COMPONENTS IDENTIFIED BY MARK ⚠ OR DOTTED LINE WITH MARK ⚠ ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFÉS PAR UNE MARQUE ⚠ SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈSES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPÉMENTS PUBLIÉS PAR SONY.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer.

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, through functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the B+ voltage to see it is at the values specified.
6. Flexible Circuit Board Repairing
   - Keep the temperature of the soldering iron around 270˚C during repairing.
   - Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
   - Be careful not to apply force on the conductor when soldering or unsoldering.

6. REPAIR PARTS LIST

* Color reproduction frame is shown on page 239.

SERVICE NOTE

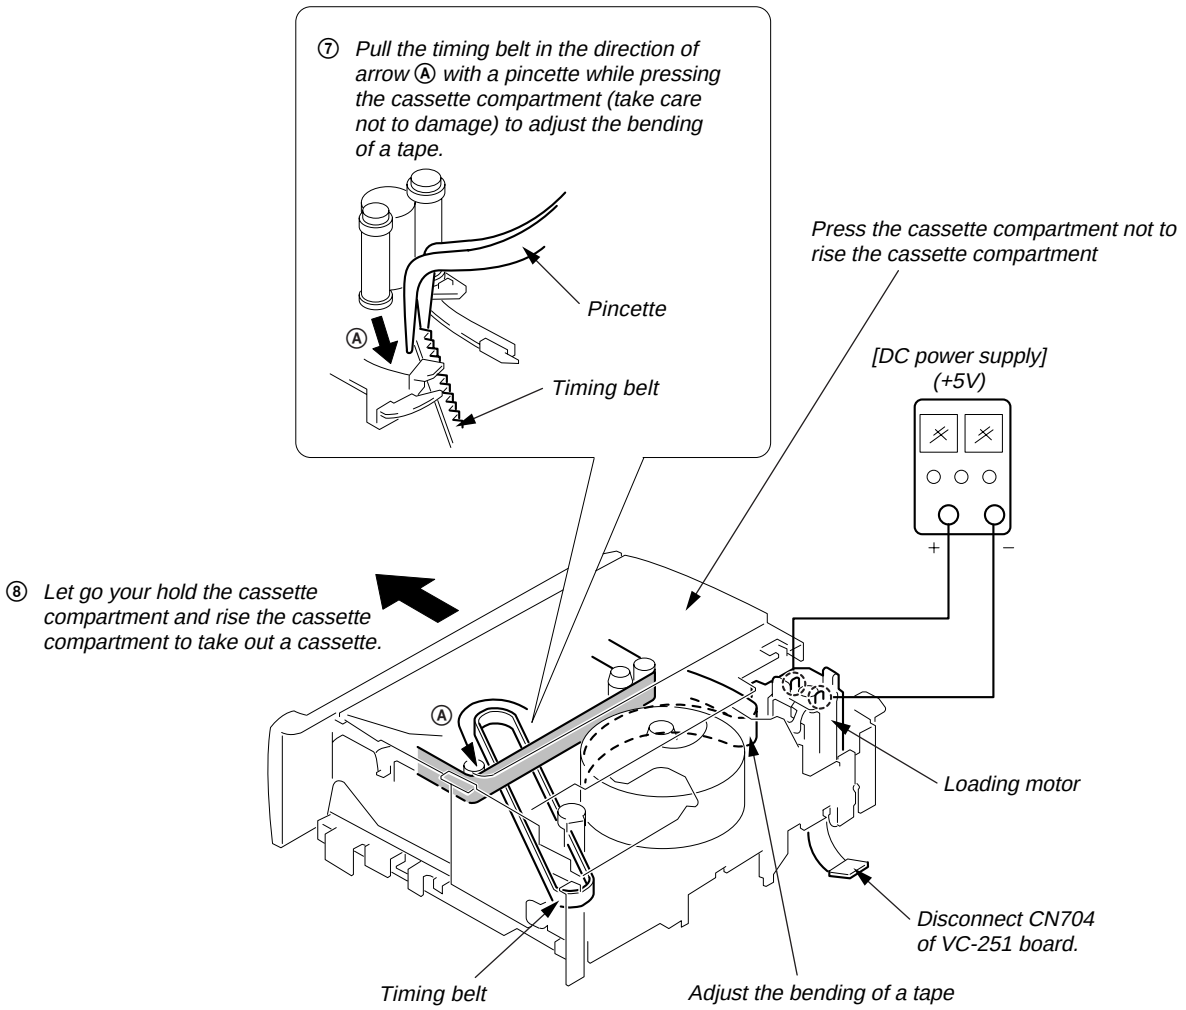
1. POWER SUPPLY DURING REPAIRS

In this unit, about 10 seconds after power is supplied (8.4V) to the battery terminal using the service power cord (J-6082-223-A), the power is shut off so that the unit cannot operate.
This following method is available to prevent this.

Method:
Use the DC IN terminal. (Use the AC power adaptor.)

2. TO TAKE OUT A CASSETTE WHEN NOT EJECT (FORCE EJECT)

① Refer to 2-3. to remove the front panel assembly.
② Refer to 2-5 (TR model). or 2-6 (TRV model). to remove the cabinet (R) assembly.
③ Open the control switch block (FK-1000).
④ Refer to 2-4. to remove the cabinet (L) assembly.
⑤ Disconnect CN704 (8P) of VC-251 board.
⑥ Add +5V from the DC POWER SUPPLY and unload with a pressing the cassette compartment.



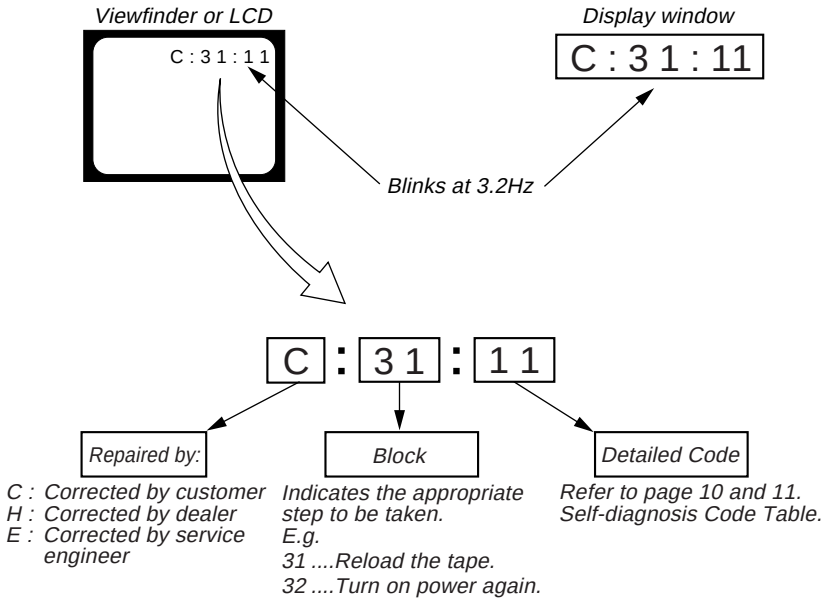
SELF-DIAGNOSIS FUNCTION

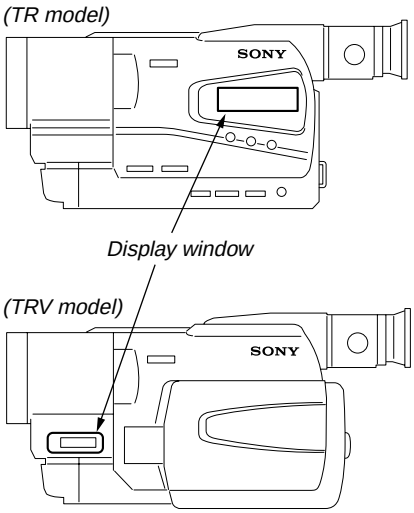
1. Self-diagnosis Function

When problems occur while the unit is operating, the self-diagnosis function starts working, and displays on the viewfinder or LCD or Display window what to do. This function consists of two display; self-diagnosis display and service mode display.
Details of the self-diagnosis functions are provided in the Instruction manual.

2. Self-diagnosis Display

When problems occur while the unit is operating, the counter of the viewfinder or LCD or Display window shows a 4-digit display consisting of an alphabet and numbers, which blinks at 3.2 Hz. This 5-character display indicates the "repaired by:", "block" in which the problem occurred, and "detailed code" of the problem.



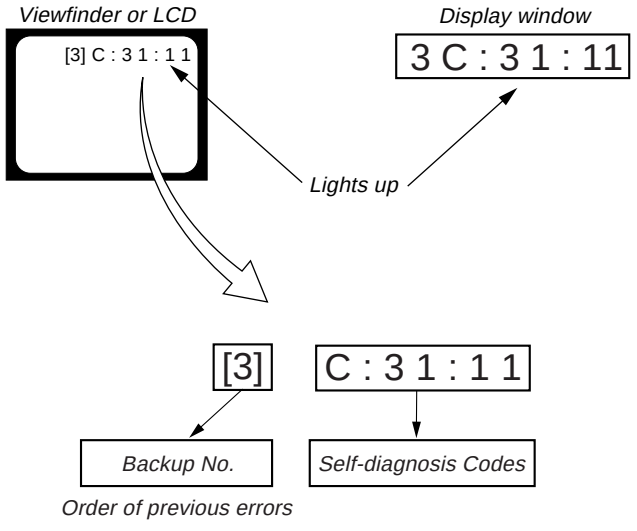


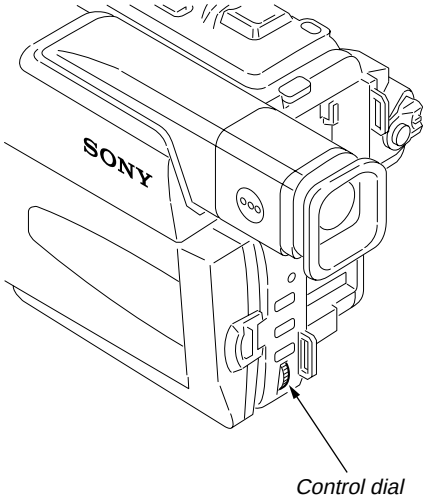
3. Service Mode Display

The service mode display shows up to six self-diagnosis codes shown in the past.

3-1. Display Method

While pressing the "STOP" key, set the switch from OFF to "VTR or PLAYER", and continue pressing the "STOP" key for 5 seconds continuously. The service mode will be displayed, and the counter will show the backup No. and the 5-character self-diagnosis codes.





3-2. Switching of Backup No.

By rotating the control dial, past self-diagnosis codes will be shown in order. The backup No. in the [] indicates the order in which the problem occurred. (If the number of problems which occurred is less than 6, only the number of problems which occurred will be shown.)

[1] : Occurred first time [4] : Occurred fourth time
[2] : Occurred second time [5] : Occurred fifth time
[3] : Occurred third time [6] : Occurred the last time

3-3. End of Display

Turning OFF the power supply will end the service mode display.

Note: The "self-diagnosis display" data will be backed up by the built-in rechargeable lithium battery (CF-1000 block/CF-077 board BT101). When the cabinet (R) assembly is disconnected, the "self-diagnosis display" data will be lost by initialization.

