AR-507

Take your business
to a better place.

WELCOME TO THE SHARP NETWORKPLACE™.

A new environment where the network and workplace intersect—linking multiple digital technologies that transform the workplace — and create more business power, more convenience, and greater productivity. Where people are empowered to combine their knowledge and intelligence, to build upon each other's ideas.

Central to the swift operation of the Networkplace is Sharp's Advanced Digital Workgroup System, the Imager™. With digital copy, print, scan and document finishing capabilities, it provides simpler and faster ways to access, produce, change, process, and distribute documents. All to raise productivity and your documents to a whole new level.

THE SHARP AR-507 IMAGER™ DIGITAL DOCUMENT SYSTEM: HIGH PERFORMANCE TECHNOLOGY THAT DELIVERS

Productivity is the key to getting ahead in today's busy office. And advanced digital technology is essential in order to get there. That's why Sharp designed the AR-507 Imager to deliver the ultimate productivity solution for front office applications. With high-speed digital copying, workgroup printing and efficient network scanning, plus the capability to add professional finishing, the AR-507 Imager is a powerhouse of productivity. Add Sharp original software, and you can do more than you ever imagined—right from the convenience of your desktop!

With a variety of advanced features, modularity, and a choice of networkable print controllers and scanners, the AR-507 Imager provides extensive document management features that truly impact your workflow. What's more, you'll get Sharp's world-famous reliability and performance, so your workflow will always keep moving. Get the innovative technology you need today, and the versatility for growth—with the AR-507 Imager from Sharp.

Boost your workflow

The AR-507 Imager has an incredibly fast 50 page per minute speed and holds up to 5,050 sheets of online paper—so you'll notice the impact on your workflow immediately. And with a choice of two optional network print controllers, you have a high-speed networkable laser printer with 1200 dpi-quality

output and the ability to produce professionally finished documents. You can even scan documents to your e-mail, desktop or to file with one of two optional network scan servers. The Sharp AR-507 Imager simplifies document management like never before!

Increase office performance

The AR-507 Imager offers increased functionality to meet even the most demanding office environments. With face-down delivery—like that of high-volume printers—multiple sets are created faster than ever and retrieval is fast and easy. The 50-sheet R-SPF (Reversing Single Pass Feeder) performs at optimal operating speed, so now even automatic feeding won't slow you down. Throughput is also faster with "1-N copying" technology, which scans originals in order from the first page to the last, enabling the Imager to begin output as soon as the first page is scanned. The result is increased job speed and heightened productivity.

Digital
IMAGER™
Advanced Workgroup System

The Sharp AR-507 Imager lets you start with a high-volume, digital copier today, and add workgroup printing, high-speed network scanning system software tomorrow.

RELIABILITY, ADVANCED TECHNOLOGY, MODULARITY, AND VALUE: EVERYTHING YOU NEED TO GET AHEAD

Getting it done—quickly

With “scan once, print many” technology, the Sharp AR-507 Imager digitally scans your originals in one pass, and gives them right back to you, so you can get back to work. Simply program the AR-507 for copy quantity, collating or finishing—and just walk away. It's that easy. And, for large documents, you can scan up to 120 images with the Imager's **Job Build** feature for maximum output functionality.

Multiple page sets in record time

With each multiple-page set delivered upon completion to the output tray, you can view a set without waiting for the entire job to finish. What's more, there is virtually no limit to the size or number of sets you can

Load up to 5,050 sheets of statement to ledger-size paper in the adjustable drawers, and go for days without a refill.

produce. The AR-507 Imager really allows you to get down to business!

Streamline productivity

The Sharp AR-507 Imager delivers an incredibly fast output speed of up to 50 pages per minute, so large copy and print jobs won't slow down your workflow. The 4.3 GB hard drive offers plenty of power to manage even the most extensive copy and print jobs.

Throughput is also faster with “1-N Copying”. Since output begins as soon as the first page is scanned—you'll experience increased speed and productivity.

