

Service Manual

Stereo Integrated Amplifier

Amplifier

SU-X102

Color

(K) Black Type

Areas

Country Code	Area	Color
(E)	Continental Europe	(K)
(EB)	Great Britain	
(EG)	F.R. Germany & Italy	
(GC)	Third Region	
(GN)	Oceania	

SPECIFICATIONS

(DIN 45 500)

■ AMPLIFIER SECTION

DIN power output	
1 kHz THD: 1 %	2 × 40 W (8 Ω)
Total harmonic distortion	•
rated power at 1 kHz	1 % (8 Ω)
Harmonic distortion	
half power at 1 kHz	0.03 % (8 Ω)
Residual hum and noise	0.5 mV
Damping factor	30 (8 Ω)
Input sensitivity and impedance	
PHONO	3 mV/47 kΩ
TUNER, TAPE	150 mV/22 kΩ
CD, AUX1, 2	200 mV/22 kΩ
Maximum input voltage (1 kHz, RMS)	
PHONO	100 mV
S/N (rated power 8 Ω)	
PHONO	73 dB (IHF, A: 79 dB)
TUNER, CD, AUX1, 2, TAPE	82 dB (IHF, A: 83 dB)
Frequency response	
PHONO	RIAA standard curve
	±0.8 dB (30 Hz~15 kHz)
TUNER, CD, AUX1, 2, TAPE	15 Hz~50 kHz (-3 dB)
Tone controls	
BASS	50 Hz, +10 dB~-10 dB
TREBLE	20 kHz, +10 dB~-10 dB

Muting	-20 dB
Super bass	60 Hz, +8 dB
Output voltage	
TAPE REC OUT	150 mV
Channel balance, TUNER 250 Hz~6,300 Hz	±1.0 dB
Channel separation, TUNER 1 kHz	55 dB
Headphones output level and impedance	421 mV/330 Ω
Load impedance	
MAIN	8 Ω~16 Ω
SURROUND	8 Ω~16 Ω

■ GENERAL

Power consumption	230 W
Power supply	
For Continental Europe	AC 50 Hz/60 Hz, 220 V
For Great Britain and Oceania	AC 50 Hz/60 Hz, 230~240 V
For others	AC 50 Hz/60 Hz, 110 V/127 V/220 V/240 V
Dimensions (W × H × D)	360 × 129 × 305 mm
	(14-3/16" × 5-3/32" × 12")
Weight	5.3 kg (11.7 lb.)

Notes:

- Specifications are subject to change without notice.
Weight and dimensions are approximate.
- Total harmonic distortion is measured by the digital spectrum analyzer.

Technics

■ CONTENTS

	Page		Page
Before repair	2	Description of FL panel	13
Protection circuitry	2	Circuit board diagram	20~25
Accessories	2	Terminal guide of IC's, transistors and diodes	25
Location of controls	3	Wiring connection diagram	26
Standard operations	4	Block diagram	27, 28
Connections	4~6	Function of IC terminals	29
Disassembly instructions	7~10	Replacement parts list	30~33, 36
Schematic diagram	11~19	Cabinet parts location	34, 35
		Packaging	36

■ BEFORE REPAIR

- (1) Turn off the power supply. Using a 10Ω, 5 W resistor connect both ends of power supply capacitors (C711, C712, 3300 μF) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50 Hz/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 110 V/127 V/220 V/240 V.

Power supply voltage	AC 110 V	AC 120 V	AC 220 V	AC 230 V	AC 240 V
Consumed current 50 Hz	181~424 mA	166~386 mA	96~224 mA	86~200 mA	87~204 mA
Consumed current 60 Hz	161~376 mA	148~346 mA	86~200 mA	75~175 mA	79~185 mA

■ PROTECTION CIRCUITRY

The protection circuitry may have operated if either of the following conditions is noticed:

- *No sound is heard when the power is switched ON.
- *Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON AGAIN.

