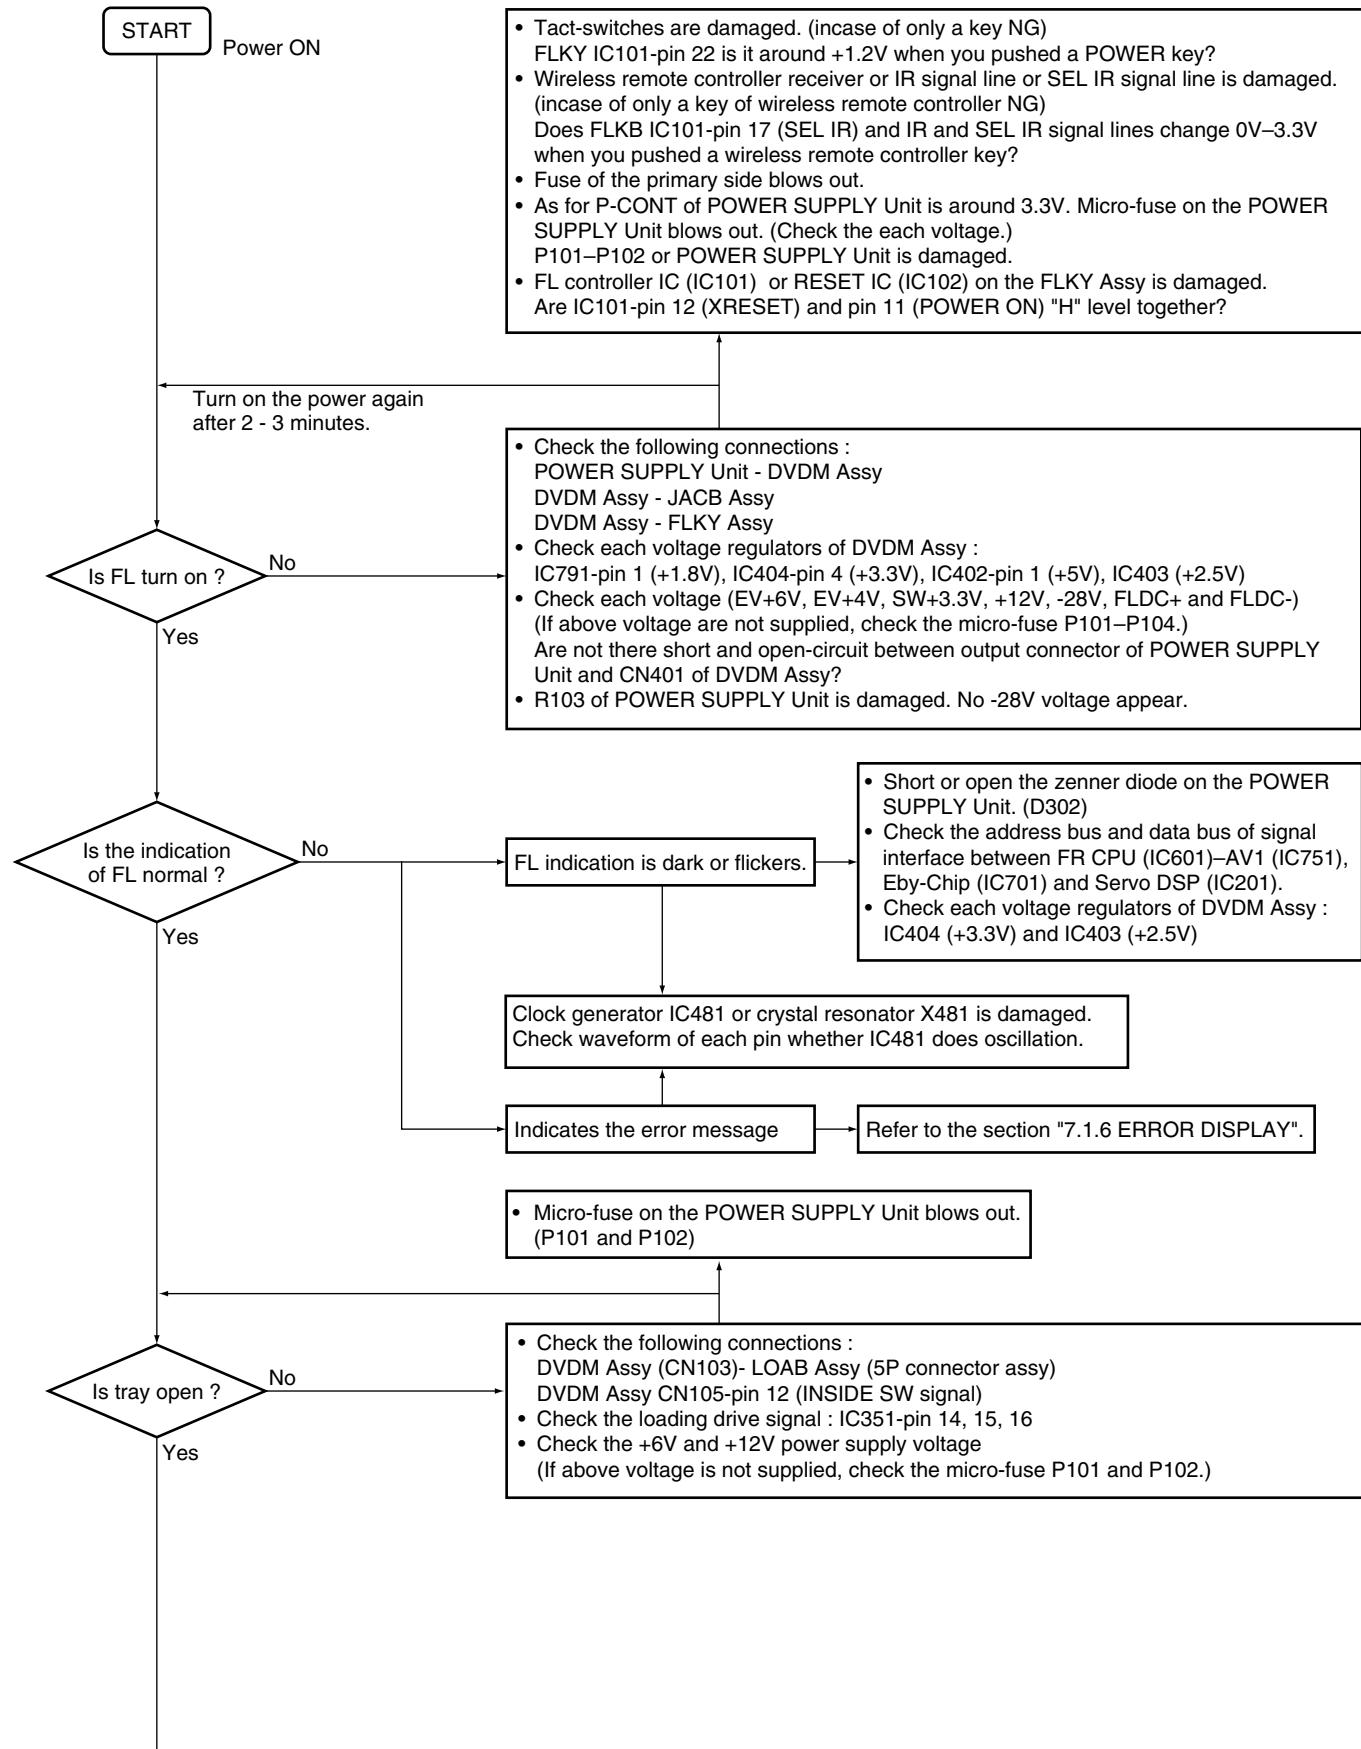

B DVDM ASSY

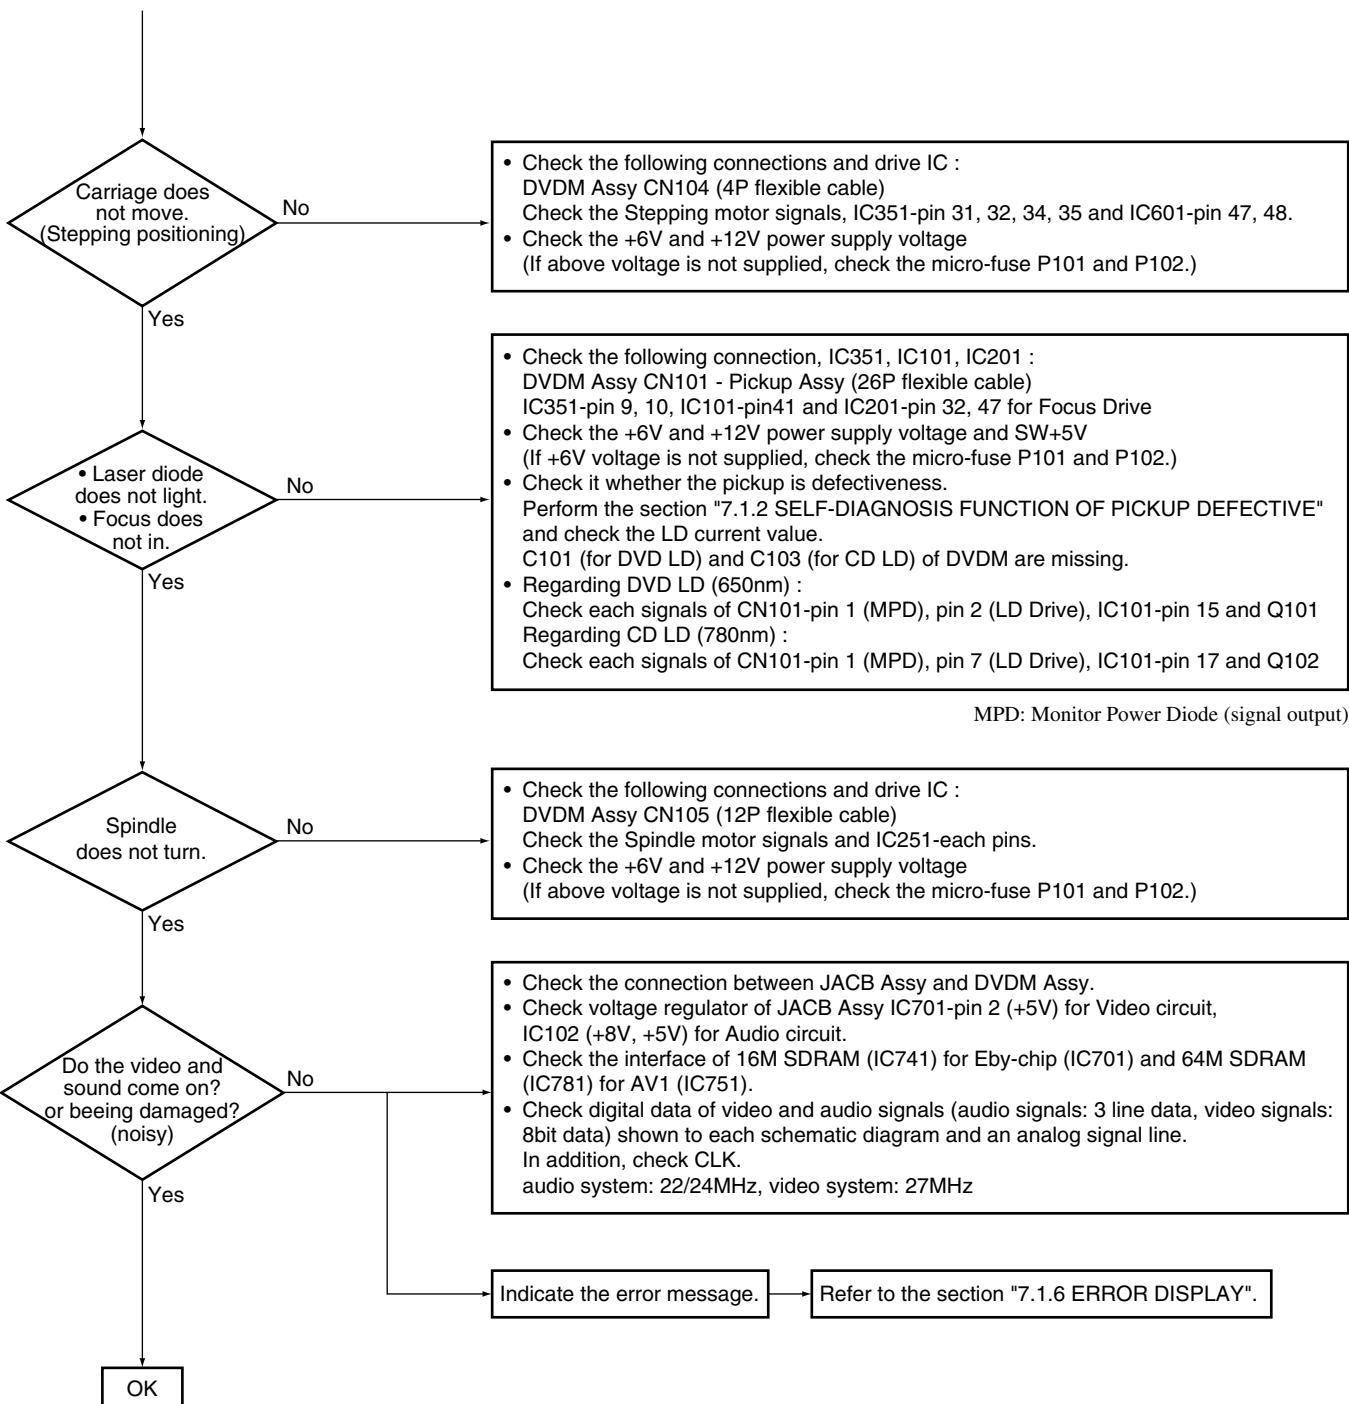

Measurement condition : No. 2, 4 and 8 to 11 : MJK1, Title 1-chp 1

No. 12 to 14 : DVD-REF-A1, T2-Chap.1
No. 15 to 20 : DVD-REF-A1, T2-Chap.19

7.1.8 TROUBLE SHOOTING

7.1.9 DISASSEMBLY

■ DIAGNOSIS OF PCBs

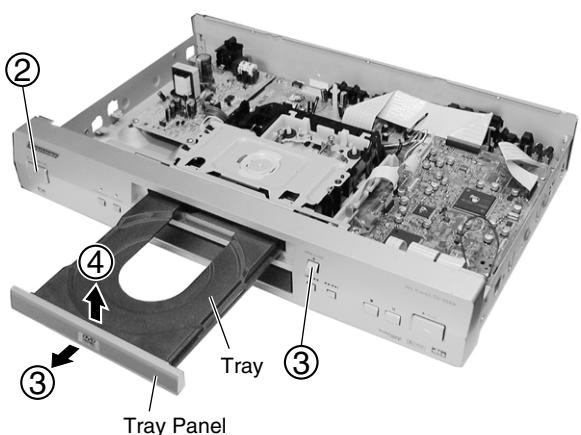

Note :

When diagnosing the unit, be sure to use two extension cables for service (Part No. : GGF1157, GGD1298) and a extension board for service (Part No. : GGF1430).

Caution: SCRB Assy is not got in a model of the following photographs.

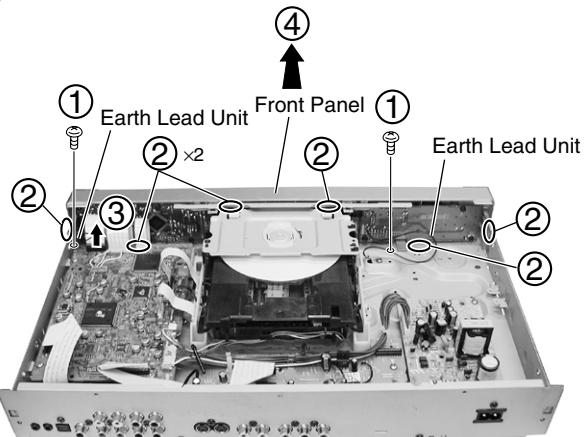

1 Bonnet and Tray Panel

- ① Remove the Bonnet (Screws × 6).
- ② Turn power ON.
- ③ Open the Tray (▲).
- ④ Remove the Tray Panel.

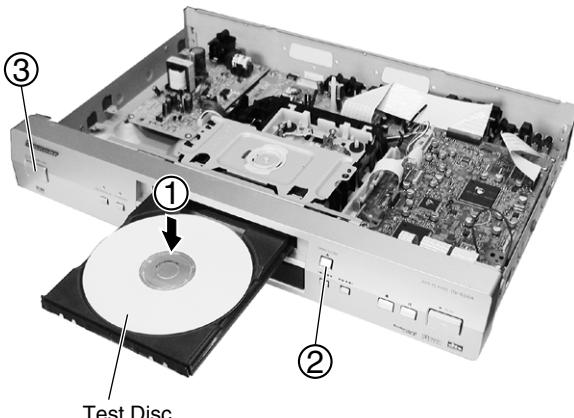

3 Front Panel

