

Features

- ▶ Double-conversion online technology provides reliable operation
- ▶ Advanced Battery Management (ABM™) doubles battery service life
- ▶ Matching battery cabinets extend backup times
- ▶ Automatic voltage and frequency selection eases startup
- ▶ Standard Static Bypass and Manual Bypass switches mean zero transfer time
- ▶ Complete offering of power management software included to ensure data integrity
- ▶ Efficiency Optimizer minimizes power loss, reduces power consumption, and cuts your power bill
- ▶ Compatible for engine generator applications

Powerware® 9150 UPS

Product Snapshot

Rating:	8.0-12.5 kVA
Input Voltage:	200/100, 208/120, 220/110, 220/127, 240/120 Vac
Output Voltage:	200/100, 208/120, 220/110, 220/127, 240/120 Vac
Frequency:	50 and 60 Hz
Configuration:	Cabinet with internal batteries; Multiple battery cabinets available

Designed with enhanced flexibility and efficiency, the Powerware 9150 uninterruptible power system (UPS) offers premium, online power protection for LANs, measurement instruments, industrial automation machines, server farms, and other sensitive electronic equipment.

Available in power ratings from 8.0 to 12.5 kVA, the Powerware 9150 utilizes double-conversion online technology to deliver exceptional voltage regulation, bi-directional filtering (to eliminate power line noise), and low input current distortion.

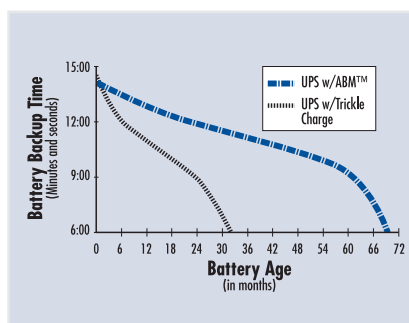

This feature-rich UPS also comes standard with Powerware's exclusive Advanced Battery Management (ABM™), which doubles battery service life, optimizes recharge time, and provides advanced warning when batteries are reaching the end of their useful life. Furthermore, matching battery cabinets are available to extend runtime to the UPS.

Offering the most compact, cost-effective, and comprehensive solution to power protection, the Powerware 9150 is backed by Powerware's 37-year reputation as a world leader in the manufacturing of power protection products.

Patented Advanced Battery Management (ABM) Technology Doubles Battery Service Life

The lead-acid batteries typically used in a UPS are considered viable as long as they can maintain backup times of at least half that of new batteries. The illustration to the right shows that batteries which are constantly trickle charged (as are virtually all batteries of other UPSs on the market today) reach the end of their useful life in less than half

the time of batteries charged using Advanced Battery Management (ABM). ABM uses a patented three-stage charging technique that not only doubles battery service life, but also optimizes recharge time and provides up to a 60-day advanced notification of the end of useful battery life.

Data based upon tests performed by an independent battery manufacturer.

Technical Specifications¹

POWER

Ratings	8, 10, & 12.5 kVA
Technology	Online, double-conversion topology with static bypass switch and maintenance bypass switch. Frequency independent operation

ELECTRICAL INPUT

Rated Voltage	See Model Selection Guide
Voltage Range	Two phase; 85–146 V per phase (170–292 Line to Line)
Frequency Range	45–65 Hz
Rated Frequency	50/60 Hz selectable, or auto-configuring
Power Factor	.95 typical
Efficiency	89% online; 98% with Efficiency Optimizer (optional setting)

ELECTRICAL OUTPUT

Voltage	200/100, 208/120, 220/110, 220/127, 240/120 (Selectable through front panel)
Frequency	50/60 Hz; ± 0.5 , ± 2.0 , or ± 3.0 Hz selectable synchronization to utility; ± 0.005 Hz free running, slew rate 2.5 Hz/sec (programmable)
Voltage Regulation	$\pm 2\%$ static
Dynamic Response	$\pm 5\%$ at 100% load change response time 1 ms
Voltage Distortion	$< 2\%$ THD on linear load $< 5\%$ THD on nonlinear load
Overload Capacity	150% 30 seconds on inverter 1000% 20 ms on bypass

BATTERY

Type	Sealed lead-acid batteries 12V 7 Ah
Backup Time	See Estimated Backup Times
Recharge Time	< 3 hrs. to 90% capacity
Battery Test	Innovative monitoring with Advanced Battery Management (ABM)
Start-On-Battery	After initial startup, UPS can be turned on using internal batteries

BATTERY (CONTINUED)

Optional External Battery Ratings	EBC-48: 48 x 12V 7Ah (DC voltage: 288V) EBC-96: 96 x 12V 7Ah (DC voltage: 288V)
------------------------------------------	------------------------------------------------------------------------------------

CONTROL FEATURES

User Interface	Monitoring panel LEDs: UPS on, Line on, Battery operation, Bypass, Overload, Overtemperature, Service required, Load bar graph, and Audible alarm
Serial Communications Port	(2) RS-232 serial communications ports, 1 with full modem compatible interface and 1 computer interface port. The computer port provides 24 VDC power, 5 watts maximum, to power the ConnectUPS SL SNMP Adapter. Both ports are UPSCode-II and BCM compatible.
Voltage Free Relays	Line failure, low battery, bypass, and alarm. Emergency power off (input)