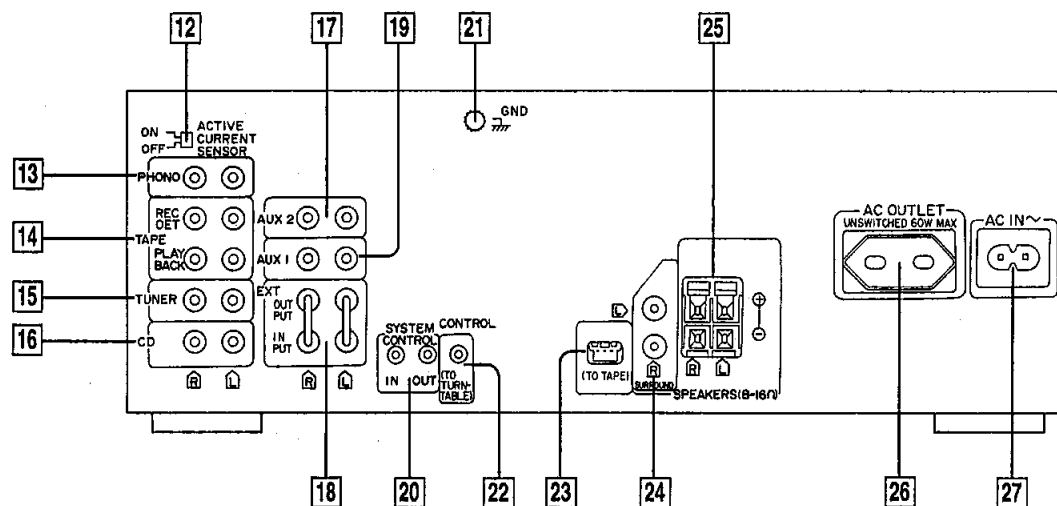

■ ACCESSORIES

- AC power supply cord 1
Configuration of AC power supply cord differs according to area.
- Attachment AC plug 1
- SJA187 For (E) (EG) area only.
- SJA173 For (GN) area only.
- SJA188 For (EB) area only.
- RJA0004 For (GC) area only.
- SJP9215 For (GC) area only.

■ LOCATION OF CONTROLS

- | | |
|--|---|
| 1 Power switch (POWER) | 7 Input selectors/indicators |
| 2 Volume-level indicator (VOLUME LEVEL) | 8 Muting indicator (MUTING) |
| 3 Volume control (VOLUME) | 9 Surround-sound button/indicator (SURROUND) |
| 4 Volume preset button (VOLUME PRESET) | 10 Super bass button/indicator (SUPER BASS) |
| 5 Balance control (BALANCE) | 11 Headphones jack (PHONES) |
| 6 Tone controls (BASS/TREBLE) | |

- | | |
|--|---|
| 12 Active current sensor switch | 21 GND terminal |
| 13 Phono input terminal | 22 Control terminal (to turntable) |
| 14 Tape rec out/playback terminal | 23 Control terminal (to cassette deck) |
| 15 Tuner input terminal | 24 Surround-sound speaker terminal |
| 16 CD input terminal | 25 Main speaker terminal |
| 17 AUX 2 input terminal | 26 AC outlet |
| 18 EXT output/Input terminal | 27 AC inlet |
| 19 AUX 1 input terminal | |
| 20 System control IN/OUT terminal | |

STANDARD OPERATIONS

When listening to music

TREBLE

Adjust the high-frequency sound to the desired tone quality.

BASS

Adjust the low-frequency sound to the desired tone quality.

BALANCE

Adjust the balance of the left/right volume.

VOLUME

Adjust the volume level.

SUPER BASS

Press this button to boost the super-low frequency range. (The indicator will illuminate.)

SURROUND

Set to the "ON" position to activate the surround-sound effect. (The indicator will illuminate.)

