SYMPTOM Loss of PIN code.

If you receive a request to remove the PIN number for protection of the Post Code setting, please first ascertain the legal ownership of the product by checking for proof of purchase.

ACTION To remove the PIN code follow the procedure outlined below.

1. Enter the test mode.
2. Select NVM page 08, position 3F and change its value from 01 to 00.
3. Press the standby button on the remote control to memorise.
4. Switch the set off, then on again using the mains switch.
5. It will now be possible to enter a new PIN number and Post Code.
