powerful document-centric system that can enhance and streamline your workflow. The new AR-P15 Print Controller delivers astounding flexibility to meet your business needs. An optional 10 GB Hard Drive, Postscript Level III upgrade, and Scan Accelerator Board empower you with network printing, scanning, and advanced document management capabilities. Designed to change the way your office works, you'll be able to produce a myriad of marketing materials including seminar materials, proposals, benefits packages, employee handbooks, and more—reducing the need to outsource. Plus, with Fiery® Command Workstation™, you'll have the power to control document workflow—from creation, to manipulation, to delivery—right from your desktop.

advanced network printing

Get more control, and get more done.

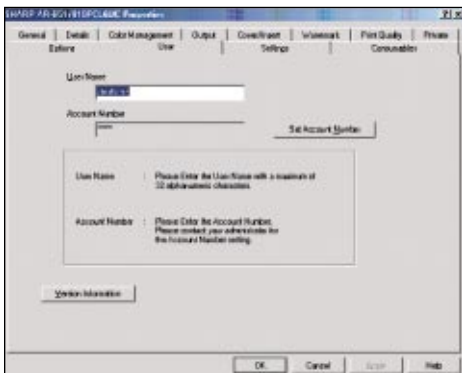

Ideally suited for workgroups or in-house central reproduction departments, the AR-651/810 IMAGER's robust controller is lightning-fast. With more processing power and an expanded internal hard drive, you can produce lengthy reports and manuals with just a few clicks of the mouse. And with Sharp's seamless network integration and easy-to-use software, your entire department can have access to sophisticated tools that can speed up your workflow, and enhance your productivity.

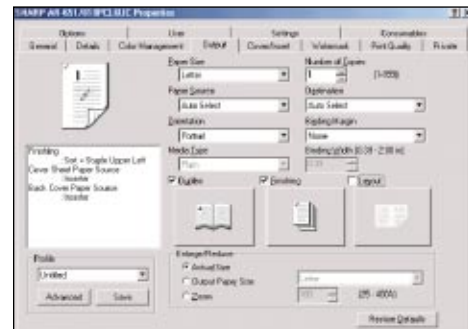

▲ User-friendly driver software displays printer availability, paper levels, toner levels, and other options.

▲ A simple, tab-oriented interface allows users to toggle through various features of the software quickly and easily.

▲ With built-in security features, administrators can easily control user access.

▲ Select paper size, page orientation, number of copies, and finishing options—all from one dialog box.

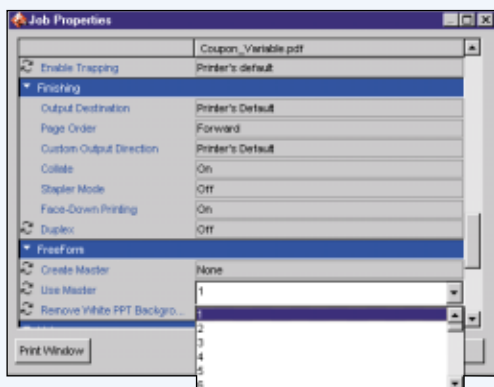

Fiery Advanced Printing Solutions

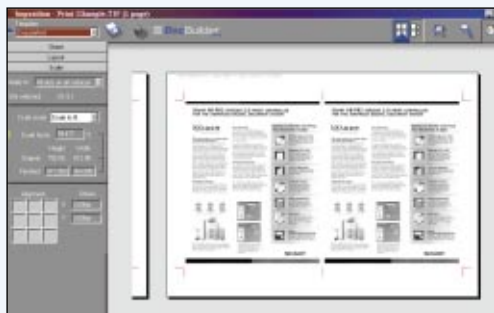

With the optional 10 GB Hard Drive (AR-PK3), you get sophisticated software solutions for a wide range of office environments. From document management software to remote printing applications, these versatile solutions will add significant value to your workflow.

◀ **Fiery Command Workstation 4.0**
Make centralized print job management easy with extensive job controls and security features. See the status of each print job at a glance—and monitor your entire network from one comprehensive interface.

◀ **Fiery Freeform™**
Create more effective direct mail campaigns with sophisticated variable data printing software.

