## OVERVIEW

Symmetricom＇s CsIII is a lightweight， compact，economical cesium frequency standard．The technology developed for the CsIII is an evolutionary step forward in the quest for higher stability，lower phase noise and longer life．An ever－increasing base of demanding users in communications，timing， synchronization and other applications take advantage of this performance．

The CsIII is configured with 5 and 10 MHZ sinewave outputs，a 10 MHz TTL output a 1PPS sync input and a 1PPS timing output． All monitoring and control of the unit is done via the serial interface and Symmetricom＇s proprietary Monitor3 software．

Packaged in a $2 \mathrm{U}, 19$－inch rack mounted chassis，the CsIII weighs less than 30 lbs．An optional portability kit and T1／E1 synthesizer are available for added functionality and versatility．

The CsIII comes standard with a 2－year electronics warranty and 12－year tube warranty．

The CsIII is ideal for SATCOM，Calibration， Metrology and many other Test \＆ Measurement applications that required cesium stability and accuracy．
