

Q-MAC HF-90 DISASTER RESPONSE PACKAGE

PACKAGE DESCRIPTION

The Q-MAC HF-90 Disaster Response Package is a transportable 'all-in-one' HF communications package incorporating the Q-MAC HF-90 Transceiver. *A detailed description of the Q-MAC HF-90 Transceiver, together with technical specifications, is provided on a separate brochure.*

Along with the HF-90 Transceiver, the package contains a variety of antennas, power/charger systems, carry packs/cases and mounting accessories. Using the appropriate combination of HF-90 Transceiver and accessories, the operator will have the ability to set up any of the following systems:

- Manpack system (walk and talk)
- Portable systems (stop and deploy) - different combinations possible
- Fixed vehicle system (mobile)
- Fixed base station system - using AC mains power

Such a package offers full flexibility to the operator in the field, who may not know what type of communications system is required until a disaster area has been surveyed. Additional HF-90 Transceivers may be added to the package as required (optional), so that a variety of systems can be achieved simultaneously.

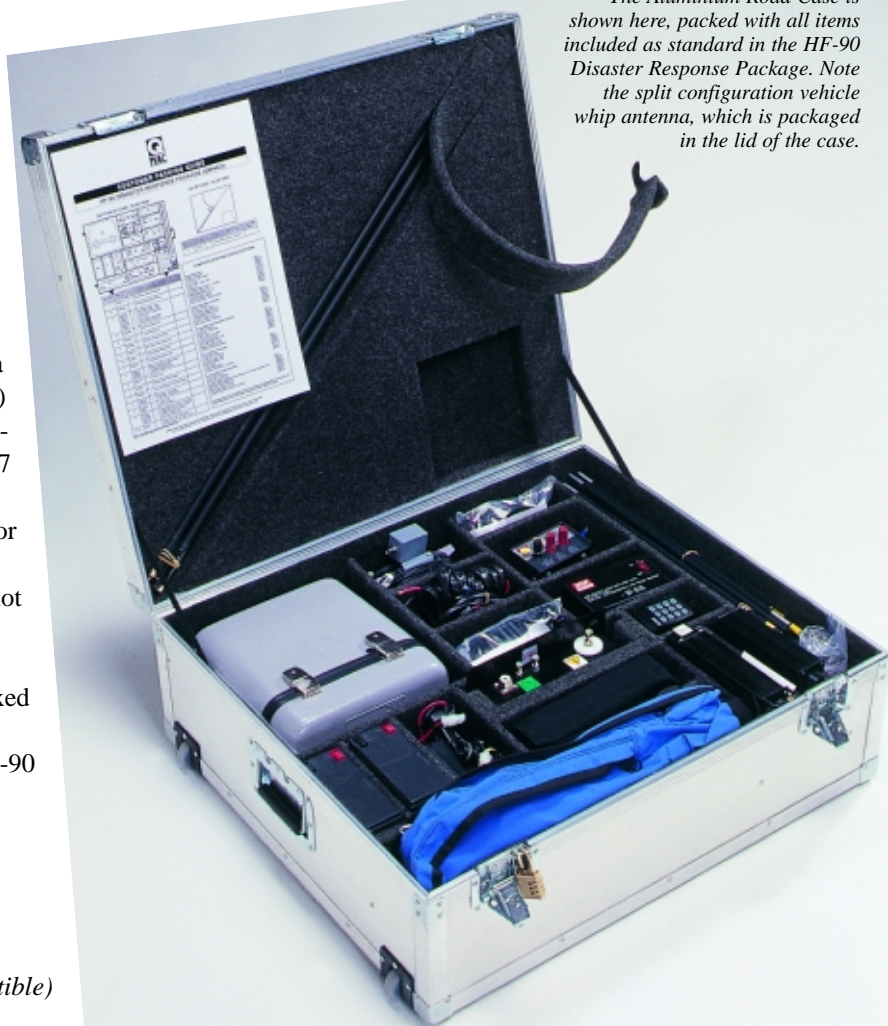

This package is designed specifically for humanitarian and emergency services organisations that must be able to deploy staff and equipment into a disaster area within a very short time frame. The entire package is conveniently housed in a sturdy aluminium road case with wheels, so that it may be transported by a single person. The case also incorporates a permanent packing list under the lid. This allows the package to be transported to site, deployed, returned to headquarters and then re-stocked for future use.

PACKAGE INCLUDES

- 1 x Q-MAC HF-90 Transceiver c/w Advanced Option* (includes DTMF Microphone)
- Q-MAC Antenna Systems:
 - 1 x TM-90 Tuner (single control) c/w coax & ground cables
 - 1 x Long Wire Antenna Kit (for use with TM-90 Tuner - 2.5 to 10MHz)
 - 1 x 6-Section Collapsible Whip Antenna (for use with TM-90 Tuner - 3.6 to 10MHz)
 - 1 x Extender Coil Section (for use with TM-90 Tuner, together with 6-section whip - 2.7 to 3.6MHz)
 - 1 x 2-Section Collapsible Whip Antenna (for use with TM-90 Tuner - 4 to 12.9MHz)
 - 1 x Portable Broadband Antenna (does not require any tuner - 2 to 30MHz)
 - 1 x TA-90 Tuner (automatic)
 - 1 x TA-90 Mounting Kit (suited to fixed vehicle installation)
 - 1 x Vehicle Whip Antenna (for use with TA-90 Tuner - 2 to 20MHz) - split configuration

Continued Overleaf

* Provides Selcall facilities (Codan compatible) and field programming ability.

The Aluminium Road Case is shown here, packed with all items included as standard in the HF-90 Disaster Response Package. Note the split configuration vehicle whip antenna, which is packaged in the lid of the case.