- ① Remove two Earth Lead Unit (Screws × 2).
- ② Unhook (× 6).
- ③ Release a Flexible Cable.
- ④ Remove the Front Panel.

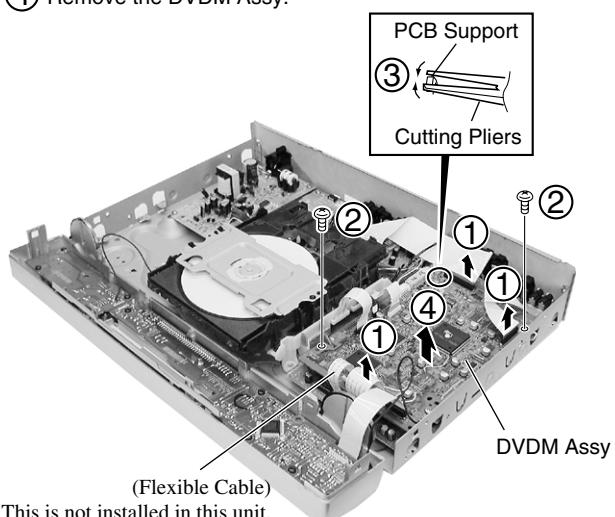

2 Test Disc Set

- ① Set the Test Disc.
- ② Close the Tray (▲). → Clamp the Test Disc.
- ③ Turn power OFF.
- ④ Pull out the Power Cord from the outlet.

4 DVDM Assy

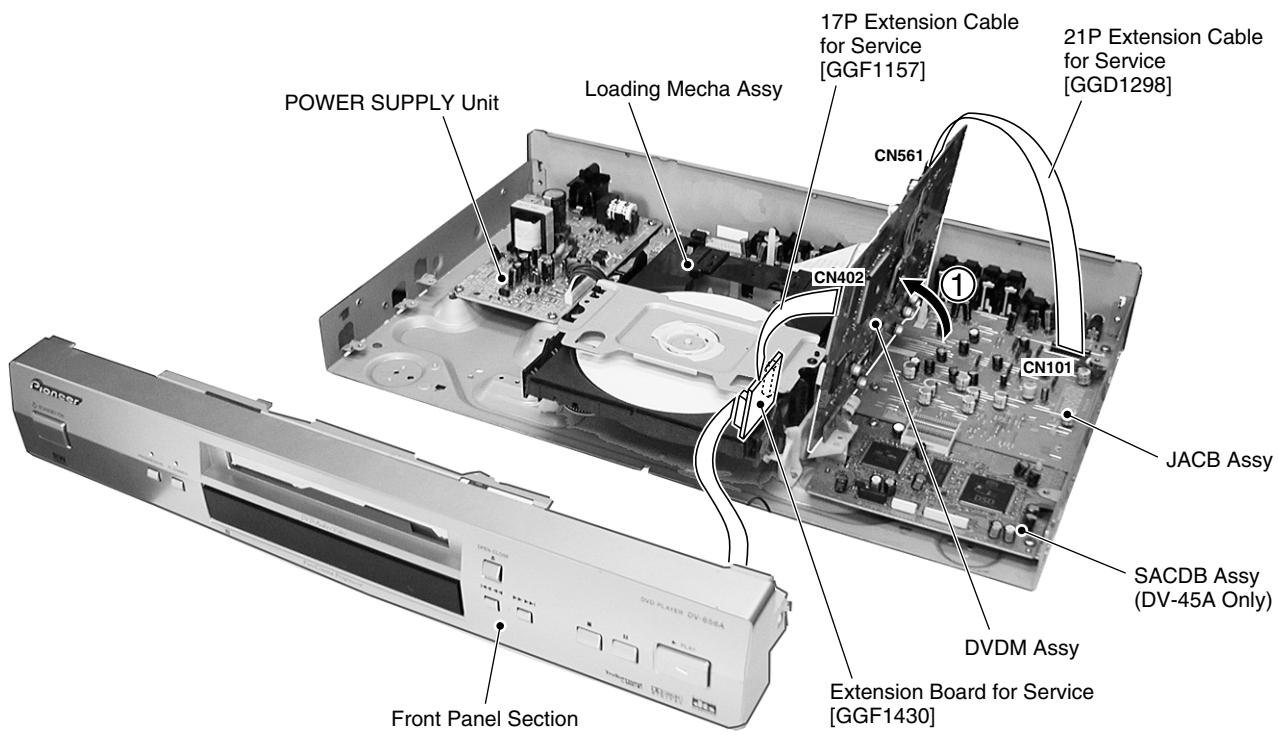

- ① Release three Flexible Cables.
- ② Remove two screws.
- ③ Release the PCB Support.
- ④ Remove the DVDM Assy.

5 Diagnosis

A ① Stand the DVDM Assy as figure below.

② Connect two Extension Cables and a Extension Board as figure below.

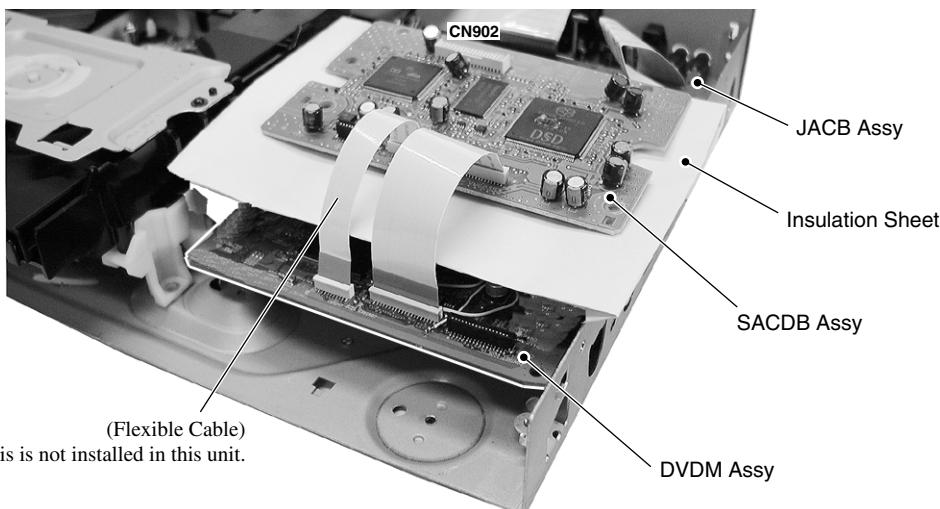

D Diagnosis

 How to diagnose the SACD block of the SACDB Assy

- ① Remove a Board to Board connector CN102 ↔ CN902
(JACB) (SACDB)
 - ② Set the SACDB Assy as figure below.

