Precautions When Displaying a Still Image

A still image may cause permanent damage to the TV screen.

- Digital Ready TV: When you select the regular screen (4:3) mode to watch an SD-grade digital broadcast (and the Set-Top Box output is 480p).

- Digital Ready TV: When you select the wide screen (16:9) mode to watch an SD-grade digital broadcast (and the Set-Top Box output is 1080i).

Although digital broadcasting must be in the wide screen (16:9) HD format, broadcasters sometimes show programs made originally in the regular screen format (4:3) by converting the signals into digital form, in which case the left and right side edges of the screen are cropped.

Note: If the borders at the left, right and the center of the screen remain fixed for an extended period of time, the amount of light transmission will also remain varied and as a result the borders may leave traces.

Do not leave the screen in pause mode for extended periods of time as you may experience temporary or permanent image burn.

- Digital Ready TV: When the TV receives HD-grade signals (and the Set-Top Box output is 1080i).

When you watch a digital HD-grade broadcast on a regular (4:3) TV with the screen size "16:9" or "Panorama" selected, you will be able to watch the program but the top and bottom edges of the screen will be cropped.

Note: If the borders at the top, bottom and the center of the screen remain fixed for an extended period of time, the amount of light transmission will also remain varied and as a result the borders may leave traces.
Do not leave the screen in pause mode for extended periods of time as you may experience temporary or permanent image burn.

• Integrated Digital TV (Wide-screen): When the TV receives SD-grade (regular) broadcasting signals (receives 480p regular signals).

• Digital Ready TV (wide-screen): digital TV: When the TV receives SD-grade (regular) broadcasting signals (with a Set-Top Box).

• When you watch an analog (regular) broadcast on a wide-screen TV (with the 4:3 screen mode selected).

Although digital broadcasting must be in the wide screen (16:9) HD format, broadcasters sometimes show programs made originally in the regular screen format (4:3) by converting the signals into digital form, in which case the left and right side edges of the screen are cropped.
Note: If the borders at the left, right and the center of the screen remain fixed for an extended period of time, the amount of light transmission will also remain varied and as a result the borders may leave traces.

Do not leave the screen in pause mode for extended periods of time as you may experience temporary or permanent image burn.

• When you watch a DVD, CD or a video in wide-screen (21:9) format on a wide-screen (16:9) TV.

• When you connect a computer or a game console to the TV and select the 4:3 screen mode.

If you connect a DVD player, computer or a game console to the wide-screen TV and watch a movie or play a game in regular (4:3) or wide (21:9) screen mode, the left and right side edges, or the top and bottom edges of the screen will be cropped.

Note: If the borders at the left, right and the center of the screen remain fixed for an extended period of time, the amount of light transmission will also remain varied and as a result the borders may leave traces.

Do not leave the screen in pause mode for extended periods of time as you may experience temporary or permanent image burn.

Chapter 1

List of Features

● Excellent Digital Interface & Networking :
   With a built-in HD digital tuner, this TV supports HD broadcasts with no
   Set-Top Box needed, and provides simple access with a single remote control.

● Excellent Picture Quality

   - DNIe technology provides life-like clear images.
   - My Color Control: Colors can be set to your preference by adjusting Red, Green, Blue,
                        Yellow, Pink, and White.
   - Dynamic Contrast: Automatically detects the input visual signal and adjusts to create
                       optimum contrast.
   - Brightness Sensor: Adjusts the screen brightness automatically depending on the
                        brightness of the surrounding environment.

● SRS TruSurround XT
   - SRS TruSurround XT provides a virtual Dolby surround system.

● Convenience
   - The TV utilizes the HDMI system to implement perfect digital sound and picture quality.
   - The Anynet system enables you to easily control Samsung audio-video (AV) devices
     from this TV.
   - For more information about Anynet, refer to the Anynet AV Owner's Instructions.

List of Parts

Please make sure the following items are included with your LCD TV.
If any items are missing, contact your dealer.

Remote Control (BN59-00460A) & Batteries (AAA x 2)	Power Cord (3903-000085)	Cleaning Cloth (BN63-001798A)	Anynet Cable (BN39-00518B)
Cover-Bottom LN-R269D/LN-R329D: BN63-01947A LN-R409D: BN63-01938A LN-R469D: BN63-01810A	Stand LN-R269D: BN96-02203A LN-R329D: BN96-02202A	Anynet AV Owner's Instructions	Owner's Instructions
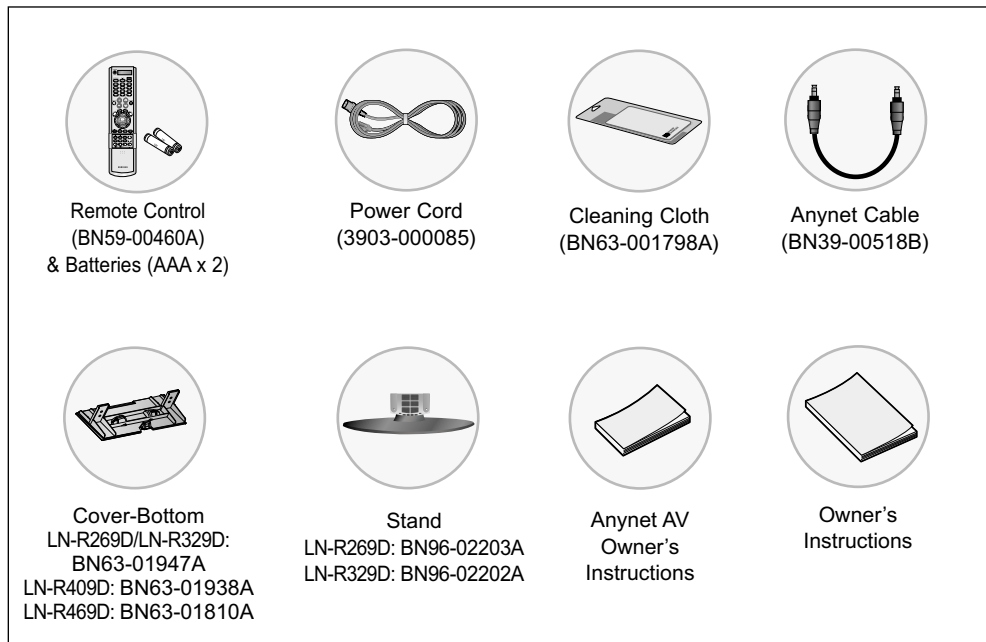

Familiarizing Yourself with Your New TV

Buttons on the Lower-Right Part of the Panel

The buttons on the lower-right panel control your TV's basic features, including the on-screen menu. To use the more advanced features, you must use the remote control.
❶ **SOURCE** ⊕
Displays a menu of all of the available input sources.
- LN-R269D
  - TV, AV, S-VIDEO, Component 1, Component 2, PC, HDMI
- LN-R329D / LN-R409D / LN-R469D
  - TV, AV 1, AV 2, S-VIDEO 1, S-VIDEO 2, Component 1, Component 2, PC, HDMI

Also used to confirm your choice on the on-screen menu.

❷ **MENU**
Press to see an on-screen menu of your TV's features.

❸ **− VOL +**
Press to decrease or increase the volume. Also used to select items on the on-screen menu.

❹ **∨ CH ∧**
Press to change channels. Also press to highlight various items on the on-screen menu.

❺ ⏻ **(POWER)**
Press to turn the TV on and off.

❻ **POWER INDICATOR**
Blinks and turns off when the power is on and lights up in stand-by mode.

❼ **REMOTE CONTROL SENSOR**
Aim the remote control towards this spot on the TV.

