SPECIFICATIONS

POWER OUTPUT AND TOTAL HARMONIC DISTORTION:

With 8 ohm loads, both channels driven, from 40 – 20,000 Hz; rated 100 watts (STR-K840P only)/80 watts (STR-K740P only) per channel minimum RMS power, with no more than 0.09 % total harmonic distortion from 250 milliwatts to rated output (Models of area code U only).

- Abbreviation
 - U : US model.
 - CA : Canadian model.
 - CEL : AEP model.
 - CEK : UK model.
 - SP : Singapore model. (Malaysia model included.)
 - MX : Mexican model.
 - MY : Malaysia model.
 - AR : Argentine model.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer: Check the antenna terminals, metal trim, “metallized” knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The “limit” indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

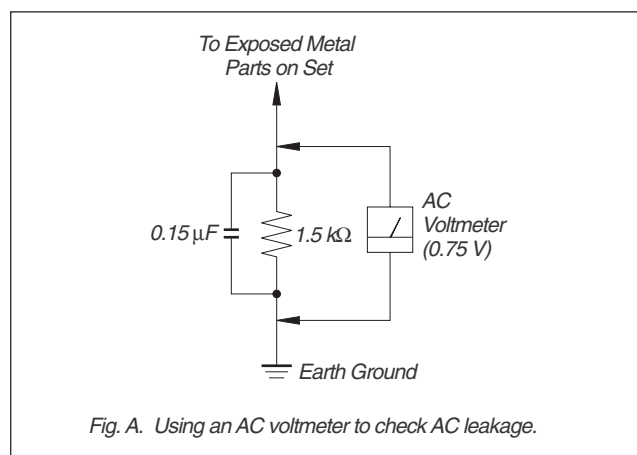

Fig. A. Using an AC voltmeter to check AC leakage.

Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

Unleaded solder

Boards requiring use of unleaded solder are printed with the lead-free mark (LF) indicating the solder contains no lead.

(Caution: Some printed circuit boards may not come printed with the lead free mark due to their particular size.)

: LEAD FREE MARK

Unleaded solder has the following characteristics.

- Unleaded solder melts at a temperature about 40°C higher than ordinary solder.
Ordinary soldering irons can be used but the iron tip has to be applied to the solder joint for a slightly longer time.
Soldering irons using a temperature regulator should be set to about 350°C.
Caution: The printed pattern (copper foil) may peel away if the heated tip is applied for too long, so be careful!
- Strong viscosity
Unleaded solder is more viscous (sticky, less prone to flow) than ordinary solder so use caution not to let solder bridges occur such as on IC pins, etc.
- Usable with ordinary solder
It is best to use only unleaded solder but unleaded solder may also be added to ordinary solder.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK \triangle OR DOTTED LINE WITH MARK \triangle ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE \triangle SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SECTION 2 TEST MODE

FACTORY PRESET MODE

* All preset contents are reset to the default setting.

* Procedure:

While depressing the **VIDEO 1** and the **2CH** buttons simultaneously, press the power **I/⏻** button to turn on the main power. The message "FACTORY" appears and switch off the set.

While depressing the **VIDEO 1** and the **2CH** buttons simultaneously, press the power **I/⏻** button again. The message "FACTORY" appears and the present contents are reset to the default values.

AM CHANNEL STEP 9 KHZ/10 KHZ SELECTION MODE

* Either the 9 kHz step or 10 kHz step can be selected for the AM channel step.

* Procedure:

Set the FUNCTION to AM. Turn off the main power.

While depressing the **TUNING+** button or the **PRESET+** button, press the power **I/⏻** button to turn on the main power. Either the message "9 k STEP" or "10 k STEP" appears. Select the desired step.

* For US/Canadian/E model only

SPEAKER SIZE SELECTION MODE

* Either Normal Speaker or Micro Satellite Speaker can be selected.

* Procedure:

While depressing the **LEVEL** button, press the power **I/⏻** button to turn the main power.

Either the message "NORM. SP." or "MICRO SP." is displayed. Select the desired speaker size.