Note:

The surround-sound effect is only effective for phono discs, compact discs, tapes that are recorded in stereo, and for FM and other broadcasts that are broadcast in stereo. It has no effect for monaural AM broadcasts, or for any other monaural source. When listening to a sound source recorded by the surround-sound method, set this switch to the "OFF" position.

The effect by using surround-sound speaker systems

An effect similar to the dynamic sound of a concert hall

During recording

Operation of controls or switches other than the surround-sound switch has no influence upon recording.

CONNECTIONS

To connect the amplifier with the cassette deck

Make connections in the numbered sequence by using the included cables.

Stereo connection cable

White (L) Red (R)

See the operating instructions of the tuner (ST-X302L) for details.

- 1 Connect the stereo connection cables.
- 2 Connect the L-type cable.
- 3 Connect the flat cable.

SYSTEM CONTROL OUT

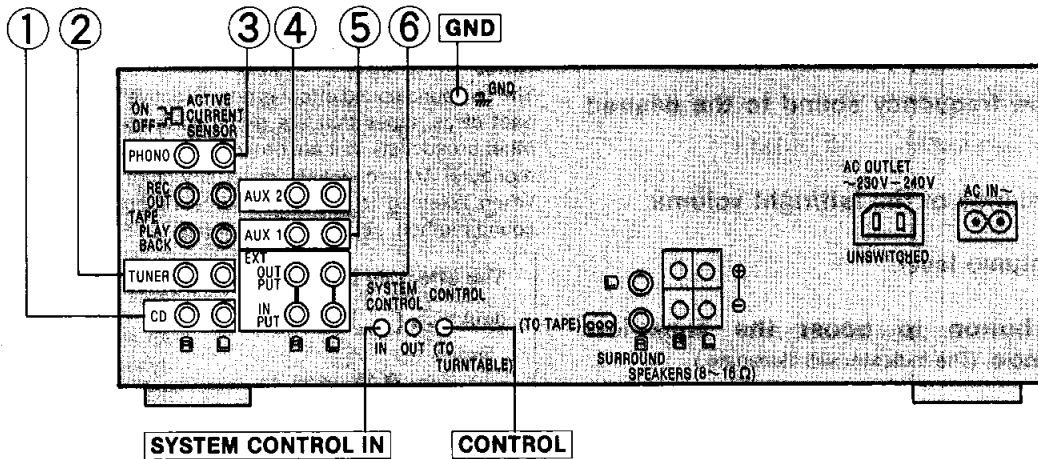

This terminal is used to connect a Technics compact disc player or a Technics stereo graphic equalizer with the "SYSTEM CONTROL IN" terminal.

CONTROL

This terminal is used to connect a Technics multi compact disc player with the "CONTROL" terminal.

To connect the amplifier with other units

Make connections to each component in the system by using stereo connection cables (not included).

1 "CD" terminals

Connect a compact disc player.

4 "AUX 2" terminals

Connect a video disc player etc. (Only the audio is connectable)

2 "TUNER" terminals

Connect a tuner.

5 "AUX 1" terminals

Connect a second compact disc player.

SYSTEM CONTROL IN terminal

This terminal is used to connect a Technics tuner with the "SYSTEM CONTROL OUT" terminal.

3 "PHONO" terminals

Connect a turntable.

6 "EXT" terminals

Connect a graphic equalizer.

Note:

When these terminals are not in use, be sure to insert the "shorting" pins (included).

"GND" terminal of the amplifier

This terminal is for use with a turntable which has a ground wire.

"CONTROL (TO TURNTABLE)" terminal

This terminal is used to connect a Technics turntable with the "REMOTE/SYNCHRO REC" terminal.

Connection of speaker systems

Two pairs of speaker systems (main, surround-sound) can be connected to the amplifier. Speaker systems that can be connected to any of the speaker connection terminals of the amplifier are speaker systems with an impedance of 8 to 16 ohms. Make connections to each speaker system by using speaker cords (not included).

