**1. GENERAL**

**1.01** This section provides procedures for operating Symmetricom’s Digital Clock Distributor (DCD) 500 System when equipped with an MIS card with a part number of 090-44018-05 or 090-45018-05. The language used for the commands in this section is Transaction Language 1 (TL1).

**1.02** This section has been reissued to add a caution to the SET-DA-EQPT command concerning the <holdoff> parameter. The caution has been marked with a change bar.

**1.03** All product names, service marks, trademarks, and registered trademarks used in this document are the property of their respective owners.

**1.04** The following abbreviations are used in this section:

ACI	Analog Clock Input
CI	Clock Input
DCIM	Dual Clock Input Messaging
EA10	E1 Analog 10 Outputs
EA10M	E1 Analog 10 Outputs Messaging

EA20	E1 Analog 20 Outputs
EA20M	E1 Analog 20 Outputs Messaging
CI-EA	Clock Input - E1 Analog
ECI	E1 Clock Input
GPS	Global Positioning System
GTI	GPS Timing Interface
GTR	GPS Timing Antenna/Receiver
LNC	Local Node Clock
MCA-5	Matrix Controller Automatic-5
MIS	Maintenance Interface, System
MRC	Multi-Reference Controller
PRS	Primary Reference Source
PSM	Precision Synchronization Monitor
TNC	Transit Node Clock
TNC-E	Transit Node Clock Enhanced
TO	Timing output
ST2	Stratum-2 Clock
ST2E	Stratum-2 Clock Enhanced
ST3	Stratum-3 Clock
ST3E	Stratum-3 Clock Enhanced
TOAA	Timing Output Analog Automatic
TOCA	Timing Output Composite Clock Automatic
TOEA	Timing Output E1 Automatic
TO-EA	Timing Output E1 Analog
TOGA	Timing Output G.703 Automatic
TOLA	Timing Output Logic Level Automatic
TOTA	Timing Output T1 Automatic
TOTA-5	Timing Output T1 Automatic
TOTA-M	Timing Output T1 Automatic Messaging
TOTL	Timing Output T1 with LBO Automatic

**2. TASKS**

**2.01** Table A lists the tasks for operating the DCD-500 System and the charts that show how to perform the tasks.

Table A. Tasks

TASK	CHART NUMBER	CHART TITLE
<ul style="list-style-type: none"> <li>• Logon</li> <li>• Logoff</li> </ul>	1	Logon & Logoff
<ul style="list-style-type: none"> <li>• Silence alarms</li> <li>• Display all current alarms in a shelf</li> <li>• Display current alarms of specified equipment</li> <li>• Display current conditions of all equipment in a shelf</li> <li>• Display current conditions of specified equipment</li> <li>• Display current alarms of specified ports</li> <li>• Display current conditions of specified ports</li> <li>• Display message log</li> <li>• Clear message log</li> </ul>	2	Alarms & Status
<ul style="list-style-type: none"> <li>• Display access level of a single user</li> <li>• Display access level of all users</li> <li>• Assign user</li> <li>• Change password</li> <li>• Change user name, password &amp; access level</li> <li>• Delete user</li> </ul>	3	Security
<ul style="list-style-type: none"> <li>• Display communication parameters</li> <li>• Change communication parameters</li> <li>• Display communication connections</li> <li>• Connect communication port</li> <li>• Disconnect communication port</li> <li>• Drop DTR signal for 5 seconds</li> </ul>	4	Communication Ports
<ul style="list-style-type: none"> <li>• Display date and time</li> <li>• Change date and time</li> <li>• Display memory bank being used for MIS card program</li> <li>• Change to alternate MIS card program</li> <li>• Delete card database in MIS card</li> <li>• Reset MIS card</li> <li>• Completely reset MIS card to factory settings</li> <li>• Display system name</li> <li>• Change system name</li> <li>• Display equipment</li> </ul>	5	System Configuration
<ul style="list-style-type: none"> <li>• Enter and restore clock card</li> <li>• Enter and restore DCIM card</li> <li>• Enter and restore GTI card</li> <li>• Enter and restore LTI card</li> <li>• Enter and restore MRC card and ports</li> <li>• Enter and restore PSM card and ports</li> <li>• Enter and restore timing output card and ports</li> <li>• Enter and restore MCA card</li> </ul>	6	Enter into the Database and Put In Service a Version 5 Card
<ul style="list-style-type: none"> <li>• Restore clock card</li> <li>• Restore DCIM card</li> <li>• Restore GTI card</li> <li>• Restore LTI card</li> <li>• Restore MRC card</li> <li>• Restore PSM card</li> <li>• Restore timing output card</li> <li>• Restore MCA card</li> </ul>	7	Put a Version 5 Card in Service

Table A. Tasks (Contd)

TASK	CHART NUMBER	CHART TITLE
<ul style="list-style-type: none"> <li>• Remove clock card</li> <li>• Remove DCIM card</li> <li>• Remove GTI card</li> <li>• Remove LTI card</li> <li>• Remove MRC card</li> <li>• Remove PSM card</li> <li>• Remove timing output card</li> <li>• Remove MCA card</li> </ul>	8	Take a Version 5 Card Out of Service
<ul style="list-style-type: none"> <li>• Delete clock card</li> <li>• Delete DCIM card</li> <li>• Delete GTI card</li> <li>• Delete LTI card</li> <li>• Delete MRC card</li> <li>• Delete PSM card</li> <li>• Delete timing output card</li> <li>• Delete MCA card</li> </ul>	9	Delete a Version 5 Card from Database
<ul style="list-style-type: none"> <li>• Enter clock card</li> <li>• Enter input card</li> <li>• Enter output card</li> <li>• Enter protection card</li> <li>• Enter PRS card</li> </ul>	10	Enter a Non-Version 5 Card in Database
<ul style="list-style-type: none"> <li>• Edit clock card</li> <li>• Edit input card</li> <li>• Edit output card</li> <li>• Edit protection card</li> <li>• Edit PRS card</li> </ul>	11	Edit Non-Version 5 Card Information

<ul style="list-style-type: none"> <li>• Display GPS statistics</li> </ul>	24	GPS Information

### 3. COMMAND CONVENTIONS

**3.01** For a more complete description of the TL1 language syntax and language structure, refer to the User's Guide section of this manual.

**3.02** The following conventions are used in the input and response messages:

- < > enclose a parameter
- [ ] enclose an optional parameter
- { } enclose multiple parameters, one of which must be selected (or in a response, one of which will appear)
- | separate parameters enclosed by the { } symbols
- " " enclose a report of an alarm, event, AID or log
- /\* \*/ enclose response text; may include spaces, carriage returns, line feeds and other characters and symbols which, as pertains to the TL1 language, are to be ignored

- :
  - ,
  - &
  - &&
  - . . .
  - ;
  - >
- separates parameter blocks
- separates parameters within a block
- indicates "and" (1&9 means 1 and 9)
- indicate a range (1&&9 means 1 through 9)
- indicates the line may repeat one or more times
- terminates a command and causes execution
- indicates a message continuation (message blocks are limited to 4096 bytes)

**Note:** When listing parameter values that can be used in a command, a range of numbers is shown as a–b, where any number a, b, or any number between a and b can be entered. (Example: 1–12 indicates any number from 1 through 12 inclusive.)

## 4. SHELF ADDRESSING

**4.01** A particular shelf in a particular system is addressed through the <aid> or the <tid>, depending on the software version of the MIS card. All commands are directed to the master shelf of the system unless an expansion or remote shelf identifier is added to the <aid> or <tid>. In a response, the <aid> or <tid> identifies the shelf that is responding.

**Note:** There are a few commands which have a <shelf> field which must be entered to direct a command at a particular shelf. This is in addition to the <aid> or <tid>.

**4.02** The shelf types are defined as follows:

*Master:* The shelf that is the communications interface for the system and contains the highest-quality clocks in the system.

*Expansion:* A shelf that has no input cards, no clock cards, and is timed from the master shelf via a ribbon cable (generally collocated with the master shelf).

*Remote:* A shelf that contains timing input cards that use composite clock timing signals from the master or an expansion shelf (generally located distant from the master shelf).

**4.03** When directing a command to a shelf in a system without remote shelves (which can have up to

three expansion shelves), modify the aid (if necessary) as follows:

<aid>	= Master shelf and/or LPR shelf
E1-<aid>	= Expansion shelf #1
E2-<aid>	= Expansion shelf #2
E3-<aid>	= Expansion shelf #3

**4.04** If the system includes a remote shelf, a maximum of two expansion shelves can be collocated with the master shelf, and no expansion shelves can be timed from the remote shelf. Therefore, modify the aid (if necessary) as follows:

<aid>	= Master shelf and/or LPR shelf
E1-<aid>	= Expansion shelf #1
E2-<aid>	= Expansion shelf #2
E3-<aid>	= Remote shelf

**Note:** In a system with a remote shelf, E3 is used to identify the remote shelf even if there are no expansion shelves.

## 5. TO AND PSM CARD ADDRESSING

**5.01** How TO and PSM cards are addressed depends on the shelf model, protection type, and other factors. Refer to Figures 1 through 5 for addressing information. The notes in each figure provide important addressing details.

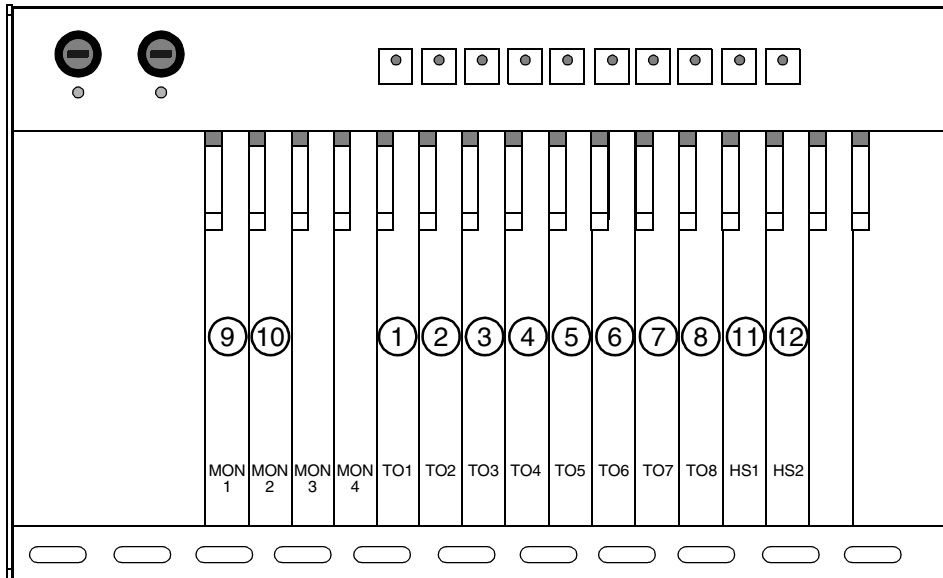

Notes:

1. The circled numbers are the addresses of the TO cards.
2. TO slots 1 through 3 may not be accessible depending on the clock type installed.
3. TO cards in TO slots 1 through 5 are addressed as the TO slot where installed (TO1, TO2, etc).
4. The TO card in slot HS2 is addressed as TO12.
5. With no TO card protection, the TO card in the TO6/HS1 slot is addressed as TO6 (SW6 and SW7 on the shelf backplane set to 6:1) or as TO11 (SW6 and SW7 set to 5:2).
6. With 1:1 or 1+1 TO card protection, the TO card in the TO6/HS1 slot is addressed as TO11 (SW6 and SW7 on the shelf backplane must be set to 5:2).
7. With 1:N TO card protection, the TO card in the TO6/HS1 slot is addressed as TO6 (one hot spare TO card and SW6 and SW7 on the shelf backplane are set to 6:1) or as TO11 (two hot spare TO cards and SW6 and SW7 are set to 5:2).
8. With 1:1 or 1+1 TO card protection, the TO card pairs are as follows: 2 and 3, 4 and 5, 11 and 12
9. Notes 1 through 7 also apply to PSM cards with the following exceptions:
  - Use PSM1 instead of TO1, etc.
  - PSM cards are double-wide cards, and therefore cannot be installed in adjacent slots.
  - PSM cards are not allowed in the TO6/HS1 slot when 1:N protection is used.
  - PSM cards are not allowed in the TO3 or HS2 slot.

