SPECIFICATION

| | |
|---------------------------------|--------------------|
| Loudspeaker | AD 2209 SZ (6.5 Ω) |
| IF | 452 Kc/s |
| Batteries | 4.5 V (3x1.5 V) |
| Consumption (without signal) | 9-12 mA |
| Output | 150 mW |
| Dimensions | 137x75x31 mm |

SPECIFICATIE

Adjust I_c of TR6 by means of R18 to the value applying to the prevailing temperature.

Door middel van R18 de I_c van TR6 instellen tot de bij de heersende temperatuur geldende waarde.

A l'aide de R18 régler I_c de TR6 à la valeur valable à la température régnante.

Mit R18 der I_c von TR6 auf den bei der herrschende Temperatur gellenden Wert einstellen.

Ajustar con R18 la I_c de TR6 al valor correspondiente a la temperatura ambiente.

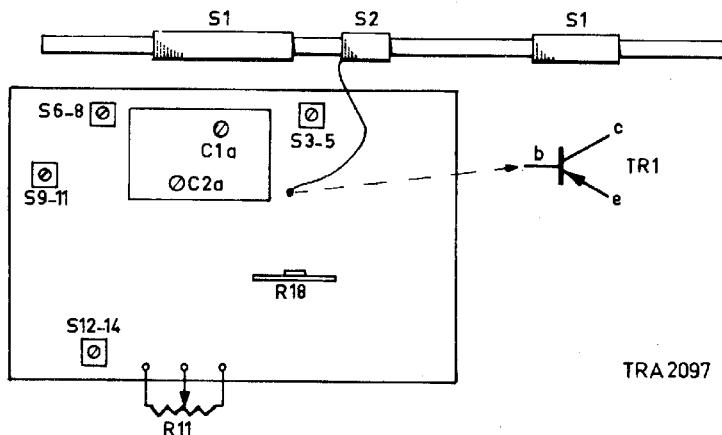

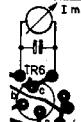

When measuring I_c disconnect the bridge in the print track at the collector of TR6 and decouple the measuring instrument by means of a capacitor of approx. $50 \mu F$.

Bi het meten van I_c de brug in het printspoor bij collector TR6 verbreken en de meter ontkoppelen d.m.v. een condensator van ongeveer $50 \mu F$.

Lors de la mesure de I_c déconnecter le pont dans la piste au collecteur de TR6 et découpler l'appareil de mesure à l'aide d'un condensateur d'environ $50 \mu F$.

Beim Messen von I_c die Brücke in der Printspur beim Kollektor von TR6 unterbrechen und der Messer mit einem Kondensator von ungefähr $50 \mu F$ entkoppeln.

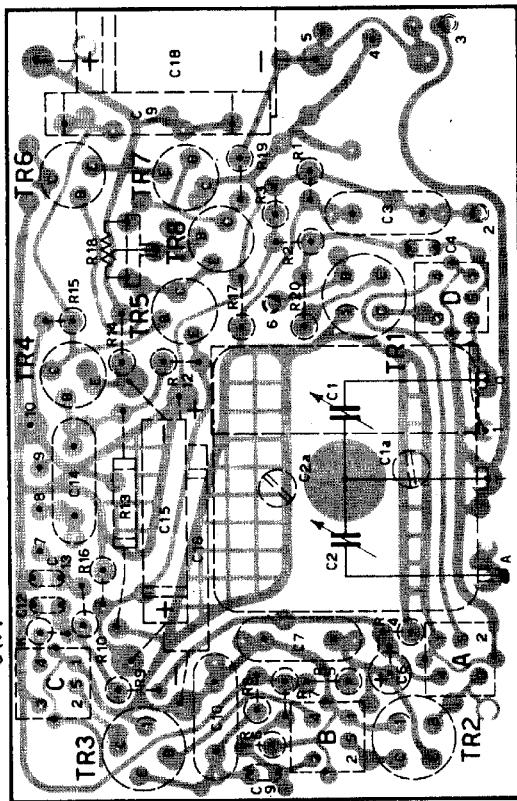

Al medir la I_c , interrumpir el puente en la placa de circuito impreso en el colector de TR6 y desacoplar el amperímetro mediante un condensador de approx. $50 \mu F$.

THE MENTIONED VOLTAGES HAVE BEEN MEASURED WITH RESPECT TO THE
MATERIAL AT 100 °C AND 40 °C.
DE AANGEVRAAGDE spanningen ZIJN GEOMETRIEEN TEGEN DE VAN METEN-
DE UNIVERSALITÄTEN VAN 40 °C EN 100 °C.
LAS TENSIONES INDICADAS FUERON MEDIDAS CON RESPECTO A CON UN
MESSAGGERO DE 40 °C Y 100 °C.
DE LAZAROS INDICATAS FUERON MEDIDAS CON RESPECTO A CON UN
INSTRUMENTO INDICADOR DE 40 °C Y 100 °C.