ENVIRONMENTAL

Operating Temperature	15–25°C (recommended), 0–40°C
Ventilation	Fan Cooling, temperature μ P monitored; vent holes on both sides of UPS
Humidity	5–95% RH non-condensing
Audible Noise	< 50 dBA at 3 feet
RFI Suppression	FCC Class A
Safety	UL 1778, cUL per CSA C22.2 No. 107.1
Input Surge Immunity	ANSI C62.41 Cat B (formerly IEEE587 Class B)
Options	External battery cabinets Remote status panel Power distribution module 2" x 16" Alphanumeric Display (ViewUPS)
Dimensions & Weight	See Model Selection Guide

¹ Due to continuing product improvement programs, specifications are subject to change without notice.

Options and Software

Standard Front Panel Interface

To control and monitor the performance of the UPS, the front panel features the on/off switch, reset button, battery start pushbutton, and a set of LEDs which display the following:

- ▶ UPS power on and utility voltage on
- ▶ UPS on battery
- ▶ Bypass mode
- ▶ Overload, overtemperature, alarm, and service conditions

Optional ViewUPS Monitoring Panel

The ViewUPS is an enhanced user interface designed for industrial and process control applications in which the use of power management software is not an option.

The ViewUPS is equipped with the following:

- ▶ LCD screen
- ▶ LED display
- ▶ Function push buttons
- ▶ Audible alarms
- ▶ Wall-mounting plate (ViewUPS can be installed in a suitable place within 50 meters of the UPS)

Power Distribution Module

Standard models utilize hardwired input and output connections. An optional Power Distribution Module comes with user-selectable receptacles and attaches easily to the rear panel of the UPS as shown below. *(See back page for receptacle options.)*

Powerware Software Suite

The industry's most comprehensive software bundle, the Powerware Software Suite, is free and included with every Powerware UPS.

- ▶ Software Wizard guides you through software selection and installation
- ▶ In addition to multimedia demonstrations, product data sheets, and video clips, the Software Suite contains the following power management software:
 - LanSafe III and CheckUPS Network shutdown for UPSs
 - OnliNet (Lite / Vista / Centro): SNMP-based network shutdown and monitoring for UPSs
 - PowerVision (30-day trial version): UPS performance analysis and monitoring
 - Foreseer (demonstration): Facility and data center management

Powerware 9150 Model Selection Guide

RATING (kVA)	FREQUENCY (Hz) ¹	INPUT VOLTAGE RANGE (VAC) ²	OUTPUT VOLTAGE (VAC)	DIMENSIONS H x W x D (INCHES) ³	WEIGHT (LB/KG)
8.0 ⁴	50/60	85–146 (per phase) 170–292 (Line to Line)	(200/100, 220/110, 120/240) ⁵ (208/120, 220/127) ⁶	28 x 16 x 29.5	510/231
10.0 ⁴	50/60	85–146 (per phase) 170–292 (Line to Line)	(200/100, 220/110, 120/240) ⁵ (208/120, 220/127) ⁶	28 x 16 x 29.5	510/231
12.5	50/60	85–146 (per phase) 170–292 (Line to Line)	(200/100, 220/110, 120/240) ⁵ (208/120, 220/127) ⁶	28 x 16 x 29.5	510/231

External Battery Cabinets

EBC-48	–	–	–	28 x 16 x 29.5	422/191
EBC-96	–	–	–	28 x 16 x 29.5	719/326

1. Selectable, auto-configuring. Output voltage is auto-configured to match input. 2. Two phases required. 3. Power Distribution Module adds 5" of depth. 4. Available in 32 and 48 battery models. See below for backup times. 5. 180° phase displacement. 6. 120° phase displacement.

BACKUP TIMES (IN MINUTES)

Additional battery cabinets are sold separately. This guide provides typical application information. Battery times are approximate and may vary with equipment, configuration, disk access, battery age, temperature, etc.

POWER DISTRIBUTION MODULE: OUTPUT PANELS

OPTION	RECEPTACLE(S)	BREAKER (AMPS)	VOLTAGE	PHASE
A	(2) 5-15R	15A	120V	Single
B	(2) 5-20R (UL)	20A	120V	Single
C	(2) 5-20R (CSA)	20A	120V	Single
D	(2) 6-15R	15A	208V	Dual
E	(2) 6-20R	20A	208V	Dual
F	(2) L5-15R	15A	120V	Single
G	L5-20R	20A	120V	Single
H	L5-30R	30A	120V	Single
I	(2) L6-15R	15A	208V	Dual
J	L6-20R	20A	208V	Dual
K	L6-30R	30A	208V	Dual
L	L14-20R	20A	120/208V	Dual
M	L14-30R	30A	120/208V	Dual

A maximum of 10 output panels can be selected and are mounted on a Power Distribution Module.
A maximum of 6 dual phase panels can be installed. PDM ships in separate box.

SNMP Compatible

The ConnectUPS SL SNMP card fits conveniently into the Profile and provides direct monitoring and control in ethernet or token ring SNMP-based networks. The ConnectUPS SL enables you to receive and respond to UPS alarms or traps and monitor key UPS status information such as line voltage, percent of load, and battery charge.
