R&S®SFE100
Test Transmitter
Installation Instructions for Options

Requirements

- The latest firmware version (2112.4439.00) must be installed on your R&S SFE100. If you need to update your firmware, follow the instructions in the release notes.
- For information on options that must be installed refer to the R&S Home Page.

Installing the License Code

You can perform the following steps using manual or remote operation. For details on the operating concepts refer to the user manual of the R&S SFE100.

1. In the "HARDKEY" menu, select "SETUP".
2. In the menu tree, select "SOFTWARE OPTIONS" → "INSTALL OPTIONS".
3. In the work view under "OPTION KEY", enter the license key from the software option list supplied with the option.
4. Confirm your entry using the "ENTER" key.
   If the key code is accepted, the response number together with the message "KEY OK" is displayed after a few seconds.
5. Reboot the R&S SFE100 and check whether the option is active:
   "SETUP" → "SOFTWARE OPTIONS" → "ACTIVE OPTIONS".

Installing the Library

If the transport stream files are supplied together with a new R&S SFE100, the files and the license key are already installed. To install the transport stream files on your R&S SFE100, proceed as follows.

1. Copy the transport stream files from the DVD to USB stick, external USB HDD, or use the DVD with an external USB DVD drive.
2. Connect the USB stick, USB HDD or the external USB DVD drive to USB connector of the R&S SFE100.
3. Copy the main folder and its contents from your library disc(s) to the "D:\" directory.