◀ **DocBuilder™ Pro™ (additional option)**
Provides powerful pre-flight and imposition capabilities for pre-press and Print-for-Pay environments, which allows the user to edit and assemble entire documents before RIPping the files.

integrated network scanning

Sophisticated scanning increases efficiency

With the optional embedded scan accelerator board (AR-SB1)*, you can add powerful functionality to your workflow.

With network scanning and Sharp's AR-651/810 Digital IMAGERS, you can scan and send documents to several destinations with just a few touches on the interactive control panel. New, built-in security features such as Private Scan mode and Scan to Mailbox provide added assurance for document management in sensitive environments.

Scan to E-mail

Scan a document and instantly e-mail it as an attachment. The scanned files are automatically saved as TIFF or PDF files.

Scan to Stored Job

Scan documents directly to a specific folder on the drive, where it can be easily accessed by users on the network.

Scan to Mailbox

A scanned file can be saved to a specific numbered mailbox for an extra level of security. The mailbox number is required when the scanned file is retrieved.

Scan to Print

Scan a document and print it immediately with the touch of a button.

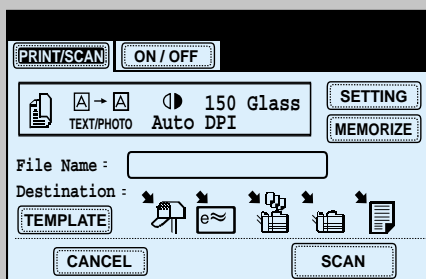

Scan to Hold Queue

Save your scanned documents to a temporary holding area and retrieve them later.

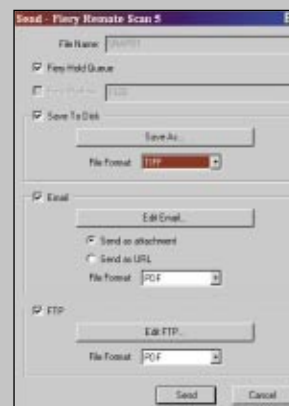

Scan to FTP

Optimum for archiving and sharing files with remote users, you can scan a file to any FTP address.

▲ The user-friendly touch-screen control panel makes it easy to select scanning options and destinations.

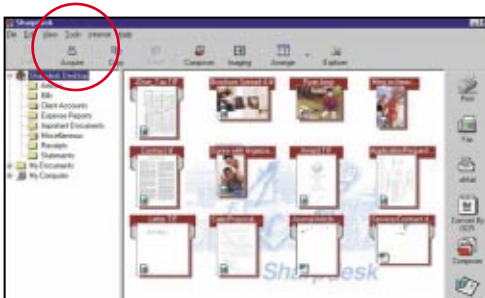

Fiery Remote Scan 5

Once your documents are stored to the hard drive, use Fiery's Remote Scan 5 utility to retrieve and bring documents into Sharpdesk or most other applications.

Powerful document management with Sharpdesk

Powerful, flexible, and intuitive, Sharpdesk enables you to easily integrate scanned documents into your everyday workflow. The Sharpdesk interface is familiar and easy to use, and allows you to view document thumbnails in over 200 file formats. Use Sharpdesk's **Acquire** button or Fiery's Remote Scan 5 Utility to retrieve your scanned files and bring them into Sharpdesk. Easy-to-use tools help you organize, edit—even combine scanned files—for maximum productivity.

◀ **The Sharpdesk Desktop**
Get powerful document control in a user-friendly interface. Simply “pull” your files from the document feeder into Sharpdesk using the **Acquire** button, or use Fiery's Remote Scan 5 utility to retrieve stored files from the hard drive.

print management and security

The AR-P15 advanced Print Controller delivers unparalleled flexibility to meet a variety of business needs. Innovative PrintMe™ standard software allows remote users and mobile professionals to print securely to any PrintMe-enabled device—right over the internet. And with advanced print management solutions (Callisto™ or Velocity™) and flexible accounting options, its easy to add the functionality you need—when you need it.

Summary Printing Activity				
By Users per Printer				
Printer	Description	Pages	Cost	
Canon 9400 01	Canon 9400 01	4	0.25