❽ **LIGHT DETECTING SENSOR**
Adjusts the brightness of the screen automatically by detecting brightness of the surrounding environment. This sensor works when the Brightness Sensor is on.

❾ **SPEAKERS**

Rear Panel Jacks

Use the rear panel jacks to connect an A/V component that will be connected continuously, such as a VCR or a DVD player.
For more information on connecting equipment, see pages 8-18.

The TV surface can be different depending on the model.

LN-R269D

LN-R329D

LN-R409D / LN-R469D
❶ **PC IN**
Connect to the video and audio output jacks on your PC.

❷ **HEADPHONE (LN-R269D)**
Connect a set of external headphones for private listening.

❸ **AUDIO OUT**
Connect to the audio input jacks on your Amplifier/Home theater.

❹ **Anynet**
Refer to "Anynet AV Owner's Instructions".

❺ **SERVICE**
Connector for service only.

❻ **COMPONENT IN**
Connect component video/audio from a DVD/Set-Top Box.

❼ **AV IN (1)**
Video and audio inputs for external devices, such as a camcorder or VCR.

❽ **S-VIDEO IN (1)**
Video inputs for external devices with an S-Video output, such as a camcorder or VCR.

❾ **DIGITAL AUDIO OUT (OPTICAL)**
Connect to a Digital Audio component.

❿ **HDMI/DVI IN**
Connect to the HDMI jack of a device with an HDMI output. Use the HDMI/DVI terminal for DVI connection to an external device. You should use the DVI to HDMI cable or DVI-HDMI adapter (DVI to HDMI) for the connection, and the 'R -AUDIO -L' terminal on DVI-IN for sound output.
 - HDMI/DVI IN terminal does not support PC.
 - No sound connection is needed for an HDMI to HDMI connection.

⓫ **ANT IN**
Connect to an antenna or to a cable TV system. (See pages 8-11, 61)

⓬ **POWER INPUT**
Connect the supplied power cord.

⓭ **KENSINGTON LOCK**
Refer to "Using the Anti-Theft Kensington Lock" on page 124.

⓮ **CABLE CARD (LN-R409D/LN-R469D)**
Insert the cableCARD into the slot.

Side Panel Jacks (LN-R329D, LN-R409D, LN-R469D)

Use the left side panel jacks to connect a component that is used only occasionally, such as a camcorder or video game. (See page 15)
❶ **S-VIDEO IN (2)**
Video inputs for external devices with an S-Video output.

❷ **AV IN (2)**
Video and audio inputs for external devices.

❸ **HEADPHONE**
Connect a set of external headphones for private listening.

	Speaker			Audio Out		
	RF	AV, S-Video	Component, PC, HDMI	RF	AV, S-VIDEO	Component, PC, HDMI
Internal Mute Off	Speaker Output	Speaker Output	Speaker Output	Sound Output	Sound Output	Sound Output
Internal Mute On	Mute	Mute	Mute	Sound Output	Sound Output	Sound Output
Video No Signal	Mute	Mute	Mute	Mute	Sound Output	Sound Output

When "Internal mute" is set to "On", Sound menus except "Multi-Track Options" and "Digital Output" cannot be adjusted.

Remote Control

You can use the remote control up to a distance of about 23 feet from the TV. When using the remote, always point it directly at the TV. You can also use your remote control to operate your VCR, Cable box, DVD player, or Set-Top Box.
❶ POWER⏻
Turns the TV on and off. (See page 19)

❷ ANTENNA
Press to select "AIR" or "CABLE". (See pages 8~11)

❸ GUIDE
Press to display the on-screen Electronic Program Guide (EPG). (See page 104)

❹ -
Press to select additional channels (digital and analog) being broadcast by the same station. For example, to select channel "54-3", press "54", then press "-" and "3".

❺ MUTE
Press to temporarily cut off the sound. (See page 19)

❻ MENU ▥
Displays the main on-screen menu. (See page 20)

❼ MODE
Selects a target device to be controlled by the Samsung remote control (TV, VCR, CATV, DVD, STB). (See pages 29~31)

❽ NUMERIC BUTTONS
Press to change the channel.

❾ PRE-CH
Turns to the previous channel. (See page 19)

❿ CH ⌃ and CH ⌄ (Channel UP/Down)
Press to change channels. (See page 19)

VOL + and VOL -
Press to increase or decrease the volume. (See page 19)

⓫ SOURCE
Press to display all of the available video sources.

⓬ UP / DOWN / LEFT / RIGHT / ENTER
Use to select on-screen menu items and change menu values.

⓭ FAV.CH
Press to switch to your favorite channels. (See page 62)

⓮ MTS
Press to choose stereo, mono or Separate Audio Program (SAP broadcast). (See pages 55~56)

⓯ PIP
Picture-in Picture ON/OFF. (See page 44)

⓰ CH.LIST
Displays the channel list. (See page 64)
⑰ Anynet
Press the Anynet button to bring up the Anynet menu.
Refer to "Anynet AV Owner's Instructions".

⑱ STILL
Press to stop the action during a particular scene.
Press again to resume normal video. (See page 43)

⑲ P.SIZE
Press to change the screen size. (See page 41~42)

⑳ DNIe
Off : DNIe Demo mode is deactivated.
On : The right-hand side of the screen shows the improved DNIe image.
The left-hand side of the screen shows the original image. (See page 40)

㉑ SRS
Selects TruSurround XT mode. (See page 54)

㉒ SET
Adjusts 5 separate devices - TV, VCR, Cable, DVD, or Set-Top Box. (See pages 29~31)

㉓ INFO
Use to see information on the current broadcast. (See page 20)

㉔ EXIT
Press to exit the menu.

㉕ SLEEP
Press to select a preset time interval for automatic shut off.

㉖ ⌃ CH ⌄
Displays the available channels in sequence. (These buttons change channels in the PIP window only.) (See page 46)

㉗ CAPTION
Controls the caption decoder. (See pages 87~91)

㉘ VCR/DVD Functions (Anynet mode only)
- Rewind
- Stop
- Play/Pause
- Fast/Forward

㉙ RESET
When your remote does not work, change the batteries and press the RESET button for 2-3 seconds before use.

Installing Batteries in the Remote Control

1

Slide the Cover out completely.
2

Install two AAA size batteries.
◄ Make sure to match the "+" and "−" ends of the batteries with the diagram inside the compartment.

3

Replace the cover.
◄ Remove the batteries and store them in a cool, dry place if you won't be using the remote control for a long time.

The remote control can be used up to about 23 feet from the TV. (Assuming typical TV usage, the batteries last for about one year.)

If the remote control doesn't work

Check the following:

1. Is the TV power on?

2. Are the plus and minus ends of the batteries reversed?

3. Are the batteries drained?

4. Is there a power outage, or is the power cord unplugged?

5. Is there a special fluorescent light or a neon sign nearby?

Chapter 2

CONNECTIONS

Connecting VHF and UHF Antennas

If your antenna has a set of leads that look like this, see "Antennas with 300-ohm Flat Twin Leads" below.
If your antenna has one lead that looks like this, see "Antennas with 75-ohm Round Leads" on page 9.

If you have two antennas, see "Separate VHF and UHF Antennas" on page 9.

Antennas with 300-ohm Flat Twin Leads

If you are using an off-air antenna (such as a roof antenna or "rabbit ears") that has 300-ohm twin flat leads, follow the directions below.

1
Place the wires from the twin leads under the screws on a 300-75 ohm adapter (not supplied). Use a screwdriver to tighten the screws.
2
Plug the adaptor into the ANT 1 IN (CABLE) terminal on the back of the TV.

ANT 1 IN (CABLE)
Antennas with 75-ohm Round Leads

1

Plug the antenna lead into the ANT 2 IN (AIR) terminal on the back of the TV.