Precautions on camcorder care

Lens and LCD screen/finder (on mounted models only)

- **The LCD screen and the finder are manufactured using extremely high-precision technology so over 99.99% of the pixels are operational for effective use. However, there may be some tiny black points and/or bright points (white, red, blue or green in colour) that constantly appear on the LCD screen and the finder. These points are normal in the manufacturing process and do not affect the recording in any way.**
- Do not let your camcorder get wet. Keep your camcorder away from rain and sea water. Letting your camcorder get wet may cause your camcorder to malfunction. Sometimes this malfunction cannot be repaired **[a]**.
- Never leave your camcorder exposed to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight **[b]**.
- Be careful when placing the camera near a window or outdoors. Exposing the LCD screen, the finder or the lens to direct sunlight for long periods may cause malfunctions **[c]**.
- Do not directly shoot the sun. Doing so might cause your camcorder to malfunction. Take pictures of the sun in low light conditions such as dusk **[d]**.

Использование данного руководства

Меры предосторожности при уходе за видеокамерой

Объектив и экран ЖКД/видоискатель (тоиько на определенных моделях)

- **Экран ЖКД и искатель изготовлены с помощью чрезвычайно высокоприцизионной технологии таким образом, что свыше 99.99% пикселей предназначено для эффективного использования. Однако, на экране ЖКД и искателя могут постоянно появляться мелкие черные и/или яркие точки (белого, красного, синего или зеленого цвета). Появление этих точек вполне нормально для процесса съемки и никоим образом не влияет на записываемое изображение.**
- Не допускайте, чтобы видеокамера становилась влажной. Предохраняйте видеокамеру от дождя и морской воды. Если Вы намочите видеокамеру, то это может привести к неисправности аппарата, которая не всегда может быть устранена **[a]**.
- Никогда не оставляйте видеокамеру в месте с температурой выше 60°C (140°F), как, например, в автомобиле, оставленном на солнце или под прямым солнечным светом **[b]**.
- Помещая фотоаппарат вблизи окна или на открытом воздухе, соблюдайте осторожность. Попадание на экран ЖКД, искатель или объектив прямого солнечного света в течение длительного времени может быть причиной неисправностей. **[c]**.
- Не выполняйте съемку солнца непосредственно. Это может привести к неисправности Вашей видеокамеры. Выполняйте съемку изображений солнца в условиях слабой освещенности, как например, в сумерках **[d]**.

Step 1 Preparing the power supply

Charging the battery pack

Use the battery pack after charging it for your camcorder.
Your camcorder operates only with the "InfoLITHIUM" battery pack (L series).
See page 95 for more information about "InfoLITHIUM" battery pack.

(1) Open the DC IN jack cover and connect the AC power adaptor supplied with your camcorder to the DC IN jack with the plug's ▲ mark facing up.
(2) Connect the mains lead to the AC power adaptor.
(3) Connect the mains lead to the mains.
(4) Set the POWER switch to OFF (CHARGE). Charging begins, and the CHG lamp is lit.

When the CHG lamp goes out, the charging is completed.

Пункт 1 Подготовка источника питания

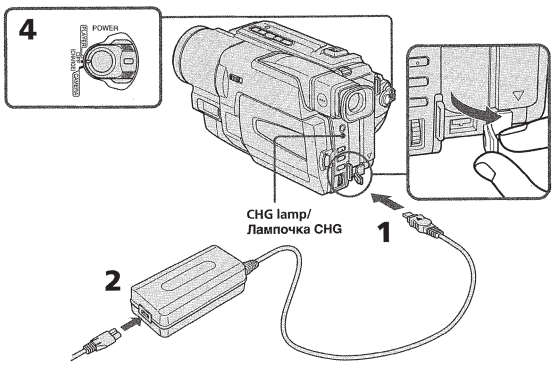
Зарядка батарейного блока

Используйте батарейный блок для Вашей видеокамеры после его зарядки.
Ваша видеокамера работает только с батарейным блоком "InfoLITHIUM" (серии L).
Более подробные сведения о батарейном блоке "InfoLITHIUM" приведены на стр. 95.

(1) Откройте крышку гнезда DC IN и подсоедините сетевой адаптер переменного тока, прилагаемый к Вашей видеокамере, к гнезду DC IN, так чтобы штекер ▲ был направлен вверх.
(2) Подсоедините провод электропитания к сетевому адаптеру переменного тока.
(3) Подсоедините провод электропитания к сетевой розетке.
(4) Установите переключатель POWER в положение OFF(CHARGE). Начнется зарядка, и лампочка CHG загорится.

Кода лампочка CHG погаснет, зарядка завершится.

Getting started Подготовка к эксплуатации



After charging the battery pack

Disconnect the AC power adaptor from the DC IN jack on your camcorder.

После зарядки батарейного блока

Отсоедините сетевой адаптер переменного тока от гнезда DC IN на Вашей видеокамере.

Step 1 Preparing the power supply

Notes

- Prevent metallic objects from coming into contact with the metal parts of the DC plug of the AC power adaptor. This may cause a short-circuit, damaging the AC power adaptor.
- Keep the battery pack dry.
- When the battery pack is not to be used for a long time, charge the battery pack fully, and then use it until it fully discharges again. Do this once a year. Keep the battery pack in a cool place.

While charging the battery pack, the CHG lamp does not light up in the following cases

– The battery pack is not installed correctly.
– Something is wrong with the battery pack.

If the power may go off although the battery remaining indicator indicates that the battery pack has enough power to operate

Charge the battery pack fully again so that the indication on the battery remainiing indicator is correct.

Пункт 1 Подготовка источника питания

Примечания

- Не допускайте контакта металлических предметов с металлическими частями штекера постоянного тока сетевого адаптера переменного тока. Это может привести к короткому замыканию и повреждению сетевого адаптера переменного тока.
- Храните батарейный блок в сухом состоянии.
- Если батарейный блок предполагается не использовать длительный период времени, зарядите батарейный блок полностью, а затем используйте до тех пор, пока он снова полностью не разрядится. Выполняйте это раз в год. Храните батарейный блок в прохладном месте.

Во время зарядки батарейного блока лампочка CHG не будет загораться в следующих случаях

– Батарейный блок установлен не правильно.
– Что-то не в порядке с батарейным блоком.

Если питание может отключиться несмотря на то, батарейный блок достаточно заряжен для работы

Зарядите батарейный блок полностью, так чтобы индикация времени оставшегося заряда батарейного блока была правильной.

What is "InfoLITHIUM"?

The "InfoLITHIUM" is a lithium ion battery pack which can exchange data such as battery consumption with compatible electronic equipment. This unit is compatible with the "InfoLITHIUM" battery pack (L series). Your camcorder operates only with the "InfoLITHIUM" battery. "InfoLITHIUM" L series battery packs have the mark. "InfoLITHIUM" is a trademark of Sony Corporation.

Приблизительное время в минутах при использовании полностью заряженного батарейного блока

При использовании видеокамеры в холодных условиях срок службы батарейного блока будет короче.

Что такое "InfoLITHIUM"?

"InfoLITHIUM" представляет собой литиево-ионный батарейный блок, который может обмениваться данными, такими как потребление заряда батарейного блока, с совместимой электронной аппаратурой. Это устройство совместимо с батарейным блоком "InfoLITHIUM" (серии L). Ваша видеокамера работает только с батарейным блоком "InfoLITHIUM". На батарейных блоках серии "InfoLITHIUM" L имеется знак . "InfoLITHIUM" является торговой маркой корпорации Sony Corporation.

Step 1 Preparing the power supply

Пункт 1 Подготовка источника питания

Connecting to the mains

When you use your camcorder for a long time, we recommend that you power it from the mains using the AC power adaptor.

(1) Open the DC IN jack cover, and connect the AC power adaptor to the DC IN jack on your camcorder with the plug's ▲ mark facing up.

(2) Connect the mains lead to the AC power adaptor.

(3) Connect the mains lead to the mains.

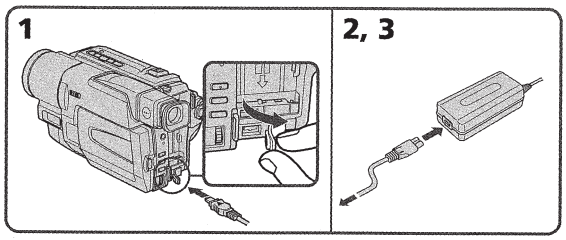
Подсоединение к сетевой розетке

Если Вы собираетесь использовать видеокамеру длительное время, рекомендуется использовать питание от электрической сети с помощью сетевого адаптера переменного тока.

(1) Откройте крышку гнезда DC IN и подсоедините сетевой адаптер переменного тока к гнезду DC IN на Вашей видеокамеру, так чтобы знак ▲ на штекере был обращен вверх.

(2) Подсоедините провод электропитания к сетевому адаптеру переменного тока.

(3) Подсоедините провод электропитания к сетевой розетке.



Step 1 Preparing the power supply

PRECAUTION
The set is not disconnected from the AC power source (mains) as long as it is connected to the mains, even if the set itself has been turned off.

Notes
- The AC power adaptor can supply power even if the battery pack is attached to your camcorder.
- The DC IN jack has "source priority". This means that the battery pack cannot supply any power if the mains lead is connected to the DC IN jack, even when the mains lead is not plugged into the mains.
- Place the AC power adaptor near mains. While using the AC power adaptor, if any trouble occurs with this unit, disconnect the plug from the mains as soon as possible to cut off the power.

Using a car battery
Use Sony DC Adaptor/Charger (optional).

Пункт 1 Подготовка источника питания

МЕРА ПРЕДОСТОРОЖНОСТИ
Аппарат не отключается от источника питания переменного тока (электрической сети) до тех пор, пока он остается подсоединенным к электрической сети, даже если сам аппарат и выключен.

Примечания
- Питание от сетевого адаптера переменного тока может подаваться даже в случае, если батарейный блок прикреплен к Вашей видеокамере.
- Гнездо DC IN имеет "приоритет источника". Это значит, что питание от батарейного блока не может подаваться, если провод электропитания подсоединен к гнезду DC IN, даже если провод электропитания и не подсоединен к сетевой розетке.
- Разместите сетевой адаптер переменного тока возле электросети. Во время использования сетевого адаптера переменного тока, если с данным аппаратом возникнет какая-либо проблема, отсоедините штекер от электросети как можно быстрее для отключения питания.

Использование автомобильного аккумулятора
Используйте адаптлер/зарядное устройство постоянного тока Sony (не прилагается).

Getting started Подготовка к эксплуатации

Step 2 Setting the date and time

Set the date and time settings when you use your camcorder for the first time.

If you do not use your camcorder for about 4 months, the date and time settings may be released (bars may appear) because the built-in rechargeable lithium cell in your camcorder will have been discharged.
First, set the year, then the month, the day, the hour and then the minute.

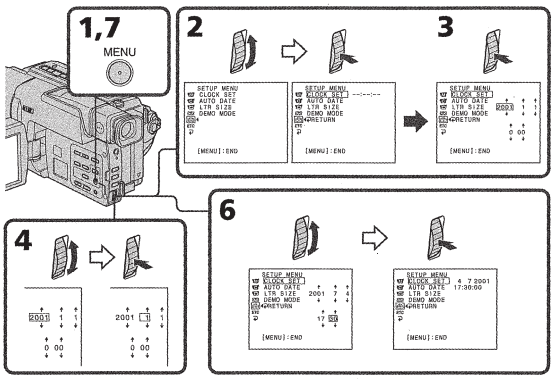
(1) While your camcorder is in CAMERA mode, press MENU to display the menu.
(2) Turn the SEL/PUSH EXEC dial to select [CAM], then press the dial.
(3) Turn the SEL/PUSH EXEC dial to select CLOCK SET, then press the dial.
(4) Turn the SEL/PUSH EXEC dial to adjust the desired year, then press the dial.
(5) Set the month, day and hour by turning the SEL/PUSH EXEC dial and pressing the dial.
(6) Set the minute by turning the SEL/PUSH EXEC dial and pressing the dial by the time signal. The clock starts to move.
(7) Press MENU to make the menu disappear. The time indicator appears.