Figure 1. TO and PSM Card Addressing in a DCD-519 Master Shelf

#### TO Card Notes:

1. The circled numbers are the addresses of TO cards (except 9 and 10).
2. TO cards in slots 1 through 8 are addressed by the TO slot where installed (TO1, TO2, etc).
3. A TO card in slot HS1 is addressed by TO11, and a TO card in slot HS2 is addressed by TO12.
4. TO cards are not allowed in slots MON1 and MON2.
5. For 1:1 and 1+1 TO card protection, the TO card pairs are as follows: 1 and 2, 3 and 4, 5 and 6, 7 and 8, 9 and 10, 11 and 12.

#### PSM Card Notes:

1. The circled numbers are the addresses of PSM cards (except 12).
2. PSM cards are double-wide cards, and therefore cannot be installed in adjacent slots.
3. PSM cards in slots 1 through 8 are addressed by the TO slot where installed (a PSM card in slot TO1 is PSM1, a PSM card in slot TO2 is PSM2, etc).
4. A PSM card in slot MON1 is addressed by PSM9, and a PSM card in slot MON2 is addressed by PSM10.
5. PSM cards are not allowed in slot MON3, MON4, TO6, or HS2.
6. PSM cards are not allowed in slot HS1 with 1:N protection.
7. A PSM card in slot HS1 is addressed by PSM11.

**Figure 2. TO and PSM Card Addressing in a DCD-519 Expansion Shelf**

**TO Card Notes:**

1. The circled numbers are the addresses of TO cards.
2. TO slots 1 through 3 may not be accessible depending on the clock type installed.
3. TO cards in slots 1 through 8 are addressed by the TO slot where installed (TO1, TO2, etc).
4. For 1:1 and 1+1 TO card protection, the TO card pairs are as follows: 1 and 2, 3 and 4, 5 and 6, 7 and 8.

**PSM Card Notes:**

1. PSM cards in slots 1, 2, 4, 5, 6, or 7 are addressed by the TO slot where installed (a PSM card in slot TO1 is PSM1, a PSM card in slot TO2 is PSM2, etc).
2. PSM cards are double-wide cards, and therefore cannot be installed in adjacent slots.
3. Due to a shelf support between slots TO3 and TO4, a PSM card (double wide) cannot be installed in the TO3 slot.
4. A PSM card (double wide) cannot be installed in the TO7 slot if equipped with an MIS card.

**Figure 3. TO and PSM Card Addressing in a DCD-519 High Density Shelf**

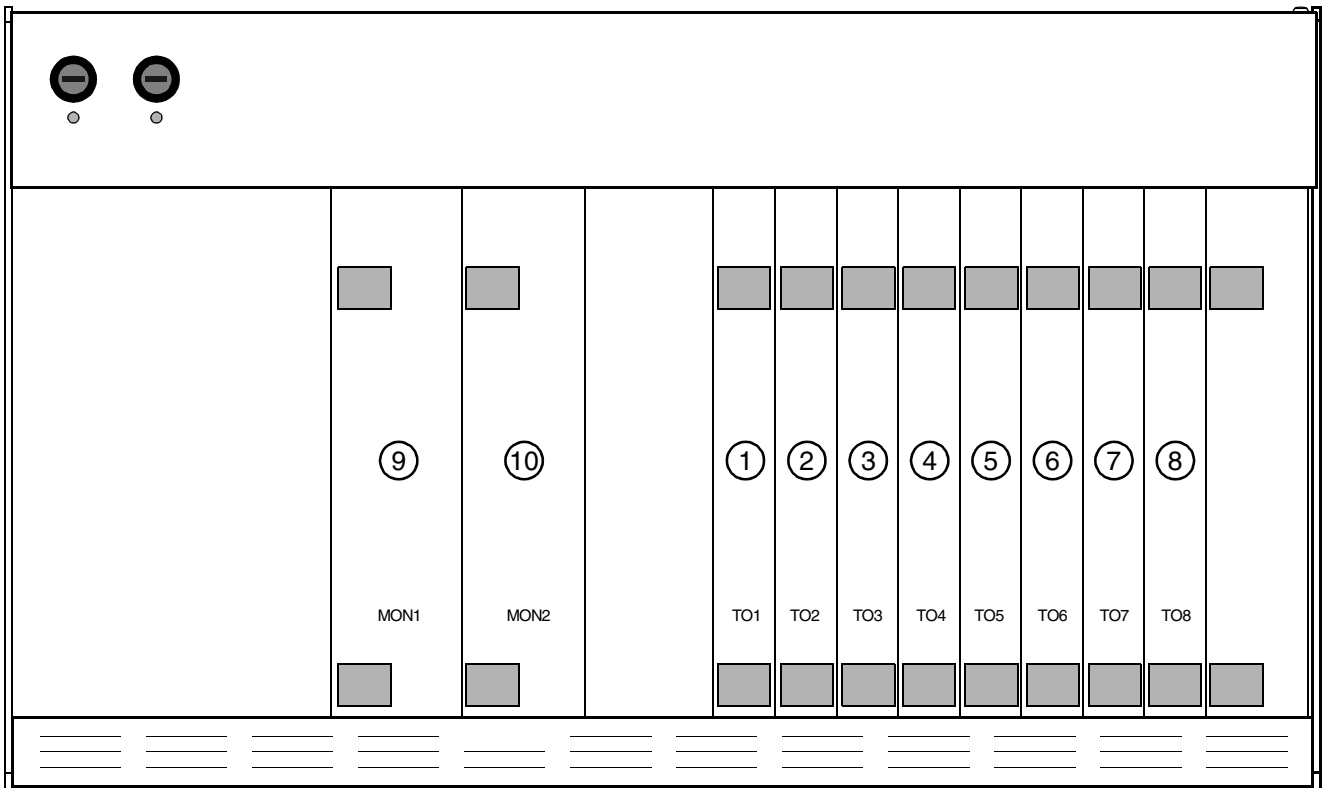

#### TO Card Notes:

1. The circled numbers are the addresses of TO cards.
2. TO cards in slots 1 through 10 are addressed by the TO slot where installed (TO1, TO2, etc).
3. Only TO-EA cards can be addressed in the HS1 and HS2 slots. A TO-EA card in slot HS1 is addressed by TO11, and a TO-EA card in slot HS2 is addressed by TO12.
4. For 1:1 and 1+1 TO card protection, the TO card pairs are as follows: 1 and 2, 3 and 4, 5 and 6, 7 and 8, 9 and 10, 11 and 12.

#### PSM Card Notes:

1. The circled numbers are the addresses of PSM cards (except 12).
2. PSM cards are double-wide cards, and therefore cannot be installed in adjacent slots.
3. PSM cards in slots 1 through 10 are addressed by the TO slot where installed (a PSM card in slot TO1 is PSM1, a PSM card in slot TO2 is PSM2, etc).
4. PSM cards are not allowed in slot HS1 with 1:N protection.
5. PSM cards are not allowed in the TO3 or HS2 slot.

**Figure 4. TO and PSM Card Addressing in a DCD-523 Shelf**

**TO Card Notes:**

1. The circled numbers are the addresses of TO cards.
2. TO slots 1 through 3 may not be accessible depending on the clock type installed.
3. TO cards in slots 1 through 8 are addressed by the TO slot where installed (TO1, TO2, etc).
4. TO cards are not allowed in the MON1 and MON2 slots.
5. For 1:1 and 1+1 TO card protection, the TO card pairs are as follows: 1 and 2, 3 and 4, 5 and 6, 7 and 8.

**PSM Card Notes:**

1. The circled numbers are the addresses of PSM cards (except TO8 where a PSM card cannot fit when an MIS card is installed).
2. PSM cards are double-wide cards, and therefore cannot be installed in adjacent slots (except MON1 and MON2).
3. PSM cards in slots 1 through 7 are addressed by the TO slot where installed (a PSM card in slot TO1 is PSM1, a PSM card in slot TO2 is PSM2, etc).
4. A PSM card in slot MON1 is addressed as PSM9, and a PSM card in slot MON2 is addressed as PSM10.

**Figure 5. TO and PSM Card Addressing in a DCD-521/C or DCD-521/C High Density Shelf**

## 6. VERSION 5 VS. NON-VERSION 5 CARDS

**6.01** Version 5 cards are those cards which can do the following:

- Report configuration information and be configured via commands
- Report status information
- Report inventory information

**6.02** Table B lists the Version 5 cards; all other cards are non-Version 5 cards. Non-Version 5 cards do not contain inventory information and must be manually entered using the ENT-INVENTORY command.

**6.03** Some non-Version 5 cards are incompatible with Version 5 cards. Refer to the manual that came with the equipment.

**Table B. Version 5 Cards**

SW1 Switch Settings

Sw1 Section	Position	Description	Factory Setting
1 (Note 1)	On	1200 Baud	—
	Off	9600 Baud	X
2 and 3 (Note 1)	2=on, 3=any	Odd Parity	—
	2=off, 3=on	Even Parity	—
	2=off, 3=off	No Parity	X
4	On	Password protection enabled	—
	Off	Password protection disabled	X
5	On	When power is applied (or recycled), the MIS card downloads its configuration database to the Version 5 cards in the shelf. Only those Version 5 cards in the same slot and with the same serial number as the configuration database receive the download.	X
	Off	The MIS card does not download its configuration database (not recommended).	—
6	Off	Factory set. Do not change.	X
7 (Note 2)	On	Installed in a remote system or expansion shelf	—
	Off	Installed in a master shelf	X
8	Off	Factory set. Do not change.	X

Notes:

- Sections 1, 2, and 3 set the RS-232 baud rate and parity for COM2 and the LOCAL COMM port only.
- To transfer information between an MIS card in a Master System and an MIS card in a Remote System, connect the COM 3 ports between the two master shelves.

Figure 6. MIS Card (090-45018-05) Switch and Jumpers

SW1 Switch Settings

Sw1 Section	Position	Description	Factory Setting
1 (Note 1)	On	1200 Baud	—
	Off	9600 Baud	X
2 and 3 (Note 1)	2=on, 3=any	Odd Parity	—
	2=off, 3=on	Even Parity	—
	2=off, 3=off	No Parity	X
4	On	Password protection enabled	—
	Off	Password protection disabled	X
5	On	When power is applied (or recycled), the MIS/C card downloads its configuration database to the Version 5 cards in the shelf. Only those Version 5 cards in the same slot and with the same serial number as the configuration database receive the download.	X
	Off	The MIS/C card does not download its configuration database (not recommended).	—
6	Off	Factory set. Do not change.	X
7 (Note 2)	On	Installed in a remote system or expansion shelf	—
	Off	Installed in a master shelf	X
8	Off	Factory set. Do not change.	X

Notes:

- Sections 1, 2, and 3 set the RS-232 baud rate and parity for COM2 only.
- To transfer information between an MIS/C card in a master system and an MIS/C card in a remote system, connect the COM 3 ports between the two master shelves.

