

## Installing a new LCD display in an old DG535

The new LCD displays are slightly different from those which were used on older DG535s. When ordering a new LCD display you must provide us with the serial number of the DG535 so we can determine if modifications are needed to the DG535 to use the new displays. Instructions and modifications required are:

- 1) The new LCD display has two additional holes on the pin board. Holes 15 and 16 are not used.
- 2) In the DG535 on the main circuit board you must replace R406 with a 7.15 Kohm resistor.
