3 RANGES ANALOG SANUS INSULATION RESISTANCE TESTER CE

DM1528S DM5218S

Introduction

These models are compact lightweight simple operation easy-to-use insulation resistance meters having a rigid structure and a new design of modern feeling. Adoption of inner magnetic field type meter, which excludes influence of external magnetic field for an indicator needle portion, causes a stable indication to be obtained. The Auto discharge function has been installed. These models are in compliance with JIS C1302 1994 and IEC1010-1 CATIII 600V.

Feature

- Equipped with the discharge function
- ullet Equipped with the M Ω measuring switch that enables both one-shot and continuous measurement with switch lock function.
- DC voltage up to 60VDC can be measured.
- •AC voltage up to 600VAC can be measured.
- Equipped with a strap to suspend from the neck to allow both hands to be used form easurement.

Standard Accessories

- ●Test Lead "TL-508S" 1 set
- Instruction manual, 1 copy
- Carrying case "C-08S, 1 piece