Пункт 2 Установка даты и времени

Если Вы используете Вашу видеокамеру впервые, выполните установки даты и времени.

Если Вы не собираетесь использовать Вашу видеокамеру около 4 месяцев, установки даты и времени могут быть стерты (могут появиться черточки), потому что встроенный перезаряжаемый литиевый элемент в Вашей видеокамере разрядится.
Сначала установите год, затем месяц, день, час, а затем минуту.

(1) В режиме видеокамеры CAMERA, нажмите кнопку MENU для отображения меню.
(2) Поверните диск SEL/PUSH EXEC для выбора индикации [CAM], а затем нажмите диск.
(3) Поверните диск SEL/PUSH EXEC для выбора команды CLOCK SET, а затем нажмите диск.
(4) Поверните диск SEL/PUSH EXEC для выбора нужного года, а затем нажмите диск.
(5) Установите месяц, день и час путем вращения диска SEL/PUSH EXEC и нажимания диска.
(6) Установите минуту путем вращения диска SEL/PUSH EXEC и нажимания диска в момент передачи сигнала точного времени. Часы начнут функционировать.
(7) Нажмите кнопку MENU для того, чтобы закрыть меню. Появится индикатор времени.



Step 2 Setting the date and time

To check the preset date and time
Press DATE to display the date indicator.
Press TIME to display the time indicator.
Press DATE (or TIME) and then press TIME (or DATE) to simultaneously display the date and time indicator.
Press DATE and/or TIME again. The date and/or time indicator disappears.

The year changes as follows:

1995 ← · · · · → 2001 ← · · · · → 2079

Auto date function
When you use your camcorder for the first time, turn it on and reset the date and time to your local time before you start recording (p. 22). The date is automatically recorded for 10 seconds after you start recording **(Auto date function)**. This function works only once a day.

Note on the time indicator
The internal clock of your camcorder operates on a 24-hour cycle.

Note on the auto date function
You can change the AUTO DATE setting by selecting ON or OFF in the menu settings. The auto date function automatically displays the date once a day.
However, the date may automatically appear more than once a day if:
– you reset the date and time.
– you eject and insert the tape again.
– you stop recording within 10 seconds.
– you set AUTO DATE to OFF once and set it back to ON in the menu settings.

Пункт 2 Установка даты и времени

Для проверки предварительно установленных даты и времени
PНажмите кнопку DATE для отображения индикатора даты.
Нажмите кнопку TIME для отображения индикатора времени.
Нажмите кнопку DATE (или TIME), а затем нажмите кнопку TIME (или DATE) для одновременного отображения индикатора даты и времени.
Нажмите еще раз кнопку DATE и/или TIME. Индикатор даты и/или времени исчезнет.

Год изменяется следующим образом:

Функция автоматической даты
Если Вы используете видеокамеру первый раз, включите ее и переустановите дату и время в соответствии со своим часовым поясом, прежде чем начать запись (стр. 22). Даты будет автоматически записываться в течение 10 секунд после начала записи **(функция автоматической даты)**. Эта функция работает один раз в день.

Примечание по индикатору времени
Встроенные часы Вашей видеокамеры работают в 24-часовом режиме.

Примечание по функции автоматической даты
Вы можете изменять установку AUTO DATE путем выбора положений ON или OFF в установках меню. Функция автоматической даты автоматически отбражает дату один раз в день.
Однако, дата может автоматически появляться больше одного раза при:
– переустановке даты и времени.
– выталкивании и установке ленты обратно на место.
– остановке записи в пределах 10 секунд.
– установке команды AUTO DATE в положение OFF и возвращении в положение ON в установках меню.

To enable smooth transition
You can make the transition between the last scene you recorded and the next scene smooth as long as you do not eject the cassette even if you turn off your camcorder. When you change the battery pack, set the POWER switch to OFF (CHARGE).

If you leave your camcorder in the standby mode for 5 minutes while the cassette is inserted
Your camcorder automatically turns off. This is to save battery power and to prevent battery and tape wear. To resume the standby mode, set the POWER switch to OFF (CHARGE) once, then turn it to CAMERA again.

To set the counter to 0:00:00
Press COUNTER RESET (p. 113).

After recording

(1) Set the POWER switch to OFF (CHARGE).
(2) Close the LCD panel.
(3) Eject the cassette.
(4) Attach the lens cap

After using your camcorder
Remove the battery pack from your camcorder to avoid turning on the built-in light accidentally.

Примечания
Плотно пристегните ремень для захвата видеокамеры. Не прикасайтесь к встроенному микрофону во время записи.

Для обеспечения плавного перехода
Вы можете выполнять плавный переход между последним записанным эпизодом и следующим эпизодом до тех пор, пока не извлечете кассету, даже при выключении Вашей видеокамеры. При замене батарейного блока установите переключатель POWER в положение OFF (CHARGE).

Если Вы оставите Вашу видеокамеру в режиме готовности на 5 минут при вставленной кассете
Ваша видеокамера выключится автоматически. Это предотвращает расход заряда батарейного блока и износ ленты. Для возобновления режима ожидания установите сначала переключатель POWER в положение OFF (CHARGE), а затем снова верните его в положение CAMERA.

Для установки счетчика в положение 0:00:00
Нажмите кнопку COUNTER RESET (стр. 113).

После записи

(1) Установите переключатель POWER в положение OFF (CHARGE).
(2) Закройте панель ЖКД.
(3) Извлеките кассету.
(4) Присоедините колпачок объектива

После использования видеокамеры
Выньте батарейный блок из Вашей видеокамеры во избежание случайного включения встроенной подсветки.

Регулировка экрана ЖКД

Панель ЖКД может передвигаться примерно на 90 градусов в сторону видоискателя и примерно на 180 градусов в сторону объектива.
Если Вы повернете панель ЖКД так, что будет направлена в другую сторону, на экране появится индикатор ☺ (**Зеркальный режим**).

При закрывании панели ЖКД установите ее вертикально, пока не раздастся щелчок, а затем присоедините ее к корпусу видеокамеры.

Примечание
При использовании экрана ЖКД видоискатель автоматически выключается, кроме зеркального режима.

Если Вы используете экран ЖКД вне помещения под прямым солнечным светом
Возможно будет трудно разглядеть экран ЖКД. В этом случае рекомендуется использовать видоискатель.

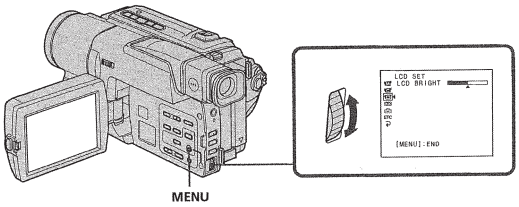
Изображение в зеркальном режиме
Изображение на экране ЖКД будет отображаться зеркально. Однако запись изображения будет нормальной.

Во время записи в зеркальном режиме
Функции DATE и TIME на Вашей видеокамере не работают.

Indicators in the mirror mode
- The STBY indicator appears as ❚❚● and REC as ●. Some of the other indicators appear mirror-reversed and others are not displayed.
- The date appears mirror-reversed when the auto date function is working. However, the date will be normal when recorded.

Adjusting the brightness of the LCD screen

Adjust the brightness of the LCD screen with LCD BRIGHT in 📷 in the menu settings.



LCD screen backlight
You can adjust the brightness of the backlight. Select LCD B.L. in the menu settings (p. 70).

Even if you adjust the LCD screen backlight
The recorded picture will not be affected.

Индикаторы в зеркальном режиме
- Индикатор STBY появится в виде ❚❚●, а индикатор REC в виде ●. Некоторые другие индикаторы появятся в зекально отображенном виде, а некоторые из них не будут отображаться совсем.
- В случае, если работает функция автоматической даты, то дата будет отображаться зеркально, однако на записи дата будет в нормальном виде.

Регулировка яркости экрана ЖКД

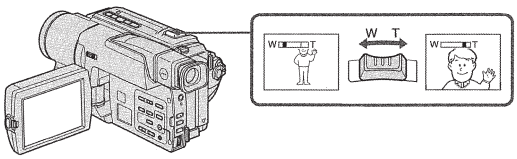
Отрегулируйте яркость экрана ЖКД с помощью команды LCD BRIGHT в 📷 в установках меню.

Задняя подсветка экрана ЖКД
Вы можете отрегулировать яркость задней подсветки. Выберите пункт LCD B.L. в установках меню (стр. 75).

Даже если Вы регулируете заднюю подсветку экрана ЖКД
На записанное изображение это не повлияет.

Using the zoom feature

Move the power zoom lever a little for a slower zoom. Move it further for a faster zoom.
Using the zoom function sparingly results in better-looking recordings.
"T" side: for telephoto (subject appears closer)
"W" side: for wide-angle (subject appears farther away)



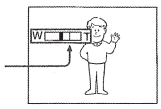
Zoom greater than 20× is performed digitally. To activate digital zoom, select the digital zoom power in D ZOOM in the menu settings (p. 69). The picture quality deteriorates as the picture is processed digitally.

Использование функции наезда видеокамеры

Передвиньте рычаг приводного вариообъектива слегка для относительно медленного наезда видеокамеры. Передвиньте его сильнее для ускоренного наезда видеокамеры.
Использование функции наезда видеокамеры в небольшом количестве обеспечивает наилучшие результаты.
Сторона "T" : для телефото (объект приближается)
Сторона "W" : для широкоугольного вида (объект удаляется)

Наезд видеокамеры более 20× выполняется цифровым методом.
Для приведения в действие цифрового вариообъектива выберите в установках меню приводной цифровой вариообъектив D ZOOM (стр. 74). Качество изображения будет немного худшим, поскольку обработка изображения ведется цифровым способом.

The right side of the bar shows the digital zooming zone. The digital zooming zone appears when you select the digital zoom power in D ZOOM in the menu settings./
Правая сторона полосы на экране показывает зону цифровой трансфокации.
Если в установках меню Вы выберите цифровой приводной объектив D ZOOM, то появится зона цифровой трансфокации.



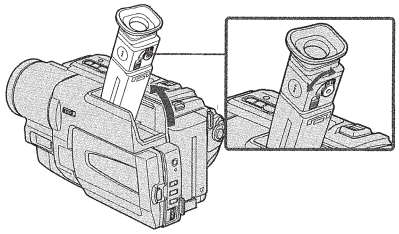
When you shoot close to a subject
If you cannot get a sharp focus, move the power zoom lever to the "W" side until the focus is sharp. You can shoot a subject that is at least about 80 cm (about 2 feet 5/8 inch) away from the lens surface in the telephoto position, or about 1 cm (about 1/2 inch) away in the wide-angle position.

Notes on digital zoom
- Digital zoom starts to function when zoom exceeds 20×.
- The picture quality deteriorates as you go toward the "T" side.

To record pictures with the viewfinder – adjusting the viewfinder

If you record pictures with the LCD panel closed, check the picture with the viewfinder. Adjust the viewfinder lens to your eyesight so that the indicators in the viewfinder come into sharp focus.

