* H3061410 contains the stepper motor, the stepper motor cushion and the motor bracket.

In some cases, the stepper motor bracket rattles due to the vibration of the stepper motor, causing a squeaking noise. To ensure this does not occur, the bracket and rear slow down gear have been modified. In addition, the motor, bracket and cushion have been grouped under one part number (H3061410).

Therefore in the field, all four parts (gear and motor assembly) should be replaced together as a set.

The Pickup Roller has been changed due to parts standardization with the new model Kaiser 3 (to be released in the near future).

Note:

1. The color of the new roller is gray (the previous roller was black). Since there is no difference in performance (int. 0/0), both rollers can be used for both models.
2. The new roller will not be used on the Kaiser 1 production line.

The material of the following part has been changed to improve the endurance of the pressure roller bushing.

<Symptom>

Poor fusing was found in the field as the pressure roller bushing was shaved.
 A chip on the axis of the pressure roller caused the problem.