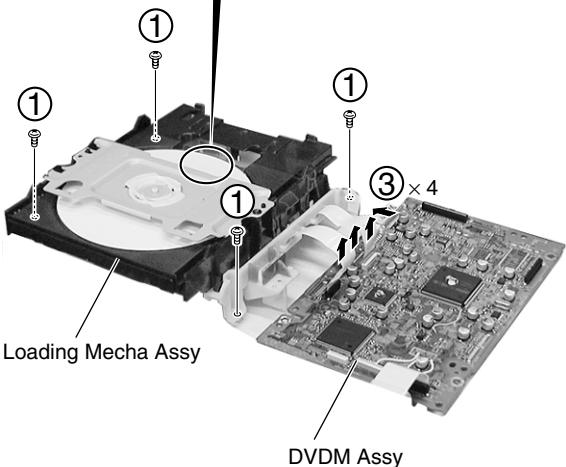

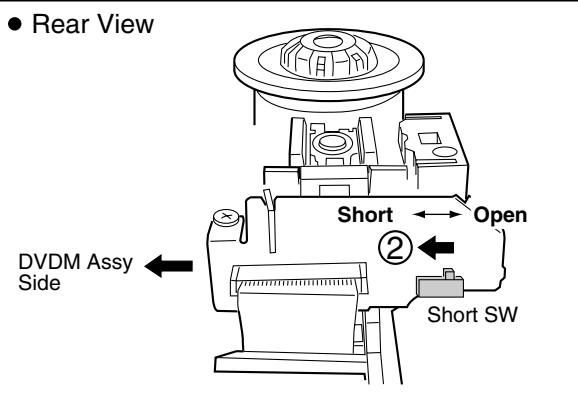

- ③ In this case an audio of SACD is not output from the Audio jack. However, observe the signal waveform of CN902 on the SACDB Assy, and can confirm it. CN902 - pin 2 (SACDSL), pin 4 (DSDBCK), pin 6 (DSD R), pin 8 (DSD L), pin 10 (DSD Rs), pin 12 (DSD Ls), pin 14 (DSD LFE), pin 16 (DSD C).

D SACDB ASSY

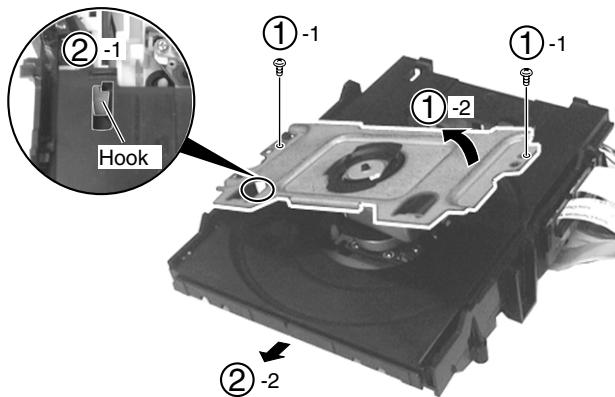

6 Loading Mecha Assy

- A
 ① Remove four Screws.
 ② Turn the Short SW to short side.
 ③ Remove three Flexible Cables and a Connector.

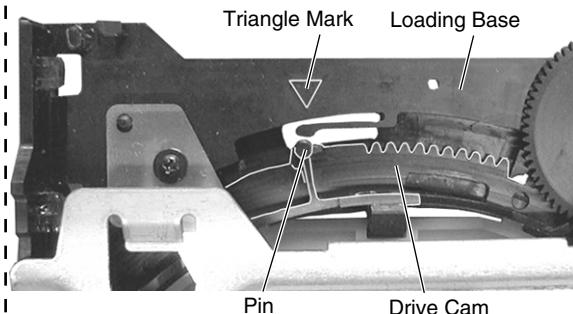

7 Tray

- ① Remove the Bridge (Screw ×2).
 ② Pull out the Tray and remove it while unhooking a hook.

Caution in the Tray Insertion

In the Tray insertion, insert it after matching a triangle mark of the Loading Base and a position of pin of the Drive Cam.

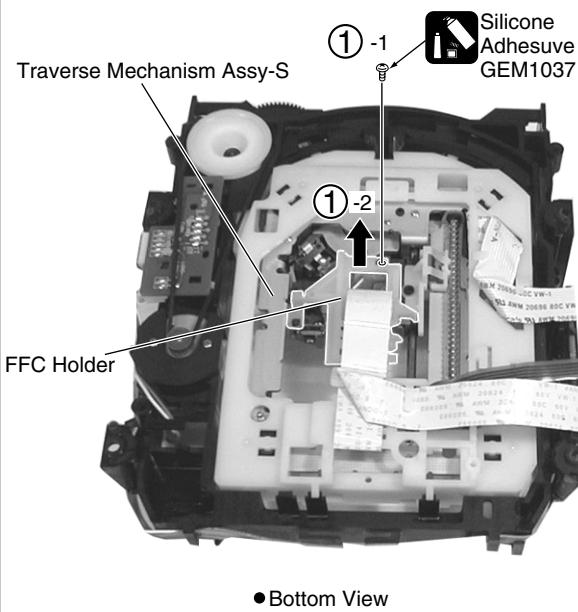

8 Traverse Mechanism Assy-S

- ① Remove the FFC Holder with the state which Flexible Cable was attached. (Screw × 1)

Cautions :

Screw is locked with Silicone Adhesive.
Please lock it with Silicone Adhesive when installs it.

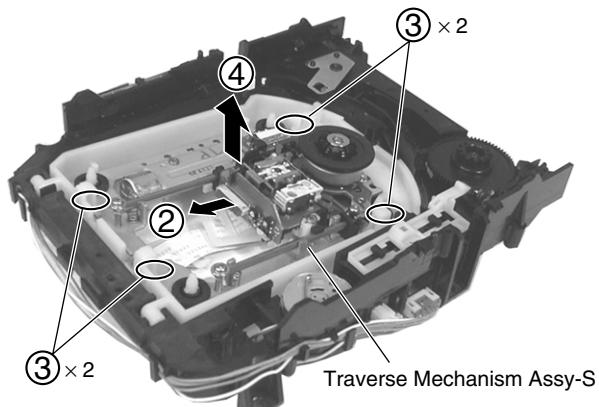

• Bottom View

- ② Remove the Pickup Flexible Cable

- ③ Unhook (× 4)

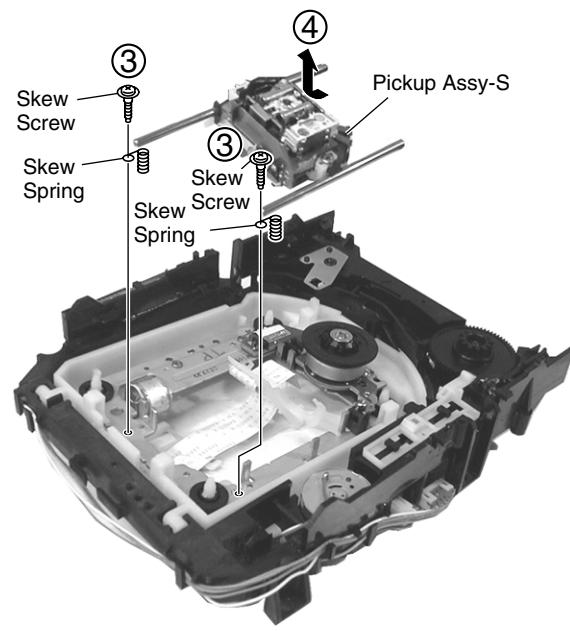

- ④ Remove the Traverse Mechanism Assy-S

● When Removing The Pickup Assy-S

- ③ Remove two Skew Screws and two Skew Springs

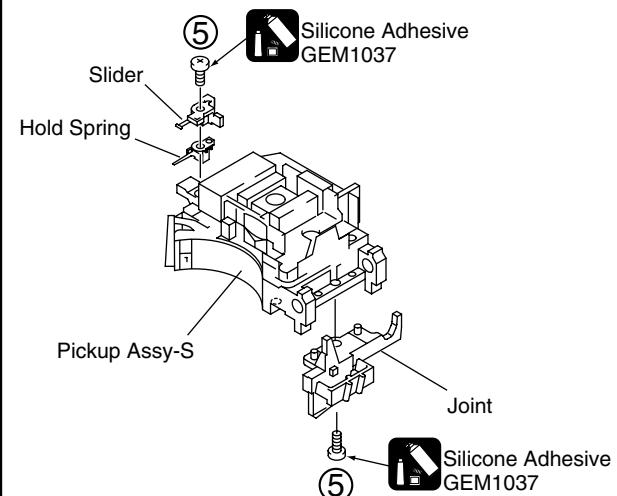

- ④ Remove the Pickup Assy-s

- ⑤ Remove two Screws

Cautions :

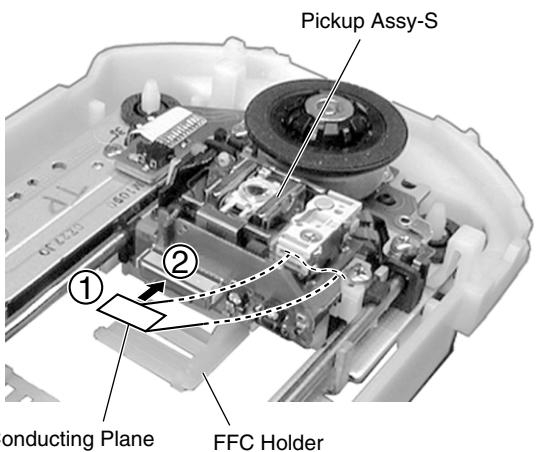

Screw is locked with Silicone Adhesive.
Please lock it with Silicone Adhesive when installs it.

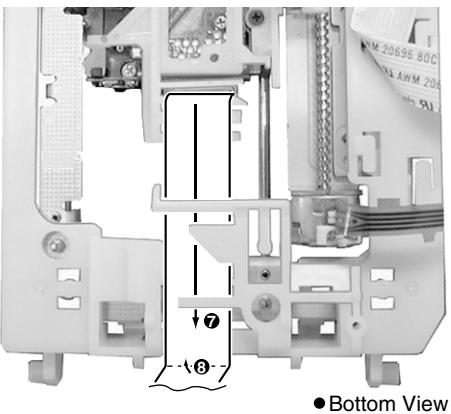

STYLING THE PICKUP FLEXIBLE CABLE

A

- ① FOLD a edge of lining part of the Pickup Flexible Cable.
- ② Insert the Pickup Flexible Cable in connector, and lock it surely.

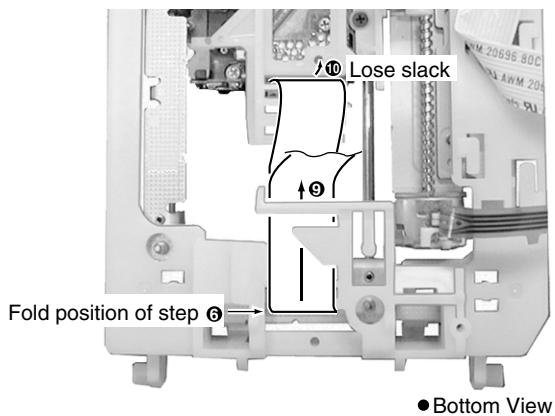

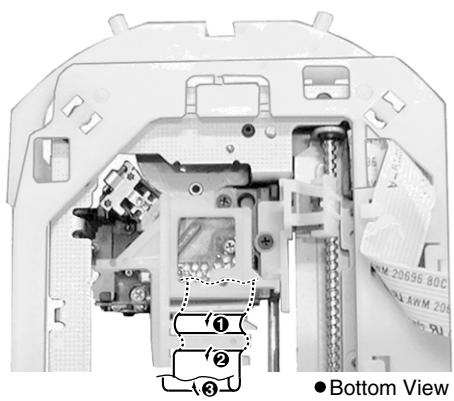

B

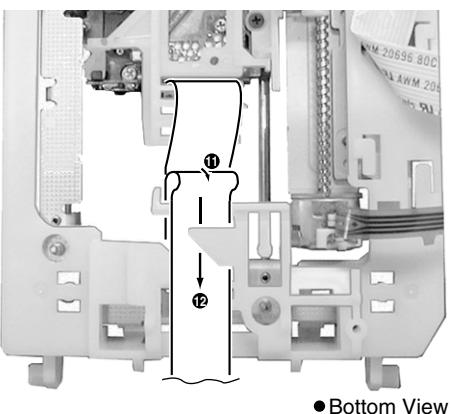

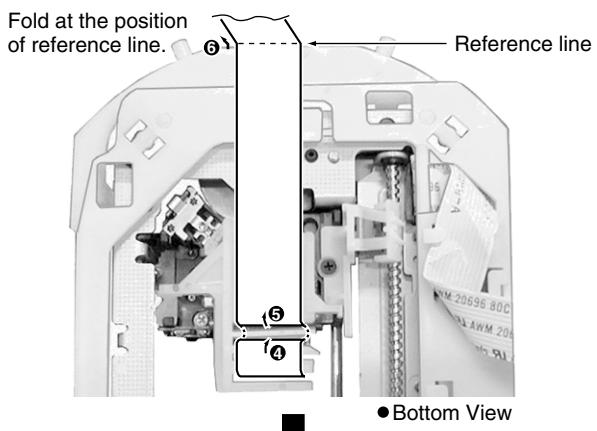

C

- ③ Perform the styling as shown in figure below.