Lift up the viewfinder and move the viewfinder lens adjustment lever.



При съемке объекта с близкого положения
Если Вы не можете получить четкой фокусировки, передвиньте рычаг приводного вариообъектива сторону "W" до получения четкой фокусировки. Вы можете выполнять съемку объекта в положении телефото, который отстоит по крайней мере на расстоянии 80 см от поверхности объектива или же около 1 см в положении широкоугольного вида.

Примечания к наезду видеокамеры цифровым методом
- Цифровой вариообъектив начинает срабатывать в случае, если наезд видеокамеры превышает 20×.
- Качество изображения ухудшается по мере приближения к стороне "T".

Для записи изображений с помощью видоискателя – регулировка видоискателя

Если Вы будете записывать изображения при закрытой панели ЖКД, проверьте изображение с помощью видоискателя. Отрегулируйте объектив видоискателя в соответствии со своим зрением, так чтобы индикаторы в видоискателе были четко сфокусированы.

Поднимите видоискатель и подвигайте рычаг регулировки объектива видоискателя.

Notes
- Do not use the NightShot function in bright places (ex. outdoors in the daytime). This may cause your camcorder to malfunction.
- When you keep NIGHTSHOT setting to ON in normal recording, the picture may be recorded in incorrect or unnatural colours.
- If focusing is difficult with the autofocus mode when using the NightShot function, focus manually.

While using the NightShot function, you can not use the following functions:

NightShot Light rays are infrared and so are invisible. The maximum shooting distance using the NightShot Light is about 3 m (10 feet).

Примечания
- Не используйте функцию ночной съемки в ярких местах (например, на улице в дневное время). Это может привести к неисправности Вашей видеокамеры.
- При удержании установки NIGHTSHOT в положении ON при нормальной записи изображение может быть записано в неправильных или неестественных цветах.
- Если фокусировка затруднена в автоматическом режиме при использовании функции ночной съемки, выполните фокусировку вручную.

При использовании функции ночной съемки Вы не можете использовать следующие функции:
– Экспозиция
– PROGRAM AE

Подсветка для ночной съемки
Лучи подсветки для ночной съемки являются инфракрасными и поэтому невидимыми. Максимальное расстояние для съемки при использовании подсветки для ночной съемки равно примерно 3 м.

Using the PROGRAM AE function

You can select PROGRAM AE (Auto Exposure) mode to suit your specific shooting requirements.

Spotlight
This mode prevents people's faces, for example, from appearing excessively white when shooting subjects lit by strong light in the theatre.

Soft portrait
This mode brings out the subject while creating a soft background for subjects such as people or flowers.

Sports lesson
This mode minimizes shake on fast-moving subjects such as in tennis or golf.

Beach & ski
This mode prevents people's faces from appearing dark in strong light or reflected light, such as at a beach in midsummer or on a ski slope.

Sunset & moon
This mode allows you to maintain atmosphere when you are recording sunsets, general night views, fireworks displays and neon signs.

Landscape
This mode is for when you are recording distant subjects such as mountains and prevents your camcorder from focusing on glass or metal mesh in windows when you are recording a subject behind glass or a screen.

Использование функции PROGRAM AE

Вы можете выбрать режим PROGRAM AE (автоматическая съемка) в соответствии со специфическими требованиями к съемке.

Прожекторное освещение
Данный режим предотвращает, к примеру, лица людей от появления в чрезмерно белом свете при выполнении съемки людей, освещенных сильным светом на свадебных церемониях или в театре.

Мягкий портрет
Этот режим позволяет выделить объект на фоне мягкого фона, и подходит для съемки, например, людей или цветов.

Спортивные состязания
Этот режим позволяет минимизировать дрожание при съемке быстро движущихся предметов, например, при игре в теннис или гольф.

Пляжный и лыжный курорт
Этот режим предотвращает появление темных лиц людей в зоне сильного света или отраженного света, например, на пляже в разгар лета или на снежном склоне.

Заход солнца и луны
Этот режим позволяет в точности отражать обстановку при съемке заходов солнца, общих ночных видов, фейерверков и неоновых реклам.

Ландшафт
Этот режим позволяет выполнять съемку отдаленных объектов, таких как горы, например, и предотвращает фокусировку видеокамеры на стекло или металлическую решетку на окнах, когда Вы выполняете запись объектов позади стекла или решетки.

Usable cassettes and playback modes

Selecting the cassette type

You can use both Hi8 and standard 8 mm video cassettes on your camcorder. When you use a Hi8 video cassette, recording and playback are carried out in the Hi8 system. When you use a standard 8 mm video cassette, recording and playback are carried out in the standard 8 mm system.
If you play back a tape recorded on a different video recorder on your camcorder, the playback mode is automatically selected according to the format in which the tape has been recorded.

This Hi8 system is an extension of the standard 8 mm system, and was developed to produce higher quality pictures.
You cannot playback a tape recorded in the Hi8 system correctly on video recorders/players other than a Hi8 video recorder/player.

When you play back

The playback mode (SP/LP) and system, Hi8 or standard 8 mm are automatically selected according to the format in which the tape has been recorded. The quality of the recorded picture in the LP mode, however, will not be as good as the SP mode.

Foreign 8 mm video

Because TV colour systems differ from country to country, you may not be able to play back foreign pre-recorded tapes. Refer to "Using your camcorder abroad" to check the TV colour systems used in foreign countries.

Используемые кассеты и режимы воспроизведения

Выбор типа кассеты

Вы можете использовать на Вашей видеокамере либо видеокассеты Hi8, либо стандартные 8-мм видеокассеты. Если Вы используете видеокассету Hi8, запись и воспроизведение будут выполняться в системе Hi8. Если Вы используете стандартную 8-мм видеокассету, запись и воспроизведение будут выполняться в стандартной 8-мм системе.
Если Вы будете воспроизводить на Вашей видеокамере ленту, записанную на разных видеомагнитофонах, то режим воспроизведения будет выбираться автоматически в соответствии с форматом, в котором была записана лента.

Система Hi8 является модификацией стандартной 8-мм системы и была разработана для получения высококачественных изображений.
Вы не сможете воспроизвести надлежащим образом ленту, записанную в системе Hi8, на видеомагнитофоне/плейере, который не относится к видеомагнитофону/плейеру Hi8.

При выполнении воспроизведения

Режим воспроизведения (SP/LP) и система, Hi8/стандартная 8-мм система выбираются автоматически в соответствии с форматом, в котором была выполнена запись на ленте. Однако, качество записанного изображения в режиме LP не будет таким хорошим, как в режиме SP.

Иностранные 8-мм видеоленты

Поскольку системы цветного телевидения отличаются от страны к стране, возможно Вы не сможете воспроизводить иностранные предварительно записанные ленты. См. раздел "Использование Вашей видеокамеры за границей" для проверки систем цветного телевидения, используемых в других странах.

Usable cassettes and playback modes

Playing back an NTSC-recorded tape

You can play back tapes recorded in the NTSC video system using the SP mode.
However, note that the following will occur during playback of an NTSC-recorded tape.

- When playing back a tape on a TV screen, you may not get the original colour depending on the TV. When you play back on a Multi System TV, set NTSC PB to the desired mode in the menu settings.
- During playback, a black band appears on the lower part of the viewfinder.
- You cannot play back a tape recorded in the NTSC video system with the LP mode neither on the LCD nor on a TV screen.
- If a tape has portions recorded in PAL and NTSC video systems, the tape counter reading is not correct. This discrepancy is due to the difference between the counting cycle of the two video systems.
- You cannot edit the NTSC-recorded tape onto another VCR.

Используемые кассеты и режимы воспроизведения

Воспроизведение лент, записанных в системе NTSC

Вы можете воспроизводить ленты, записанные в системе NTSC, используя режим SP.
Однако, имейте в виду, что во время воспроизведения лент, записанных в системе NTSC, будет иметь место следующее.

- При воспроизведении ленты на экране телевизора Вы можете не получить первоначальные цвета в зависимости от типа телевизора. При воспроизведении на мультисистемном телевизоре установите переключатель NTSC PB на нужный режим в установках меню.
- Во время воспроизведения в нижней части видоискателя будет появляться черная полоса.
- Вы не можете воспроизводить ленту, записанную в видеосистеме NTSC в режиме LP, ни на экране ЖКД, ни на экране телевизора.
- Если на ленте имеются участки, записанные в видеосистемах PAL и NTSC, то функционирование счетчика ленты будет неправильным. Это расхождение объясняется разницей между счетными циклами двух видеосистем.
- Вы не можете выполнять монтаж ленты, записанной в системе NTSC, на другой КВМ.

About "InfoLITHIUM" battery

What is the "InfoLITHIUM" battery?

The "InfoLITHIUM" battery is a lithium-ion battery that has functions for communicating information related to operating conditions between your camcorder and an AC power adaptor.
The "InfoLITHIUM" battery calculates the power consumption according to the operating conditions of your camcorder, and displays the remaining battery time in minutes.

Charging the battery

- Be sure to charge the battery before you start using your camcorder.
- We recommend charging the battery in an ambient temperature of between 10 to 30°C until the CHG lamp goes out, indicating that the battery is fully charged. If you charge the battery outside of this temperature range, you may not be able to effectively charge the battery.
- After charging is completed, either disconnect the cable from the DC IN jack on your camcorder or remove the battery.

Effective use of the battery

- Battery performance drops in low-temperature surroundings. So, the time that the battery can be used is shorter in cold places. We recommend the following to ensure care-free, longer use:
  –Put the battery in a pocket close to your body to warm it up, and insert it in your camcorder immediately before you start taking shots.
  –Use the high-power battery (NP-F730/F750/F930/F950/F960, optional).
- Frequently using the LCD screen or frequently operating playback, fast forward or rewind wears out the battery faster. We recommend using the high-power battery (NP-F730/F750/F930/F950/F960, optional).
- Be certain to turn the POWER switch to OFF (CHARGE) while taking shots or playing back on your camcorder. The battery also wears out when your camcorder is in the standby mode or playback is paused.
- Have spare batteries handy for two or three times the expected shooting time, and take test shots before taking the actual shots.

О батарейном блоке "InfoLITHIUM"

Что такое батарейный блок "InfoLITHIUM"?

Батарейный блок "InfoLITHIUM" является литиево-ионным батарейным блоком, который имеет функции для информации связи, относящейся к условиям взаимодействия между Вашей видеокамерой и сетевым адаптером переменного тока. Батарейный блок "InfoLITHIUM" подсчитывает потребляемую мощность в соответствии с условиями эксплуатации Вашей видеокамеры и отображает время оставшегося заряда батарейного блока в минутах.

Зарядка батарейного блока

- Не забудьте зарядить батарейный блок перед началом эксплуатации видеокамеры.
- Мы рекомендуем заряжать батарейный блок при окружающей температуре в пределах между 10 и 30°C до тех пор, пока не погаснет лампочка CHG, означающая, что батарейный блок полностью заряжен. Если Вы будете заряжать батарейный блок вне рекомендуемого температурного диапазона, возможно Вы не сможете эффективно зарядить батарейный блок.
- После завершения зарядки, либо отсоедините кабель от гнезда DC IN на Вашей видеокамере, либо снимите батарейный блок.