Figure 7. MIS/C Card (090-44018-05) Switch

**6.04** Version 5 cards and ports can be entered in the database using the complete TL1 command sequence or an abbreviated method can be used.

### Complete Command Sequence

*Card installed:* when the card is first installed, all outputs are enabled and the card and ports perform their prescribed function (if enabled by card switches). In this state, the card cannot communicate with the MIS card; therefore, card information and alarm reporting is not supported by the MIS card.

*Card entered:* after the card is entered with the ENT-EQPT command (including the card parameters), the card information and configuration is copied to the system database in the MIS card where it is stored in nonvolatile memory; outputs may be squelched (depending on the card configuration status) and alarms are not reported.

*Port entered:* (applies only to input cards, monitor cards, and timing output cards) after the port is entered with the ENT-PORT command, the entered port configuration is copied to the system database in the MIS card and stored in nonvolatile memory; outputs may be squelched (depending on the card configuration status) and alarms are not reported.

*Card restored:* after the card is restored with the RST-EQPT command, the card performs all its prescribed equipment-related functions. The timing input and output ports of the cards remain out of service. Port-related status and alarm reporting is inhibited.

*Port restored:* (applies only to input cards, monitor cards, and timing output cards) after the port is restored via the RST-PORT command, the card and all provisioned inputs and outputs are in service.

*Port removed:* (applies only to input cards, monitor cards, and timing output cards) after the port

is removed via the RMV-PORT command, the card performs all its prescribed functions except that the removed port is squelched and port-related alarms are not reported.

*Card removed:* after the card is removed via the RMV-EQPT command, the card no longer performs its prescribed functions; outputs are squelched and equipment and port alarms are not reported.

*Port deleted:* (applies only to input cards, monitor cards, and timing output cards) after the port is deleted via the DLT-PORT command, the card performs all its prescribed functions except that the deleted port is removed from the system database; outputs are squelched and alarms are not reported.

*Card deleted:* after the card is deleted via the DLT-EQPT command, the card is erased from the system database; outputs are squelched and alarms are not reported.

### Abbreviated Command Sequence

**6.05** To use the abbreviated sequence, the ENT-EQPT command for the desired Version 5 card is entered without any parameters as follows:

```
ENT-EQPT: [<tid>]:<aid>:<ctag>;
```

**6.06** The ENT-EQPT command without parameters is the same as using the following commands: ENT-EQPT, ENT-PORT, RST-EQPT, and RST-PORT. The card will be in-service, and ports will be in or out of service as determined by card switch settings.

#### A. Non-Version 5 Cards

**6.07** Non-Version 5 cards are fully functional when plugged into the shelf. To enter information about a non-Version 5 card into the database, use the ENT-INVENTORY command.

## 7. SECURITY

**7.01** Security is controlled by a combination of a switch on the MIS card and by assigning users with passwords and particular access levels. To enable security, the switch must be set correctly and all users must have non-null passwords. Once security is enabled, access to commands is controlled by assigning levels to users.

### A. Switch Setting

**7.02** To enable security, section 4 of SW1 on the MIS card must be set to the ON position. From the factory, the switch is set for no security (section 4 is in the OFF position). While in this configuration, all commands can be accessed without logging onto the system. For all the switch settings on the MIS card, refer to the manual that came with the shelf where the card is installed.

### B. Command Levels

**7.03** Security consists of restricting access to commands. Restriction is accomplished by requiring a particular access level for each command. The access level is listed with each command. The access levels are from 1 (lowest) to 5 (highest). Each user is assigned an access level allowing access to all commands at that level and below. A user with level 5 can access all commands.

**7.04** As shipped from the factory, one user is assigned with a user name of "super", a password of "sparky", and an access level of 5. Up to 16 additional users can be assigned (for a total of 17 users) with any access levels.

## 8. DATABASE DOWNLOAD

**8.01** Database downloading is the process of copying card configuration information from the nonvolatile memory in the MIS card to the Version 5 cards. Database downloading is used to automatically con-

figure Version 5 cards, which do not have nonvolatile memory, following a power cycle of the card or the shelf (if the cards were previously entered in the system).

**8.02** Section 5 of switch SW1 on the MIS card controls whether the card database configuration is downloaded from the MIS card to the Version 5 cards. To enable downloading, section 5 must be set to ON. When enabled, the database download will occur when the MIS card is pulled out, then reinstalled in the shelf, or when the shelf is power cycled (does not require a craft terminal). If the MIS database does not match the card database, a database mismatch will occur and must be resolved. (The CPY-MEM command must be used to copy the card databases to the MIS card, or to copy the MIS card database to the cards.)

**8.03** If section 5 of SW1 is set to OFF, the card operation will be based on card switch settings or previously provisioned options.

**8.04** If a Version 5 card is replaced, the new card will automatically be entered in the system database.

## 9. PROVISIONING SEQUENCE

**9.01** Use the steps in Table C to put a system in service. If equipment must be removed, user the steps in Table D. Table E lists the steps for adding and removing ports.

**Caution:** *Using an EDIT command on an in-service input or output card will cause a service interruption. The interruption will occur because the transmission operating parameters are redefined and reinitialized.*

## 10. FACTORY SETTINGS

**10.01** For a list of factory settings, refer to Table H.

**Table C. Steps to Put Equipment into Service and into Database**

STEP	PROCEDURE	COMMAND
1	Insert cards into shelf	N/A
2	Log on	ACT-USER
3	Set communication parameters (Note 1)	ED-COM
4	Enter current date and time (Note 2)	ED-DAT
5	Enter system/shelf identification	SET-SID
6	Assign users	ENT-USER-SECU
7	Enter card into system database (Version 5 cards only) (enters and restores the card, enters and restores all ports on the card)	ENT-EQPT
8	Change card parameters (if required)	ED-EQPT
9	Change port parameters (if required)	ED-PORT
10	Enter non-Version 5 cards into the database	ENT-INVENTORY
11	Set source mode (TO cards only)	SET-ATTR-CONT
12	Set output protection type (TO cards only)	SET-ATTR-CONT
13	Set notification codes for port events (DCIM, MRC, and PSM cards)	SET-ATTR-PORT
14	Set threshold level for monitored parameters (DCIM, MRC, and PSM cards)	SET-TH-PORT
15	Log off	CANC-USER
<p>Notes:</p> <ol style="list-style-type: none"> <li>1. If any communication parameters are changed which causes loss of communication, set the terminal parameters to match the set parameters, then restart the terminal and wait 30 seconds.</li> <li>2. Failure to use the ED-DAT command to set the current date and time on initial power-up will result in erroneous time stamps on alarms and events reported by the MIS card.</li> </ol>		

**Table D. Steps to Delete Equipment from Service and from Database**

STEP	PROCEDURE	COMMAND
1	Log on	ACT-USER
2	Take ports out of service (MRC, PSM, and TO cards only)	RMV-PORT
3	Take cards out of service (Version 5 cards only)	RMV-EQPT
4	Delete ports from system database (Version 5 MRC, PSM, and TO cards only)	DLT-PORT
5	Delete cards from system database (Version 5 cards only)	DLT-EQPT
6	Pull card out of shelf	(None)
7	Log off	CANC-USER

**Table E. Steps for Ports Only**

<b>STEP</b>	<b>PROCEDURE</b>	<b>COMMAND</b>
1	Enter port into database	ENT-PORT
2	Put port in service	RST-PORT
3	Take port out of service	RMV-PORT
4	Delete port from database	DLT-PORT

**Table F. Steps to Activate SSM**

<b>STEP</b>	<b>PROCEDURE</b>	<b>COMMAND</b>
1	Enter clocks into database	ENT-EQPT
2	Enter quality levels of clocks	ED-EQPT
3	Set the SSM mode for MIS card	SET-ATTR-CONT
4	Set protection mode for DCIM cards	SET-ATTR-CONT

**Table G. Steps to Deactivate SSM**

<b>STEP</b>	<b>PROCEDURE</b>	<b>COMMAND</b>
1	Set the SSM mode for MIS card to OFF	SET-ATTR-CONT

Table H. Factory Settings

COMMAND	ITEM	PARAMETER	FACTORY SETTING
<b>SECURITY</b>			
ED-USER-SECU	User name	<uid>	super (has an access level of 5)
	Password	<pid>	sparky
SET-SID	Source identifier	<sid>	TELECOM
<b>MONITORING THRESHOLDS</b>			
SET-TH-PORT	BPV	<thlev>	16
	CRC		16
	OOF		1
	MTIE 1 s		300 ns

	TDEV 1 s		100 ns
	TDEV 4 s		100 ns
	TDEV 16 s		125 ns
	TDEV 64 s		255 ns
TDEV 128 s	360 ns		
<b>SHELF FUNCTION</b>			
SET-ATTR-CONT	Shelf function	<conttype>	RVRT
<b>DCIM CARD FUNCTION</b>			
SET-ATTR-CONT	Card function	<conttype>	Stand-alone
<b>NOTIFICATION CODE FOR EVENT</b>			
SET-ATTR-PORT	Notification code	<conttype>	NA (all cards, all <condtype>)

Table H. Factory Settings (Contd)

COMMAND	ITEM	PARAMETER	FACTORY SETTING
<b>SYNCHRONIZATION STATUS MESSAGING</b>			
SET-ATTR-CONT	SSM Support	<conttype>	OFF
ED-SSM-EQPT and ED-SSM-PORT	Message	<ssmmsg>	QL-NORM
	Sa4 bit usage	<ssmsa4>	ALW
	Sa5 bit usage	<ssmsa5>	ALW
	Sa6 bit usage	<ssmsa6>	ALW
	Sa7 bit usage	<ssmsa7>	ALW
	Sa8 bit usage	<ssmsa8>	ALW
ED-SSM-EQPT	Trouble code	<ssmtc>	QL-NORM
ED-SSM-MSG	Message	<ssmmsg>	QL-NORM
<b>DELAYS</b>			
SET-DA-EQPT	Holdoff delay	<holdoff>	100 ms
	Restore delay	<rstdur>	0 min
SET-TH-MSG	Persistence delay	<durmsg>	0 ms
	Nonswitching message delay	<nswmsg>	0 ms
	Switching message delay	<swmsg>	0 ms
	Holdover message delay	<hldovrmsg>	0 s
<b>MESSAGE TYPE FOR PORT ALARMS</b>			
SET-REPTMODE-PORT	Message type	<modetype>	Reported as REPT-ALM-PORT messages

Table H. Factory Settings (Contd)

COMMAND	ITEM	PARAMETER	FACTORY SETTING
<b>COMMUNICATIONS</b>			
ED-COM (Notes 1 & 2)	Baud rate	<baud>	Port 1: 9600 Port 2: 9600 Port 3: 9600
	Monitoring mode	<monmsg>	Port 1: inhibited from viewing messages associated with other ports Port 2: inhibited from viewing messages associated with other ports Port 3: inhibited from viewing messages associated with other ports
	Keep alive	<keepalive>	Port 1: inhibited from sending out a COMPLD message Port 2: inhibited from sending out a COMPLD message Port 3: inhibited from sending out a COMPLD message
	Communication type	<comtype>	Port 1: terminal 2 Port 2: terminal 1 Port 3: terminal 2
	End-of-text character	<endoftext>	Port 1: 00 (no end-of-text character) Port 2: 00 (no end-of-text character) Port 3: 00 (no end-of-text character)
	Echo	<echo>	Port 1: echo inhibited Port 2: echo inhibited Port 3: echo inhibited
	Communication priority	<compri>	Port 1: ALW1 (autonomous messages are always sent out this port) Port 2: ALW1 (autonomous messages are always sent out this port) Port 3: ALW1 (autonomous messages are always sent out this port)
	Hardware flow	<hwcontrol>	External equipment is inhibited from starting and stopping output messages by manipulating the clear-to-send (CTS) lead
	Software flow	<swcontrol>	User is inhibited from starting and stopping output messages by using Control-s and Control-q key sequences
	Duration	<dur>	Port 1: 15 minutes Port 2: 15 minutes Port 3: 15 minutes
Notes:			
1. The baud rate for port 2 can only be changed by strap settings on the MIS card.			
2. Communication parameters which cannot be changed are: character bits = 8 and start bits = 1.			