D

F

7.2 IC

- The information shown in the list is basic information and may not correspond exactly to that shown in the schematic diagrams.

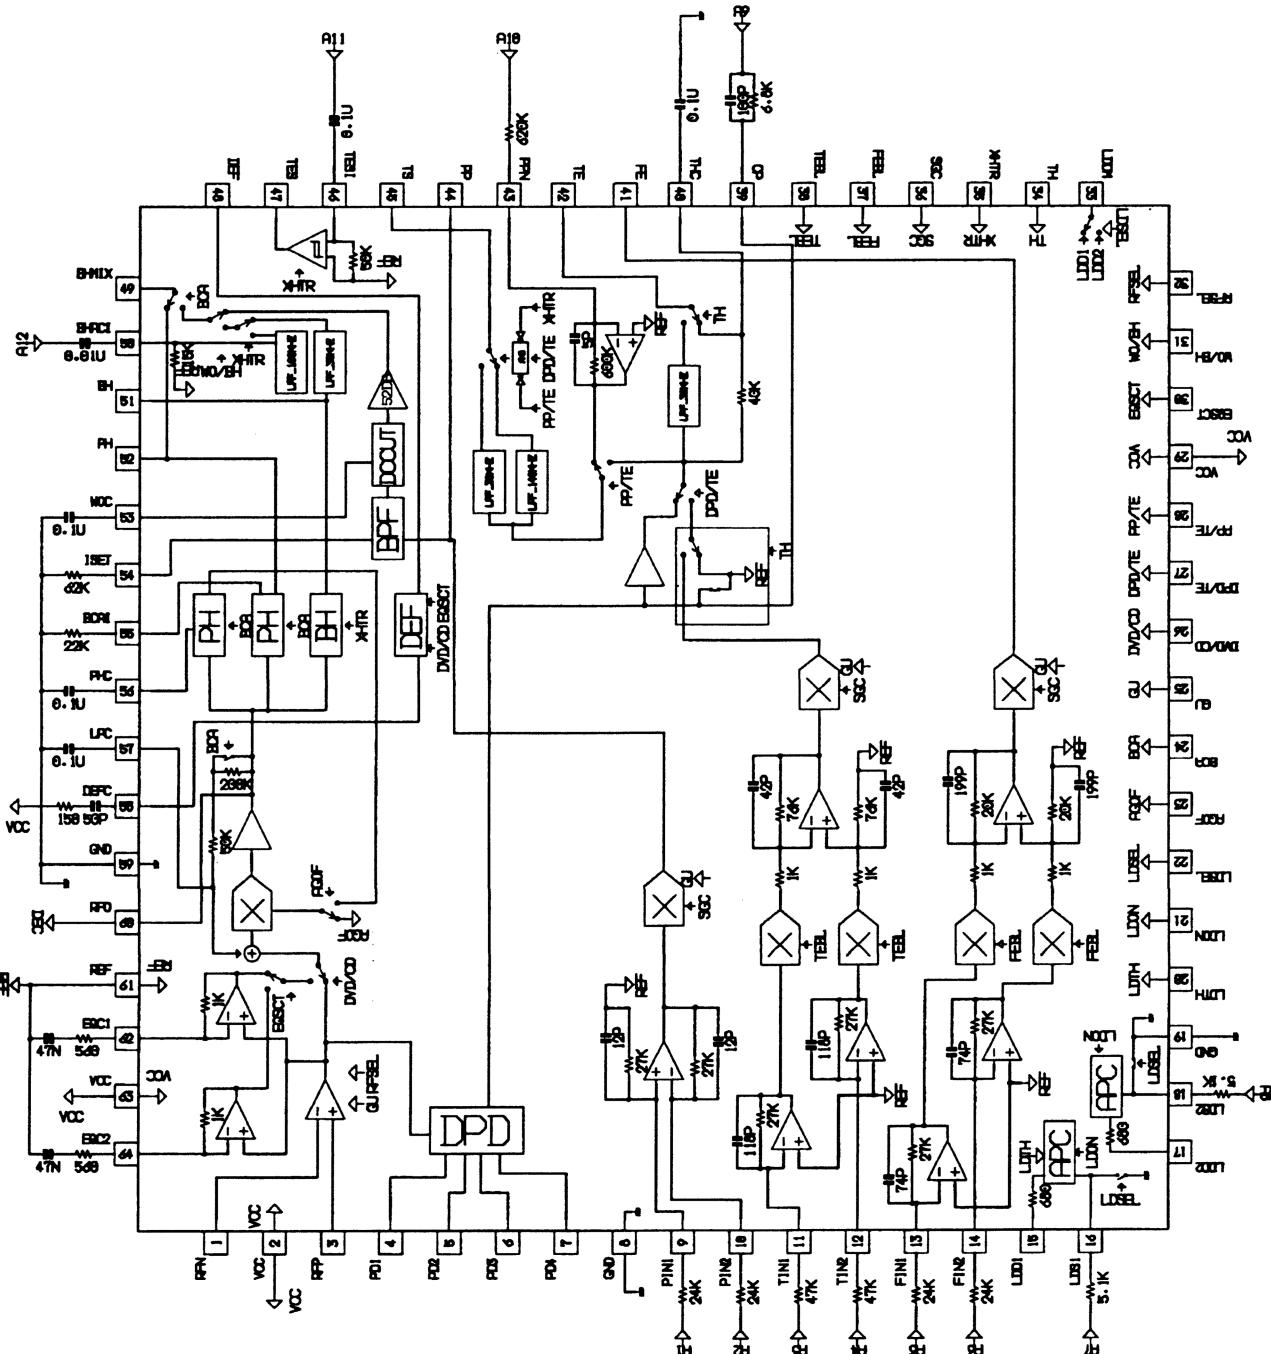

- List of IC

LA9704W, LC78652W, BA6664FM, SM8707HV, PD6345A, M65776AFP, AD7172KST, PCM1738EG-3, DSD1702EG, LA73054, CXD2753R, PE5314B, PE5286A

- RF IC

● Block Diagram

● Pin Function

No.	Pin name	Pin Functions
A 1	RFN	RF- input
2	VCC	Power supply terminal (for DPD)
3	RFP	RF+ input
4	PD1	
5	PD2	
6	PD3	Pickup signal input
7	PD4	
8	GND	Ground (for DPD)
B 9	PIN1	
10	PIN2	
11	TIN1	Pickup signal input
12	TIN2	
13	FIN1	
14	FIN2	
15	LDD1	APC1 output
16	LDS1	APC1 monitor input
17	LDD2	APC2 output
C 18	LDS2	APC2 monitor input
19	GND	Ground (Servo system)
20	LDTH	APC1 threshold change (H: VCC-1.5V, L: 180mV)
21	LDON	Laser ON terminal (H: ON)
22	LDSEL	APC change terminal (H: APC1)
23	AGOF	RFAGC off terminal
24	BCA	PH electric discharge coefficient change (H: BCA mode)
25	GU	RF, Servo signal gain up terminal (H: Gain up)
26	DVD/CD	RF- equalizer band change terminal (H: DVD)
D 27	DPD/TE	TE output change terminal (H: DPD)
28	PP/TE	TS output change terminal (H: PP)
29	VCC	Power supply terminal (Servo system)
30	EQSCT	EQ change for CD (H: 62 pin choice)
31	WO/BH	BHMIX output change terminal (H: WOBLE)
32	RFSEL	RF amplifier gain change (H: 6dB up)
33	LDDM	LDD monitor terminal
34	TH	Tracking hold (H: hold)
35	XHTR	Tracking, Bottom band change (L: High bandwidth)
E 36	SGC	Servo gain control terminal (FE, PP, TE)
37	FEBL	FE balance adjustment terminal
38	TEBL	TE balance adjustment terminal
39	CP	Resistance for charge pump gain setting, a condenser connection terminal
40	THC	Volume connection terminal for tracking hold
41	FE	Focus error output
42	TE	Tracking error output
43	PPN	Ohms connection terminal for push-pull gain setting
44	PP	Push-pull output terminal

No.	Pin name	Pin Functions
45	TS	Tracking cross signal output
46	TESI	TES comparator input terminal
47	TES	TES output
48	DEF	Defect search
49	BHMIX	PH, BH, wobble change output
50	BHACI	BH- AC input
51	BH	RF bottom detection output
52	PH	RF peak detection output
53	WOC	Volume connection terminal for DC cut
54	ISET	Ohms connection terminal for BPF center frequency setting
55	BCAI	Ohms connection terminal for peak hold detection fixed number setting (In BCA)
56	PHC	PH detection condenser connection terminal for RF-AGC
57	LPC	Condenser connection terminal for RF DC servo
58	DEFC	Volume connection terminal for defect search
59	GND	Ground (RF system)
60	RFO	RF output terminal
61	REF	Reference output terminal
62	EQC1	Equalizer setting terminal for CD
63	VCC	Power supply terminal (RF system)
64	EQC2	Equalizer setting terminal for CD