ANT 2 IN
(AIR)
Separate VHF and UHF Antennas

If you have two separate antennas for your TV (one VHF and one UHF), you must combine the two antenna signals before connecting the antennas to the TV. This procedure requires an optional combiner-adaptor (available at most electronics shops).

1

Connect both antenna leads to the combiner.

UHF
VHF
2

Plug the combiner into the ANT 2 IN (AIR) terminal on the bottom of the rear panel.

UHF
VHF

ANT 2 IN
(AIR)
Connecting Cable TV

To connect to a cable TV system, follow the instructions below.

Cable without a Cable Box

1

Plug the incoming cable into the ANT 1 IN (CABLE) terminal on the back of the TV.

ANT 1 IN
(CABLE)

◀ Because this TV is cable-ready, you do not need a cable box to view unscrambled cable channels.

Connecting to a Cable Box that Descrambles All Channels

1
Find the cable that is connected to the ANT OUT terminal on your cable box.

ANT IN   ANT OUT
◀ This terminal might be labeled "ANT OUT", "VHF OUT" or simply, "OUT".

2
Connect the other end of this cable to the ANT 1 IN (CABLE) terminal on the back of the TV.

ANT 1 IN (CABLE)
Connecting to a Cable Box that Descrambles Some Channels

If your cable box descrambles only some channels (such as premium channels), follow the instructions below. You will need a two-way splitter, an RF (A/B) switch, and four lengths of RF cable. (These items are available at most electronics stores.)

1
Find and disconnect the cable that is connected to the ANT IN terminal on your cable box.
ANT IN

◀ This terminal might be labeled "ANT IN", "VHF IN" or simply, "IN".

2
Connect this cable to a two-way splitter.

Incoming cable
Splitter

3
Connect an RF cable between an OUTPUT terminal on the splitter and the IN terminal on the cable box.

Incoming cable

TV Rear
After you have made this connection, set the A/B switch to the "A" position for normal viewing. Set the A/B switch to the "B" position to view scrambled channels.
(When you set the A/B switch to "B", you will need to tune your TV to the cable box's output channel, which is usually channel 3 or 4.)

Connecting a VCR

These instructions assume that you have already connected your TV to an antenna or a cable TV system (according to the instructions on pages 8-11).
Skip step 1 if you have not yet connected to an antenna or a cable system.

1
Unplug the cable or antenna from the back of the TV.
ANT IN

2
Connect the cable or antenna to the ANT IN terminal on the back of the VCR.

VCR Rear Panel

Incoming Cable or Antenna
3
Connect an RF cable between the ANT OUT terminal on the VCR and the ANT 1 IN (CABLE) or ANT 2 IN (AIR) terminal on the TV.

Video Cable (Option)

RF Cable (Option)
Follow the instructions in "Viewing a VCR or Camcorder Tape" to view your VCR tape.

* Each external input source device has a different back panel configuration.
* When connecting an external device, match the color of the connection terminal to the cable.

Connecting an S-VHS VCR

Your Samsung TV can be connected to an S-Video signal from an S-VHS VCR.
(This connection delivers a better picture as compared to a standard VHS VCR.)

1

To begin, follow steps 1–3 in the previous section to connect the antenna or cable to your VCR and your TV.
VCR Rear Panel

TV Rear Panel

RF Cable (Option)

2

Connect an audio cable between the AUDIO OUT jacks on the VCR and the AV IN [R-AUDIO-L] jacks on the TV.

Audio Cable (Option)

S-Video Cable (Option)

RF Cable (Option)
An S-Video cable is usually included with an S-VHS VCR.
(If not, check your local electronics store.)

* Each external input source device has a different back panel configuration.
* When connecting an external device, match the color of the connection terminal to the cable.

Connecting a Camcorder (LN-R329D, LN-R409D, LN-R469D)

The side panel jacks on your TV make it easy to connect a camcorder to your TV.
They allow you to view the camcorder tapes without using a VCR.

1

Connect an audio cables between the AV IN 2 / S-VIDEO 2 [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the camcorder.
2

Connect a video cable between the AV IN 2 / S-VIDEO 2 [VIDEO] (or S-VIDEO) jack on the TV and the VIDEO OUT jack on the camcorder.
Connecting a DVD Player

The rear panel jacks on your TV make it easy to connect a DVD player to your TV.

1

Connect an audio cable between the COMPONENT IN 1 or COMPONENT IN 2 [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the DVD player.
2

Connect a Component Cable between the COMPONENT IN 1 or COMPONENT IN 2 [P_R, P_B, Y] jacks on the TV and the COMPONENT [Y, P_B, P_R] jacks on the DVD player.
Note: For an explanation of Component video, see your DVD player owner's manual.
Be sure to match the component video and audio connections. For example, if connecting the video cable to COMPONENT IN 1, connect the audio cable to COMPONENT IN 1 also.

* Each external input source device has a different back panel configuration.
* When connecting an external device, match the color of the connection terminal to the cable.

Connecting a DVD Player/Set-Top Box via DVI

This can be applied only if there is a DVI Output connector on the external device.

1

Connect a DVI to HDMI cable or DVI-HDMI Adapter between the HDMI/DVI connector on the TV and the DVI connector on the DVD player/Set-Top Box.

DVD Player / Set-Top Box

TV Rear Panel

DVI to HDMI Cable (Option)

2
Connect an audio cable between the DVI IN [R-AUDIO-L] jack on the TV and the AUDIO OUT jacks on the DVD player/Set-Top Box.

DVD Player / Set-Top Box

Connecting a DVD Player/Set-Top Box via HDMI

This can be applied only if there is the HDMI Output connector on the external device.

1

Connect an HDMI cable between the HDMI/DVI connector on the TV and the HDMI connector on the DVD player/ Set-Top Box.

DVD Player Rear Panel

TV Rear Panel

HDMI Cable (Option)
What is HDMI?
- HDMI, or high-definition multimedia interface, is a next-generation interface that enables the transmission of digital audio and video signals using a single cable without compression.
- "Multimedia interface" is a more accurate name for it especially because it allows multiple channels of digital audio (5.1 channels). The difference between HDMI and DVI is that the HDMI device is smaller in size, has the HDCP (High Bandwidth Digital Copy Protection) coding feature installed, and supports multi-channel digital audio.

* Each external input source device has a different back panel configuration.
* When connecting an external device, match the color of the connection terminal to the cable.

English-16

Connecting a Digital Audio System

The rear panel jacks on your TV make it easy to connect a Digital Audio System to your TV.

1

Connect an optical cable between the DIGITAL AUDIO OUT (OPTICAL) jacks on the TV and the Digital Audio Input jacks on the Digital Audio System.

Digital Audio System

TV Rear Panel

Optical Cable (Option)

Note: 5.1CH broadcasting is possible when it is connected to an external device supporting 5.1CH. For an explanation of Component video, see your Digital Audio System owner's manual.

Connecting an Amplifier/DVD Home Theater

1

Connect an audio cable between the AUDIO OUT [R-AUDIO-L] on the TV and AUDIO IN [R-AUDIO-L] on the Amplifier/DVD Home Theater.

Amplifier/DVD Home Theater

* Each external input source device has a different back panel configuration.
* When connecting an external device, match the color of the connection terminal to the cable.

Connecting CableCARD (LN-R409D, LN-R469D)

You must obtain a CableCARD from a local cable service provider.

TV Rear Panel

CableCARD

RF Cable
1

Insert the CableCARD into the "CableCARD" slot and the message "CableCARD Inserted" is displayed on the screen. If the channel information does not exist, the message "Updating Channel List" is displayed during channel information configuration.
It could take several minutes to update the channel information depending on your cable service provider.