Эффективное использование батарейного блока

- Характеристика батарейного блока упадет при низкой окружающей температуре. Поэтому время использования батарейного блока в холодных местах будет короче. Для обеспечения долговечной эксплуатации без проблем рекомендуется следующее:
  – Положите батарейный блок в свой карман поближе к своему телу для того, чтобы прогреть его, и вставьте его в свою видеокамеру непосредственно перед выполнением съемок.
  – Используйте высокоемкостный батарейный блок (NP-F730/F750/F930/F950/F960, приобретается отдельно).
- Частое использование экрана ЖКД или частое использование функций воспроизведения, ускоренной перемотки вперед или назад приводит к более быстрой разрядке батарейного блока. Рекомендуется использовать высокоемкостный батарейный блок (NP-F730/F750/F930/F950/F960, приобретается отдельно).
- Не забудьте повернуть переключатель POWER в положение OFF (CHARGE) при выполнении съемок или воспроизведения на Вашей видеокамере. Батарейный блок всегда разряжается, если Ваша видеокамера находится в режиме ожидания вили паузы воспроизведения.
- Удобно иметь батарейных блоков для времени съемок в два или три раза больше ожидаемого, рекомендуется также выполнять пробные съемки перед выполнением реальных съемок.

About "InfoLITHIUM" battery

Remaining battery time indicator

- If the POWER switch turns to OFF (CHARGE) immediately even though the remaining battery indicator indicates sufficient battery power, fully charge the battery again. The correct remaining battery time will be indicated. Note, however, that the correct battery indication sometimes will not be restored if it is used in high temperatures for a long time or left in a fully charged state, or the battery is frequently used. Regard the remaining battery time indication as the approximate shooting time.
- The mark indicating there is little remaining battery time sometimes blinks depending on the operating conditions or ambient temperature and environment even if the remaining battery time is 5 to 10 minutes.

How to store the battery

- Even if the battery is not used for a long time, store it in a low humidity, cool place after fully charging it once per year and then using the battery up on your camcorder. This is to maintain the battery's functions.
- To use the battery up on your camcorder, leave your camcorder in the shooting mode until there is no more battery power left without a cassette inserted.

Battery life

- The battery life is limited. Battery capacity drops little by little as you use it more and more, and as time passes. When the available battery time is shortened considerably, a probable cause is that the battery has reached the end of its life. Buy a new battery.
- The battery life varies according to how it is stored and operating conditions and environment for each battery pack.

О батарейном блоке "InfoLITHIUM"

Индикатор времени оставшегося заряда батарейного блока

- Если переключатель POWER будет сразу повернут в положение OFF (CHARGE), даже если индикатор времени оставшегося заряда батарейного блока будет указывать достаточный заряд батарейного блока, то следует снова полностью зарядить батарейный блок. После этого время оставшегося заряда батарейного блока будет отображаться правильно. Однако имейте в виду, что правильная индикация времени оставшегося заряда батарейного блока иногда не будет восстановлена, если он использовался при высоких температурах длительный период времени или был оставлен в полностью заряженном состоянии, либо же батарейный блок часто использовался. Считайте, что индикация времени оставшегося заряда батарейного блока означает прилизительное время съемки.
- Знак , означающий, что осталось немного времени заряда батарейного блока, иногда мигает в зависимости от условий эксплуатации или окружающей температуры, даже если время оставшегося заряда батарейного блока составляет 5-10 минут.

Как хранить батарейный блок

- Даже если батарейный блок не используется в течение длительного периода времени, храните его при низкой влажности, в прохладном месте после его полной зарядки один раз в год и полного использования заряда на Вашей видеокамере. Это необходимо для поддержания функций батарейного блока.
- Для полного использования заряда на вашей видеокамере, оставьте вашу видеокамеру в режиме съемки до тех пор, пока заряд батарейного блока полностью израсходуется без вставленной кассеты.

Срок службы батарейного блока

- Срок службы батарейного блока ограничен. Емкость батарейного блока будет постепенно уменьшаться по мере продолжительности его использования. Если время использования батарейного блока существенно уменьшится, вероятной причиной может быть то, что срок службы батарейного блока подошел к концу. Купите новый батарейный блок.
- Срок службы батарейного блока зависит от условий хранения и эксплуатации каждого батарейного блока.

Maintenance information and precautions

Moisture condensation

If your camcorder is brought directly from a cold place to a warm place, moisture may condense inside your camcorder, on the surface of the tape, or on the lens. In this condition, the tape may stick to the head drum and be damaged or your camcorder may not operate correctly. If there is moisture inside your camcorder, the beep sounds and the indicator flashes. When the indicator flashes at the same time, the cassette is inserted in your camcorder. If moisture condenses on the lens, the indicator will not appear.

If moisture condensation occurs

None of the functions except cassette ejection will work. Eject the cassette, turn off your camcorder, and leave it for about 1 hour with the cassette compartment open. Your camcorder can be used again if the indicator does not appear when the power is turned on again.

Note on moisture condensation

Moisture may condense when you bring your camcorder from a cold place into a warm place (or vice versa) or when you use your camcorder in a hot place as follows:

- You bring your camcorder from a ski slope into a place warmed up by a heating device
- You bring your camcorder from an air-conditioned car or room into a hot place outside
- You use your camcorder after a squall or a shower
- You use your camcorder in a high temperature and humid place

How to prevent moisture condensation

When you bring your camcorder from a cold place into a warm place, put your camcorder in a plastic bag and tightly seal it. Remove the bag when the air temperature inside the plastic bag has reached the surrounding temperature (after about 1 hour).

Конденсация влаги

Если видеокамера принесена прямо из холодного места в теплое, то внутри видеокамеры, на поверхности ленты или на объективе может произойти конденсанция влаги. В таком состоянии лента может прилипнуть к барабану головки и будет повреждена или же видеокамера не сможет работать надлежащим образом. Если внутри видеокамеры произошла конденсация влаги, то прозвучит зуммерный сигнал и будет мигать индикатор . Если в то же самое время будет мигать индикатор , это значит, что в видеокамеру вставлена кассета. Если влага сконденсировалась на объективе, индикатор появляться не будет.

Если произойдет конденсация влаги

Ни одна из функций, кроме выталкивания кассеты, не будут работать. Извлеките кассету, выключите видеокамеру и оставьте ее приблизительно на 1 час с открытым отсеком для кассеты. Если при повторном включении питания индикатор не появится на дисплее, Вы можете снова пользоваться видеокамерой.

Примечание по конденсации влаги

Влага может образоваться, если Вы принесете Вашу видеокамеру из холодного места в теплое (или наоборот) или когда Вы используете Вашу видеокамеру в жарком месте в следующих случаях:

- Вы принесли Вашу видеокамеру с лыжного склона в помещение, где функционирует обогреватель
- Вы принесли Вашу видеокамеру из автомобиля или из комнаты с воздушным кондиционированием в жаркое место на улице
- Вы используете видеокамеру после грозы или дождя
- Вы используете Вашу видеокамеру в очень жарком и влажном месте

Как предотвратить конденсацию влаги

Если видеокамера принесена из холодного места в теплое, то положите видеокамеру в полиэтиленовый пакет и плотно заклейте его. Выньте видеокамеру из полиэтиленового пакета, когда температура воздуха внутри пакета достигнет температуры окружающего воздуха (приблизительно через 1 час).

Cleaning the video head

To ensure normal recording and clear pictures, clean the video heads. The video head may be dirty when:

- The indicator and "CLEANING CASSETTE" message appear one after another or the indicator flashes on the screen.
- Playback pictures contain noise.
- Playback pictures are hardly visible.
- Playback pictures do not appear.

If this happens, clean the video heads with the Sony V8-25CLD cleaning cassette (optional).

[a] Slightly dirty
[b] Very dirty

Note on video heads

When the playback pictures still contain noise even if you have cleaned the video heads with a cleaning cassette, the video heads may have worn down due to long use. If this is the case, they must be replaced with new heads. Contact your Sony dealer or local authorized Sony service facility.

Чистка видеоголовок

Для обеспечения нормальной записи и четкого изображения следует периодически чистить видеоголовки. Видеоголовки возможно загрязнены, если:

- На экране появляются один за другим индикатор и сообщение "CLEANING CASSETTE" или же мигат индикатор .
- Воспроизводимое изображение содержит помехи.
- Воспроизводимое изображение с трудом различимо.
- Воспроизводимое изображение не появляется на экране.

Если это произошло, почистите видеоголовки с помощью очистительной кассеты Sony V8-25CLD (приобретается отдельно).

[a] Слегка загрязнены
[b] Очень загрязнены

Примечание по видеоголовкам

Если воспроизводимое изображение все еще содержит помехи даже после того, как Вы почистили видеоголовки с помощью очистительной кассеты, то, возможно, видеоголовки уже износились вследствие длительной эксплуатации видеокамеры. В этом случае, их следует заменить на новые. Обратитесь в сервисный центр Sony или в местное уполномоченное предприятие по обслуживанию изделий Sony.

About care and storage of the lens

- Wipe the surface of the lens clean with a soft cloth in the following instances.
  - When there are fingerprints on the lens surface
  - In hot or humid locations
  - When the lens is used in environments susceptible to salt such as the seaside
- Store the lens in a well-ventilated location subject to little dirt or dust.

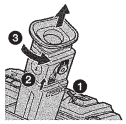
To prevent mold from occurring, periodically perform the adove.
We recommend turning on and operating your camcorder about once per month to keep your camcorder in an optimum state for a long time.

Cleaning the LCD screen

If fingerprints or dust make the LCD screen dirty, we recommend using a LCD Cleaning Kit (optional) to clean the LCD screen.

Removing dust from inside the viewfinder

(1) ❶Remove the screw with a screwdriver (not supplied). ❷Then, while holding the RELEASE knob up, ❸turn the eyecup in a counterclockwise direction and pull it out.
(2) Clean the surface with a commercially available blower for a still camera.
(3) Turn the eyecup in a clockwise direction, then replace the screw.



Caution
Do not remove any other screws. You may remove only the screw to remove the eyecup.

Об уходе за объективом и его хранении

- В следующих случаях следует протирать поверхность объектива дочиста:
  - Если на поверхности объектива имеются отпечатки
  - В жарких и влажных местах
  - Если объектив используется в условиях, подверженных воздействию соли, например, на морском курорте.
- Храните объектив в хорошо проветриваемом место без излишней грязи и пыли.

Для предотвращения образования плесени, периодически выполняйте приведенные выше процедуры.
Рекомендуется включать и использовать некоторое время Вашу видеокамеру один раз в месяц для поддержания оптимального состояния Вашей видеокамеры в течение длительного времени.

Чистка экрана ЖКД

Если на экране ЖКД появятся отпечатки или пыль, рекомендуется воспользоваться очистительным набором для ЖКД (не прилагается) для чистки ЖКД.

Удаление пыли изнутри видоискателя

(1) ❶Отвинтите винт с помощью отвертки (по заказу). ❷Затем, передвинув кнопку RELEASE, ❸поверните окуляр в направлении против часовой стрелки и потяните его.
(2) Почистите поверхность с помощью воздуходувки для фотоаппаратов, которая приобретается отдельно.
(3) Прикрепите окуляр в направлении по часовой стрелке и завинтите винт обратно на место.

Внимание
Не отвинчивайте другие винты. Вы можете отвинчивать только винт для снятия окуляра.