- Servo DSP IC

● Block Diagram

● Pin Function

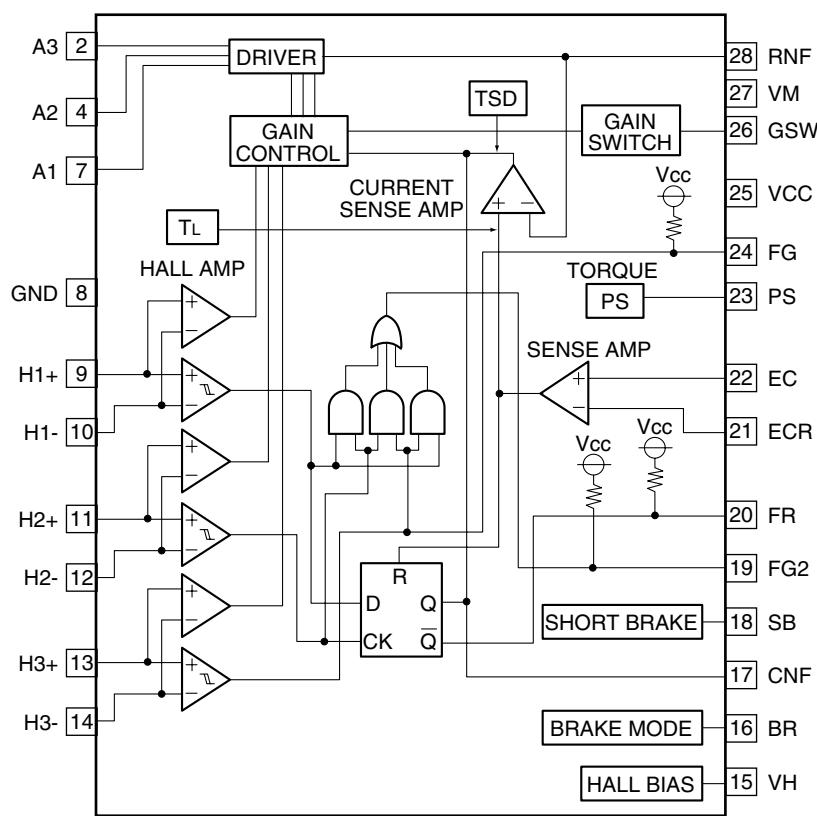

No.	Pin Name	I/O	Pin Function
1	EFMOUT	O	Output the state that was binary-stated value EFM
2	C2F	O	C2 flag output
3	ROMXA	O	CD-ROM data output
4	ROMCK	O	Shift clock output for CD-ROM data output
5	LRSY	O	L/R clock output for CD-ROM data output
6	PP3	I/O	General-purpose port input/output / DVD sync. signal input N ch-OD output
7	FBUSYB	O	Busy signal output of DSP process operation N ch-OD output
8	XTALOUT	O	External system clock output
9	FSX	O	CD 1 frame sync. signal output
10	SBCK	I	Subcode reading out clock input
11	SFSY	O	Frame sync. signal output of subcode
12	PW	O	Subcode P, Q, R, S, T, U, V and W output
13	VSS	-	GND pin
14	XIN	I	Connect a crystal resonator (16.9344MHz)
15	XOUT	O	Connect a crystal resonator
16	DVDD1	-	3.3V power supply of the oscillation circuit
17	EMPH	O	Monitor pin of the deemphasis
18	SBSY	O	Sync. signal output of the subcode block
19	DOUT	O	Audio EIAJ data output
20	EFLG	O	Error correction state monitor of the error correction C1 and C2
21	FSEQ	O	Detection monitor of the CD/DVD frame sync. signal
22	FAST	O	Playback speed monitor N ch-OD output
23	V_PB	O	Monitor output of the rough servo/CLV control
24	DRF	O	In focus monitor
25	TEST3	I	Test input 3
26	TES	I	Tracking error signal input
27	TEST2	I	Test input 2
28	JITT	I	Jitter quantity detecting signal input of EFM PLL
29	TILTE	I	Tilt error signal input
30	RF_PH	I	RF peak hold signal input
31	RF_BH	I	RF bottom hold signal input
32	TE	I	Tracking error signal input
33	FE	I	Focus error signal input
34	SLCIST1	-	Current setting pin 1 of the constant current charge pump for SLC
35	SLCIST2	-	Current setting pin 2 of the constant current charge pump for SLC
36	SLCO1	O	Control output 1 for SLC
37	SLCO2	O	Control output 2 for SLC
38	TEST1	I	Test input 1
39	EFMIN	I	EFM/EFM + input
40	AVDD	-	5V power supply of A/D and D/A for servo
41	AVSS	-	GND of A/D and D/A for servo
42	AUXO	O	DA auxiliary output
43	TILTDO	O	Tilt control signal output
44	TBAL	O	Tracking balance control signal output
45	SLDO	O	Sled control signal output
46	SPDO	O	Spindle control signal output
47	FDO	O	Focus control signal output
48	TDO	O	Tracking control signal output
49	VREF	-	Reference level of D/A for servo
50	TEST4	I	Test input 4

No.	Pin Name	I/O	Pin Function
51	HFLIO	I/O	Mirror detection signal input/output
52	LASER	O	Output pin for laser ON/OFF control
53	PP0/DVD_CDB	I/O	General-purpose port input/output / Disc discrimination signal output
54	PP1/CRCERRB	I/O	General-purpose port input/output / Subcode CRC result signal output
55	FG	I	FG counter input
56	PP2/EVENT	I/O	General-purpose port input/output / Event counter input
57	RESB	I	Reset input
58	CSB	I	Chip select input
59	RDB	I	Internal state reading signal input
60	WRB	I	Command / data writing signal input
61	DVDD2	-	5V power supply
62	VSS	-	GND
63	P0	I/O	Command / data input/output
64	P1		
65	P2		
66	P3		
67	P4		
68	P5		
69	P6		
70	P7		
71	VSS	-	GND
72	DVDD1	-	3.3V power supply for internal
73	BUSYB	O	Busy signal output of command process
74	SQOUT	O	Serial output of subcode Q
75	CQCKB	I	Shift clock input for subcode Q data output
76	RWC	I	Update permission input of subcode Q
77	WRQ	O	Read out ready monitor of subcode Q
78	AVSS	-	PLL GND for internal system clock
79	VRPFR	-	VCO oscillation range setting of PLL for system clock
80	VCOC	I	Connect a PLL filter for system clock
81	VPDO	O	
82	AVDD	-	PLL 5V power supply for system clock
83	PDO1	I/O	PLL filter connection pin 1 for EFM playback
84	PDO2	I/O	PLL filter connection pin 2 for EFM playback
85	PDO3	I/O	PLL filter connection pin 3 for EFM playback
86	AVSS	-	PLL GND for EFM playback
87	PCKIST1	-	Current setting 1 of PLL constant current charge pump for EFM playback
88	PCKIST2	-	Current setting 2 of PLL constant current charge pump for EFM playback
89	AVDD	-	PLL 5V power supply for EFM playback
90	DVDFR	-	VCO oscillation range setting of PLL for EFM playback 1
91	CDFR	-	VCO oscillation range setting of PLL for EFM playback 2
92	JV	O	Jitter output of PLL clock for EFM playback
93	PCK	O	Bit clock output for EFM playback
94	ADRAO	I	Address input
95	DVDSYEQ	I	DVD synchronize pulse input
96	DVDSYNC	I	DVD synchronous signal input
97	LEFM2	O	Output the state that cut and out a signal which was binary-stated value EFM with PCK 2
98	DVDD1	-	3.3V power supply for I/O
99	VSS	-	GND
100	LEFM	O	Output the state that cut and out a signal which was binary-stated value EFM with PCK 1

● Pin Function

	No.	Pin name	Dir.	Pin Functions
A	201-208	BD [7:0]	IN	Bit stream data entry pin
	2	BCLK	IN	Strobe signal of BD pin (clock)
	3	BDEN	IN	This order effective / invalidity of data done a sample of by BD pin. It is done a sample with a start edge of BCLK.
	4	BDREQ	OUT	Data demand signal
	5	BSECH	IN	This order it whether data of BD pin are with top byte of a sector.
	84-87 90-95 97-102	MD [15:0]	I/O	Data transfer line with SDRAM
B	53-55 58-63 65, 67, 69	MA [11:0]	OUT	Address line of SDRAM
	66, 68	MBA [1:0]	OUT	SDRAM bank choice line
	70	DCS	OUT	Chip select of SDRAM
	73	DCS2		
	74	DCS3		
	75	DCS4		
	76	DCS5		
C	77	RAS	OUT	RAS (Row Address Strobe) control line of SDRAM
	78	CAS	OUT	CAS (Column Address Strobe) control line of SDRAM
	82	DQMU	OUT	DQM control line of SDRAM
	83	DQML	OUT	DQM control line of SDRAM
	80	DWE	OUT	WE control line of SDRAM
	79	MCLK	OUT	Movement clock of SDRAM
	183	PXCLK	OUT	27MHz pixel clock
	182	PXCLKP	OUT	54MHz pixel clock
D	157, 158, 184-186 188-192	PD [7:0]	OUT	Digital pixel data. Y/Cb/Cr is done multiple of by 8 bit bus, and it is output.
	178	CSYNC	IN	Composite SYNC signal input terminal
	179	OSDKEY	OUT	OSD key flag output
	177	PWD	OUT	The phase comparator output for external synchronization movement
	181	HSYNC	OUT	Horizontal synchronizing signal output pin
	180	VSYNC	OUT	Vertical synchronizing signal output pin
	164	AO0	OUT	Serial PCM data for DAC It output Lf/Rf data.
	166	AO1	OUT	Serial PCM data for DAC It output C/Sw data.
	167	AO2	OUT	Serial PCM data for DAC It output Ls/Rs data.
E	168	AOD	OUT	Serial PCM data for DAC It is for the down mixture output.
	169	AAD	OUT	Ancillary data output
	176	DOCLK	OUT	PCM bit clock
	159	LRCLK	OUT	Clock for channel distinction of pulse code modulation audio system data (L/R)
	173	DACCLK	OUT	Exaggerated sample movement clock of DAC
	161	CDBCK	IN	The pulse code modulation bit clock which is input by CDDSP
	160	CDLRCK	IN	The L/R clock which is input by CDDSP

No.	Pin name	Dir.	Pin Functions
163	CDDIN	IN	PCM audio system data which are input by CDDSP
162	CDDATA	IN	Digital audio interface input
170	DOUT0	OUT	Digital audio interface output
171	DOUT1	OUT	Digital audio interface output
6-11 14-19 21-24	HD [15:0]	I/O	Data I/O pin
25, 26 29-34 36-39	HA [11:0]	IN	Address input pin
45	BHE	IN	Byte High Enable signal input pin
41	RE	IN	Read Enable signal input pin
44	WE	IN	Write Enable signal input pin
40	CS	IN	Chip Select signal input pin
46	RDY	OUT	The acknowledge signal which shows that readout of data or a note was completed
47	INT1	OUT	It is an interrupt request signal for outside CPU from M65776AFF
48	INT2		
49	INT3		
51	DREQ	OUT	DMA request signal for OSD BitMap transfer
52	DACK	IN	DMA acknowledge signal for OSD BitMap transfer
194, 195	HMODE [1:0]	IN	Host interface mode of operation setting pin
117	IREF	IN	Reference electric current input pin
115	AVRI	IN	Reference voltage input pin
120	BIAS1	IN	Bias voltage impression pin of current source
118	BIAS2		
119	PAY	OUT	Analog electric current output pin (for Y)
116	PAB	OUT	Analog electric current output pin (for Pb)
122	PAR	OUT	Analog electric current output pin (for Pr)
114	DAOUTB	OUT	Be connected to an analog ground.
113, 121, 123	AVDD33	–	3.3V analog power supply
124	AGND33	–	Analog ground
106	CLKIN	IN	System clock input terminal It input 27MHz clock.
105	CLKO	OUT	27MHz clock output
172	ACLKI	IN	Audio system clock input terminal
193	RESET	IN	Hardware reset terminal
196, 197, 200	TEST [2:0]	IN	Fix it in "L" potential.
12, 27, 42, 56, 71, 88, 103, 134, 155, 174, 198	VDD18	–	1.8V power supply terminal
13, 28, 43, 57, 72, 89, 104, 135, 156, 175, 199	VDD33	–	3.3V power supply terminal

No.	Pin name	Dir.	Pin Functions
1, 20, 35, 50, 64, 81, 96, 112, 125, 145, 165, 187	GND	–	Ground terminal
107	AVDD18	–	1.8V power supply terminal for inside PLL
108	AGND18	–	Ground terminal for inside PLL
109-111 126-133 136-144 146-154	NC0	NC

- Digital PAL/NTSC Video Encoder with Six DACs (10-bits), Color Control and Enhanced Power Management

● Pin Arrangement

● Block Diagram

● Pin Function

No.	Name	I/O	Pin Function
1	VAA	P	Power Supply (+3V to +5V)
2	P0	I	8-bit 4 : 2 : 2 Multiplexed YCrCb Pixel Port (P7-P0) P0 represents the LSB
3	P1		
4	P2		
5	P3		

