

Model: CDX-C910**No.** 418R1**Subject:** NO AUDIO OUTPUT**Date:** May 6, 1997**Symptom:****(151)**

The unit will not have audio on the line outputs, this may be caused by the PS1 fusible link open. The link is located on the main board conductor side and gives the B+ voltage to the DC to DC Converter.

Solution:

Replace the fusible link with a 0 ohm resistor. The part number for the 0 ohm resistor is **1-216-296-00**.

Serial Numbers: up to 15700

**REPLACE PS1
WITH ZERO
OHM RESISTOR**