Chart 1. Logon & Logoff

TASK	PROCEDURE
	<p>This chart provides the steps for logging on and logging off the System. The user name and password must have been assigned using the ENT-SECU-USER command unless the factory-supplied user name (super) and password (sparky) are being used. After a period of inactivity (set in the ED-COM command), the user is automatically logged off.</p> <p>Note: The user name and password are case (uppercase/lowercase) sensitive and must be entered exactly as assigned.</p>
Logon	<p>Access level 1 is required to use this command. Enter:</p> <pre>ACT-USER: [&lt;tid&gt;] :&lt;uid&gt;:&lt;ctag&gt;::&lt;pid&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Logoff	<p>Access level 1 is required to use this command. Enter:</p> <pre>CANC-USER: [&lt;tid&gt;] :&lt;uid&gt;:&lt;ctag&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 2. Alarms & Status

TASK	PROCEDURE
	<p>This chart provides the steps for silencing audible alarms, and for displaying alarms, conditions, and messages.</p>
<p>Silence Alarms</p>	<p>Access level 1 is required to use this command. Enter:</p> <pre>OPR-ACO-ALL: [&lt;tid&gt;] : [&lt;shelf&gt;] :&lt;ctag&gt;;</pre> <p>shelf = shelf to which the command is directed:            (null) = master shelf            E1 = expansion shelf 1            E2 = expansion shelf 2            E3 = expansion shelf 3 (or remote shelf if equipped with a remote shelf instead of an expansion shelf 3)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Display All Current Alarms in a Shelf</p>	<p>Access level 1 is required to use this command. Enter:</p> <pre>RTRV-ALM-ALL: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = SHELF</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD &lt;aid&gt;:&lt;ntfcncde&gt;,&lt;condtype&gt;,&lt;service effecting&gt;,&lt;date&gt;,&lt;time&gt;,,:&lt;conddescr&gt;," ...</pre> <p>aid = see Table J            ntfcncde = notification code:                CR = critical alarm                MJ = major alarm                MN = minor alarm                NA = not alarmed                NR = not reported</p> <p>condtype = see Table J            service effecting = the effect on service:                SA = service effecting                NSA = not service effecting</p> <p>date = date of the alarm            time = time of the alarm            conddescr = see Table J</p>

Chart 2. Alarms & Status (Contd)

TASK	PROCEDURE
<p>Display Current Alarms of Specified Equipment</p>	<p>Access level 1 is required to use this command. Enter:</p> <p style="padding-left: 40px;">RTRV-ALM-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid = equipment:</p> <ul style="list-style-type: none"> <li>CLK-a = clock card (a = 1-2)</li> <li>DCIM-a = DCIM card (a = 1-2)</li> <li>GTI-a = GTI card (a = 1-2)</li> <li>LTI-a = LTI card (a = 1-2)</li> <li>MCA = MCA card</li> <li>MRC-a = MRC card (a = 1-2)</li> <li>PSM-a = PSM card (a = 1-11)</li> <li>SHELF = shelf (master shelf includes GTI and LTI)</li> <li>TO-a = TO card (a = 1-12) (1-10 for TOTA-5 &amp; TOTA-M)</li> </ul> <p>Response:</p> <p>If there are no alarms in the specified card, the format is:</p> <pre style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre> <p>If there is at least one alarm to report in the specified card, the format is:</p> <pre style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD &lt;aid&gt;:&lt;ntfcncde&gt;,&lt;condtype&gt;,&lt;service effecting&gt;,&lt;date&gt;,&lt;time&gt;,&lt;conddescr&gt;," ...</pre> <ul style="list-style-type: none"> <li>aid = see Table J</li> <li>ntfcncde = notification code: <ul style="list-style-type: none"> <li>CR = critical alarm</li> <li>MJ = major alarm</li> <li>MN = minor alarm</li> <li>NA = not alarmed</li> <li>NR = not reported</li> </ul> </li> <li>condtype = see typerep in Table J</li> <li>service effecting = the effect on service: <ul style="list-style-type: none"> <li>SA = service effecting</li> <li>NSA = not service effecting</li> </ul> </li> <li>date = date of the alarm</li> <li>time = time of the alarm</li> <li>conddescr = see Table J</li> </ul>

Chart 2. Alarms & Status (Contd)

TASK	PROCEDURE
Display Current Conditions of All Equipment in a Shelf	<p>Access level 1 is required to use this command. Enter:</p> <pre>RTRV-COND-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = SHELF (master shelf includes GTI and LTI)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD &lt;aid&gt;:&lt;ntfcncde&gt;,&lt;typerep&gt;,&lt;service effecting&gt;,&lt;conddescr&gt;," ...</pre> <p>aid = see Table J</p> <p>ntfcncde = notification code:</p> <ul style="list-style-type: none"> <li>CR = critical alarm</li> <li>MJ = major alarm</li> <li>MN = minor alarm</li> <li>NA = not alarmed</li> <li>NR = not reported</li> </ul> <p>typerep = see Table A in the Input/Output Reference Guide section of this manual, and also see condtype in Table J</p> <p>service effecting = the effect on service:</p> <ul style="list-style-type: none"> <li>SA = service effecting</li> <li>NSA = not service effecting</li> </ul> <p>conddescr = see Table J</p>

Chart 2. Alarms & Status (Contd)

TASK	PROCEDURE
<p>Display Current Conditions of Specified Ports</p>	<p>Access level 1 is required to use this command. Enter:</p> <p style="text-align: center;">RTRV-COND-PORT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="margin-left: 40px;">aid = port:</p> <p style="margin-left: 80px;">DCIM-a-b:</p> <p style="margin-left: 120px;">a = DCIM card (a = 1-2)</p> <p style="margin-left: 120px;">b = port (b = 1-2 or ALL)</p> <p style="margin-left: 80px;">MRC-a-b[&amp;&amp;-c]:</p> <p style="margin-left: 120px;">a = MRC card (a = 1-2)</p> <p style="margin-left: 120px;">b = port (b = 1-4 or ALL)</p> <p style="margin-left: 120px;">c = ending port (2-4 with c &gt; b)</p> <p style="margin-left: 80px;">PSM-a-b[&amp;&amp;-c]:</p> <p style="margin-left: 120px;">a = PSM card (a = 1-11)</p> <p style="margin-left: 120px;">b = port (b = 1-4 or ALL)</p> <p style="margin-left: 120px;">c = ending port (2-4 with c &gt; b)</p> <p style="margin-left: 80px;">TO-a-b[&amp;&amp;-c]:</p> <p style="margin-left: 120px;">a = TO card (a = 1-12) (1-10 for TOTA-5 &amp; TOTA-M)</p> <p style="margin-left: 120px;">b = port (1-10 [1-20 for EA20] or ALL)</p> <p style="margin-left: 120px;">c = ending port in a range (2-10 [2-20 for EA20] with c &gt; b)</p> <p>Response:</p> <p style="margin-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p style="margin-left: 40px;">M &lt;ctag&gt; COMPLD</p> <p style="margin-left: 40px;">&lt;aid&gt;:&lt;ntfcncde&gt;,&lt;typerep&gt;,&lt;service effecting&gt;,&lt;conddescr&gt;," ...</p> <p style="margin-left: 40px;">aid = see Table J</p> <p style="margin-left: 40px;">ntfcncde = notification code:</p> <p style="margin-left: 80px;">CR = critical alarm</p> <p style="margin-left: 80px;">MJ = major alarm</p> <p style="margin-left: 80px;">MN = minor alarm</p> <p style="margin-left: 80px;">NA = not alarmed</p> <p style="margin-left: 80px;">NR = not reported</p> <p style="margin-left: 40px;">typerep = see Table A in the Input/Output Reference Guide section of this manual, and also see condtype in Table J</p> <p style="margin-left: 40px;">service effecting = the effect on service:</p> <p style="margin-left: 80px;">SA = service effecting</p> <p style="margin-left: 80px;">NSA = not service effecting</p> <p style="margin-left: 40px;">conddescr = see Table J</p>

Chart 2. Alarms & Status (Contd)

TASK	PROCEDURE
<p>Display Message Log</p>	<p>Access level 1 is required to use this command. This command retrieves up to 256 alarms and events, but does not clear the message log. Enter:</p> <pre>RTRV-LOG: [&lt;tid&gt;] : [&lt;shelf&gt;] : &lt;ctag&gt; :: LOG;</pre> <p>shelf = shelf from which log will be displayed:            (null) = master shelf            E1 = expansion shelf 1            E2 = expansion shelf 2            E3 = expansion shelf 3 (or remote shelf if equipped with a remote shelf instead of an expansion shelf 3)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD   "LOG"   /*   "&lt;sid&gt;:&lt;ocrdat&gt; &lt;ocrtm&gt; &lt;aid&gt;:&lt;ntfcncde&gt;,&lt;cond-   type&gt;,&lt;srveff&gt;:/* &lt;conddescr&gt; */" ...   "&lt;sid&gt;:&lt;ocrdat&gt; &lt;ocrtm&gt; &lt;aid&gt;:&lt;condtype&gt;,&lt;condeff&gt;:   /* &lt;conddescr&gt; */" ...   */</pre> <p>Notes:</p> <ol style="list-style-type: none"> <li>1. The line shown as "&lt;date&gt; &lt;time&gt; " in the response format will show an arbitrary date and time when the RTRV-LOG command is used without having ever used the INIT-LOG command. After the INIT-LOG command has been used, that line will appear as follows:           <pre>"&lt;date&gt; &lt;time&gt; INIT-LOG:::&lt;ctag&gt;::LOG"</pre>           where the date and time shown are the date and time when the INIT-LOG command was entered.         </li> <li>2. The next-to-the-last line in the response format (begins with "&lt;sid&gt;") is the format for an alarm in the log.</li> <li>3. The last line in the response format (also begins with "&lt;sid&gt;") is the format for an event in the log.</li> </ol>

Chart 2. Alarms & Status (Contd)

TASK	PROCEDURE
<p>Clear Message Log</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>INIT-LOG: [&lt;tid&gt;] : [&lt;shelf&gt;] : &lt;ctag&gt;::LOG;</pre> <p>shelf = shelf where log will be initialized:</p> <ul style="list-style-type: none"> <li>(null) = master shelf</li> <li>E1 = expansion shelf 1</li> <li>E2 = expansion shelf 2</li> <li>E3 = expansion shelf 3 (or remote shelf if equipped with a remote shelf instead of an expansion shelf 3)</li> </ul> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 3. Security

