

RICOH® DEVICE OPTION UTILITY FOR METAFRAME

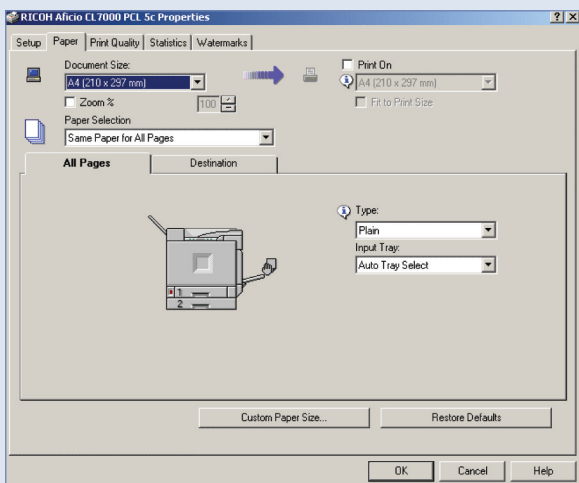

Expand Your Remote Printing Capabilities

All Ricoh MFPs and Printers are already compatible with Citrix® MetaFrame™, this utility supports the MFP and Printer options such as finishing, duplexing and optional paper trays, which are not supported by standard printer installations of MetaFrame.

Device Option Utility for Citrix® MetaFrame™ is available for no charge via www.ricoh-usa.com and integrates with your workflow in minutes, plus enhances print versatility by:

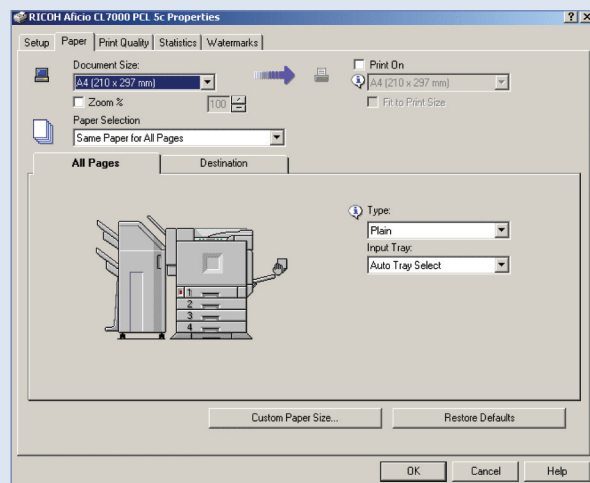

- ▶ Allowing System Administrators to set up MFPs and printers for Aficio™ devices that are compatible* with Citrix® MetaFrame™. Users can then enjoy the full functionality of enhanced print features/options thanks to the, "Auto Create Printer and Device Option Utility Software."
- ▶ Capitalizing on the enhanced printing options that were once not possible within a Citrix® MetaFrame™ environment, such as:
 - Optional paper trays to handle a variety of stocks/sizes, then making appropriate tray selections from multiple drawers
 - Duplexing for convenient two-sided printing
 - Finishing documents with stapling or hole-punching
 - Sending files to the MFP/Printer
 - Directing documents to the mailbox output bin
- ▶ Cost-effectively expanding your print management capabilities. The Auto Installed Printers feature automatically tells the server where the printer you're using is located and what its capabilities are, so you have instant access to a network printer plus all the features you need to create a finished document.

Without Device Option Utility

Citrix® MetaFrame™ will only allow users to see the default settings on the main unit

With Device Option Utility

Ricoh's Device Option Utility allows access to optional printing functions

*See back for complete listing of compatible models and take full advantage of Ricoh's printing and finishing capabilities.
