

HF Receiving Antenna HA105

Brief description

Due to its small size and low weight, the HF Receiving Antenna HA105 is particularly suitable for use in mobile stations and on ships. The V-shaped arrangement of the radiators enables this antenna to be used for the reception of both horizontally and vertically polarized signals.

- Wide frequency range,
- Small size
- Omnidirectional horizontal pattern for reception of high-angle signals
- Suitable for mobile and stationary use

Specifications

Frequency range	1.5 to 30 MHz
Polarization	horizontal and vertical
Nominal impedance	50 Ω
Connector	N female
Weight	
HA 105/1/50	14 kg (with stand)
HA 104/11/50	5 kg
Particularly suitable for	
HA 105/1/50	mobile use
HA 104/11/50	stationary use
Dimensions	
Length of radiators	approx. 3.6 m
