

## ADDENDUM

This manual refers to a 560-5153 assembly. The actual module shipped to the customer is a 560-5153-1 assembly. The following describes the unique operation and makeup of the 560-5153-1:

1. The E1\T1 output of this board will become 0 volts DC when all three passive combiners' input references are lost.
2. The E1\T1 outputs will return upon the reinsertion of a valid input reference.