2

The pairing information containing a telephone number, CableCARD ID, Host ID, and other information will be displayed in about 2~3 minutes. If an error message is displayed, please contact your service provider.

3

When the channel information configuration has finished, the message "Updating Completed" is displayed, indicating that the channel list is now updated.

4

The Channel list can now be displayed by pressing the CH.LIST button.

Note
• Once the channel list has been updated, only the channels on the channel list can be selected.
• Remove the cable card by carefully pulling it out with your hands since dropping the cable card may cause damage to it.

Turning the TV On and Off

1

Press the **POWER**⏻ button
on the remote.
You can also use the **POWER**⏻
button on the front of the panel.
Changing Channels

Using the Channel Buttons

1

Press the **CH** ∧ / ∨ buttons to change channels.
When you press the **CH** ∧ / ∨ buttons, the TV changes channels in sequence.
You will see all the channels that the TV has memorized. (The TV must have
memorized at least three channels). You will not see channels that were either
erased or not memorized. See pages 21-28 to memorize channels.

Using the PRE-CH Button to select the Previous Channel

1

Press the **PRE-CH** button.
The TV will switch to the last channel viewed.

To quickly switch between two channels that are far apart, tune to one channel,
then use the number button to select the second channel. Then use the PRE-CH
button to quickly alternate between them.

Adjusting the Volume

1

Press the **VOL +/–** buttons to increase or decrease the volume.

Using Mute

At any time, you can cut off the sound using the **MUTE** button.

1

Press **MUTE** and the sound cuts off.

The word " ⊘ **MUTE** " will appear in

the lower-left corner of the screen.

2

To turn mute off, press the **MUTE** button again, or simply press the **VOL +/-** buttons.

Viewing the Display

The display identifies the current channel and the status of certain audio-video settings.

1

Press the **INFO** button on the remote control.

The TV will display the channel, the type of sound, and the status of certain picture and sound settings.

Air 7

Note
• Plug and Play can only be accessed in the TV mode.

Memorizing the Channels

Your TV can memorize and store all of the available channels for both "off-air" (antenna) and cable channels. After the available channels are memorized, use the CH ∧ and CH ∨ buttons to scan through the channels. This eliminates the need to change channels by entering the channel digits. There are three steps for memorizing channels: selecting a broadcast source, memorizing the channels (automatic) and adding and deleting channels (manual).

Selecting the Video Signal-source

Before your television can begin memorizing the available channels, you must specify the type of signal source that is connected to the TV (i.e. an antenna or a cable system).

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Channel", then press the **ENTER** button.

Setting Up Your Remote Control

After it has been set up properly, your remote control can operate in five different modes: TV, VCR, Cable, DVD, or Set-Top Box. Pressing the corresponding button on the remote control allows you to switch between these modes, and control whichever piece of equipment you choose.

Note
The remote control might not be compatible with all DVD Players, VCRs, Cable boxes, and Set-Top Boxes.

Setting Up the Remote to Operate Your VCR

1 Turn off your VCR.

2 Press the MODE button and make sure that the VCR appears on the LCD screen.

3 Press the **SET** button on your TV's remote control.

4 Using the number buttons on your remote control, enter three digits of the VCR code listed on page 32 of this manual for your brand of VCR. Make sure you enter three digits of the code, even if the first digit is a "0". (If more than one code is listed, try the first one.)

5 Press the **POWER** ⏻ button on the remote control. Your VCR should turn on if your remote is set up correctly.

If your VCR does not turn on after set-up, repeat steps 2, 3 and 4, but try one of the other codes listed for your brand of VCR. If no other codes are listed, try each VCR code, 000 through 072.

Note on Using Remote Control Modes: VCR
When your remote control is in "VCR" mode, the volume buttons still control your TV's volume.

Setting Up the Remote to Operate Your Cable Box

1 Turn off your cable box.

2 Press the MODE button and make sure that the CATV appears on the LCD screen.

3 Press the **SET** button on your TV's remote control.

4 Using the number buttons on your remote control, enter three digits of the cable box code listed on page 32 of this manual for your brand of cable box. Make sure you enter three digits of the code, even if the first digit is a "0".
If there is more than one code listed, try the first one.

5 Press the Power button on the remote control. Your cable box should turn on if your remote is set up correctly.

If your cable box does not turn on after set-up, repeat steps 2, 3 and 4, but try one of the other codes listed for your brand of cable box. If no other codes are listed, try each code, 000 through 045.

Note on Using Remote Control Modes: Cable Box
When your remote control is in "CATV" mode, the volume buttons still control your TV's volume.

Setting Up the Remote to Operate Your DVD

1 Turn off your DVD.

2 Press the MODE button and make sure that the DVD appears on the LCD screen.

3 Press the **SET** button on your TV's remote control.

4 Using the number buttons on your remote control, enter three digits of the DVD code listed on page 32 of this manual for your brand of DVD. Make sure you enter three digits of the code, even if the first digit is a "0".
If there is more than one code listed, try the first one.

5 Press the Power button on the remote control. Your DVD should turn on if your remote is set up correctly.

If your DVD does not turn on after set-up, repeat steps 2, 3 and 4, but try one of the other codes listed for your brand of DVD. If no other codes are listed, try each code, 000 through 009.

Note on Using Remote Control Modes: DVD
When your remote control is in "DVD" mode, the volume buttons still control your TV's volume.

To Select the Source

Use to select TV or other external input sources connected to the TV.
Use to select the input source of your choice.

Some OSD can be different depending on the model.

1

Press the **MENU** ▥ button to display the on-screen menu.

Press the **ENTER**☑ button to select "Input".

2-1 (LN-R269D)

Press the **ENTER**☑ button to select "Source List".

Press the **UP/DOWN** ▲▼ buttons to select signal source, then press the **ENTER**☑ button.

Press the **EXIT** button to exit.

◄ (LN-R269D)

• When you connect equipment to the LCD, you can choose between the following sets of jacks: TV, AV, S-Video, Component 1, Component 2, PC, or HDMI on the TV's rear panel.
• HDMI input can only be selected when the external device is turned on and connected via HDMI.

2-2 (LN-R329D / LN-R409D / LN-R469D)

Press the **ENTER**☑ button to select "Source List".

Press the **UP/DOWN** ▲▼ buttons to select signal source, then press the **ENTER**☑ button.

Press the **EXIT** button to exit.

◄ (LN-R329D/LN-R409D/LN-R469D)

• When you connect equipment to the LCD, you can choose between the following sets of jacks: TV, AV1, AV2, S-Video1, S-Video2, Component 1, Component 2, PC, or HDMI on the TV's rear panel.

• HDMI input can only be selected when the external device is turned on and connected via HDMI.

• For 32", 40" and 46", AV2/S-Video2 is placed on the side of the TV.

Alternate method:

Press the **SOURCE** button on the remote control to view an external signal source.
Note

You can choose only those external devices that are connected to the TV.

To Edit the Input Source Name

Name the device connected to the input jacks to make your input source selection easier.
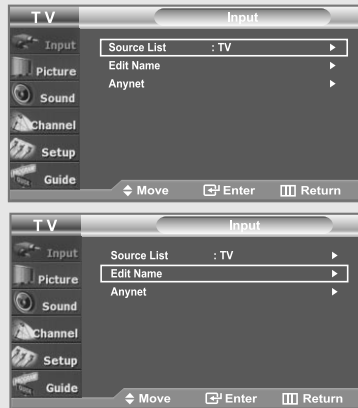

Some OSD can be different depending on the model.

1

Press the **MENU** button to display the on-screen menu.

Press the **ENTER** button to select "Input".