FLUORESCENT INDICATOR TUBE TEST MODE

* All fluorescent segments are tested. When this test is activated, all segments turn on at the same time, then each segment turns on one after another.

* Procedure:

While depressing the **MD/TAPE** and the **SHIFT** buttons simultaneously, press the power **I/⏻** button to turn on the main power.

1. All segments turn on.

MULTI CHANNEL DECODING, **Digital Cinema Sound**, **A.F.D.**, **MODE**, **2CH** and **SET UP** LED turn on.

2. Press the **VIDEO 1** button, confirm display.

A.F.D., **MODE**, **LEVEL**, **SET UP**, and **Digital Cinema Sound** LED turn on.

3. Press the **VIDEO** button, confirm display

MULTI CHANNEL DECODING, **2CH**, **SURR** and **NAME** LED turn on.

4. Press the **VIDEO** button, All segments turn off.

5. Every pressing of the **VIDEO** button turns on each segment and LED one after another in the same order. (Not only the **VIDEO** button, but also the other buttons such as **DVD/LD**, **TV/SAT**, **MD/TAPE**, **CD**, **TUNER** and **AUX** can be used.)

SOUND FIELD CLEAR MODE

* The preset sound field is cleared when this mode is activated. Use this mode before returning the product to clients upon completion of repair.

* Procedure:

While depressing the **MODE** button, press the power **I/⏻** button to turn on the main power.

The message "SURRE CLR." appears and initialization is performed.

DEMONSTRATION MODE

* Demonstration is performed.

* Procedure :

While depressing the **SET UP** button, press the power **I/⏻** button. The message appears and demonstration is performed.

* To finish DEMONSTRATION MODE, press the power **I/⏻** button while the introduction message appears in the display.

SOFTWARE VERSION DISPLAY MODE

* The software version is displayed.

* Procedure:

While depressing the **ENTER** and the **A.F.D** buttons simultaneously, press the power **I/⏻** button to turn on the main power. The model name, destination and the software version are displayed.

KEY CHECK MODE

* Button check

* Procedure:

While depressing the **VIDEO 1** and the **SHIFT** buttons simultaneously, press the power **I/⏻** button to turn on the main power.

"REST 39" appears. (AEP, UK, model: "RESET 38")

Every pressing of any button other than **I/⏻** and **SPEAKERS** counts down the buttons. The buttons which are already counted once are not counted again. When all buttons are pressed "REST 00" appears.

When **MASTER VOLUME** is rotated in clockwise direction, "VOL MIN", "VOL 1" to "VOL 48", "VOL MAX" appear.

AUTO BETICAL MODE

* This mode is installed in the Europe models only. When this mode is used, the receiver scans the broadcasts that can be received by the tuner, and sets up the broadcasts. Be sure to start scanning after connecting the antenna.

* Procedure:

1. Check that the antenna is connected.
2. Press the  button to turn on the power while pressing the  button.
3. The message "AUTO-BETICAL SELECT" appears and the receiver starts scanning.

SECTION 3
DIAGRAMS

3-1. Circuit Board Location

THIS NOTE IS COMMON FOR PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS.
(In addition to this necessary note is printed in each block.)

For schematic diagrams.

Note:

- All capacitors are in μF unless otherwise noted. p : pF. 50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and $1/4\text{W}$ or less unless otherwise specified.
- % : indicates tolerance.
- Δ : internal component.
-  : nonflammable resistor.
-  : fusible resistor.
-  : panel designation.

Note:
 The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Note:
 Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

-  : B+ Line.
-  : B- Line.

- Voltages and waveforms are dc with respect to ground under no-signal (detuned) conditions.
 No mark : FM

- Voltages are taken with a VOM (Input impedance $10\text{M}\Omega$). Voltage variations may be noted due to normal production tolerances.

- Waveforms are taken with a oscilloscope.
- Circled numbers refer to waveforms.

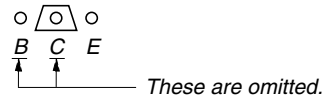

- **Signal path.**
-  : FM
-  : CD (ANALOG)
-  : DVD (DIGITAL)

- **Abbreviation**
- CND : Canadian model
- MY : Malaysia model
