Car Stereo
Service Bulletin

CSA-14

Sony Service Company - Technical Services
A Division of Sony Electronics Inc.
Sony Drive, Park Ridge, New Jersey 07656

Model: **CDX-91** **No.** **390**

Subject: **No Audio With MDX-U1 Or XDP-U50D.** **Date:** March 25, 1996

Symptom:

(51) There is no audio when the CDX-91 is connected to the MDX-U1 or XDP-U50D via the analog connection (the audio is normal when the digital connection is used).

Solution: This problem may occur if IC31 on the CDX-91 **SERVO** board is the newest type (CXP84332-014Q). If the above mentioned symptom occurs, and if IC31 is the newest type, replace it with the former type (CXP84332-008Q). **Also**, if the suffix of the silkscreened part number on the **MD** board is "-13" a trace on the **MD** board must be cut as shown in the illustration. **Finally**, if the XDP-U50D is being used, make sure that the procedure described in Car Stereo Service Bulletin # 377 has also been performed.