Charging the built-in rechargeable lithium cell

Your camcorder is supplied with a built-in rechargeable lithium cell so as to retain the date and time, etc., regardless of the setting of the POWER switch. The rechargeable lithium cell is always charged as long as you are using your camcorder. The cell, however, will get discharged gradually if you do not use your camcorder. It will be completely discharged in about 4 months if you do not use your camcorder at all.
Even if the rechargeable lithium cell is not charged, it will not affect the camcorder operation. To retain the date and time, etc., charge the cell if the cell is discharged.

Charging the rechargeable lithium cell:

- Connect your camcorder to the mains using the AC power adaptor supplied with your camcorder, and leave your camcorder with the POWER switch turned off for more than 24 hours.
- Or install the fully charged battery pack in your camcorder with the POWER switch turned off for more than 24 hours.

Зарядка встроенного перезаряжаемого литевого элемента

Ваша видеокамера оснащена перезаряжаемой литиевой батарейкой, установленной для того, чтобы поддерживать дату, время и т.д., вне зависимости от установки переключателя POWER. Перезаряжаемая литиевая батарейка всегда заряжена, когда Вы используете Вашу видеокамеру. Однако, батарейка постепенно разрядится, если Вы не будете использовать Вашу видеокамеру. Она будет полностью разряжена примерно через 4 месяца, если Вы вообще не будете пользоваться Вашей видеокамерой. Даже если перезаряжаемая литиевая батарейка не заряжена, она не повлияет на работу видеокамеры. Чтобы поддерживать дату и время, зарядите батарейку, если она разрядилась.

Зарядка перезаряжаемого литиевого элемента:

- Подсоедините Вашу видеокамеру к электросети с помощью сетевого адаптера переменного тока, прилагаемого к Вашей видеокамере, и оставьте Вашу видеокамеру при выключенном положении переключателя POWER более чем на 24 часа.
- Или прикрепите полностью заряженный батарейный блок к Вашей видеокамере и оставьте Вашу видеокамеру с выключенным переключателем POWER более чем на 24 часа.

Precautions

Camcorder operation

- Operate your camcorder on 7.2 V (battery pack) or 8.4 V (AC power adaptor).
- For DC or AC operation, use the accessories recommended in this operating instructions.
- If any solid object or liquid get inside the casing, unplug your camcorder and have it checked by a Sony dealer before operating it any further.
- Avoid rough handling or mechanical shock. Be particularly careful of the lens.
- Keep the POWER switch set to OFF (CHARGE) when you are not using your camcorder.
- Do not wrap your camcorder with a towel, for example, and operate it. Doing so might cause heat to build up inside.
- Keep your camcorder away from strong magnetic fields or mechanical vibration.
- Do not touch the LCD screen with your fingers or a sharp-pointed object.
- If your camcorder is used in a cold place, a residual image may appear on the LCD screen. This is not a malfunction.
- While using your camcorder, the back of the LCD screen may heat up. This is not a malfunction.

Меры предосторожности

Эксплуатация видеокамеры

- Эксплуатируйте видеокамеру от 7,2 В (батарейный блок) или 8,4 В (сетевой адаптер переменного тока)
- Что касается эксплуатации видеокамеры от постоянного и переменного тока, используйте принадлежности, рекомендуемые в данной инструкции по эксплуатации.
- Если какой-нибудь твердый предмет или жидкость попали внутрь корпуса, то выключите видеокамеру и проверьте ее у дилера Sony перед дальнейшей ее эксплуатацией.
- Избегайте грубого обращения с видеокамерой или механических ударов. Будьте особенно осторожны с объективом.
- Если видеокамера не используется, держите выключатель POWER в положении OFF (CHARGE).
- Не заворачивайте Вашу видеокамеру, например, в полотенце, и не эксплуатируйте ее в таком состоянии. В противном случае может произойти повышение температуры внутри видеокамеры.
- Держите Вашу видеокамеру подальше от сильных магнитных полей или механической вибрации.
- Не прикасайтесь к экрану ЖКД своими пальцами или острыми предметами.
- При эксплуатации Вашей видеокамеры в холодном месте, на экране ЖКД может появляться остаточное изображение. Это не является неисправностью.
- При эксплуатации Вашей видеокамеры, задняя сторона экрана ЖКД может нагреваться. Это не является неисправностью.

Built-in light

- Do not knock or jolt the built-in light while it is turned on as it may damage the bulb or shorten the life of the bulb.
- Do not leave the built-in light on while it is resting on or against something; it may cause a fire or damage the built-in light.

On handling tapes

Do not insert anything into the small holes on the rear of the cassette. These holes are used to sense the type and thickness of the tape and if the recording tab is in or out.

Camcorder care

- Remove the tape, and periodically turn on the power, operate the CAMERA and PLAYER sections and play back a tape for about 5 minutes when your camcorder is not to be used for a long time.
- Clean the lens with a soft brush to remove dust. If there are fingerprints on the lens, remove them with a soft cloth.
- Clean the camcorder body with a dry soft cloth, or a soft cloth lightly moistened with a mild detergent solution. Do not use any type of solvent which may damage the finish.
- Do not let sand get into your camcorder. When you use your camcorder on a sandy beach or in a dusty place, protect it from the sand or dust. Sand or dust may cause your camcorder to malfunction, and sometimes this malfunction cannot be repaired.

Встроенная подсветка

- Не стучите по устройству подсветки и не трясите его в то время, когда оно включено, поскольку это может повредить лампу накаливания или сократить ее срок службы.
- Не оставляйте встроенную подсветку включенной в то время, когда она на чем-то лежит или направлена на какой-либо предмет.

Относительно обращения с лентами

Не вставляйте ничего в маленькие отверстия на задней стороне кассеты. Эти отверстия используются для определения типа и толщины ленты, а также для определения наличия или отсутствия лепестка защиты записи на ленте.

Уход за видеокамерой

- Если Ваша видеокамера не будет использоваться в течение длительного времени, выньте кассету с лентой и периодически включайте питание, оперируйте устройствами CAMERA и PLAYER и воспроизводите ленту в течение 5-ти минут.
- Чистите объектив с помощью мягкой кисточки для удаления пыли. Если имеются отпечатки пальцев на объективе, удалите их с помощью мягкой ткани.
- Чистите корпус видеокамеры с помощью сухой мягкой ткани или мягкой ткани, слегка смоченной раствором умеренного моющего средства. Не используйте каких-либо типов растворителей, которые могут повредить отделку.
- Не допускайте попадания песка в видеокамеру. Если Вы используете видеокамеру на песчаном пляже или в каком-либо пыльном месте, предохраните аппарат от песка или пыли. Песок или пыль могут привести к неисправности аппарата, которая иногда может быть неисправимой.

Maintenance information and precautions

AC power adaptor

- Unplug the unit from the mains when you are not using the unit for a long time. To disconnect the mains lead, pull it out by the plug. Never pull the mains lead itself.
- Do not operate the unit with a damaged cord or if the unit has been dropped or damaged.
- Do not bend the mains lead forcibly, or place a heavy object on it. This will damage the cord and may cause fire or electrical shock.
- Prevent metallic objects from coming into contact with the metal parts of the connecting section. If this happens, a short may occur and the unit may be damaged.
- Always keep metal contacts clean.
- Do not disassemble the unit.
- Do not apply mechanical shock or drop the unit.
- While the unit is in use, particularly during charging, keep it away from AM receivers and video equipment. AM receivers and video equipment disturb AM reception and video operation.
- The unit becomes warm during use. This is not a malfunction.
- Do not place the unit in locations that are:
  - Extremely hot or cold
  - Dusty or dirty
  - Very humid
  - Vibrating

Сетевой адаптер переменного тока

- Отсоедините аппарат от электрической сети, если он не используется длительное время. Для отсоединения сетевого шнура потяните его за разъем. Никогда не тяните за сам шнур.
- Не эксплуатируйте аппарат с поврежденным шнуром или же в случае, если аппарат упал или был поврежден.
- Не сгибайте сетевой провод силой и не ставьте на него тяжелые предметы. Это повредит провод и может привести к пожару или поражению электрическим током.
- Будьте осторожны, чтобы никакие металлические предметы не соприкасались с металлическими частями соединительной секции. Если это случится, то может произойти короткое замыкание, и аппарат может быть поврежден.
- Всегда поддерживайте металлические контакты в чистоте.
- Не разбирайте аппарат.
- Не подвергайте аппарат механической вибрации и не роняйте его.
- При использовании аппарата, особенно во время зарядки, держите его подальше от приемников АМ-радиовещания и видеоаппаратуры. Приемники АМ-радиовещания и видеоаппаратура нарушают АМ-радиоприем и работу видеоаппаратуры.
- В процессе эксплуатации аппарат нагревается. Это является вполне нормальным.
- Не размещайте аппарат в местах:
  - Чрезмерно жарких или холодных
  - Пыльных или грязных
  - Очень влажных
  - Подверженных вибрации

Maintenance information and precautions

Battery pack

- Use only the specified charger or video equipment with the charging function.
- To prevent an accidental short circuit, do not allow metal objects to come into contact with the battery terminals.
- Keep the battery pack away from fire.
- Never expose the battery pack to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight.
- Keep the battery pack dry.
- Do not expose the battery pack to any mechanical shock.
- Do not disassemble nor modify the battery pack.
- Attach the battery pack to the video equipment securely.
- Charging while some capacity remains does not affect the original battery capacity.

Notes on dry batteries

– CCD-TRV49E/TRV59E/TRV78E/TRV98E only

To avoid possible damage from battery leakage or corrosion, observe the following:

- Be sure to insert the batteries with the + – polarities matched to the + – marks.
- Dry batteries are not rechargeable.
- Do not use a combination of new and old batteries.
- Do not use different types of batteries.
- Current flows from batteries when you are not using them for a long time.
- Do not use leaking batteries.

If batteries are leaking

- Wipe off the liquid in the battery compartment carefully before replacing the batteries.
- If you touch the liquid, wash it off with water.
- If the liquid get into your eyes, wash your eyes with a lot of water and then consult a doctor.

If any problem occurs, unplug your camcorder and contact your nearest Sony dealer.

Батарейный блок

- Используйте только указанные устройство зарядки или видеоаппаратуру с функцией зарядки.
- Для предотвращения несчастного случая из-за короткого замыкания не допускайте контакта металлических предметов с контактами батарейного блока.
- Храните батарейный блок подальше от огня.
- Никогда не подвергайте батарейный блок воздействию температур выше 60°C, например, не оставляйте батарейный блок в припаркованном автомобиле под солнцем или прямым солнечным светом.
- Храните батарейный блок в сухом виде.
- Не подвергайте батарейный блок механическим ударам.
- Не разбирайте и не переделывайте батарейный блок.
- Подсоединяйте батарейный блок к видеоаппаратуре плотно.
- Зарядка при наличии оставшейся емкости не влияет на первоначальную емкость батарейного блока.

Примечание к сухим батарейкам – Только модели CCD-TRV76E/TRV78E/TRV98E

Во избежание возможного повреждения видеока-меры вследствие утечки внутреннего вещества батареек или коррозии соблюдайте следующее:

- При установке батареек соблюдайте правильную полярность + – в соответствии с метками + –.
- Сухие батарейки нельзя перезаряжать.
- Не используйте новые батарейки вместе со старыми.
- Не используйте батарейки разного типа.
- Если батарейки не используются длительное время, они постепенно разряжаются.
- Не используйте батарейки, которые потекли.

