Within each range, multiple curves represent different measurement conditions, generally showing an increase in error as the return loss increases.</p>	
Power-handling capacity	<p>The graph plots Forward power (W) on the y-axis (from 100 to 1000) against Frequency (GHz) on the x-axis (from 0.2 to 4 GHz). Three curves are shown: PEAK (max. 10 ms), VSWR ≤ 3; AVG -10 °C to 35 °C VSWR ≤ 3; and AVG 35 °C to 50 °C VSWR ≤ 3. All curves show a general decrease in power as frequency increases, with the peak power curve being the highest and the average power curves being lower at higher frequencies.</p>