Press the **UP/DOWN** ▲▼ buttons to select "Edit Name", then pressthe **ENTER** button.

3

Press the **LEFT/RIGHT** ◀▶ buttons to select the screen format you want.

Press the **ENTER** button.

Press the **EXIT** button to exit.

| TV		Size		
Input				
Picture				
Sound				
Channel	16:9	Panorama	Zoom1 Zoom2	4:3
Setup				
Guide	◀▶ Move	Enter	Return	

• 16:9 : Sets the picture to 16:9 wide mode.

• Panorama : Use this mode for the wide aspect ratio of a panoramic picture.

• Zoom1 : Magnifies the size of the picture on the screen.

• Zoom2 : Expands the Zoom1 format picture.

• 4:3 : Sets the picture to 4:3 normal mode.

When you press the P.SIZE button under the cover of the remote control, the TV's screen mode should appear in sequence. The screen displays in this order: 16:9, Panorama, Zoom1, Zoom2, 4:3.
Note
• If you watch a still image or the 4:3 mode for a long time (over 2 hours), an image may be burned onto the screen. View the TV in 16:9 or Panorama mode as much as possible.

• HD (High Definition)
 16:9 - 1080i (1920x1080)
        720P (1280x720)
16:9
Sets the picture to 16:9 wide mode.

Panorama
Converts regular 4:3 aspect ratio screen to wide screen.

Zoom1
The screen size when Wide screen is vertically enlarged.

Zoom2
The screen size when the Zoom1 screen is vertically enlarged.

4:3
Sets the picture to 4:3 normal mode.

Note
• In TV, VIDEO, S-VIDEO,and all COMPONENT (480i, 480p) modes, all screen modes can be selected. (16:9 • Panorama • Zoom1 • Zoom2 • 4:3).
• In TV(DTV), DVI, PC, HDMI, COMPONENT (720p, 1080i) modes, only 16:9 & 4:3 modes can be selected.
• In Zoom1, Zoom2 modes, you can move the picture on screen by pressing the **UP/DOWN ▲▼** buttons.
• Picture size will not change when PIP size is Double.

Freezing the Picture

1

Press the **STILL** button to freeze a moving picture.
• Normal sound will still be heard.
  Press again to cancel.

Viewing Picture-in-Picture

This product has one built-in tuner, which does not allow PIP to function in the same mode. For example, you cannot watch one TV channel in the main screen, and a different one in the PIP screen. Please see 'PIP Settings'below for details.

You can use the PIP feature to simultaneously watch two video sources.

Note: While V-Chip is in operation, the PIP function cannot be used.
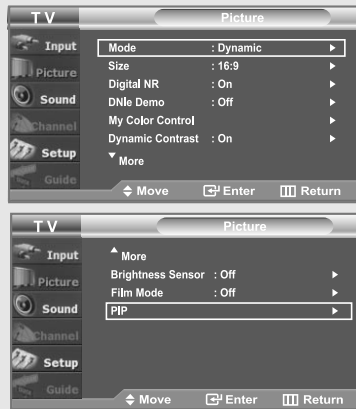

Activating Picture-in-Picture

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Picture", then press the **ENTER** button.

Press the **UP/DOWN** ▲▼ buttons to select "PIP", then press the **ENTER** button.

2

Press the **ENTER** button.

Press the **UP/DOWN** ▲▼ buttons to select "On", then press the **ENTER** button.

◄ If you turn the TV off while watching in PIP mode and turn it on again, the PIP window will disappear.

Alternate method :

Press the **PIP** button on the remote control repeatedly to activate or deactivate the PIP.

PIP Settings

O: PIP operates
X: PIP doesn't operate

• Choose *Custom* to recall your personalized settings
 (see "Customizing the Sound", page 52).

Setting the TruSurround XT

TruSurround XT is a patented SRS technology that solves the problem of playing 5.1 multichannel content over two speakers. Trusurround delivers a compelling, virtual surround sound experience through any two-speaker playback system, including internal television speakers. It is fully compatible with all multichannel formats.

# Choosing a Multi-Channel Sound (MTS) track - Digital

The digital-TV transmission system is capable of simultaneous transmission of many audio tracks (for example, simultaneous translations of the program into foreign languages).
The availability of these additional "multitracks" depends upon the program.

Preferred Language

1
Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Sound", then press the **ENTER** button.

◀ Quick way to access the MTS menu: Just press the "MTS" button on the remote control.
You can listen in a language other than your chosen language by pressing the MTS button.

2
Press the **UP/DOWN** ▲▼ buttons to select "Multi-Track Options", then press the **ENTER** button.

3
Press the **ENTER** button to select "Preferred Language". Press the **UP/DOWN** ▲▼ buttons to choose the language (English, Spanish or French) you want, then press the **ENTER** button.

Press the **EXIT** button to exit.

Multi-Track Sound

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Sound", then press the **ENTER** button.

2

Press the **UP/DOWN** ▲▼ buttons to select "Multi-Track Options", then press the **ENTER** button.

3

Press the **UP/DOWN** ▲▼ buttons to select "Multi-Track Sound", then press the **ENTER** button.

Press the **UP/DOWN** ▲▼ buttons to select a setting you want, then press the **ENTER** button.

Press the **EXIT** button to exit.

- Choose *Mono* for channels that are broadcasting in mono, or if you are having difficulty receiving a stereo signal.
- Choose *Stereo* for channels that are broadcasting in stereo.
- Choose *SAP* to listen to the Separate Audio Program, which is usually a foreign-language translation.

# Automatic Volume Control

Reduces the differences in volume level among broadcasters.

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Sound", then press the **ENTER** button.

Checking the Digital-Signal Strength

Unlike analog channels, which can vary in reception quality from "snowy" to clear, digital (HDTV) channels have either perfect reception quality or you will not receive them at all. So, unlike analog channels, you cannot fine tune a digital channel.
You can, however, adjust your antenna to improve the reception of available digital channels.
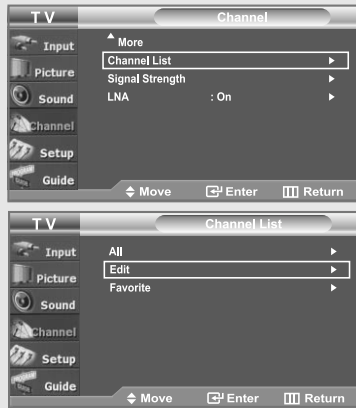

1

Press the **MENU** ▥ button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Channel", then press the **ENTER**◉ button.

  • For 26" and 32", LNA functions may operate when antenna is set to Cable.

Using Your TV as a Computer (PC) Display

Setting Up Your PC Software (Based on Windows XP)

The Windows display-settings for a typical computer are shown below. The actual screens on your PC will probably be different, depending upon your particular version of Windows and your particular video card. However, even if your actual screens look different, the same basic set-up information will apply in almost all cases. (If not, contact your computer manufacturer or Samsung Dealer.)

1 First, click on "**Control Panel**" on the Windows start menu.
2 When the control panel window appears, click on "**Appearance and Themes**" and a display dialog-box will appear.
3 When the control panel window appears, click on "**Display**" and a display dialog-box will appear.
4 Navigate to the "**Settings**" tab on the display dialog-box.

The correct size setting (resolution)
Optimum: 1360 x 768 pixels

If a vertical-frequency option exists on your display settings dialog box, the correct value is "**60**" or "**60 Hz**". Otherwise, just click "**OK**" and exit the dialog box.

∗ See "Display Modes" on page 128.

How to Auto Adjust

Use the Auto Adjust function to have the TV set automatically adjust the video signals
the monitor receives. The function also automatically fine-tunes the settings and adjusts
the frequency values and positions.
Note: This function does not work in DVI-Digital mode.