TASK	PROCEDURE
	<p>This chart provides the steps for displaying and changing security parameters. As shipped from the factory, there is one user named "super" with a password of "sparky" and an access level of 5. For password protection to be enabled, section 4 of switch SW1 on the MIS card must be set to the ON position.</p> <p><b>Note:</b> The user name and password are case (uppercase/lowercase) sensitive and must be entered exactly as assigned.</p>
Display Access Level of a Single User	<p>Access level 5 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>RTRV-USER-SECU: [&lt;tid&gt;]:&lt;uid&gt;:&lt;ctag&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD &lt;uid&gt;:,&lt;access level&gt;</pre>
Display Access Level of All Users	<p>Access level 5 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>RTRV-USER-SECU: [&lt;tid&gt;]:ALL:&lt;ctag&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD &lt;uid&gt;:,&lt;access level&gt; ...</pre>
Assign User	<p>Access level 5 is required to use this command. This command is directed to the master shelf only. This command enters a new user into the system. A maximum of 16 users can be assigned. Enter:</p> <pre>ENT-USER-SECU: [&lt;tid&gt;]:&lt;uid&gt;:&lt;ctag&gt;::&lt;password&gt;,, &lt;access level&gt;;</pre> <p>uid = name of new user (up to 10 alpha-numeric characters)  password = password for new user (see note below)  access level = access level of new user (1–5 with 5 the highest)</p> <p><b>Note:</b> The password can have a minimum of 1 character and a maximum of 10 characters. At least one alpha character must be used. Alpha characters can be uppercase, lowercase, or a mixture of both. Any printable character can be used except: comma (,), colon (:), semicolon (;), null (), space ( ), ampersand (&amp;), and equal sign (=).</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 3. Security (Contd)

TASK	PROCEDURE
<p>Change Password</p>	<p>Access level 1 is required to use this command. This command is directed to the master shelf only. This command changes a user's password. Enter:</p> <pre>ED-PID: [&lt;tid&gt;]:&lt;uid&gt;:&lt;ctag&gt;::&lt;pid&gt;,&lt;new pid&gt;;</pre> <p>uid = name of user whose password is being changed  pid = existing password  new pid = new password (see note below)</p> <p><b>Note:</b> The password can have a minimum of 1 character and a maximum of 10 characters. At least one alpha character must be used. Alpha characters can be uppercase, lowercase, or a mixture of both. Any printable character can be used except: comma (,), colon (:), semicolon (;), null (), space (), ampersand (&amp;), and equal sign (=). Also, the following key words cannot be used: "E1", "E2", "E3", or "NO".</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Change User Name, Password, &amp; Access Level</p>	<p>Access level 5 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>ED-USER-SECU: [&lt;tid&gt;]:&lt;uid&gt;:&lt;ctag&gt;::&lt;new uid&gt;,&lt;new pid&gt; , , &lt;uap&gt;;</pre> <p>uid = name of user whose name, password, and/or access level is being changed  new uid = new user name (up to 10 alpha-numeric characters)  new pid = new password (see note below)  uap = new access level (1-5 with 5 the highest)</p> <p><b>Note:</b> The password can have a minimum of 1 character and a maximum of 10 characters. At least one alpha character must be used. Alpha characters can be uppercase, lowercase, or a mixture of both. Any printable character can be used except: comma (,), colon (:), semicolon (;), null (), space (), ampersand (&amp;), and equal sign (=). Also, the following key words cannot be used: "E1", "E2", "E3", or "NO".</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 3. Security (Contd)

TASK	PROCEDURE
Delete User	<p>Access level 5 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>DLT-USER-SECU: [&lt;tid&gt;] :&lt;uid&gt;:&lt;ctag&gt;;</pre> <p>uid = name of user being deleted</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 4. Communication Ports

TASK	PROCEDURE
<p>This chart provides the steps for displaying and changing the communication parameters.</p>	
<p>Display Communication Parameters</p>	<p>Access level 1 is required to use this command. Enter:</p> <pre>RTRV-COM: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = communication port (COM-1, COM-2, COM-3, or COM-ALL)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;" ... /*BAUD= &lt;value&gt;, MONMSG= &lt;value&gt;, KEEPALIVE= &lt;value&gt;,   COMTYPE= &lt;value&gt;, ENDOFTEXT= &lt;value&gt;, ECHO=&lt;value&gt;     , COMPRI= &lt;value&gt;, HWCONTROL= &lt;value&gt;     , SWCONTROL= &lt;value&gt;, DUR= &lt;value&gt;     , DN= &lt;value&gt;...*/</pre> <p>baud = data rate (baud rate) for this communication port:      9600 = 9600 baud      1200 = 1200 baud</p> <p>monmsg = specifies whether this communication port is allowed to view communication messages associated with other ports:      ALW = allowed      INH = inhibited</p> <p>keepalive = specifies whether this communication port is allowed to autonomously output a COMPL messages every 15 to 20 minutes:      ALW = allowed      INH = inhibited</p> <p>comtype = communication type for this communication port:      X25 = PAD      MODEM = modem (Hayes compatible with autodial)      TERM1 = dumb terminal (VT100 with no DSR/DTR support and message buffering disabled)      TERM2 = dumb terminal (VT100 with DSR/DTR support and message buffering enabled)      REMOTE = remote shelf</p> <p>endoftext = specifies an additional end-of-text character for this communication port:      00 = no additional end-of-text character      x = the additional end-of-text character which is a hexadecimal number (x = 1-9F)</p> <p>echo = specifies whether this communication port allows local echo:      ALW = allowed      INH = inhibited</p>

Chart 4. Communication Ports (Contd)

TASK	PROCEDURE	
Display Communication Parameters (Contd)	<p>compri</p> <p>hwcontrol</p> <p>swcontrol</p> <p>dur</p> <p>dn</p>	<p>= specifies whether alarm and event messages are allowed to be transmitted from this communication port:</p> <p>INH = communication through a port with this designation is inhibited (INH is not allowed on COM2)</p> <p>ALW0 = allows normal communication; autonomous messages are not sent out a port with this priority</p> <p>ALW1 = allows normal communication; autonomous messages are always sent out this port regardless of the priorities of the other ports (this is the highest port priority)</p> <p>ALW2 = allows normal communication; autonomous messages are sent out this port only if there are no ports with a priority level of ALW1 (this is the second-highest port priority)</p> <p>ALW3 = allows normal communication; autonomous messages are sent out this port only if there are no ports with a priority level of ALW1 or ALW2 (this is the lowest port priority)</p> <p>= specifies whether external equipment is allowed to stop the DCD system from sending messages by setting the clear to send (CTS) lead low, or continue messages by setting the CTS lead high on this communication port:</p> <p>ALW = allowed</p> <p>INH = inhibited</p> <p>= specifies whether user is allowed to use a Control-s key combination to stop the DCD system from sending messages or use a Control-q key combination to cause the DCD system to continue sending messages via this communication port:</p> <p>ALW = allowed</p> <p>INH = inhibited</p> <p>= the amount of time (1–45 minutes) after which the user is logged off if there is no activity.</p> <p>= the remote PAD address (up to 32 numeric characters)</p>

Chart 4. Communication Ports (Contd)

TASK	PROCEDURE
<p>Change Communication Parameters</p>	<p>Access level 3 is required to use this command. If a parameter is omitted, that parameter is not changed. Enter:</p> <pre>ED-COM: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;baud&gt;] , [&lt;monmsg&gt;] ,         [&lt;keepalive&gt;] , [&lt;comtype&gt;] , [&lt;endoftext&gt;] , [&lt;echo&gt;] ,         [&lt;compri&gt;] , [&lt;hwcontrol&gt;] , [&lt;swcontrol&gt;]         [ , [&lt;dur&gt;] , [&lt;dn&gt;] ] ;</pre> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. Any parameter left blank causes no change to that parameter.</li> <li>2. Before changing the &lt;comtype&gt;, the cable on the communication port specified in the &lt;aid&gt; must be disconnected. If the cable is not disconnected and an attempt is made to change only the &lt;comtype&gt; parameter, an SROF error message will be returned. If the cable is not disconnected and an attempt is made to change &lt;comtype&gt; plus other parameters, a completed response will be returned to show that all parameters other than &lt;comtype&gt; were changed.</li> </ol> <p>aid = communication port number (COM-1, COM-2, COM-3)</p> <p>baud = data rate (baud rate) for this communication port (baud rate for port 2 can only be changed by a switch on the MIS card):</p> <p>9600 = 9600 baud</p> <p>1200 = 1200 baud</p> <p>monmsg = specifies whether this communication port is allowed to view communication messages associated with other ports:</p> <p>ALW = allowed</p> <p>INH = inhibited</p> <p>keepalive = specifies whether this communication port is allowed to autonomously output a COMPL messages every 15 to 20 minutes:</p> <p>ALW = allowed</p> <p>INH = inhibited</p>

Chart 4. Communication Ports (Contd)

TASK	PROCEDURE
<p>Change Communication Parameters (Contd)</p>	<p>comtype = communication type for this communication port:                      X25 = for use with X.25 PAD (sets configuration for Black Box Corporation's X.25 PAD-8 only with the following settings:                      a. drops call if idle time is greater than 1 minute                      b. fixed destination id  <b>Note:</b> If the &lt;comtype&gt; is set to X25 and TimeScan NMS or TMN is used, refer to the PAD manual and the X.3 Standard to set the following parameters in the PAD Profile: disable ECHO, enable MESSAGES, and disable SERVICE SIGNALS.                      MODEM = modem (Hayes compatible with autodial)                      TERM1 = dumb terminal (VT100 with no DSR/DTR support and message buffering disabled) (the autologoff feature will not function on a port with a comtype of TERM1)                      TERM2 = dumb terminal (VT100 with DSR/DTR support and message buffering enabled)                      REMOTE = remote shelf                      endoftext = specifies an additional end-of-text character for this communication port:                      00 = no additional end-of-text character                      x = the additional end-of-text character which is a hexadecimal number (0-9F)                      echo = specifies whether this communication port allows local echo:                      ALW = allowed                      INH = inhibited                      compri = specifies whether alarm and event messages are allowed to be transmitted from this communication port:                      INH = communication through a port with this designation is inhibited (INH is not allowed on COM2)                      ALW0 = allows normal communication; autonomous messages are not sent out a port with this priority level                      ALW1 = allows normal communication; autonomous messages are always sent out this port regardless of the priorities of the other ports (this is the highest port priority)                      ALW2 = allows normal communication; autonomous messages are sent out this port only if there are no ports with a priority level of ALW1 (this is the second-highest port priority)                      ALW3 = allows normal communication; autonomous messages are sent out this port only if there are no ports with a priority level of ALW1 or ALW2 (this is the lowest port priority)</p>

Chart 4. Communication Ports (Contd)

TASK	PROCEDURE
<p>Change Communication Parameters (Contd)</p>	<p>hwcontrol = specifies whether external equipment is allowed to stop the DCD system from sending messages by setting the clear to send (CTS) lead low, or continue messages by setting the CTS lead high:  ALW = allowed  INH = inhibited</p> <p>swcontrol = specifies whether user is allowed to use a Control-s key combination to stop the DCD system from sending messages, or use a Control-q key combination to cause the DCD system to continue sending messages via this communication port:  ALW = allowed  INH = inhibited  <b>Note:</b> If the &lt;comtype&gt; is set to X25 and TimeScan NMS or TMN is used: set &lt;swcontrol&gt; to ALW, and also enable software flow control in the PAD.</p> <p>dur = the amount of time (1–45 minutes) after which the user is logged off if there is no activity (the autologoff feature will not function on a port with a comtype of TERM1)</p> <p>dn = the remote PAD address (up to 32 numeric characters)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 4. Communication Ports (Contd)