Если произошла утечка внутреннего вещества батареек

- Перед тем, как заменить батарейки, тщательно протрите остатки жидкости в отсеке для батареек.
- В случае попадания жидкости на кожу, промойте жидкость водой.
- В случае попадания жидкости в глаза, промойте свои глаза большим количеством воды, после чего обратитесь к врачу.

В случае возникновения каких-либо проблем, отключите Вашу видеокамеру от источника питания и обратитесь в ближайший сервисный центр Sony.

Notes on the Remote Commander

- Point the remote sensor away from strong light sources such as direct sunlight or overhead lighting. Otherwise, the Remote Commander may not function properly.
- Your camcorder works in the commander mode VTR 2. Commander modes 1, 2 and 3 are used to distinguish your camcorder from other Sony VCRs to avoid remote control misoperation. If you use another Sony VCR in the commander mode VTR 2, we recommend changing the commander mode or covering the sensor of the VCR with black paper.

Примечания к пульту дистанционного управления

- Держите дистанционный датчик подальше от сильных источников света, как например, прямые солнечные лучи или иллюминация. В противном случае дистанционное управление может не действовать.
- Данная видеокамера работает в режиме пульта дистанционного управления VTR 2. Режимы пульта дистанционного управления 1, 2 и 3 используются для отличия данной видеокамеры от других KBM фирмы Sony во избежание неправильной работы дистанционного управления. Если Вы используете другой KBM фирмы Sony, работающий в режиме VTR 2, мы рекомендуем Вам изменить режим пульта дистанционного управления или закрыть дистанционный датчик KBM черной бумагой.

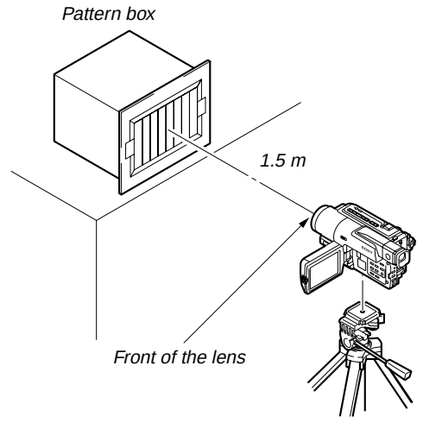
(Measuring conditions voltage and waveform)
- Voltages and waveforms are measured between the measurement points and ground when camera shoots color bar chart of pattern box. They are reference values and reference waveforms. *
  (VOM of DC 10 MΩ input impedance is used.).
- Voltage values change depending upon input impedance of VOM used.) *

1. Connection



2. Adjust the distance so that the output waveform of Fig. a and the Fig. b can be obtain.

Precautions Upon Replacing CCD imager

- The CD-281/286 board mounted as a repair part is not equipped with a CCD imager.
  When replacing this board, remove the CCD imager from the old one and mount it onto the new one.
- If the CCD imager has been replaced, carry out all the adjustments for the camera section.
- As the CCD imager may be damaged by static electricity from its structure, handle it carefully like for the MOS IC.
  In addition, ensure that the receiver is not covered with dusts nor exposed to strong light.

To operate the adjustment remote commander, connect the AC power adapter to the DC IN jack of CPC jig for BX/BK, or connect the L series Info-LITHIUM battery to the battery terminal of CPC jig for BX/BK. (Fig. 5-1-3.)
3) The front panel block (MI-040/041 board, microphone unit, video light) need not be assembled except during the steady shot operation check.

Note4: As removing the cabinet (R) (removing the VC-251 board CN709) means removing the lithium 3V power supply (CF-1000 block/CF-077 board BT101), data such as date, time, user-set menus will be lost. After completing adjustments, reset these data. If the cabinet (R) has been removed, the self-diagnosis data, data on history of use (total drum rotation time etc.) will be lost. Before removing, note down the self-diagnosis data (data of page: 2, address: B0 to C6) and data on history use (data of page: 2, address: A2 to AA and E0 to E2). (Refer to "5-4. Service Mode" for the self-diagnosis data and data on the history use.)

Note5: Setting the "Forced Camera Power ON" Mode
1) Select page: 0, address: 01, and set data: 01.
2) Select page: D, address: 10, set data: 01, and press the PAUSE button.
The above procedure will enable the camera power to be turned on with the SS-1000 block removed. After completing adjustments, be sure to exit the "Forced Camera Power ON Mode".

Note6: Exiting the "Forced Camera Power ON" Mode
1) Select page: 0, address: 01, and set data: 01.
2) Select page: D, address: 10, set data: 00, and press the PAUSE button.
3) Select page: 0, address: 01, and set data: 00.

3. Subjects

1) Color bar chart (Color reproduction adjustment frame)
   When performing adjustments using the color bar chart, adjust the picture frame as shown in Fig. 5-1-6. (Color reproduction adjustment frame)
2) Clear chart (Color reproduction adjustment frame)
   Remove the color bar chart from the pattern box and insert a clear chart in its place. (Do not perform zoom operations during this time.)
3) Flange back adjustment chart
   Make the chart shown in Fig. 5-1-7 using A0 size (1189mm × 841mm) black and white vellum paper.

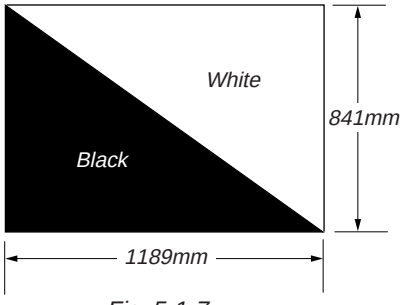

Fig. 5-1-7.

Note: Use matte vellum paper bigger than A0, and make sure the edges of the black and white paper joined together are not rough.

1-2. INITIALIZATION OF D, E, F, 7 PAGE DATA

1. Initializing the D, E, F, 7 Page Data

Note1: If "Initializing the D, E, F, 7 Page Data" is performed, all data of the D page, E page, F page and 7 page will be initialized. (It is impossible to initialize a single page.)

Note2: If the D, E, F, 7 page data has been initialized, "Modification of D, E, F, 7 Page Data" and all adjustments need to be performed again.

2. Modification of D, E, F, 7 Page Data

If the D, E, F, 7 page data has been initialized, change the data of the "Fixed data-2" address shown in the following tables by manual input.

Modifying Method:

1) Before changing the data, select page: 0, address: 01, and set data: 01.
2) New data for changing are not shown in the tables because they are different in destination. When changing the data, copy the data built in the same model.
   Note: If copy the data built in the different model, the camcorder may not operate.
3) When changing the data, press the PAUSE button of the adjustment remote commander each time when setting new data to write the data in the non-volatile memory.
4) Check that the data of adjustment addresses is the initial value. If not, change the data to the initial value.

Processing after Completing Modification of D, E, F, 7 Page data

Order	Page	Address	Data	Procedure
1	2	00	29	Set the data

11. Angular Velocity Sensor Sensitivity Adjustment (CCD-TR818/TRV68/TRV78/TRV78E/TRV88/TRV98/ TRV98E)

Precautions on the Parts Replacement

There are two types of repair parts.

Type A: ENC03JA

Type B: ENC03JB

Replace the broken sensor with a same type sensor. If replace with other type parts, the image will vibrate up and down or left and right during hand-shake correction operations. After replacing, re-adjust according to the adjusting method after replacement.

Precautions on Angular Velocity Sensor

The sensor incorporates a precision oscillator. Handle it with care as if it dropped, the balance of the oscillator will be disrupted and operations will not be performed properly.

5-4. SERVICE MODE

4-1. ADJUSTMENT REMOTE COMMANDER

The adjustment remote commander is used for changing the calculation coefficient in signal processing, EVR data, etc. The adjustment remote commander performs bi-directional communication with the unit using the remote commander signal line (LANC). The resultant data of this bi-directional communication is written in the non-volatile memory.

1. Using the Adjustment Remote Commander

1) Connect the adjustment remote commander to CN713 of VC-251 board or CPC connector of FP-262 flexible via CPC jig for BX/BK (J-6082-521-A). To operate the adjustment remote commander, connect the AC power adapter (8.4Vdc) to the DC IN jack of CPC jig for BX/BK, or connect the L series Info-LITHIUM battery to the battery terminal of CPC jig for BX/BK.
2) Set the HOLD switch of the adjustment remote commander to "HOLD" (SERVICE position). If it has been properly connected, the LCD on the adjustment remote commander will display as shown in Fig. 5-4-1.

Fig. 5-4-1.

3) Operate the adjustment remote commander as follows.
   - Changing the page
     The page increases when the EDIT SEARCH+ button is pressed, and decreases when the EDIT SEARCH– button is pressed. There are altogether 16 pages, from 0 to F.

Hexadecimal notation	0	1	2	3	4	5	6	7	8	9	A	B	C	D	E	F
LCD Display	0	1	2	3	4	5	6	7	8	9	A	b	c	d	E	F
Decimal notation conversion value	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

   - Changing the address
     The address increases when the FF (►►) button is pressed, and decreases when the REW (◄◄) button is pressed. There are altogether 256 addresses, from 00 to FF.
   - Changing the data (Data setting)
     The data increases when the PLAY (►) button is pressed, and decreases when the STOP (■) button is pressed. There are altogether 256 data, from 00 to FF.
   - Writing the adjustment data
     The PAUSE button must be pressed to write the adjustment data (D, E, F, 7 page) in the nonvolatile memory. (The new adjusting data will not be recorded in the nonvolatile memory if this step is not performed.)
4) After completing all adjustments, turn off the main power supply (8.4 V) once.

2. Precautions Upon Using the Adjustment Remote Commander

Mishandling of the adjustment remote commander may erase the correct adjustment data at times. To prevent this, it is recommended that all adjustment data be noted down before beginning adjustments and new adjustment data after each adjustment.

4-2. DATA PROCESS

The calculation of the DDS display and the adjustment remote commander display data (hexadecimal notation) are required for obtaining the adjustment data of some adjustment items. In this case, after converting the hexadecimal notation to decimal notation, calculate and convert the result to hexadecimal notation, and use it as the adjustment data. Indicates the hexadecimal-decimal conversion table.

Note: The characters shown in the parenthesis ( ) shown the display on the adjustment remote commander.

(Example) If the DDS display or the adjustment remote commander shows BD (bd);
Because the upper digit of the adjustment number is B (b), and the lower digit is D (d), the meeting point "189" of ① and ② in the above table is the corresponding decimal number.

Table. 5-4-1.

4-3. SERVICE MODE

Note: After the completion of the all adjustments, cancel the service mode by either of the following ways.

1) Unplug the main power supply and remove the lithium battery. (In this case, date and time and menu setting have been set by users are canceled. Perform resetting.)
2) After data on page: D and F is restored, return data of the address: 01 on page: 0 to 00. And when data on page: 2 is changed, return the data to the original condition.

1. Test Mode Setting

Set/release each test mode. Set page: 0, address: 01, data: 01 before setting the data of page D and F.

Page F	Address 22

Data	Function
80	Normal
81	Test mode Various emergency prohibitions and releases Drum emergency, capstan emergency, loading motor emergency, reel emergency, tape top and end, DEW detection

Page D	Address 10

Data	Function
00	Normal
01	Camera power ON
02	VTR power ON
03	Camera + VTR power ON

* For page D and F, the data set will be recorded in the nonvolatile memory by pressing the PAUSE button on the adjustment remote commander. Take note that, in this case, the test mode will not be released even if the main power has been turned off.