Some OSD can be different depending on the model.

Adjusting the Screen Quality

The purpose of the picture quality adjustment is to remove or reduce picture noise.
If the noise is not removed by fine tuning alone, then do the frequency adjustments to
the utmost and fine tune again. After the noise has been reduced, re-adjust the picture
so that it is aligned on the center of screen.

Some OSD can be different depending on the model.

• The default is "CC1".

CC1 : The Primary Synchronous Caption Service.
These are captions in the primary language that must be in sync with the sound, preferably matched to a specific frame.

CC2 : The Special Non-Synchronous Use Captions.
This channel carries data that is intended to augment information carried in the program.

CC3 : Secondary Synchronous Caption Service.
Alternate program-related caption data, typically second language captions.

CC4 : Special Non-Synchronous Use Captions.
Similar to CC2.

Text1: First Text Service. This may be various non-program related data.

Text2: Second Text Service. Additional data, usually not program related.

Text3/Text4: Third and Fourth Text Services. These data channels should be used only if Text1 and Text2 are not sufficient.

Note

• The Caption feature doesn't work in COMPONENT(480p, 720p, 1080i), HDMI modes.

• The availability of captions depends on the program being broadcast.

How to Set up Restrictions Using the "TV Parental Guidelines"

First, set up a personal identification number (PIN), and enable the V-Chip. (See previous section.) Parental restrictions can be set up using either of two methods: The TV guidelines or the MPAA rating.

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN ▲▼** buttons to select "Setup", then press the **ENTER** button.

2

Press the **UP/DOWN ▲▼** buttons to select "V-Chip", then press the **ENTER** button.
The message "Enter PIN" will appear. Enter your 4 digit PIN number.

3

The "V-Chip" screen will appear. Press the **UP/DOWN ▲▼** buttons to select "TV Parental Guidelines", then press the **ENTER** button.
4

The "TV Parental Guidelines" screen will appear.
Press the **UP/DOWN ▲▼** buttons to select one of the six aged based categories:
TV-Y	Young children
TV-Y7	Children 7 and over
TV-G	General audience
TV-PG	Parental guidance
TV-14	Viewers 14 and over
TV-MA	Mature audience

5

At this point, one of the TV-Ratings is selected. Press the **ENTER** button. Depending on your existing setup, a symbol will 🔒 be selected.
(Blank = Unblocked, 🔒 = Blocked)
While "🔒" is selected, press the **ENTER** button to block or unblock the category.

To select a different TV-Rating, press the **UP/DOWN ▲▼** buttons and then repeat the process.

◀ Allow all: Press to unlock all TV ratings.

Block all: Press to lock all TV ratings.

Note 1: The TV-Y, TV-Y7, TV-G, TV-PG, TV-14 and TV-MA have additional options. See the next step to change any of the following sub-ratings:

FV: Fantasy violence
D: Sexually Suggestive Dialog
L: Adult Language
S: Sexual situation
V: Violence

Note 2: The V-Chip will automatically block certain categories that are "more restrictive". For example, if you block "TV-Y" category, then TV-Y7 will automatically be blocked. Similarly, if you block the TV-G category, then all the categories in the "young adult" group will be blocked (TV-Y, TV-Y7, TV-G, TV-PG, TV-14, and TV-MA). The sub-rat ings (D, L, S, V) work together similarly. (See next section.)

6

How to set the FV, D, L, S and V sub-ratings.
First, select one of these TV-Ratings: TV-Y, TV-Y7, TV-G, TV-PG, TV-14, or TV-MA (See Step 4, on previous page), and press the **RIGHT ▶** button. A symbol " 🔒 " will be displayed for each sub-rating.
While " 🔒 " is selected, press the **ENTER** button to go to a sub rating. Press **ENTER** to block the sub rating. To select a different TV-Rating, press the **UP/DOWN ▲▼** buttons and then repeat the process.
Note: The V-chip will automatically block certain categories that are "More restrictive" .For example, if you block "L" sub-rating in TV-PG, then the "L" sub-ratings in TV-14 and TV-MA will automatically be blocked.

7

Press the MENU button to clear all the screens. (Or proceed to the next section, and set up additional restrictions based on the MPAA codes.)

Note
• These categories consist of two separate groups: TV-Y and TV-Y7 (young children through age 7), and TV-G through TV-MA (everybody else). The restrictions for these two groups work independently: If a household includes very young children as well as young adults, the TV guidelines must be set up separately for each age group. (See next step.)

How to Set up Restrictions Using the MPAA Ratings: G, PG, PG-13, R, NC-17, X, NR

The MPAA rating system uses the Motion Picture Association of America (MPAA) system, and its main application is for movies. When the V-Chip lock is on, the TV will automatically block any programs that are coded with objectionable ratings (either MPAA or TV-Ratings).

1

Press the **MENU** button to display the menu.

Press the **UP/DOWN** ▲▼ buttons to select "Setup", then press the **ENTER** button.

2
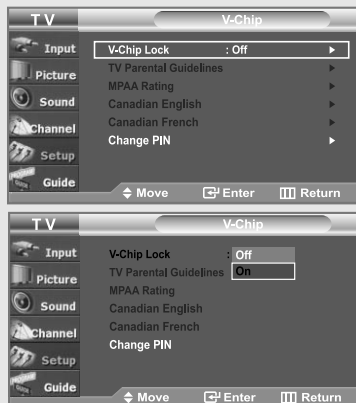

Press the **UP/DOWN** ▲▼ buttons to select "V-Chip", then press the **ENTER** button. The message "Enter PIN" will appear. Enter your 4 digit PIN number.

3

The "V-Chip" screen will appear. Press the **UP/DOWN** ▲▼ buttons to select "MPAA Rating", then press the **ENTER** button.

4

The "MPAA Rating" screen will appear. Repeatedly press the **UP/DOWN** ▲▼ buttons to select a particular MPAA category. Pressing the **UP/DOWN** ▲▼ buttons will cycle through the MPAA categories:

TV	**MPAA Rating**	
Input	**Block**	Allow All
Picture	G	Block All
Sound	PG	
	PG-13	
Channel	R	
	NC-17	
Setup	X	
Guide	NR	
	◇ Move ⏎ Enter Ⅲ Return	

◀ Allow all: Press to unlock all TV ratings.

Block all: Press to lock all TV ratings.

G	General audience (no restrictions).
PG	Parental guidance suggested.
PG-13	PG-13 (Parents strongly cautioned).
R	R (Restricted. Children under 17 should be accompanied by an adult).
NC-17	No children under age 17.
X	X (Adults only).
NR	Not rated.

While a particular category is selected, press the **ENTER**⏎ button to activate it. A selected symbol " 🔒 " will be displayed.
Press the **ENTER** ⏎ button to block or unblock the category.

Note: The V-Chip will automatically block any category that is "more restrictive". For example, if you block the "PG-13" category, then "R", "NC-17" and "X" will automatically be blocked also.

• 16 ans+ : Programming is not suitable for children under the age of 16.
• 18 ans+ : Programming restricted to adults.

How to Reset the TV after the V-Chip Blocks a Channel ("Emergency Escape")

If the TV is tuned to a restricted channel, the V-Chip will block it. The screen will go black and the following message will appear:

1

Enter your PIN number.

Channel Is Locked by
TV-pg[S]

☐ ☐ ☐ ☐

Use the NUMBER buttons to enter your
pin number to unlock all channels.
Press EXIT to clear PIN.
Press MENU for main menu.

