

Model: Model-J CF		Date: 26-May-03	No.: MG570001
Modified Article: DIMM		Prepared by: Hideki Taguchi	
From: 1st Tech. Support Sec. Service Support Dept.			
Reason for Modification:	<input type="checkbox"/> Parts catalog correction <input type="checkbox"/> To facilitate assembly <input type="checkbox"/> Part standardization	<input type="checkbox"/> Vendor change <input checked="" type="checkbox"/> To improve reliability <input type="checkbox"/> Other	<input type="checkbox"/> To meet standards (      )

The contents of the System firmware DIMM have been changed. See RTB #RG570002 for the v1.07 firmware history.

Major changes made:

- The meter click counter specification has been changed so that copies made in SP mode are not counted up.  
**Note:** Be sure to use v1.07 with engine main firmware v1.15e or later, as SC999 will occur with older engine main versions.
- Fixed centering problem when printing onto 12" x 18" paper.