No.	Name	I/O	Pin Function
6	P4	I	8-bit 4 : 2 : 2 Multiplexed YCrCb Pixel Port (P7-P0) P0 represents the LSB
7	P5		
8	P6		
9	P7		
10	CSO_HSO	O	Dual function CSO or HSO TTL Output Sync Signal
11	VAA	P	Power Supply (+3V to +5V)
12	GND	G	Ground Pin
13	GND	G	Ground Pin
14	HSYNC	I/O	Hsync (Models 1 and 2) Control Signal. This pin may be configured to output (Master Mode) or as an input and accept (Slave Mode) Sync signals.
15	FIELD/VSYNC	I/O	Dual Function FIELD (Mode1) and VSYNC (Mode2) Control Signal. This pin may be configured to output (Master Mode) or as an input (Slave Mode) and accept these control signals.
16	BLANK	I/O	Video Blanking Control Signal. The pixel inputs are ignored when this is logic level "0". This signal is optional.
17	ALSB	I	TTL Address Input. This signal sets up the LSB of the MPU address.
18	GND	G	Ground Pin
19	VAA	P	Power Supply (+3V to +5V)
20	SCLOCK	I	MPU Port Serial Interface Clock Input
21	SDATA	I/O	MPU Port Serial Data Input/Output
22	RSET2	I	A 600 ohm resistor connected from this pin to GND is used to control full-scale amplitudes of the Video Signals from DACs D, E and F (the "small" DACs).
23	COMP2	O	Compensation Pin for DACs d, E and F. Connect a 0.1μF Capacitor from COMP to VAA.
24	DAC F	O	RED/S-Video C/V Analog Output. This DAC is capable of providing 8.66 mA output.
25	DAC E	O	BLUE/S-Video Y/U Analog Output. This DAC is capable of providing 8.66 mA output.
26	GND	G	Ground Pin
27	VAA	P	Power Supply (+3V to +5V)
28	DAC D	O	GREEN/Composite/Y Analog Output. This DAC is capable of providing 8.66 mA output.
29	DAC C	O	RED/S-Video C/V Analog Output. This DAC is capable of providing 34.66 mA output.
30	VAA	P	Power Supply (+3V to +5V)
31	GND	G	Ground Pin
32	VAA	P	Power Supply (+3V to +5V)
33	DAC B	O	BLUE/S-Video Y/U Analog Output. This DAC is capable of providing 34.66 mA output.
34	VAA	P	Power Supply (+3V to +5V)
35	DAC A	O	GREEN/Composite/Y Analog Output. This DAC is capable of providing 34.66 mA output.
36	COMP1	O	Compensation Pin for DACs A, B and C. Connect a 0.1μF Capacitor from COMP to VAA. For Optimum Dynamic Performance in Low Power Mode, the value of the COMP1 capacitor can be lowered to as low as 2.2mF.
37	VREF	I/O	Voltage Reference Input for DACs or Voltage Reference Output (1.235V)
38	RSET1	I	A 150 ohm resistor connected from this pin to GND is used to control full-scale amplitudes of the Video Signals from DACs A, B and C (the "large" DACs).
39	SCRESET/RTC	I	This pin can be configured as an input by setting MR42 and MR41 of Mode Resistor 4. It can be configured as a subcarrier reset pin, in which case a high to low transition on this pin will reset the subcarrier phase to Field 0. Alternatively it may be configured as a Real-Time Control (RTCF) Input.
40	TTXREQ	O	Teletext Data Request input signal used to control teletext data transfer.
41	TTX	O	Teletext Data Input Pin.
42	CLAMP	O	TTL Output Signal to external circuitry to enable clamping of all video signals.
43	PAL_NTSC	I	Input signal to select PAL or NTSC mode of operation, pin set to Logic "1" selects PAL.
44	RESET	I	The input resets the on-chip timing generator and sets the ADV7172KST into default mode. This is NTSC operation, Timing Slave Mode 0, DACs A, B and C powered OFF, DACs D, E and F powered ON, Composite and S-Video out.
45	VSO	O	VSO TTL Output Sync Signal
46	VAA	P	Power Supply (+3V to +5V)
47	GND	G	Ground Pin
48	CLOCK	I	TTL Clock Input. Requires a stable 27 MHz reference clock for standard operation. Alternatively, a 24.52 MHz (NTSC) or 29.5 MHz (PAL) can be used for square pixel operation.

PCM1738EG-3 (JACB ASSY : IC301)

- D/A Converter IC

Pin Arrangement

PCM1738

9	VDD	Vcom2	20
10	SCKO	Vcom1	19
11	MDO	AGND1	18
12	MDI	IoutR+	17
13	MC	IoutR-	16
14	CS	MUTE	15

Pin Function

PIN	NAME	TYPE	DESCRIPTIONS
1	RST	IN	Reset (1)
2	ZEROL	OUT	Zero Flag for L-channel
3	ZEROR	OUT	Zero Flag for R-channel
4	LRCK	IN	Left and Right Clock (f_s) Input for Normal operation. WDCK clock input in External DF mode. Connected to GND in DSD mode. (1)
5	DATA	IN	Serial Audio Data Input for Normal operation. L-channel audio data input for External DF and DSD modes. (1)
6	BCK	IN	Bit Clock. Input. Connected GND for DSD mode. (1)
7	SCKI	IN	System Clock Input. BCK (64 f_s) clock input for DSD mode (1)
8	DGND	-	Digital Ground
9	V _{DD}	-	Digital Supply, +3.3 V
10	SCKO	OUT	System Clock Output
11	MDO	OUT	Serial data output for function control register (2)
12	MDI	IN	Serial data input for function control register (1)
13	MC	IN	Shift Clock for function control register (1)
14	CS	IN	Mode control chip select and latch signal. (1)
15	MUTE	IN	Analog output mute control for normal operation R-channel audio data input for external DF mode and DSD mode. (1)
16	IoutR-	OUT	R-channel Analog Current Output -
17	IoutR+	OUT	R-channel Analog Current Output +
18	AGND1	-	Analog Ground.
19	V _{com1}	-	Internal bias de-coupling pin
20	V _{com2}	-	Common voltage for I/V
21	I _{REF}	-	Output current reference bias pin. Connect 16KΩ resistor to GND
22	V _{com3}	-	Internal bias de-coupling pin
23	V _{cc1}	-	Analog Supply, +5.0 V
24	V _{cc2}	-	Analog Supply, +5.0 V
25	IoutL+	OUT	L-channel Analog Current Output +
26	IoutL-	OUT	L-channel Analog Current Output -
27	AGND2	-	Analog Ground
28	Vcc3	-	Analog Power Supply, +5.0V

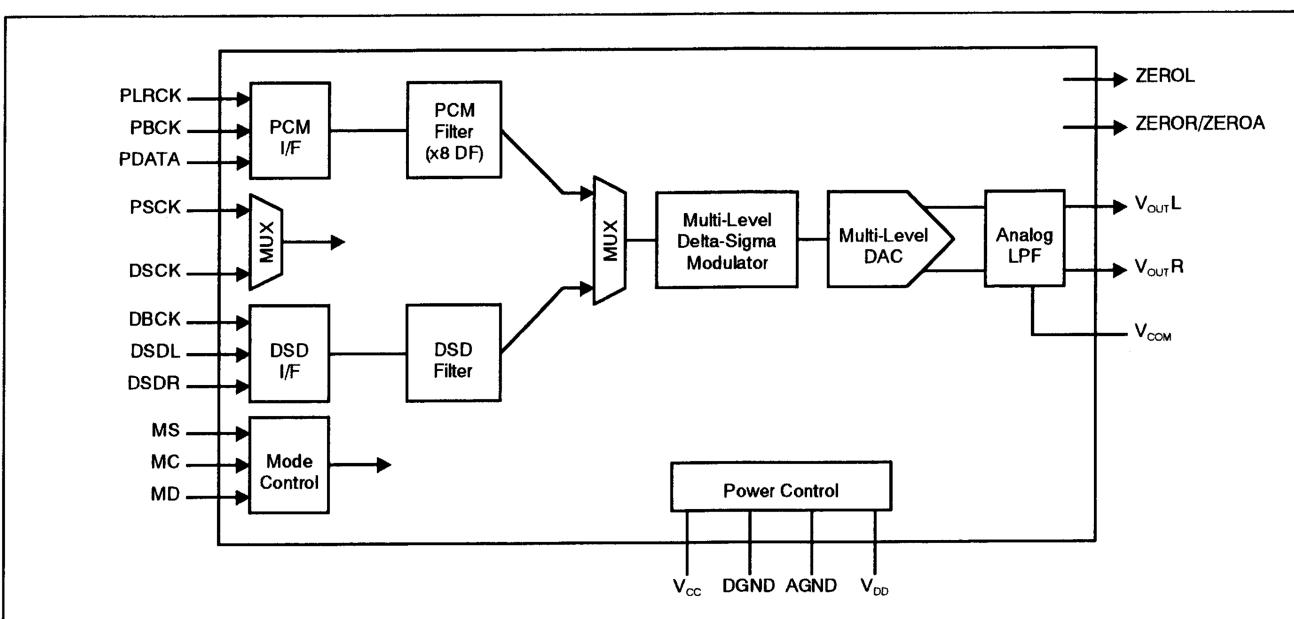

NOTES:

- (1) Schmitt trigger input, 5 V tolerant.
(2) Tristate output.

- DVD Video Amplifier

- Block Diagram

● Pin Function

No.	Pin Functions		0– 0.7V (LOW)	2.6– 5V (HIGH)
36	AMP-GAIN change for composite/S		6 dB	9 dB
15	AMP-GAIN change for component		6 dB	9 dB
35	Drive electric current change for composite/S		2 system drive	1 system drive
19	Drive electric current change for component		2 system drive	1 system drive
5	Mute control for composite/S	In 10 pin LOW	It is not do mute	33, 31, 28 pin mute
		In 10 pin HIGH	It is not do mute	31, 28 pin mute
12	Mute control for component		It is not do mute	25, 23, 21 pin mute
9	The control of Y/C- MIX		In composite	In Y/C- MIX
10	11 pin input form change		In the component input	In the baseband input
13	LPF characteristic change for component		Inter race correspondence	Progressive correspondence

2 pin falls to GND in Y/C-MIX.

11 pin is clamp, and the Y signal input, 14, 16 pin input a CB, CR signal into NTSC (in the component input) with pedestal clamp.

8 pin is clamp, and the Y signal input, 11, 14, 16 pin input a R, G, B signal into PAL (in the baseband input) with pedestal clamp.

It prohibit mute of 5 pin when It do Y/C-MIX in PAL (in the baseband input).