Channel Is Locked by
TV-pg[L]

☐ ☐ ☐ ☐

Use the NUMBER buttons to enter your
pin number to unlock all channels.
Press EXIT to clear PIN.
Press MENU for main menu.
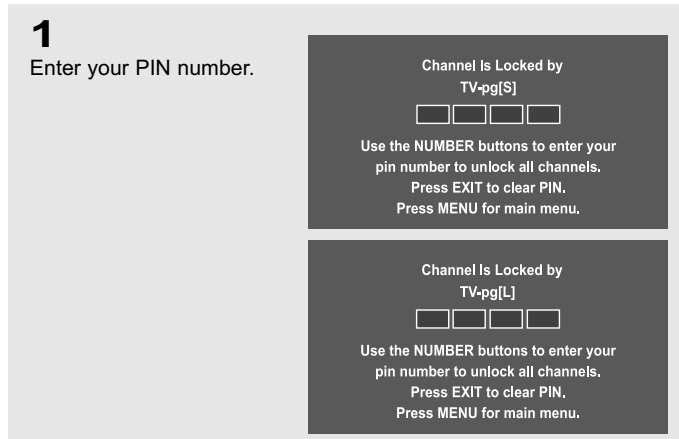

To resume normal viewing, tune to a different channel using CH ⌃ or CH ⌄ button. Under certain conditions (depending on the rating of the local TV programs) the V-Chip might lock out all the channels. In this case, use the V-Chip function for an "emergency escape":

1 Press the **MENU** ▥ button. Press the **UP/DOWN** ▲▼ buttons to select "Setup", then press the **ENTER** ⊞ button.

2 Press the **UP/DOWN** ▲▼ buttons to select "V-Chip", then press the **ENTER** ⊞ button.

3 Enter your PIN number, press the **ENTER** ⊞ button, and press the **UP/DOWN** ▲▼ buttons to temporarily disable the V-Chip Lock.

Electronic Program Guide

Your TV has an "Electronic Program Guide" to
help you navigate through all the possible
viewing options. The EPG supplies
information, such as program lists, start and end
times of all available channels.
In addition, detailed information about the
program is often available in the EPG.
(The availability and the amount of program
details will vary depending on the broadcaster.)
Viewing the Electronic Program Guide

A	Displays which channel is currently selected to show program information in the Channel Guide.
B	Press to view detailed information for the selected digital program.
C	Switches to the mini program guide. The mini guide shows the titles of the available programs of one channel. Press the Red button on the remote control. The set default guide is Mini Guide.
D	Scrolls backwards quickly (2 hours). Press the Green button on the remote control.
E	Displays titles and other details about upcoming programs of particular channels. Highlight the program and press the INFO button to see additional and detailed information. (The availability of additional details depends on the broadcaster.) Use the ▲/▼ buttons to search information about another channel.
F	Scrolls forward quickly (2 hours). Press the Yellow button on the remote control and repeatedly press the ENTER button so that the appropriate time is displayed.
G	Exits from the Program Guide and returns to normal viewing mode. Press the Blue button on the remote control.
H	Displays the program times (arranged in 1 hour time blocks).
I	Displays the current time and date.

Note
• You can use the GUIDE button on the remote control to display the Electronic Program Guide.
  The EPG begins its list with the channel that is currently active.
  The EPG will only work when you are receiving digital channels.

If the TV seems to have a problem, first try this list of possible problems and solutions. If none of these troubleshooting tips apply, call your nearest Samsung service center.

Identifying Problems

Problem	Possible Solution
Poor picture	Try another channel.
	Adjust the antenna.
	Check all wire connections.
Poor sound quality.	Try another channel.
	Adjust the antenna.
No picture or sound.	Try another channel.
	Press the SOURCE button.
	Make sure the TV is plugged in.
	Check the antenna connections.
No sound or sound is too low at maximum volume.	First, check the volume of units connected to your TV (digital broadcasting receiver, DVD, cable broadcasting receiver, VCR, etc.). Then, adjust the TV volume accordingly.
Picture rolls vertically.	Check all wire connections.
The TV operates erratically.	Unplug the TV for 30 seconds, then try operating it again.
The TV won't turn on.	Make sure the wall outlet is working.
Remote control malfunctions	Replace the remote control batteries.
	Clean the upper edge of the remote control (transmission window).
	Check the battery terminals.
"Check signal cable" message.	Ensure that the signal cable is firmly connected to the PC sources.
"Not Supported Mode" message.	Check the maximum resolution and the frequency of the Video Adapter.
	Compare these values with the data in the Display Modes.
Digital broadcasting screen problem.	Please check the digital signal strength and input antenna.

Problem	Possible Solution
The image is too light or too dark.	Adjust the Brightness and Contrast. Adjust the Fine tuning.
Horizontal bars appear to flicker, jitter or shimmer on the image.	Adjust the Coarse tuning and then adjust the Fine tuning.
Vertical bars appear to flicker, jitter or shimmer on the image.	Adjust the Coarse tuning and then adjust the Fine tuning.
Screen is black and power indicator light blinks steadily.	On your computer check: Power, Signal Cable. The TV is using its power management system. Move the computer's mouse or press any key on the keyboard.
Image is not stable and may appear to vibrate when you have a computer connected to the PC input.	If the setting is not correct, use your computer utility program to change the display settings. NOTE: Your TV supports multiscan display functions within the following frequency domain:
Image is not centered on the screen.	Adjust the horizontal and vertical position. The screen position must be adjusted on the output source (i.e. STB) with a digital signal.
If a still image is displayed for an extended period of time, residual images or blurring may appear.	When you need to leave the monitor unused for an extended period of time, adjust the settings so that the monitor automatically goes into energy saving mode or activates the screen saver to display moving images.

Horizontal frequency (kHz)	30~60
Vertical frequency (Hz)	60~75
PC Maximum refresh rate (at 60Hz)	1360 x 768

The TFT LCD panel uses a panel consisting of sub pixels (3,147,264) which require sophisticated technology to produce. However, there may be few bright or dark pixels on the screen. These pixels will have no impact on the performance of the product.

Installing the Stand (LN-R269D, LN-R329D)

<2>   <3>

1. Place the TV faced down on a soft cloth or cushion on a table.
2. Attach the stand to the TV set as shown in the picture.
3. Use the four screws to tightly fix the stand.
Disconnecting the Stand

<2>   <3>   <4>

1. Place the TV faced down on a soft cloth or cushion on a table.
2. Remove four screws from the back of the TV.
3. Separate the stand from the TV.
4. Cover the bottom hole with a cap.
Installing the Wall Mount Kit (LN-R269D)

*Note: This installation is to be used when attaching the wall mount to a wall.
When attaching to other building materials, please contact your nearest dealer.*

Components (Sold separately)

❶ Wall-Bracket	❷ Set-Bracket	❸ Screw: 8EA	❹ Wood Screw: 4EA	❺ Anchor: 4EA	❻ Installation Guide
		M4 X L12	M4 X L20		

How to assemble the Wall Mount Bracket

1 ① Mark the location on the wall where the hole will be drilled.
  ② Make over 35mm-depth-hole on the marked location using drill.
  ③ Fix anchors ❺ on each hole on the wall.
  ④ Connect wall-bracket ❶ to the wall with wood screws ❹ after fitting
    anchors ❺ into the wall-bracket ❶ .
    Note: If the bracket is not firmly fixed to the wall, LCD TV can fall off.

2 ① Turn the power off and unplug the power cord from the outlet.
  ② Place the TV faced down on a soft cloth or cushion on a table.
  ③ Attach the set-bracket ❷ onto the rear side of the TV set and secure the screws ❸ .

3 ① Insert three Hangers of the set-bracket ❷ into the grooves of the wall-bracket ❶ .
  ② Fix set-bracket ❷ and wall-bracket ❶ with screws ❸ .
    Note: Before installing the set on the wall, connect the cables to the set first.