* Be sure to return the data of page: F, address: 22 to 80, and the data of page : D, address: 10 to 00 after completing adjustments/ repairs and press the PAUSE button of the adjustment remote commander. And set page: 0, address: 01, data: 00.

2. Emergency Memory Address

Page F	Address 10 to 1B

Address	Contents
10	1st EMG code
12	Upper: MSW code when the mechanism starts shifting the 1st time Lower: MSW code when the 1st emergency occurs
13	Lower: Target MSW code of the 1st emergency occurs
14	2nd EMG code
16	Upper: MSW code when the mechanism starts shifting the 2nd time Lower: MSW code when the 2nd emergency occurs
17	Lower: Target MSW code of the 2nd emergency occurs
18	Last EMG code
1A	Upper: MSW code when the mechanism starts shifting the last time Lower: MSW code when the last emergency occurs
1B	Lower: Target MSW code of the last emergency occurs

When there are no emergency, data 00 will be written in the above addresses (10 to 1B). When the first emergency occurs, the data corresponding to the emergency will be written in the address (10 to 13) for this first emergency. In the same way, when the second emergency occurs, the data corresponding to the emergency will be written in the address (14 to 17) for this second emergency.
The data corresponding to the emergency occurring the last will be written in the address (18 to 1B) for this last emergency.
Therefore the data of addresses 18 to 1B are renewed each time an emergency occurs.

Note 1: Be sure to rewrite the data of addresses 10 to 1B to 00 after repairs/adjustments.
Note 2: When rewriting the data, be sure to press the PAUSE button of the remote commander after setting the data.

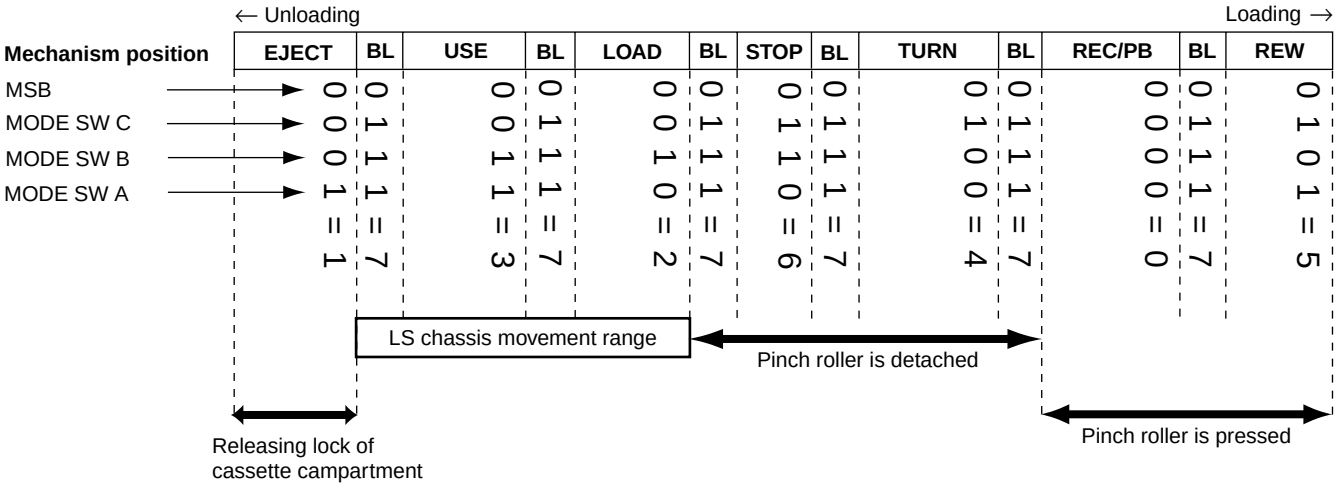
2-1. EMG code (Emergency code)

The codes shown in the following table which correspond to errors that occur are recorded in addresses 10, 14, and 18.

Code	Type of Emergency
00	No error
10	Loading motor time-out during load
11	Loading motor time-out during unload
20	T reel emergency (reel slack) during unloading
21	S reel emergency (reel slack) during unloading
22	T reel emergency
23	S reel emergency
30	FG emergency at the start up of the capstan
31	FG emergency during the normal rotation of the capstan
40	FG emergency at the start up of the drum
41	PG emergency at the start up of the drum
42	FG emergency during the normal rotation of the drum
43	PG emergency during the normal rotation of the drum
44	Phase emergency during the normal rotation of the drum

2-2. MSW codes

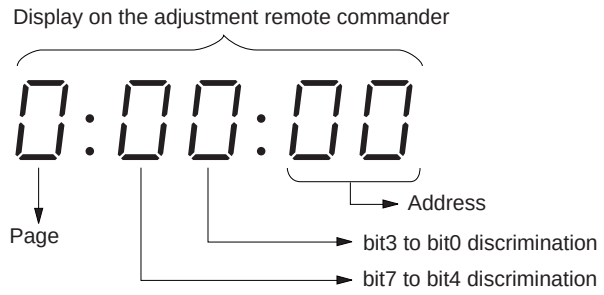
- The lower parts of the data of addresses 12, 16 and 1A represent the MSW codes (mode switch, mechanism position) when errors occurs.
- The upper parts of the data of addresses 12, 16 and 1A represent, when the mechanism position is to be moved, the MSW codes at the start of movement (when moving the loading motor).
- The lower parts of the data of addresses 13, 17 and 1B represent the MSW codes of the desired movement when the mechanism position is to be moved.



Mechanism Position	MSW Code	Contents
EJECT	1	Position at which the cassette compartment lock is released. The mechanism will not move any further in the unloading direction.
BL	7	BLANC code. Between two codes. The mechanism will not be stopped by this code while it is operating.
USE	3	EJECT completion position. When the cassette is ejected, the mechanism will stop at this position.
LOAD	2	Code during loading/unloading. Code that is used while the LS chassis is moving.
STOP	6	Normal stop position. The pinch roller separates, the tension regulator returns, and the brakes of both reels turn on.
TURN	4	Position at which is used when the pendulum gear swings from S to T or from T to S.
RECP/PB	0	PB, REC, CUE, REV, PAUSE, FF positions. The pinch roller is pressed and tension regulator is on.
REW	5	REW position. REW are carried at this position. The mechanism will not move any further in the loading direction.

3. Bit Value Discrimination

Bit values must be discriminated using the display data of the adjustment remote commander for the following items. Us the table below to discriminate if the bit value is “1” or “0”.



(Example) If the remote commander display is “8E”, bit value from bit 7 to bit 4 can be discriminated from the column Ⓐ, and those from bit 3 to bit 0 from column Ⓑ.

	Display on the adjustment remote commander	Bit values bit3 or bit7	bit2 or bit6	bit1 or bit5	bit0 or bit4
	0	0	0	0	0

Subject

- This SUPPLEMENT -1 describes the change of the CCD imager of the CCD-TRV68/TRV78/TRV88/TRV98 (NTSC model) from type S to type M.
  The following contents are added in accordance with this change.

	Type S	Type M
CCD BLOCK ASSY	A-7031-207-A	A-7031-301-A
VC-251 Board	A-7096-405-A (1-680-208-11)	A-7096-815-A (1-608-208-13)
Adjustments		
CAMERA Color Reproduction Frame		

Note1: See page 2 “Discrimination of the CCD imager type” on how to identify the CCD imager type S from type M.
Note2: In the schematic diagrams, the changed blocks are exchanged with the new circuits.

- The LCD (Liquid Crystal Display) panel is supplied as the block assembly.

Discrimination of the CCD imager type

Method 1: The check method using the adjustment remote commander.

1) Select page: 6, address: 04, and check the data.

	Type S	Type M
Data	DF to FF	9E to C0

Method 2: The check method from the resistor values.

1) Check the R611 and R612 on VC-251 board.

	Type S	Type M
R611	10 kΩ	47 kΩ
R612	XX	100 kΩ

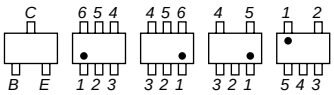
SECTION 4. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

4-2. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

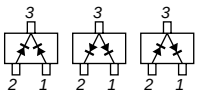
THIS NOTE IS COMMON FOR WIRING BOARDS AND SCHEMATIC DIAGRAMS
(In addition to this, the necessary note is printed in each block)

(For printed wiring boards)
- ▒▒▒: Pattern from the side which enables seeing.
  (The other layers' patterns are not indicated.)
- Through hole is omitted.
- Circled numbers refer to waveforms.
- There are few cases that the part printed on diagram isn't mounted in this model.
- Chip parts.

Transistor



Diode



(For schematic diagrams)
- All capacitors are in mF unless otherwise noted. pF : m mF. 50V or less are not indicated except for electrolytics and tantalums.
- Chip resistors are 1/10W unless otherwise noted.
  kW=1000W, MW=1000kW.
- Caution when replacing chip parts.
  New parts must be attached after removal of chip.
  Be careful not to heat the minus side of tantalum capacitor, Because it is damaged by the heat.
- Some chip part will be indicated as follows.

	22U	10UH
	TA A	2520

Kinds of capacitor
Temperature characteristics
External dimensions (mm)

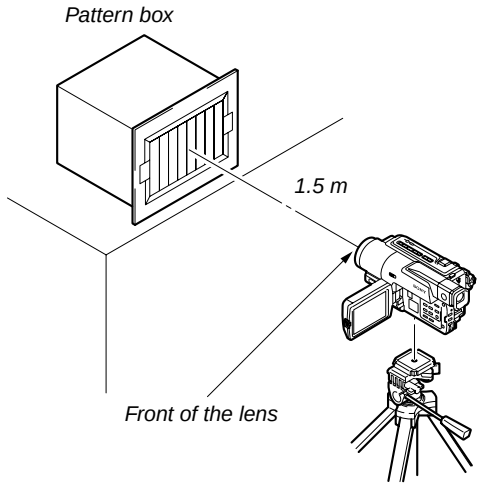
- Constants of resistors, capacitors, ICs and etc with XX indicate that they are not used.
  In such cases, the unused circuits may be indicated.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- Signal name
  XEDIT → $\overline{\text{EDIT}}$ PB/XREC → PB/$\overline{\text{REC}}$
- : non flammable resistor
- : fusible resistor
- : panel designation
- : B+ Line *
- : B– Line *
- : IN/OUT direction of (+,–) B LINE. *
- : adjustment for repair. *
- Circled numbers refer to waveforms. *

* Indicated by the color red.

Note :	**Note :**
The components identified by mark ⚠ or dotted line with mark ⚠ are critical for safety. Replace only with part number specified.	Les composants identifiés par une marque ⚠ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

(Measuring conditions voltage and waveform)
- Voltages and waveforms are measured between the measurement points and ground when camera shoots color bar chart of pattern box. They are reference values and reference waveforms. *
  (VOM of DC 10 MΩ input impedance is used.).
- Voltage values change depending upon input impedance of VOM used.) *

1. Connection



2. Adjust the distance so that the output waveform of Fig. a and the Fig. b can be obtain.

Precautions Upon Replacing CCD imager

- The CD-281/286 board mounted as a repair part is not equipped with a CCD imager.
  When replacing this board, remove the CCD imager from the old one and mount it onto the new one.
- If the CCD imager has been replaced, carry out all the adjustments for the camera section.
- As the CCD imager may be damaged by static electricity from its structure, handle it carefully like for the MOS IC.
  In addition, ensure that the receiver is not covered with dusts nor exposed to strong light.