Main speaker systems (not included)

Connect to the "SPEAKER" terminals.

Surround-sound speaker systems (not included)

Connect to the "SURROUND" terminals. Be sure to connect both speaker systems. If only one side is connected, no sound will be heard.

How to use the active current sensor

The selector is used to enjoy powerful super-bass sound.
ON: Switch ON when connecting the Technics system speakers (SB-CS50).
OFF: Switch OFF when connecting speakers other than Technics system speakers.

Note: When connecting speakers other than system speakers, sound from the speakers may not be heard if the selector is pressed ON, because the protecting circuit on the amplifier becomes active.

To connect cords to terminals

- ① Strip off the outer covering, and twist the center conductor.
- ② Tilt the lever back and insert the cord.
- ③ Close the lever and pull the cord gently to be sure that it is secure.

Notes:

- Do not use solid core speaker wire.
- To connect the speaker cord, twist the strands on the end. Do not solder the conductor.
- Be sure to only connect positive (+) cords to positive (+) terminals, and negative (-) cords to negative (-) terminals.

Note:

To prevent damage to circuitry, never short-circuit the plus (+) and minus (-) speaker wires.

AC outlet ("AC OUTLET")

Do not connect video equipment (such as a TV, etc.) to the AC outlet of this unit. (This outlet is intended for audio equipment.) Do not exceed the indicated power ratings when connecting to this outlet.

"UNSWITCHED" outlet

Power is always available, regardless of power switch. Audio equipment rated up to 60 W can be connected here.

Note:

The configuration of the AC outlet differs according to area.

AC power supply cord

Connect the AC power supply cord (included) after all other cables and cords are connected.

Notes:

- Configuration of the AC outlet and AC power supply cord differs according to area.
- If this unit is not to be connected with the tuner, the cord is to be connected to the household AC outlet.

Tuner (not included)

AC power supply cord (included)

Amplifier

For United Kingdom

Cut off and dispose of the plug and replace with a suitable plug. (Refer to "For United Kingdom" on page 2.)

Ref. No.
9

Removal of the P.C.B.s

Procedure
1→7→9

•Remove the P.C.B. in the direction of the arrow.

Ref. No.
10

Check of the main P.C.B.

Procedure
1→10

1. Remove the 7 screws (1~7).

2. Remove the 4 screws (8~11).

3. Remove the 3 screws (12~14).
4. Remove the front panel unit in the direction of the arrow.
*Connect 2 flat cables (J501A, J502).

5. Remove the bottom chassis.
6. Reinstall the front panel unit to the main P.C.B.

Ref. No. 11	Removal of the Power IC and Regulator Transistor	Ref. No. 12	Removal of the Power Transformer
Procedure 1→10→11	1. Unsolder the power IC or regulator transistor. 2. Remove the 3 screws (①~③).	Procedure 1→12	
 <p>Note: When mounting the power IC, or regulator transistor apply silicon terminal compound (SZZ0L15) to the rear of the power IC or regulator transistor.</p>		 <p>1. Remove the 1 flat cable (J701). 2. Remove the 4 screws (①~④).</p>	

“ATTENTION SERVICER”

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

●Replacement of the Foot.

1. Remove the 4 heat melted posts on the chassis with a pair of nippers or similar tool.
2. To replace the foot (RKA0011-2) on the chassis, melt the 4 posts with a soldering iron.

- ⋯⋯⋯⋯⋯⋯ CD signal (Lch), Phono signal (Lch)
- Positive voltage lines (+)
- - - - - Negative voltage lines (-)

●Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

●Important safety notice:

Components identified by \triangle mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

***Caution!**

- IC and LSI are sensitive to static electricity.
- Secondary trouble can be prevented by taking care during repair.
- *Cover the parts boxes made of plastics with aluminum foil.
- *Ground the soldering iron.
- *Put a conductive mat on the work table.
- *Do not touch the legs of IC or LSI with the fingers directly.