TASK	PROCEDURE
<p>Display Communication Connections</p>	<p>Access level 1 is required to use this command. Enter:</p> <pre>RTRV-COM-CONN: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = SHELF</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;" ... /* COM-1=&lt;value&gt; [,ACT-USER=&lt;uid&gt;] , COM-2=&lt;value&gt; [,ACT-USER=&lt;uid&gt;] , COM-3=&lt;value&gt; [,ACT-USER=&lt;uid&gt;] */</pre> <p>value = status of communication port (ACTIVE or INACTIVE)  uid = user id (as set by the ENT-USER-SECU command) of the user logged onto the port</p> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. The “,ACT-USER= &lt;uid&gt;” part of the response appears only if the communication port is active and security is enabled by section 4 of switch SW1 on the MIS card.</li> <li>2. A status of INACTIVE (even if the port is active) will be reported for any communication port that is using a 3-wire connection or has been set for a comtype of TERM1 with the ED-COM command.</li> </ol>
<p>Connect Communication Port</p>	<p>Access level 4 is required to use this command. Enter:</p> <pre>CONN-COM: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;comtype&gt;];</pre> <p>aid = communication port:  COM-1 = communication port 1  COM-2 = communication port 2  COM-3 = communication port 3</p> <p>comtype = communication device type:  X25 = PAD  MODEM = modem (Hayes compatible with autodial)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

**Chart 4. Communication Ports (Contd)**

TASK	PROCEDURE
<p>Disconnect Communication Port</p>	<p>Access level 4 is required to use this command. Enter:</p> <p style="padding-left: 40px;">DISC-COM: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = communication port:</p> <p style="padding-left: 120px;">COM-1       = communication port 1</p> <p style="padding-left: 120px;">COM-2       = communication port 2</p> <p style="padding-left: 120px;">COM-3       = communication port 3</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p style="padding-left: 40px;">M &lt;ctag&gt; COMPLD</p>
<p>Drop DTR Signal for 5 Seconds</p>	<p>Access level 3 is required to use this command. If a port is provision for TERM1 (no DSR/DTR support), the command will indicate completed but no action will occur. Enter:</p> <p style="padding-left: 40px;">INIT-COM: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = communication port number (COM-1, COM-2, COM-3, or COM-ALL)</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p style="padding-left: 40px;">M &lt;ctag&gt; COMPLD</p>

## Chart 5. System Configuration

TASK	PROCEDURE
	<p>This chart provides the steps for displaying the date &amp; time and changing the date &amp; time. Steps are included for displaying and changing the system name, and how to reset the system database. Also included is a step for displaying the MIS card software revision. The system name is set at the factory to TELECOM. The system name is entered (optional) as the target identifier (tid) and is included with every response from the system as the source identifier (sid).</p> <p>Refer to Part 4, Shelf Addressing, for expansion or remote shelf addressing details.</p>
Display Date & Time	<p>Access level 1 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>RTRV-HDR: [&lt;tid&gt;] :: &lt;ctag&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Change Date & Time	<p>Access level 4 is required to use this command. This command is directed to the master shelf only. If connected to a GTI card, the system will adjust the minutes and seconds to coincide with UTC time. The current hour (entered with &lt;time&gt;) will be used so that local time is displayed. Enter:</p> <pre>ED-DAT: [&lt;tid&gt;] :: &lt;ctag&gt; :: { &lt;date&gt;, &lt;time&gt; };</pre> <p>date = date in the format yyyy-mm-dd:  yyyy = year (1997–2096)  mm = month (01–12)  dd = day (01–31)</p> <p>time = time in the format hh-mm-ss:  hh = hour (00–23)  mm = minute (00–59)  ss = second (00–59)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
<p>Display Memory Bank Being Used for MIS Card Program</p>	<p>Access level 2 is required to use this command. This command displays the MIS card inventory and the program memory bank (low bank or hi bank) in use. Enter:</p> <pre>RTRV-INVENTORY: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;       aid           = ADMIN</pre> <p>Response:</p> <pre>      &lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD   "&lt;aid&gt;" /* CARD=&lt;value&gt;, TYPE=&lt;value&gt;, PART=&lt;value&gt;, CLEI=&lt;value&gt;, SERIAL=&lt;value&gt;, HARDREV=&lt;value&gt;, LOW_BANK_SW=&lt;value&gt;:   SOFTREV=&lt;value&gt;,   SOFTVER=&lt;value&gt;, HI_BANK_SW=&lt;value&gt;:   SOFTREV=&lt;value&gt;,   SOFTVER=&lt;value&gt; */</pre> <p>Note: The word (ACTIVE or INACTIVE) following the LOW_BANK_SW= and the HI_BANK_SW= fields indicate which memory bank is in use (ACTIVE = in use, INACTIVE = not in use).</p>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
Change to Alternate MIS Card Program	<p><b>Caution:</b> <i>If section 5 of SW1 on the MIS card is set to ON, the following command will retain the card database in the MIS card and this card database will be downloaded from the MIS card to all other cards. If section 5 of SW1 on the MIS card is set to OFF, the following command will retain the card database in the MIS card, but this card database will <u>not</u> be downloaded from the MIS card to all other cards.</i></p> <p>Access level 5 is required to use this command. This command causes the MIS card to use the alternate MIS card program (if one is available) which may take up to 5 minutes. This command does not affect the SID, security, or communication port parameters. Enter:</p> <pre>INIT-SYS: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::5;       aid          = MIS</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Delete Card Database in MIS Card	<p><b>Caution:</b> <i>The following command will delete the card database in the MIS card.</i></p> <p>Access level 5 is required to use this command. This command deletes the card database in the MIS card. This command does not affect the SID, security, or communication port parameters. Enter:</p> <pre>INIT-SYS: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::3;       aid          = MIS</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
Reset MIS Card	<p><b>Caution: If section 5 of SW1 on the MIS card is set to ON, the following command will retain the card database in the MIS card and this card database will be downloaded from the MIS card to all other cards. If section 5 of SW1 on the MIS card is set to OFF, the following command will retain the card database in the MIS card, but this card database will <u>not</u> be downloaded from the MIS card to all other cards.</b></p> <p>Access level 5 is required to use this command. This command causes the MIS card to perform a soft reset. This command does not affect the SID, security, or communication port parameters. Enter:</p> <pre>INIT-SYS: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::4;</pre> <p style="padding-left: 40px;">aid                    = MIS</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Completely Reset MIS Card to Factory Settings	<p><b>Caution: The following command will delete the card database in the MIS card and reset all SID, security, and communication port parameters to the factory settings.</b></p> <p>Access level 5 is required to use this command. This command deletes all card information (no cards will be entered in the database); resets all security information and the source ID (SID) to the factory settings (there will be only one user named “super” with a password of “sparky”, and the DCD system SID will be TELECOM); and resets all communication parameters to factory settings. Enter:</p> <pre>INIT-SYS: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::9;</pre> <p style="padding-left: 40px;">aid                    = MIS</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Display System Name	<p>Access level 1 is required to use this command. This command is directed to the master shelf only. Enter:</p> <pre>RTRV-HDR: [&lt;tid&gt;] ::&lt;ctag&gt;;</pre> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
Change System Name	<p>Access level 4 is required to use this command. This command is directed to the master shelf only. This command changes the source identifier for a system. Enter:</p> <pre>SET-SID:&lt;tid&gt;::&lt;ctag&gt;::&lt;sid&gt;;</pre> <p>tid = old source identifier of the system sid = new source identifier of the system (20 characters max using letters, numbers, and hyphens; the source identifier must begin with a letter; the target's CLLI code [if available] is recommended as the source identifier, or the office name can be used)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
<p>Display Equipment</p>	<p>Access level 2 is required to use this command. This command displays equipped cards. Non-Version 5 cards must have been entered with the ENT-INVENTORY command (cards not entered will show blank fields). Version 5 cards are automatically entered in the database with the ENT-EQPT command. Enter:</p> <pre>RTRV-INVENTORY:&lt;tid&gt;:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = specific equipment locations:</p> <ul style="list-style-type: none"> <li>ADMIN = MIS card slot</li> <li>CLOCK-a = clock slot (a = 1-2)</li> <li>INPUT-a = input slot (a = 1-2)</li> <li>OUTPUT-a = output slot (used for timing output cards, monitoring cards, and clock insertion cards) (a = 1-12)</li> <li>PROT = protection controller slot</li> <li>PRS-a = LPR shelf (a = 1-2)</li> <li>SHELF = all equipment locations (PRS included with master shelf)</li> </ul> <p>Response:</p> <p><u>For MIS card:</u></p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD   "&lt;aid&gt;" /* CARD=&lt;value&gt;, TYPE=&lt;value&gt;, PART=&lt;value&gt;, CLEI=&lt;value&gt;, SERIAL=&lt;value&gt;, HARDREV=&lt;value&gt;, LOW_BANK_SW=&lt;value&gt;:   SOFTREV=&lt;value&gt;,   SOFTVER=&lt;value&gt;, HI_BANK_SW=&lt;value&gt;:   SOFTREV=&lt;value&gt;,   SOFTVER=&lt;value&gt; */...</pre> <p><b>Note:</b> Information about the ADMIN slot shows information for the high-bank and low-bank program memory locations. One of these locations will be active and the other will be inactive.</p>

Chart 5. System Configuration (Contd)

TASK	PROCEDURE
Display Equipment (Contd)	Response (Contd):  <u>For cards other than MIS:</u>  <pre>                     &lt;sid&gt; &lt;date&gt; &lt;time&gt; M  &lt;ctag&gt; COMPLD     "&lt;aid&gt;"     /*     CARD=&lt;value&gt;,     TYPE=&lt;value&gt;,     PART=&lt;value&gt;,     CLEI=&lt;value&gt;,     SERIAL=&lt;value&gt;,     HARDREV=&lt;value&gt;,     SOFTREV=&lt;value&gt;,     SOFTVER=&lt;value&gt;     */...</pre>

Chart 6. Enter into the Database and Put In Service a Version 5 Card

TASK	PROCEDURE
	<p>This chart provides the steps for entering Version 5 cards into the system database. The card will be put in service according to the switch settings on the card.</p> <p><b>Note:</b> For EA10, EA10M, EA20, EA20M, TO-EA5, TOTA-5, and TOTA-M cards, if section 8 of switch SW1 is ON:</p> <ul style="list-style-type: none"> <li>• The outputs are disabled upon power-up.</li> <li>• The ENT-PORT, RST-EQPT, and RST-PORT commands must be used to enable the outputs.</li> </ul>
<p>Enter and Restore Clock Card</p>	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = clock card slot (CLK-1 or CLK-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Enter and Restore DCIM Card</p>	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = DCIM card slot (DCIM-1 or DCIM-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Enter and Restore GTI Card</p>	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = GTI card slot (GTI-1 or GTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 6. Enter into the Database and Put In Service a Version 5 Card (Contd)

TASK	PROCEDURE
Enter and Restore LTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p style="padding-left: 40px;">aid = LTI card slot (LTI-1 or LTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Enter and Restore MRC Card and Ports	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p style="padding-left: 40px;">aid = MRC card slot (MRC-1 or MRC-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Enter and Restore PSM Card and Ports	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p style="padding-left: 40px;">aid = PSM card slot (PSM-x, where x = 1-11)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Enter and Restore Timing Output Card and Ports	<p>Access level 4 is required to use this command. Enter:</p> <pre>ENT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p style="padding-left: 40px;">aid = TO card slot (TO-x, where x = 1-12 [1-10 for TOTA-5 &amp; TOTA-M])</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 6. Enter into the Database and Put In Service a Version 5 Card (Contd)

