Under Counter Mounting Bracket

Accommodates 13" and 15" AQUOS™ Liquid Crystal Televisions

Viewing Position

Folded Position

Sharp reinvented the way we watch television in the kitchen with the new AN-PUCM/B/W under-the-cabinet mount. The AN-PUCM/B/W is the first mounting system on the market to effectively manage cables as well as the AC Adaptor supplied with the Sharp AQUOS Liquid Crystal Television. This innovative new design is revolutionizing kitchen-mounting systems and allows installation of 13" and 15" AQUOS televisions directly under kitchen cabinets. When the AQUOS is not in use, the mount folds and the LCTV virtually disappears. When it's time to watch TV, simply slide and fold down the mount to allow the AQUOS to swivel 360-degrees for choosing the best viewing angle. This mounting system is available in silver, black or white to coordinate with the various AQUOS cabinet colors and complement any kitchen décor.

Features include:

CableTrac Cable Management: Finally, a solution that hides all the cables within a bracket. Cables from the AQUOS are fed directly through the mount's arm, into a plastic encasing and up through the cabinet to connect to any signal source such as cable or satellite and to the power outlet. The mounting bracket installation is as clean and sleek as the AQUOS Liquid Crystal Television it supports.

AC Adaptor Management: The AN-PUCM/B/W is the only kitchen cabinet bracket in the industry that conceals the AC adaptor that ships with every AQUOS. If desired, the adaptor can be placed into an optional custom enclosure shipped with every mount and matches the finish of the back of the AQUOS. This enclosure is mounted directly under the cabinet and is hidden by the cabinet's front facing trim. If the AQUOS needs to be mounted higher and there is space in the cabinet for the adaptor, the optional custom enclosure provides a streamlined solution.

Tilt and Swivel Capability: When folded down, the AN-PUCM/B/W can tilt up to 10-degrees for taller viewers. This mount also allows an astounding 360-degrees* of effortless swivel action. This can be extremely beneficial when there are multiple viewing locations throughout the kitchen and/or if the user moves around within the space.

TeleFold System: When you're not watching TV or need the extra counter space, this mount allows you to fold up the AQUOS so that it is inconspicuous. This versatile system accommodates up to a 15" AQUOS folded completely under a standard 12" deep cabinet.

Rigging Plate: The optional Rigging Plate is included with every mount and can be utilized when increased reinforcement is required. Simply sandwich the bottom of the cabinet between the mounting bracket and rigging plate.

**Actual Swivel may be slightly less due to interference between the size of the AQUOS and depth of the cabinet.*

Features & Specifications:

Unit Dimensions: Please refer to diagram on next page
Unit Weight: 4 lbs.
Carton Dimensions: 8 3/8" x 3 1/4" x 13 1/8" (w x h x d)
Shipping Weight: 5 lbs.
Maximum Load Capacity: 10 lbs.

Mountable Surfaces: Upper Cabinets
