

## Repair Tips

---

**SUBJECT:** Erases discs, does not play MO discs

---

**DATE:** June/2002

**MODEL (S):** MZ-R700PC

---

**Symptom:** Erases discs, does not play MO discs. Unit shows a "138" error right at the end of setup.

**Solution:** Replacement of the chassis and the spindle motor has corrected this problem. **Spindle motor by itself usually will NOT correct the fault.** PCB's and chassis have been swapped to confirm this. Fault is due to physical impact on a soft surface.