Installing the Wall Mount Kit (LN-R329D, LN-R409D)

Note: This installation is to be used when attaching the wall mount to a wall.
When attaching to other building materials, please contact your nearest dealer.

ⓐ Wall-Bracket ⓑ Set-Bracket ⓒ Screw: 8EA ⓓ Wood Screw: 7EA ⓔ Anchor: 7EA ⓕ Screw: 3EA ⓖ Installation Guide

How to assemble the Wall Mount Bracket

1 ① Mark the location on the wall where the hole will be drilled.
   ② Make over 35mm-depth-hole on the marked location using drill.
   ③ Fix anchors ⓔ on each hole on the wall.
   ④ Connect wall-bracket ⓐ to the wall with wood screws ⓓ after fitting
      anchors ⓔ into the wall-bracket ⓐ .
      Note: If the bracket is not firmly fixed to the wall, LCD TV can fall off.
2 ① Turn the power off and unplug the power cord from the outlet.
   ② Place the TV faced down on a soft cloth or cushion on a table.
   ③ Loosen two screws on the rear side of the TV set (only model LN-R409D applied).
   ④ Attach the set-bracket ⓑ onto the rear side of the TV set and secure the screws ⓒ .
      For 40 inches model, attach the bracket into the two holes with the two screws removed
      in step 3 above.

② ③ ④
(Only Model LN-R409D Applied)

3 ① Insert three Hangers of the set-bracket ⓑ into the grooves of the wall-bracket ⓐ .
   ② Fix set-bracket ⓑ and wall-bracket ⓐ with screws ⓕ .
   Note: Before installing the set on the wall, connect the cables to the set first.

①   ②
Wall Installation Instructions (LN-R469D)

Refer to the correct installation guide according to your wall bracket.

Installation Notes

1 Contact a technician for installing the wall bracket.

2 Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you elect to perform the wall installation.

3 This product is for installing on cement walls. The product may not stay in place when installed on plaster or wood.

Parts (Wall attachment panel is sold separately. Check with your dealer.)

Only use the components and accessories shipped with the panel.

Wall Bracket	Hinge	Accessories
1	Left : 1 Right : 1	Plastic Hanger : 4 Screw ⓐ : 11 M4 X L20 Screw ⓑ : 4 M8 X L40 Anchor : 11
How to assemble the Wall Mount Bracket

1 Insert and tighten the Captive Screw in the direction of the arrow. When done, mount the wall bracket on the wall.

Captive Screw

Wall Bracket

Hinge (Left)

There are two hinges (left and right). Use the correct one.

Hinge (Right)
2 Before drilling into the wall, check if the length between the two locking holes at the back of the product is correct. If the length is too short or long, loosen all or some of the 4 screws on the wall bracket to adjust the length.

Length between the two locking holes
3 Check the installation diagram and mark the drill points on the wall. Use the 5.0 mm bit to drill holes deeper than 35 mm. Fix each anchor in the corresponding hole. Match each of the brackets and hinge holes to the corresponding anchor holes and insert and tighten the 11 screws ⓐ.
Fixing the TV panel to the wall attachment panel bracket

The shape of the product may vary depending on the model. (The assemblies of the plastic hanger and the screw are the same)

1 Remove the 4 screws on the back of the product.
2 Insert the screw ⓑ into the plastic hanger. (See the figure below)
- Mount the product on the wall bracket and make sure it is properly fixed to the left and right plastic hangers.
- Be careful when installing the product on the bracket as fingers can be caught in the holes.
- Make sure the wall bracket is securely fixed to the wall, or the product may not stay in place after installation.

3 Tighten the 4 screws in step 2 (plastic hanger + screw ⓑ) to the rear holes of the product.
4 Remove safety pin (③) and insert the 4 product holders into the corresponding bracket holes (①). Then place the product (②) so that it is firmly fixed to the bracket. Make sure to reinsert and tighten the safety pin (③) to securely hold the product to the bracket.

LCD TV
Wall Bracket   Wall

How to Adjust Mounting Angle

Note Note : Adjust the bracket angle to -2° before installing it on the wall.
1. Fix the product to the wall bracket.
2. Hold the product at the top in the center and pull it forward (direction of the arrow) to adjust the angle. (See the figure to the right)
3. You can adjust the bracket angle between -2° and 15°.

Make sure to use the top center, and not the left or the right side of the product to adjust the angle.

How to assemble the Stand-Base (LN-R469D)

1   Using the 4 screws for securing the stand pegs and the monitor, firmly attach the monitor to the stand pegs. (The exterior of the set may be different than the picture.)
Warning

Firmly secure the stand to the TV before moving it, as the stand may fall and could cause serious injury.

Note
• Two or more people should carry the TV. Never lay the TV on the floor because of possible damage to the screen.

• Always store the TV upright.

Using the Anti-Theft Kensington Lock

The Kensington lock is a device used to physically fix the system when using it in a public place. The locking device has to be purchased separately. The appearance and locking method may differ from the illustration depending on the manufacturer. Please refer to the manual provided with the Kensington lock for proper use.
1. Insert the locking device into the Kensington slot on the LCD TV (Figure 1), and turn it in the locking direction (Figure 2).

2. Connect the Kensington lock cable.

3. Fix the Kensington lock to a desk or a heavy stationary object.

Using Your TV in Another Country

If you plan to take your TV with you to a foreign country, please be aware of the different television systems that are in use around the world. A TV designed for one system may not work properly with another system due to differences in the TV channel frequencies.

CableCARD and Digital Cable Ready TVs

CableCARD and Digital Cable Ready TVs are the products of a new digital cable standard.
This new standard is called OpenCable and it is a concerted effort to standardize the digital cable
service network interface in North America. For more information, please refer to www.cablelabs.com.

Digital Cable Ready TVs are equipped with a proper digital cable tuner to receive digital cable signals
from your local cable service provider. They are also designed to work with digital cable card modules
(PCMCIA card modules called CableCARDs). These PCMCIA card modules or CableCARDs will be
provided by your local cable service provider after a proper subscription process.

The provided CableCARD from your local cable service provider needs to be inserted into the
CableCARD slot of a Digital Cable Ready TV. Please refer to page 28 for how to insert the
CableCARD.
A digital Set-Top Box which used to be provided by the cable service provider is no longer needed
with Digital Cable Ready TVs and CableCARDs.

When the CableCARD is inserted into the slot, the TV screen will show a message that CableCARD
is inserted and necessary data such as channel information or subscription information will be
downloaded from your digital cable service provider. When you insert CableCARD for the first time,
this process may take few minutes depending on the amount of data your cable provider needs to
send. During this process, the digital cable service provider or CableCARD may display messages
on the TV screen to help or give you further information.

Please contact your local cable provider for more information on service availability and how to
acquire a CableCARD.

Note
• This television receiver supports the copy protection system regulated by DTLA (Digital Transmission
  Licensing Administrator). It should be noted that copy protected content may not be viewable depending on
  your particular connections.
• Some channels may be scrambled depending on your cable service provider.
  When you tune to these channels, no screen or a still screen may appear. In order to view the screen properly,
  you have to go through a subscription process after contacting your service provider.
  It will take several minutes to update the channel information depending on your cable service provider.

Display Modes

If the signal from the system equals the standard signal mode, the screen is adjusted automatically. If the signal from the system doesn't equal the standard signal mode, adjust the mode by referring to your videocard user guide; otherwise there may be no video. For the display modes listed below, the screen image has been optimized during manufacture.

Mode	Resolution	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock Frequency (MHz)	Sync Polarity (H/V)
