LICENSE ISSUES
==============
The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

LICENSE AGREEMENT

LICENSE AGREEMENT

This license agreement covers your use of the iMatix Corporation XITAMI WEBSERVER, its source code, documentation, and executable files, hereinafterreferred to as "the Product".

The Product is Copyright (c) 1991-2003 iMatix Corporation. You may use it anddistribute it according to this following License Agreement. If you do notagree with these terms, please remove the Product from your system. Byincorporating the Product in your work or distributing the Product to othersyou implicitly agree to these license terms.

This License Agreement covers the current version of The Product. iMatixCorporation reserves the right to modify the terms of this License Agreementat any moment, and without prior notification, in future releases of TheProduct.

STATEMENT OF COPYRIGHT

The Product is, and remains, copyright 1991-99 iMatix Corporation, withexception of specific copyrights as noted in the individual source files.

GENERAL CONDITIONS

The Product is provided in two forms: as a ready-to-run installation kitconsisting of executable programs, help files, etc. (the "ProductExecutable") and as a package of source files, the "Product Sources".

You may freely use and distribute the Product Executable so long as youprovide the complete and unmodified original Product Executable installationkit as supplied by iMatix Corporation.

The Product Sources fall under the License Agreement for the iMatix SMTproduct. The applicable terms and conditions are repeated here.

CONDITIONS OF USE FOR PRODUCT SOURCES

You do not need to provide the source code for the Product as part of yourproduct. However, you must do one of these things to comply with the ProductLicense Agreement:

1. Provide the source code for Product modules that you use, and includethis License Agreement, or

2. Make your product freely available according to a license similar tothe GNU General Public License, or the Perl Artistic License, or thisLicense Agreement, or

3. Add this phrase to the documentation for your product: "This productuses parts of the SMT Kernel, Copyright (c) 1991-2003 iMatix Corporation<http://www.imatix.com>".

RIGHTS OF USAGE

You may freely and at no cost use the Product in any project, commercial,academic, military, or private, so long as you respect the LicenseAgreement. The License Agreement does not affect any software except theProduct. In particular, any application that uses the Product does notitself fall under the License Agreement.

You may modify any part of the Product, including sources and documentation,except this License Agreement, which you may not modify.

You must clearly indicate any modifications at the start of each sourcefile. The user of any modified Product code must know that the source fileis not original.

At your discretion, you may rewrite or reuse any part of the Product so thatyour derived code is not obviously part of the Product. This derived codedoes not fall under the Product License Agreement directly, but you mustinclude a credit at the start of each source file indicating the originalauthorship and source of the code, and a statement of copyright as follows:

"Parts copyright (c) 1991-99 iMatix Corporation"

RIGHTS OF DISTRIBUTION

You may freely distribute the Product, or any subset of the Product, by anymeans. This covers, but is not limited to, distribution of binaries builtfrom original or modified copies of the product source code. The License, inthe form of the file called "LICENSE.TXT" must accompany any suchdistribution.

You may charge a fee for distributing the Product, for providing a warrantyon the Product, for making modifications to the Product, or for any otherservice provided in relation to the Product. You are not required to ask ourpermission for any of these activities.

At no time will iMatix Corporation associate itself with any distribution ofthe Product except that supplied from the iMatix Corporation Internet sitehttp://www.imatix.com.

DISCLAIMER OF WARRANTY

The Product is provided as free software, in the hope that it will beuseful. It is provided "as-is", without warranty of any kind, eitherexpressed or implied, including, but not limited to, the implied warrantiesof merchantability and fitness for a particular purpose. The entire risk asto determining the suitability, quality and performance of the Product iswith you. Should the Product prove defective, the full cost of repair,servicing, or correction lies with you.

TECHNICAL SUPPORT

Limited technical support can be had from support@imatix.com. Full guaranteed technical support is subject to an iMatix Corporation supportlicense: current prices and commercial conditions can be had on request fromsales@imatix.com.

2.5 The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package,while giving the users of the package the right to use and distributethe Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

- "Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

- "Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishesof the Copyright Holder.

- "Copyright Holder" is whoever is named in the copyright orcopyrights for the package.

- "You" is you, if you're thinking about copying or distributing this Package.

- "Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

- "Freely Available" means that no fee is charged for the itemitself, though there may be fees involved in handling the item.

It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Packagemodified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a

prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of thefollowing:

a) place your modifications in the Public Domain or otherwise make them

Freely Available, such as by posting said modifications to Usenet oran equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code orexecutable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files,together with instructions (in the manual page or equivalent) on whereto get the Standard Version.

b) accompany the distribution with the machine-readable source ofthe Package with your modifications.

c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executablesnon-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to getthe Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this

Package. You may charge any fee you choose for support of this Package.

You may not charge a fee for this Package itself. However,

you may distribute this Package in aggregate with other (possiblycommercial) programs as part of a larger (possibly commercial) software

distribution provided that you do not advertise this Package as aproduct of your own.

6. The scripts and library files supplied as input to or produced asoutput from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTIBILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The End.

2.9 GNU Lesser General Public License

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.
As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library.
Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.
You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.
If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.
The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.
You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.