43	SUPDT4	O	Supplementary data output terminal
44	SUPDT5		
45	VDIO	-	Power supply terminal for I/O
46	SUPDT6		Supplementary data output terminal
47	SUPDT7	O	Supplementary data output terminal (MSB)
48	XSUPAK		Supplementary data output terminal
49	VSC	-	Ground terminal for core
50	TESTO	O	Output terminal for test

No.	Pin Name	I/O	Pin Function
51	TESTI	I	It is fixation in "L" a test input terminal.
52			
53	TESTO	O	Output terminal for test
54	VDC	-	Power supply terminal for core
55	DSADML	O	DSD data output terminal for Lch Down Mix
56	DSADM		DSD data output terminal for Rch Down Mix
57	BCKASL	I	Input and output choice terminal of a 1 bit clock for DSD data output.L= input (slave), H = output (master).
58	VSDSD	-	Ground terminal for DSD data output
59	BCKAI	I	Bit clock input terminal for DSD data output
60	BCKAO	O	Bit clock output terminal for DSD data output
61	PHREFI	I	Phase reference signal input terminal for DSD output phase modulation
62	PHREFO		Phase reference signal output terminal for DSD output phase modulation
63	ZDFL		Zero Lch data search flag
64	DSAL	O	DSD data output terminal for Lch loud speaker
65	ZDFR		Zero Rch data search flag
66	DSAR		DSD data output terminal for Rch loud speaker
67	VDDSD	-	Power supply Mizuko for DSD data output
68	ZDFC		Zero Cch data search flag
69	DSAC	O	DSD data output terminal for Cch loud speaker
70	ZDFLFE		Zero LFEch data search flag
71	DSASW		DSD data output terminal for SWch loud speaker
72	VSDSD	-	Ground terminal for DSD data output
73	ZDFLS		Zero LSch data search flag
74	DSALS	O	DSD data output terminal child for LSch loud speaker
75	ZDFRS		Zero RSch data search flag
76	DSARS		DSD data output terminal for RSch loud speaker
77	VDDSD	-	Power supply Mizuko for DSD data output
78	IOUT0	O	Data output terminal 0 for IEEE1394 link tip I/F
79	IOUT1		Data output terminal 1 for IEEE1394 link tip I/F
80	VSC	-	Ground terminal for core
81	IOUT2	O	Data output terminal 2 for IEEE1394 link tip I/F
82	IOUT3		Data output terminal 3 for IEEE1394 link tip I/F
83	VDC	-	Power supply terminal for co
84	IOUT4	O	Data output terminal 4 for IEEE1394 link tip I/F
85	IOUT5		Data output terminal 5 for IEEE1394 link tip I/F
86	VSIO	-	Ground terminal for I/O
87	IANCO	O	Transmission information data output terminal for IEEE1394 link tip I/F
88	IFULL	I	Data transmission hold demand signal input terminal for IEEE1394 link tip I/F
89	IEMPTY		High speed transmission demand signal input terminal for IEEE1394 link tip I/F
90	VDIO	-	Power supply terminal for I/O
91	IFRM		Frame reference signal output Mizuko for IEEE1394 link tip I/F
92	IOUTE	O	Enable signal output terminal for IEEE1394 link tip I/F
93	IBCK		Data transmission clock output terminal for IEEE1394 link tip I/F
94	VSC	-	Ground terminal for core
95		I	It is fixation in "H" a test input terminal.
96	TESTI		It is fixation in "L" a test input terminal.
97		Ipu	It is fixation in "H" a test input terminal.
98	TESTO	O	Output terminal for test
99	VDC	-	Power supply terminal for co
100	TESTI	I	It is fixation in "L" a test input terminal.

No.	Pin Name	I/O	Pin Function
101	TESTI	I	It is fixation in "L" a test input terminal.

- DVD Data Processor

● Pin Function

No.	Pin name	Dir.	Pin Functions
3, 40, 50, 54, 84, 103, 107, 145, 154, 158, 207	VDD3.3	—	It is a power supply of digital circuit. Be connected to +3.3V.
15, 18, 27, 53, 64, 74, 78, 92, 104, 130, 157, 164, 183, 191, 208	VDD2.5	—	It is a power supply of digital circuit. Be connected to +2.5V.
1, 2, 16, 17, 26, 41, 51, 52, 63, 73, 79, 85, 91, 105, 106, 131, 144, 150, 155, 156, 178, 182, 190	GND	—	It is a ground of digital circuit.
167, 171, 175	NC	—	It is a non-use pin. Fix it in GND or VDD.
165 166	AVDD	—	It is a power supply supply terminal for built-in analog-to-digital converter. Supply +2.5V (analog).
176 177	AGND	—	It is a GND terminal for built-in D/A converter.
6	BUNRI	IN	It is a separation test control terminal of inside RAM. Input LOW in use usually.
90	TMC1	IN	It is a test terminal. Input LOW in use usually.
148	TMC2	IN	
4	DMCK/RF_A	IN	It is the system clock input of DVD/CD-ROM decoder. Input 10-54MHz.
189	CKCD	IN	It is master clock of an audio system I/F block. In audio out of a CD, input 16.9MHz of reference clock.
5	DMACKI/PD4	IN	Fix unused time (unused usually) in GND or VDD.
149	VCOCLK	IN	With system clock of spindle demodulator, it is connected to VCO of outside charge account.
161	XRESET	IN	By the input of a LOW level, It initialize the whole large scale integrated circuit system.
135	SA19	I/O	Connect address bus of central processing unit.
134	SA18		
133	SA17		
132	SA16		
129	SA15		
128	SA14		
127	SA13		
126	SA12		
125	SA11		
124	SA10		
123	SA9		

No.	Pin name	Dir.	Pin Functions
122	SA8	IN	Connect address bus of central processing unit.
121	SA7		
120	SA6		
119	SA5		
118	SA4		
117	SA3		
116	SA2		
115	SA1		
114	SA0		
99	SAD7	I/O	Connect a data bus of central processing unit.
100	SAD6		
101	SAD5		
102	SAD4		
108	SAD3		
109	SAD2		
110	SAD1		
111	SAD0		
97	XSRD	IN	Be connected to a RD signal of central processing unit.
98	XSWR	IN	Be connected to a WR signal of central processing unit.
96	XSCL1	IN	It is chip select signal from central processing unit. XSRD/XSWR becomes effective at the time of LOW this signal.
95	XSWAIT	OUT	It is the WAIT output for central processing unit. This terminal must leave access from central processing unit at the time of LOW.
94	XSDREQ	OUT	It is a DMA demand for central processing unit. LOW level hip of this terminal falls down and activates DMA transfer with an edge.
93	SDACK	IN	It is DMA answer back. Data are output with HIGH this signal by SAD (7:0).
112	XIRQ10	OUT	It demand interrupt for central processing unit with LOW. Both terminals can set it with a register whether they output it.
113	XIRQ11		
141	GPL/PE3	IN	Input a turn pulse from spindle motor.
147	FPWM	OUT	It is 7bitPWM output terminal for FG servo. It is the 3 value output of HIGH,LOW, high impedance.
146	VPWM	OUT	It is 5bitPWM output terminal for speed servo. It is the 3 value output of HIGH,LOW, high impedance.
143	PPWM	OUT	It is pulse width modulation output terminal for phase servo. It is the 3 value output of HIGH,LOW, high impedance.
142	RERR	OUT	It is control output for rough servo. It is the 3 value output of HIGH,LOW, high impedance.
31	PA7	I/O	It is general-purpose I/O port. By setting of a \$70 register, You can select a function. CDDO inputs a digital out signal from a CD decoder. DIFOUT is digital audio output terminal based on IEC958. BCA is terminal to input a BCA code into. RWDIN is terminal to input a WOBBLE signal into. BCA/RWDIN terminal becomes necessary with RW revitalization machines.
32	PA6		
33	PA5		
34	PA4		
35	CDDO/PA3		
36	DIFOUT		
196	BCA/PA1		
195	RWDIN/PA0		

	No.	Pin name	Dir.	Pin Functions
A	138	PD7/STATUS2	OUT	It output a various monitor signal (STATUS (2:0)). By setting of a \$ 70 register, You can use it as a general-purpose I/O port port.
	139	PD6/STATUS1		
	140	PD5/STATUS0		
	151	DUTY50	OUT	It always output a pulse of duty 50%. It give reference voltage of a various PWD signal of the recovery system.
	160	ASC	OUT	It output frequency error of a sink period as a PWD pulse.
	153	APC	OUT	It output a phase error of phase locked loop as a PWD pulse.
	159	ATC	OUT	It output a direct current error of a RF signal as a PWD pulse.
B	152	AFC	OUT	It output VC OCL k and frequency error of reference clock as a PWD pulse. It is the 3 value output of HIGH,LOW, high impedance.
	163	DEFECT/PE1	IN	It is the diffect signal input from the outside. Then a phase error of phase locked loop outputs this terminal in HIGH (APC), and it is done front value hold.
	162	T_DET/PC7	OUT	It output a tangential-tilt search result as a pulse width modulation pulse.
C	70	DA13	OUT	It is address signal of DRAM for a VBR buffer.
	71	DA12		
	72	DA11		
	75	DA10		
	76	DA9		
	77	DA8		
	80	DA7		
	81	DA6		
	82	DA5		
	83	DA4		
D	86	DA3	I/O	It is a data bus of DRAM for a VBR buffer.
	87	DA2		
	88	DA1		
	89	DA0		
	39	DD15		
	42	DD14		
	43	DD13		
	44	DD12		
	45	DD11		
	46	DD10		
E	47	DD9		
	48	DD8		
	49	DD7		
	55	DD6		
	56	DD5		
	57	DD4		
	58	DD3		
	59	DD2		
	60	DD1		
	61	DD0		

No.	Pin name	Dir.	Pin Functions
69	XDRAS	OUT	It is a RAS signal of DRAM of a VBR buffer.
67	XDCAS/XDCASL	OUT	It is a CAS signal of DRAM of a VBR buffer.
66	XDOE/DQML	OUT	It is an OE signal of DRAM of a VBR buffer.
65	XDWE	OUT	It is a WE signal of DRAM of a VBR buffer.
13	SDATA7	OUT	It is a data output bus of a VIDEO_DMA channel. Be connected to MPEG decoder.
14	SDATA6		
19	SDATA5		
20	SDATA4		
21	SDATA3		
22	SDATA2		
23	SDATA1		
24	SDATA0		
29	SREQ	IN	It is a data transfer demand terminal of a VIDEO_DMA channel. Be connected to MPEG decoder. You can change polarity by setting.
25	XSACK/PC5	OUT	It is a transfer reply terminal of a VIDEO_DMA channel. Be connected to MPEG decoder. Output form varies with setting.
28	XWR	OUT	It is a transfer reply terminal of a VIDEO_DMA channel. Be connected to MPEG decoder. Output form varies with setting.
30	XAVTRM/PC6	OUT	It is a signal to show the top of a sector of transfer data of a VIDEO_DMA channel in.
7	DSPA0/PC0	OUT	When it connects Motorola Digital Signal Processor as destination of an AUDIO_DMA channel, it is the signal which gives a DMA address to Motorola Digital Signal Processor.
8	DSPA1/PC1		
9	DSPA2/PC2		
206	ASDATA0/PB0	I/O	It is general-purpose I/O port. By setting of a \$70 register, It become a data output bus of an AUDIO_DMA channel besides a port.
205	ASDATA1/PB1		
204	ASDATA2/PB2		
203	ASDATA3/PB3		
202	ASDATA4/PB4		
201	ASDATA5/PB5		
200	ASDATA6/PB6		
199	ASDATA7/PB7		
10	XAWR	OUT	It is a transfer reply terminal of an AUDIO_DMA channel. Output form varies with setting.
11	XASACK	OUT	It is a transfer reply terminal of an AUDIO_DMA channel. Output form varies with setting.
12	ASREQ	IN	It is a transfer demand terminal of an AUDIO_DMA channel. You can change polarity by setting.
192	BCK	OUT	It is the bit clock output to DAC.
193	LRCK	OUT	It is the LRCK signal output to DAC.
194	ADATA0	OUT	It is the serial data output to DAC.
187	CDBCK	IN	It input a bit clock from a CD decoder. Prospective frequency is 2.1168MHz(48fs).
186	CDLR	IN	It input a LRCK signal from a CD decoder.
185	CDDT	IN	It input audio system data from a CD decoder.
181	WFCK	IN	It is frame clock signal of a CD.
180	SCOR	IN	It is input terminal of assistant code sink of a CD.

No.	Pin name	Dir.	Pin Functions
179	SBSO	IN	It is an assistant code data input terminal of a CD.
184	EXCK	OUT	It is a shift clock making timeliness to send data forth on a SBSO terminal.
188	C2FI/PE2	IN	It is input terminal of C2 error flag from a CD decoder.
136	FSX/STATUS4	I/O	It input a FSX signal from a CD decoder. FSX signal is 7.35Khz at normal speed with frame alignment signal of error correction of CIRC. By setting of a \$7F register, It become the internal monitor output (STATUS 4).
137	EFLG/STATUS3	I/O	It input an EFLG signal from a CD decoder. An EFLG signal is a monitor signal of error correction processing movement of CIRC. By setting of a \$7F register, It become the internal monitor output (STATUS 3).
172	AIN	IN	It is analog RF signal input terminal to built-in A/D converter.
168	VRT	IN	It is reference voltage input terminal of built-in A/D converter.
169	VRTS	OUT	Connect with VRT.
170	VRC	OUT	It is center voltage output terminal of built-in A/D converter.
174	VRB	IN	It is reference voltage input terminal of built-in A/D converter.
173	VRBS	OUT	Connect with VRB.
37	CKE/PD3	OUT	It is an Enable signal of SDCLK.
38	CSB/PD2	OUT	It is chip select signal of SDRAM.
62	SDCLK	OUT	It is a terminal outputting a movement clock of SDRAM.
68	XCASH/DOMH	OUT	When it uses DRAM of bus 16 wide bit, it is a CAS signal of high rank 8bit.
197	VREQEN/PD1	I/O	It is an Enable signal of Video-REQ.
198	AREQEN/PD0	I/O	It is an Enable signal of Audio-REQ.