TASK	PROCEDURE
Enter and Restore MCA Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>                     ENT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;                     aid           = MCA card (MCA)                 </pre> <p>Response:</p> <pre>                     &lt;sid&gt; &lt;date&gt; &lt;time&gt;                     M &lt;ctag&gt; COMPLD                 </pre>

Chart 7. Put Version 5 Card In Service

TASK	PROCEDURE
This chart provides the steps for putting Version 5 cards into service. Once in service, cards can report alarm and conditions.	
Restore Clock Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = clock card slot (CLK-1 or CLK-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore DCIM Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = DCIM card slot (DCIM-1 or DCIM-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore GTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = GTI card slot (GTI-1 or GTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore LTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;::,,,,,;</pre> <p>aid = LTI card slot (LTI-1 or LTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 7. Put Version 5 Card In Service (Contd)

TASK	PROCEDURE
Restore MRC Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = MRC card slot (MRC-1 or MRC-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore PSM Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = PSM card slot (PSM-x, where x = 1-11)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore Timing Output Card	<p>Access level 4 is required to use this command. When a timing output card is restored (put in service), its outputs are enabled. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = TO card slot (TO-x, where x = 1-12 [1-10 for TOTA-5 &amp; TOTA-M])</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Restore MCA Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RST-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = MCA card (MCA)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 8. Take a Version 5 Card Out of Service

TASK	PROCEDURE
	<p>This chart provides the steps for taking Version 5 cards out of service. When out of service, cards can no longer report alarms and conditions.</p> <p><b>Prerequisite:</b> Before MRC, PSM, or timing output cards can be taken out of service, all the ports associated with the card must be taken out of service. Refer to Chart 14 (Reference Input Ports), Chart 15 (Monitor Input Ports), or Chart 16 (Timing Output Ports) for the procedure to take ports out of service.</p>
Remove Clock Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = clock card slot (CLK-1 or CLK-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove DCIM Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = DCIM card slot (DCIM-1 or DCIM-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove GTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = GTI card slot (GTI-1 or GTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove LTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = LTI card slot (LTI-1 or LTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 8. Take a Version 5 Card Out of Service (Contd)

TASK	PROCEDURE
Remove MRC Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = MRC card slot (MRC-1 or MRC-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove PSM Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = PSM card slot (PSM-x, where x = 1-11)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove Timing Output Card	<p>Access level 4 is required to use this command. When a timing output card is removed (taken out of service), its outputs are disabled. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = TO card slot (TO-x, where x = 1-12 [1-10 for TOTA-5 &amp; TOTA-M])</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Remove MCA Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>RMV-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = MCA card (MCA)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

## Chart 9. Delete a Version 5 Card from Database

TASK	PROCEDURE
	<p>This chart provides the steps for deleting Version 5 cards from the system database.</p> <p><b>Prerequisite:</b> Before DCIM, MRC, PSM, or timing output cards can be deleted from the database, all the ports associated with the card must be deleted from the database. Refer to Chart 14 (Reference Input Ports), Chart 15 (Monitor Input Ports), or Chart 16 (Timing Output Ports) for the procedure to delete ports from the database.</p>
Delete Clock Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>DLT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = clock card slot (CLK-1 or CLK-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Delete DCIM Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>DLT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = DCIM card slot (DCIM-1 or DCIM-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Delete GTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>DLT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = GTI card slot (GTI-1 or GTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
Delete LTI Card	<p>Access level 4 is required to use this command. Enter:</p> <pre>DLT-EQPT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = LTI card slot (LTI-1 or LTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 9. Delete a Version 5 Card from Database (Contd)

TASK	PROCEDURE
Delete MRC Card	<p>Access level 4 is required to use this command. Enter:</p> <p style="padding-left: 40px;">DLT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = MRC card slot (MRC-1 or MRC-2)</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p>M &lt;ctag&gt; COMPLD</p>
Delete PSM Card	<p>Access level 4 is required to use this command. Enter:</p> <p style="padding-left: 40px;">DLT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = PSM card slot (PSM-x, where x = 1-11)</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p>M &lt;ctag&gt; COMPLD</p>
Delete Timing Output Card	<p>Access level 4 is required to use this command. Enter:</p> <p style="padding-left: 40px;">DLT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = TO card slot (TO-x, where x = 1-12 [1-10 for TOTA-5 &amp; TOTA-M])</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p>M &lt;ctag&gt; COMPLD</p>
Delete MCA Card	<p>Access level 4 is required to use this command. Enter:</p> <p style="padding-left: 40px;">DLT-EQPT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</p> <p style="padding-left: 80px;">aid                   = MCA card (MCA)</p> <p>Response:</p> <p style="padding-left: 40px;">&lt;sid&gt; &lt;date&gt; &lt;time&gt;</p> <p>M &lt;ctag&gt; COMPLD</p>

Chart 10. Enter a Non-Version 5 Card in Database

TASK	PROCEDURE
	<p>This chart provides the steps for entering non-Version 5 cards and Version 5 cards without a database (ST2, ST2E, ST3, ST3E, TNC, TNC-E, and LNC) into the system database. Obtain information about the card from the front panel of the card. If information is not available, leave the associated field in the command empty.</p>
<p>Enter Clock Card</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>ENT-INVENTORY: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;card&gt;], [&lt;part&gt;],                 [&lt;clei&gt;], [&lt;serial&gt;], [&lt;hardware_revision&gt;],                 [&lt;software_revision&gt;;</pre> <p>aid = clock card slot (CLOCK-1 or CLOCK-2) card = card (LNC, TNC, TNC-E, ST2, ST2E, ST3, or ST3E)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Enter Input Card</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>ENT-INVENTORY: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;card&gt;], [&lt;part&gt;],                 [&lt;clei&gt;], [&lt;serial&gt;], [&lt;hardware_revision&gt;],                 [&lt;software_revision&gt;;</pre> <p>aid = input card slot (INPUT-1 or INPUT-2) card = card (ACI, CI, CI-EA, or ECI)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Enter Output Card</p>	<p>Access level 3 is required to use this command. **Table I. GTI Card Alarm Integration Times**

INTEGRATION PARAMETER SETTING	GTI CARD TYPE	ALARM INTEGRATION TIME (SIGNAL DEFECT ONLY)	
		MINOR ALARM	MAJOR ALARM
1	GTI -13 & -14	4 hours	24 hours
	GTI -15, -16, -17, & -18	Rubidium ref: 4 hours	Rubidium ref: 24 hours
		Quartz ref: 3/4 hour	Quartz ref: 6 hours
2	GTI -13 & -14	3 hours	18 hours
	GTI -15, -16, -17, & -18	Rubidium ref: 8 hours	Rubidium ref: 48 hours
		Quartz ref: no minor alarm	Quartz ref: 6 hours
3	GTI -13 & -14	1 hour	6 hours
	GTI -15, -16, -17, & -18	Rubidium ref: no minor alarm	Rubidium ref: 24 hours
		Quartz ref: no minor alarm	Quartz ref: 1 hour
4	GTI -13 & -14	10 minutes	1 hour
	GTI -15, -16, -17, & -18	Rubidium ref: 1/2 hour	Rubidium ref: 1 hour
		Quartz ref: 1/2 hour	Quartz ref: 1 hour

Notes:  
 1. The GTI types are as follows:  

<u>type</u>	<u>part #</u>
GTI -13	090-42140-13
GTI -14	090-42140-14 & 090-44140-14
GTI -15	090-42140-15
GTI -16	090-42140-16 & 090-44140-16
GTI -17	090-42140-17
GTI -18	090-42140-18 & 090-44140-18

