SAILOR 33 Fleet+   Installation Check List   1

The check list is an aid in securing that all necessary settings have been made following the installation of SAILOR 33 Fleet+.

References are made to the SAILOR 33 Fleet+ **Getting Started** *manual and the* **User Guide** *on the enclosed CD.*

Configuration from PC is done by downloading the SAILOR vtLite program from the CD, see **Getting Started** > *Installing the PC program.*

Check that all grounding conditions are according to the installation appendix in Getting Started!

Antenna Unit
When placing the antenna avoid obstructions and interference.

Below Deck Equipment
Ensure a free space around the BDU of at least 10 cm for adequate cooling, and *to allow removal of the unit.*

Ref No		Action	Function	No	Comments/settings
1	❑	Switch ON SAILOR 33 Fleet+. (wait for initialization to finish)			Disregard alarm readouts
