

Vehicle Installations

Sliding Roof Carriage

We specialise in our customer's personal requirements. Just one of our installation options is a Sliding Roof Carriage that is mounted on top of the vehicle. Typical vehicles which have this kind of installation are 4x4's and vans, however we can fit to almost anything, even lorry cabins and containers. Not only do we fit the mast, but we offer our skills of interior design and fitment, creating a work space and suitable facilities within the vehicle at the customers requirements. Our interior fittings can range from a simple power inverter and split charger to a full installation of the following:

Masts up to 30m

Ideal for use with a HiloCAM
High Level Photography System

- Split charger
- Auxiliary battery
- Power inverter to invert 12V to mains
- Mains sockets
- Cigarette lighter socket
- Voltmeter for Aux. power
- Interior lighting
- Desking and seating
- Suitable work surfacing
- Vehicle levelling

The Carriage

- Zinc plated steel, heavyduty sliding carriage
- Re-inforced roofrack
- Optional safety harness
- Any colours available

Mast is easily deployed in under 15 minutes...

Vehicle Installations

Through The Roof

The alternative installation to a sliding roof carriage is the 'Through The Roof' fitment, fitting through the vehicle's roof skin and bolted to the interior floor. Using the vehicle roof bearings we can create a 100% waterproof seal, keeping the inside area of the vehicle completely dry. Typical vehicles which have this kind of installation are 4x4's and vans, however we can fit to almost anything, even lorry cabins and containers or cars. Not only do we fit the mast, but we offer our skills of interior design and fitment, creating a work space and suitable facilities within the vehicle at the customers requirements. Our interior fittings can range from a simple power inverter and split charger to a full installation of the following:

- Split charger
- Auxiliary battery
- Power inverter to invert 12V to mains
- Mains sockets
- Cigarette lighter socket
- Voltmeter for Aux. power
- Interior lighting
- Desking and seating
- Suitable work surfacing

The Installation

- Waterproof roof bearings
- Less obtrusive than a mast carriage
- Mobile office interior
- Vehicle colour matching available

Masts up to 30m

100% Waterproof Seal

Ideal for use with a Hilo **CAM**
High Level Photography System