 2. The times listed are from when a SIGNAL DEFECT occurs until a minor or major alarm is declared.

Chart 14. Reference Input Ports

TASK	PROCEDURE
	<p>This chart provides the steps for controlling reference input ports including: entering ports into the system database, putting ports into service, displaying port parameters, changing port parameters, taking ports out of service, and deleting ports from the system database.</p>
<p>Enter DCIM Card Input Port</p>	<p>Access level 4 is required to use this command. If a parameter is left blank, the switch settings for that parameter will be used. Enter:</p> <pre>ENT-PORT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;framing&gt;],                                      [&lt;priority&gt;],, [&lt;signal type&gt;]                                      [, [&lt;reference condition&gt;]];</pre> <p>aid = DCIM card port (DCIM-a-b):  a = DCIM card slot (1-2)  b = port (1-2 or ALL)</p> <p>framing = type of framing:  CAS = channel associated signaling  CAS4 = channel associated signaling with cyclic redundancy check 4  CRC4 = common channel signaling with cyclic redundancy check 4  D4 = D4 framing  ESF = ESF framing  FAS = common channel signaling</p> <p>priority = priority of the reference on this port (1-4 for 1+1 mode, 1-2 for 1:1 mode [1 is highest priority])</p> <p>signal type = type of signal:  ANALOG = analog  DIGITAL = digital</p> <p>reference condition = reference can be used:  ALW = this input reference can be used  INH = this input reference cannot be used (but can be IS-NR)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE
<p>Enter MRC Card Input Port</p>	<p>Access level 4 is required to use this command. If a parameter is left blank, the switch settings for that parameter will be used. Enter:</p> <pre>ENT-PORT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;framing&gt;],            [&lt;priority&gt;], [&lt;reference type&gt;], [&lt;signal type&gt;];</pre> <p>aid = MRC card port (MRC-a-b[&amp;&amp;-c]):  a = MRC card slot (1-2)  b = port (1-4 or ALL)  c = ending port in a range (2-4 with c &gt; b)</p> <p>framing = type of framing:  CAS = channel associated signaling  CAS4 = channel associated signaling with cyclic redundancy check 4  CRC4 = common channel signaling with cyclic redundancy check 4  D4 = D4 framing  ESF = ESF framing  FAS = common channel signaling</p> <p>priority = priority of the reference on this port (1-4 with 1 the highest)</p> <p>reference type = type of reference:  CESIUM = cesium  GPS = global positioning system  LORAN = LORAN  NETWORK = network</p> <p>signal type = type of signal:  ANALOG = analog  DIGITAL = digital</p> <p><b>Note:</b> If all the reference ports of an MRC card are configured for the same priority, the references will be selected based on the numerical order of the ports. The same numerical order will be listed if the settings are retrieved.</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE
<p>Restore Input Port</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>RST-PORT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = port:  DCIM card port (DCIM-a-b):  a = DCIM card slot (1-2)  b = port (1-2 or ALL)  MRC card port (MRC-a-b[&amp;&amp;-c]):  a = MRC card slot (1-2)  b = port (1-4 or ALL)  c = ending port in a range (2-4 with c &gt; b)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Display Performance Monitoring Data</p>	<p>Access level 2 is required to use this command. Enter:</p> <pre>RTRV-PM-PORT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;:: &lt;monitor type&gt;,,,,,;</pre> <p>aid = port:  DCIM card port (DCIM-a-b):  a = DCIM card slot (1-2)  b = port (1-2 or ALL)  MRC card port (MRC-a-b[&amp;&amp;-c]):  a = MRC card slot (1-2)  b = port (1-4 or ALL)  c = ending port in a range (2-4 with c &gt; b)</p> <p>monitor type = the monitored parameter:  ALL = all monitor types  BPV = bipolar violations  CRC = cyclic redundancy check</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;:&lt;monitor type&gt;,&lt;monitor value&gt;,&lt;vldty&gt;,,,, &lt;monitor date&gt;,&lt;monitor time&gt;" ...</pre> <p>monitor value = value retrieved for the monitor type  monitor date = current date  monitor time = current time</p>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE
<p>Clear Performance Monitoring Data</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>INIT-REG: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::&lt;monitor type&gt;;</pre> <p>aid = port:  DCIM card port (DCIM-a-b):  a = DCIM card slot (1-2)  b = port (1-2 or ALL)  MRC card port (MRC-a-b[&amp;&amp;-c]):  a = MRC card slot (1-2)  b = port (1-4 or ALL)  c = ending port in a range (2-4 with c &gt; b)</p> <p>monitor type = the monitored parameter:  ALL = all monitor registers  BPV = bipolar violations register  CRC = cyclic redundancy check register</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
<p>Clear Performance Monitoring Data for DCIM, MRC, &amp; PSM Cards</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>INIT-REG: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::&lt;monitor type&gt;;</pre> <p>aid = all spans of all DCIM, MRC, &amp; PSM cards (ALL)</p> <p>montype = the monitored parameter:  ALL = all register types  BPV = bipolar violations register  CRC = cyclic redundancy check register  MTIE = MTIE register (PSM only)  PHASE1M = phase 1-minute register (PSM only)  SLIPS = slips register (PSM only)  TDEV = TDEV register (PSM only)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE
Display Framing, Priority, Signal Type, & Reference Condition of DCIM Cards	<p>Access level 1 is required to use this command. Enter:</p> <pre>RTRV-PORT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = DCIM card port (DCIM-a-b):                      a = DCIM card slot (1-2)                      b = port (1-2 or ALL)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;:&lt;ctag&gt;::&lt;framing&gt;,&lt;priority&gt;,,   &lt;signal type&gt;,&lt;reference condition&gt;" ...</pre> <p>framing = type of framing:                      AUTO = (see note below)                      CAS = channel associated signaling                      CAS4 = channel associated signaling with cyclic redundancy check 4                      CRC4 = common channel signaling with cyclic redundancy check 4                      D4 = D4 framing                      ESF = ESF framing                      FAS = common channel signaling</p> <p>priority = priority of the reference on this port (1-4 with 1 the highest)</p> <p>signal type = type of signal:                      ANALOG = analog                      DIGITAL = digital</p> <p>reference condition = reference use:                      ALW = use reference                      INH = do not use reference</p> <p><b>Note:</b> If the framing type has never been set for a port on an MRC card, the retrieved framing type for that port will indicate AUTO. If this occurs, use the ENT-PORT command (if the port has not been entered) or the ED-PORT command (if the port has been entered) to set the framing type for the specified port.</p>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE
<p>Change Framing, Priority, Signal Type, &amp; Reference Condition of DCIM Cards</p>	<p>Access level 3 is required to use this command. Enter:</p> <pre>ED-PORT: [&lt;tid&gt;]:&lt;aid&gt;:&lt;ctag&gt;:: [&lt;framing&gt;], [&lt;priority&gt;] , , [&lt;signal type&gt;] [, [&lt;reference condition&gt;]];</pre> <p>aid = DCIM card port (DCIM-a-b):  a = DCIM card slot (1-2)  b = port (1-2 or ALL)</p> <p>framing = type of framing:  CAS = channel associated signaling  CAS4 = channel associated signaling with cyclic redundancy check 4  CRC4 = common channel signaling with cyclic redundancy check 4  D4 = D4 framing  ESF = ESF framing  FAS = common channel signaling</p> <p>priority = priority of the reference on this port (1-4 with 1 the highest)</p> <p>signal type = type of signal:  ANALOG = analog  DIGITAL = digital</p> <p>reference condition = reference use:  ALW = use reference  INH = do not use reference</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>

Chart 14. Reference Input Ports (Contd)

TASK	PROCEDURE				
Change Threshold (Contd)	BPV or CRC counts for an E1 signal				
	Error Rate	1 port in service	2 ports in service	3 ports in service	4 ports in service
	$1 \times 10^{-8}$	18	9	6	4
	$1 \times 10^{-7}$	184	92	61	46
	$1 \times 10^{-6}$	1843	922	614	461
	$1 \times 10^{-5}$	18432	9216	6144	4608
	$2.35 \times 10^{-5}$	32767	16384	10922	8192
Because the ports are sampled in turn, there is some amount of settling time for the framing circuit. This settling time causes an error of $\pm 4\%$ in the specified error rate. The observation interval is 15 minutes. If an MRC or PSM card has only one port active, no sampling occurs.

Chart 20. SSM Control (Contd)

TASK	PROCEDURE
<p>Display Quality Level Assigned to Outputs of Cards For Specific Conditions</p>	<p>Access level 1 is required to use this command. This command displays the quality level assigned by the ED-SSM-MSG command to the output of a TOTA-M, EA10-M, EA20-M, GTI-TM, or GTI-18 card. On TOTA-M, EA10-M, and EA20-M cards, the message indicated will be sent only if the TOTA-M, EA10-M, or EA20-M card loses communications with the MIS card for longer than 2 seconds. On GTI-17 and GTI-18 cards, the message indicated will be sent only if the output signal from the GTI-17 or GTI-18 card is not traceable to PRS/PRC and the card signal is still active. Enter:</p> <pre>RTRV-SSM-MSG: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = card:  GTI-a = GTI-17 or GTI-18 card (a = 1-2 or ALL)  TO-a = TOTA-M, EA10-M, or EA20-M card (a = 1-12 or ALL)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;:&lt;ssmmsg&gt;"</pre> <p>ssmmsg = ssm message:  QL-DNU = do not use for synchronization  QL-DUS = do not use for synchronization  QL-HOLDOVER = output quality level based on quality level of the active shelf clock  QL-PRC = traceable to a primary reference clock  QL-PRS = traceable to a primary reference source  QL-RES = traceable to a user-defined level  QL-SEC = traceable to SDH equipment clock  QL-SMC = traceable to SONET minimum clock  QL-SSUL = traceable to synchronization supply unit local  QL-SSUT = traceable to synchronization supply unit transit  QL-ST2 = traceable to stratum 2  QL-ST3 = traceable to stratum 3  QL-ST3E = traceable to stratum 3E  QL-ST4 = traceable to stratum 4  QL-STU = traceable to unknown stratum level  QL-TNC = traceable to transit node clock  QL-UNK = traceable to unknown stratum level</p>

Chart 20. SSM Control (Contd)

TASK	PROCEDURE
<p>Change Quality Level Assigned to Outputs of Cards For Specific Conditions</p>	<p>Access level 4 is required to use this command. This command changes the quality level assigned to the output signal of an input card, the output signals of TOTA-M, EA10-M, or EA20-M cards, GTI-17, or GTI-18 cards. On TOTA-M, EA10-M, and EA20-M cards, the assigned message will be sent only if the TOTA-M, EA10-M, or EA20-M card loses communications with the MIS card for longer than 2 seconds. On GTI-17 and GTI-18 cards, the assigned message will be sent only if the output signal from the GTI-17 or GTI-18 card is not traceable to PRS/PRC and the card signal is still active. Parameters left blank are not changed. Enter:</p> <p style="text-align: center;">ED-SSM-MSG: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::&lt;ssmmsg&gt;;</p> <p>aid = card:              GTI-a = GTI card (a = 1–2)              TO-a = TOTA-M, EA10-M, or EA20-M card (a = 1–12)</p> <p>ssmmsg = ssm message:  <u>For GTI-18, EA10-M, EA20-M cards:</u>              QL-DNU = do not use for synchronization              QL-HOLDOVER = output quality level is based on quality level of the active shelf clock              QL-PRC = traceable to a primary reference clock              QL-SEC = traceable to SDH equipment clock              QL-SSUL = traceable to synchronization supply unit local              QL-SSUT = traceable to synchronization supply unit transit              QL-UNK = traceable to unknown stratum level  <u>For GTI-17, TOTA-M cards:</u>              QL-DUS = do not use for synchronization              QL-PRS = traceable to a primary reference source              QL-HOLDOVER = output quality level is based on quality level of the active shelf clock              QL-RES = traceable to a user-defined level              QL-SMC = traceable to SONET minimum clock              QL-ST2 = traceable to stratum 2              QL-ST3 = traceable to stratum 3              QL-ST3E = traceable to stratum 3E              QL-ST4 = traceable to stratum 4              QL-STU = traceable to unknown stratum level              QL-TNC = traceable to transit node clock</p>

Chart 20. SSM Control (Contd)

TASK	PROCEDURE
<p>Display Quality Level Assigned to Inputs of DCIM Cards</p>	<p>Access level 1 is required to use this command. This command displays the quality level assigned by the ED-SSM-PORT command to the input signal of a DCIM card. Chart 23. Copy Program from External Source to MIS Card (Contd)

STEP	PROCEDURE
8	<p><b>Caution: If the program download is interrupted before completion, the inactive bank will be empty. Any program residing in this bank will be lost. Do not interrupt the download.</b></p> <p>Transmit one of the following files to the inactive memory bank in the MIS card:</p> <p>If the LOW BANK is active (as determined in Step 4), transmit the xxxxx.hi file.                      If the HI BANK is active (as determined in Step 4), transmit the xxxxx.low file.</p> <p>where xxxxx represents the particular release of software being installed. Example: 50303 would be for release 5.03.03.</p>
9	<p>Wait until the communication software indicates that the copying has been completed (may take up to 8 minutes).</p>
10	<p>Access level 5 is required to use this command. To switch to the program just copied to the MIS card, enter:</p> <pre>INIT-SYS: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;::5;</pre> <p>aid = MIS</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD</pre>
11	<p>This procedure is completed.</p>

Chart 24. GPS Information

TASK	PROCEDURE
<p>This chart provides the steps for displaying the GPS operating statistics.</p>	
<p>Display GPS Statistics</p>	<p>Access level 2 is required to use this command. Enter:</p> <pre>RTRV-GPS-STAT: [&lt;tid&gt;] :&lt;aid&gt;:&lt;ctag&gt;;</pre> <p>aid = GTI card slot (GTI-1 or GTI-2)</p> <p>Response:</p> <pre>&lt;sid&gt; &lt;date&gt; &lt;time&gt; M &lt;ctag&gt; COMPLD "&lt;aid&gt;" /* UTC-TIME=b, LOCATION=c, SAT-IN-VIEW=d, [SAT-e=f], ... GTIMDEV=g, OSC1FFREQ=h, OSC2FFREQ=i */</pre> <p>b = universal coordinated time (hours:minutes:seconds)</p> <p>c = format is ddmm.mmm-x-dddmm.mmm-y-aa  ddmm.mmm-x = latitude:  dd = degrees  mm.mmm = minutes  x = north (N) or south (S)  dddmm.mmm-y = longitude:  ddd = degrees  mm.mmm = minutes  x = east (E) or west (W)  aa = altitude in meters (can be negative, error is ±20 meters)</p> <p>d = number of satellites in view</p> <p>e = satellite number</p> <p>f = format is d1-d2-sn:  d1 = satellite azimuth (degrees relative to true north)  d2 = satellite elevation (degrees relative from horizontal)  sn = signal-to-noise ratio (dB)</p> <p>g = modified Allen deviation of the GTI card</p> <p>h = oscillator 1 fractional frequency</p> <p>i = oscillator 2 fractional frequency</p> <p><b>Note:</b> The system occasionally returns an SARB error message in response to the RTRV-GPS-STAT command. If this occurs, repeat the command.</p>