Crisp, clean image quality

The high-performance digital laser engine of the AR-507 Imager produces copies with a crisp 600 dpi output for images with exceptional clarity and detail. With standard features like automatic copy quality process controls and scanning at 256 shades of gray, you never even have to think about image quality—it's automatically adjusted for you.

Professional finishing at a moment's notice

The AR-507 Imager offers an optional 3-tray finisher with multi-position stapling, offset stacking and face-down delivery. With finished sets delivered face down, retrieval is fast and easy. For the ultimate in productivity, add optional connectivity capabilities and access all of the AR-507 Imager's finishing functions right from your desktop PC!

High-speed tandem copying & printing

For a lightning-fast output rate of up to 100 pages per minute, you can easily connect two AR-507 Imagers together for tandem copying. Just feed the originals into one Imager, and the documents will automatically run on both. Tandem printing is also a snap...right from your desktop PC.

Expert handling of confidential documents

The **Confidential Print** function prohibits printing of designated documents until a Personal ID

number is entered in both the print window and on the Imager's LCD panel.

The optional **Hard Disk Erase Security Kit** turns the Imager into a secure system for printing and copying of confidential documents. With two simple key functions, “Auto Clear” and “Clear All Data”, users can avoid confidential documents ending up in the wrong person's hands.

Copy jobs are delivered to one tray, print jobs to another. Multiple-page sets are already collated, stapled, and stacked—ready for distribution.

EASY-TO-USE CONTROLS

The user-friendly LCD panel easily guides users through features and options with simple prompts. The animated display logically leads you step by step through the selections. Easily confirm your selections with the touch of a key before you press “Start” and put the Imager into action.

MODULAR DESIGN AND EASY-TO-USE SOFTWARE MAKES THE AR-507 IMAGER A COMPLETE DOCUMENT MANAGEMENT SYSTEM.

Network Printing

A choice of two network print controllers provides the convenience of network connectivity. With 1200-dpi quality laser printing at 50 pages per minute, the AR-507 Imager is ideal for every workgroup.

Network Scanning

Choose from two optional network scan servers for maximum productivity.

Sharp AR-NS1 Embedded Scanner
– Scan documents directly to your desktop, file server or e-mail.

SharpDesk™
– Software features include scanning, OCR, Image Viewer and more. A document can be e-mailed or posted to the web, or printed and professionally finished. You can also file, OCR print or link to your fax server right from your desktop.

Sharp AR-PB2A Print Controller

- Ideal for workgroups
- Includes **Printer Administration Utility Software** for Network Administrators to monitor any SNMP-compliant printer on the network
- Includes **Printer Status Monitor**, an application which enables users to view network printer conditions through an easy-to-use graphical interface. It even notifies you when your job is complete!

Axis 7000 Scan Server

- Digitally distribute paper-based documents across networks, within workgroups or around the world
- Configured with a keyboard for walk-up convenience
- Scan documents directly to your desktop to send to file, e-mail, or post to your web browser

AR-LXII Print Controller

Fiery LXII Print Controller

- Ideal for midsize and larger businesses with high-volume printing and frequent use of complex graphics.

Sharp Remote E-mail Diagnostics (R.E.D.)

- Advanced communication system for the network environment that allows information and device status to be sent over the Internet
- Use as a support tool for administrators inside a facility and for monitoring by a Sharp Authorized Dealer
- Provide the highest level of product support by sending an e-mail message at a set time schedule, or, when a certain event has occurred

More output options...to make your documents look their best

Multiple pages per sheet

Make pamphlets easily

Automated page editing

Print on both sides

Auto stapler

Each job neatly separated

TECHNICAL SPECIFICATIONS

AR-507 IMAGER SPECIFICATIONS

Type:	Console
Copy System:	Dry, electrostatic
Originals:	Sheets, bound documents, photographs
Original Size:	Max. 11" x 17"