7.3 DISC / CONTENT FORMAT PLAYBACK COMPATIBILITY

Disc / Content Format Playback Compatibility

General Disc Compatibility

- This player was designed and engineered to be compatible with software bearing one or more of the following logos.

DVD-Audio

DVD-Video

DVD-R

DVD-RW

Audio CD

Video CD

CD-R

CD-RW

Super Audio CD

- Other formats, including but not limited to the following, are not playable in this player:

Photo CD, DVD-RAM, DVD-ROM, CD-ROM

- DVD-R/RW and CD-R/RW discs (Audio CDs and Video CDs) recorded using a DVD recorder, CD recorder or personal computer may not be playable on this machine. This may be caused by a number of possibilities, including but not limited to: the type of disc used; the type of recording; damage, dirt or condensation on either the disc or the player's pick-up lens. See below for notes about particular software and formats.

CD-R/RW Compatibility

- This unit will play CD-R and CD-RW discs recorded in CD Audio or Video CD format, or as a CD-ROM containing MP3 audio files. However, any other content may cause the disc not to play, or create noise/distortion in the output.
- This unit cannot record CD-R or CD-RW discs.
- Unfinalized CD-R/RW discs recorded as CD Audio can be played, but the full Table of Contents (playing time, etc.) will not be displayed.

DVD-R/RW Compatibility

- This unit will play DVD-R/RW discs that were recorded using the DVD Video format or Video Recording format.
- This unit cannot record DVD-R/RW discs.
- Unfinalized DVD-R/RW discs cannot be played in this player.

7.4 CLEANING

Before shipping out the product, be sure to clean the following positions by using the prescribed cleaning tools:

Position to be cleaned	Cleaning tools
Pickup lenses	Cleaning liquid : GEM1004 Cleaning paper : GED-008

B

C

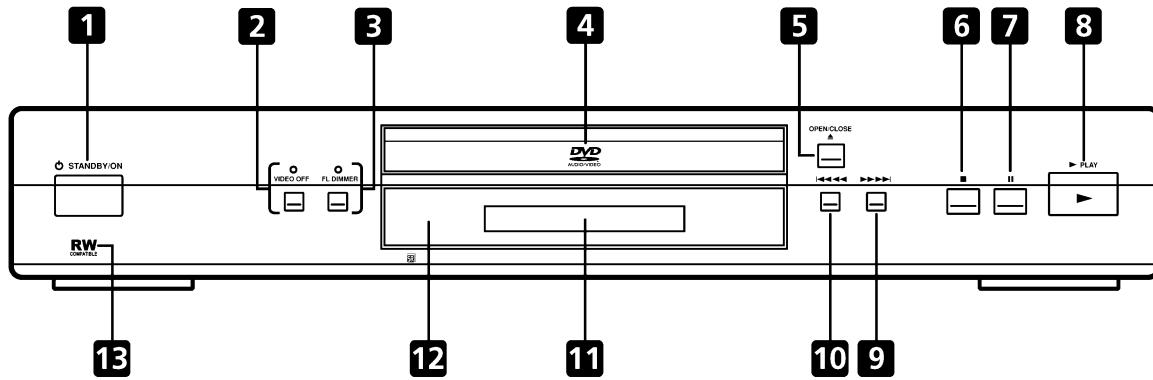

D

E

F

8. PANEL FACILITIES

Front panel

1 ⏻ STANDBY/ON

Press to switch the player on or into standby

2 VIDEO OFF button/indicator

Press to switch the video output on/off. The indicator lights when the video output is switched off (when listening to a DVD-Audio disc, for example)

3 FL DIMMER button/FL OFF indicator

Press to change the brightness of the front panel display and **VIDEO OFF** indicator in four steps: maximum brightness, medium brightness, minimum brightness, and off. When the display is turned off, the **FL OFF** indicator Lights.

4 Disc tray

5 ▲ OPEN/CLOSE

Press to open or close the disc tray

6 ■

Press to stop the disc (you can resume playback by pressing ▶ (play))

7 ▶

Press to pause playback. Press again to restart

8 ▶

Press to start or resume playback

9 ▶▶▶

- Press and hold for fast forward scanning
- Press to jump to the next chapter or track

10 ▶◀◀

- Press and hold for fast reverse scanning
- Press to jump back to the beginning of the current chapter or track, then to previous chapters/tracks

11 Display

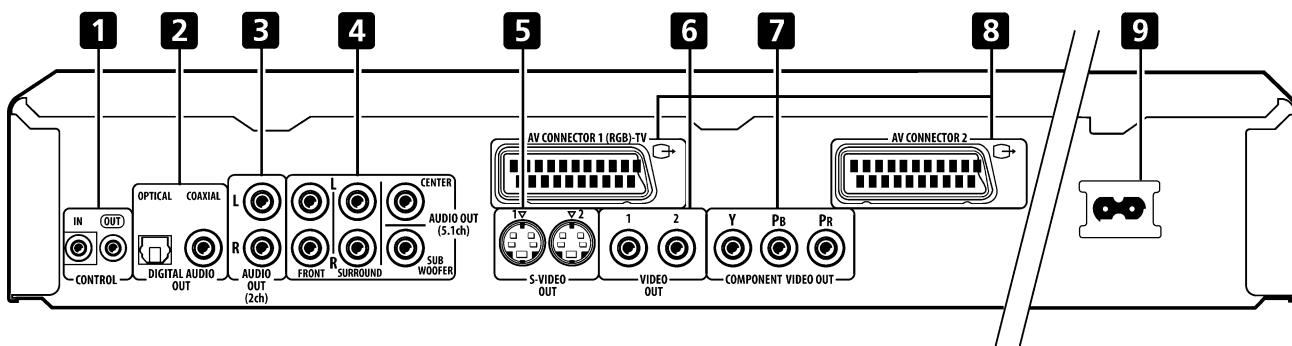

12 Remote control sensor

The remote control has a range of up to about 7m

13 RW COMPATIBLE

This mark indicates compatibility with DVD-RW discs recorded on a DVD recorder in Video Recording mode

Rear panel

When connecting this player up to your TV, AV receiver or other components, make sure that all components are switched off and unplugged.

1 CONTROL IN / OUT

For passing remote control signals to other Pioneer components.

2 DIGITAL AUDIO OUT – OPTICAL / COAXIAL

Digital audio outputs for connection to a PCM, Dolby Digital, DTS and/or MPEG-compatible AV receiver.

3 AUDIO OUT (2ch)

Two channel analog audio outputs for connection to your TV, AV receiver or stereo system.

4 AUDIO OUT (5.1ch)

Multichannel analog audio outputs for connection to an AV receiver with multichannel inputs.

5 S-VIDEO OUT

S-video outputs that you can use instead of the video output described in **6** below.

6 VIDEO OUT

Standard video outputs that you can connect to your TV or AV receiver using the supplied audio/video cable.

7 COMPONENT VIDEO OUT

High quality video output for connection to a TV, monitor or AV receiver that has component video inputs.

Connect using a commercially available three-way component video cable. Be careful to match the colors of the jacks and cables for correct connection.

8 AV CONNECTOR

AV CONNECTOR 1 (RGB)-TV

Use a 21-pin SCART cable to connect to a TV or monitor compatible with this type of connection. Both audio (2 channel stereo) and video (Video, S-video, and RGB) signals are output from the **AV CONNECTOR 1 (RGB)-TV**.

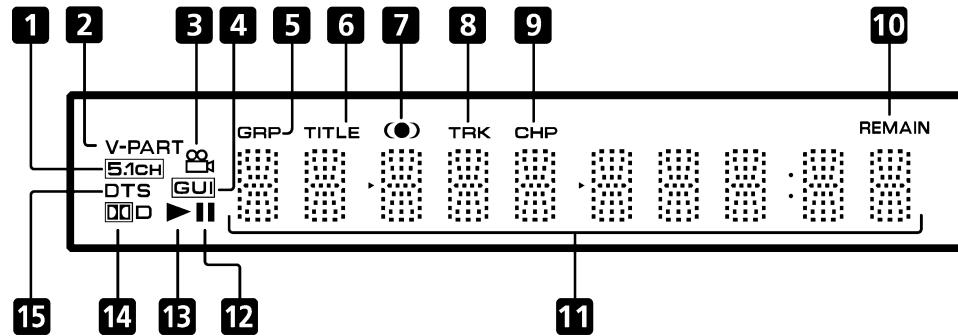

AV CONNECTOR 2

Use a 21-pin SCART cable to connect to a VCR.

9 AC IN

Connect the supplied power cord here, then plug into a power outlet.

Display

1 5.1CH

Lights when analog 5.1 channel output is selected

2 V-PART

Lights when playing a video part of a DVD disc

3

Lights during multi-angle scenes on a DVD disc

4 GUI (Graphical User Interface)

Lights when a menu is displayed on-screen

5 GRP

Indicates that the character display is showing a DVD-Audio group number

6 TITLE

Indicates that the character display is showing a DVD-Video title number

7

Lights when DViV/TruSurround is active

8 TRK

Indicates that the character display is showing a track number

9 CHP

Indicates that the character display is showing a DVD chapter number

10 REMAIN

Lights when the character display is showing the time or number of tracks/titles/chapters remaining

11 Character display

12

Lights when a disc is paused

13

Lights when a disc is playing

14

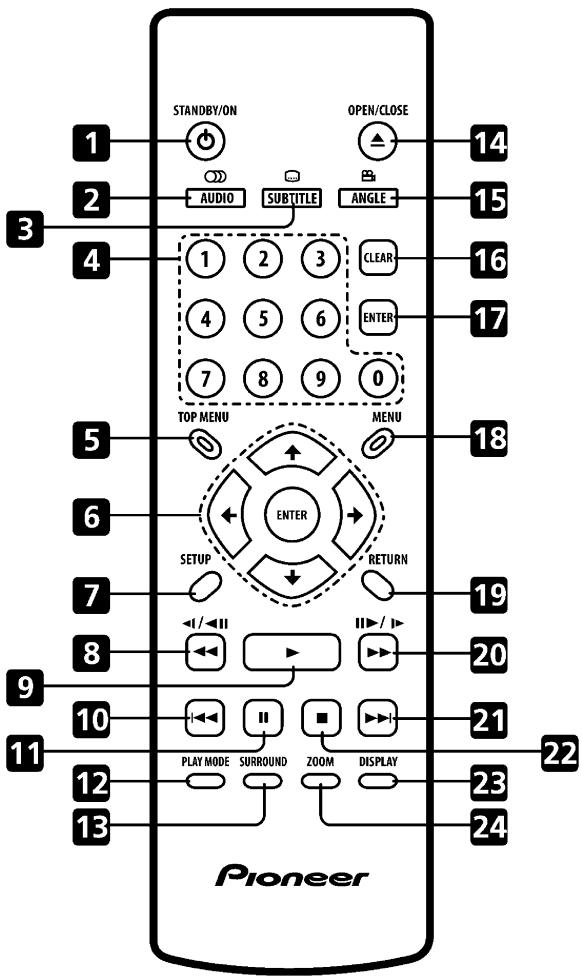

Lights when a Dolby Digital soundtrack is playing

15 DTS

Lights when a DTS soundtrack is playing
