

Careers in the next generation

UK

Today's RF and digital technology demands that we train our sales and application engineers to a high standard in measurement technology in support of our client base who are developing the future generation of products in the Mobile Communications, Digital Multimedia, Optoelectronics, Microwave and Automotive sectors.

With Rohde & Schwarz your future in this complex digital world of broadcast,

multi-media home platforms and wireless communication is assured.

To apply for a position you will be equipped with a suitable degree/HNC and/or experience in one of the disciplines. You will enjoy some travel and be solution orientated.

In return you will become a member of a well respected team, receive a good salary and benefits package with excellent potential, plus a rewarding career.
