

Service Manual

Amplifier

Amplifier

SE-CH530

Colour

(K) : Black

Remote Control
Transmitter

RS-CH730

SE-CH530

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

Areas

Suffix for Model No.	Area	Colour
(E)	Europe	(K)
(EB)	Britain	
(EG)	Germany and Italy	
(EP)	Eastern Europe and Poland	

System: SC-CH530

Specifications

Power output

[For (E), (EG) and (EP) areas]

DIN 1 kHz, THD 1%, both channel driven

2 × 35 W (6 Ω)

[For (EB) area]

RMS 1 kHz, THD 10%, both channel driven

2 × 48 W (6 Ω)

Total harmonic distortion

Rated power at 1 kHz

1% (6 Ω)

Half power at 1 kHz

0.09% (6 Ω)

Load impedance

6 Ω – 8 Ω

S/N (rated power)

90 dB

Frequency response

40 Hz – 30 kHz

■ General

Power consumption

114 W

Power supply

[For (E), (EG) and (EP) areas] 230 V, AC 50/60 Hz

[For (EB) area] 230 – 240 V, AC 50/60 Hz

Dimensions (W × H × D)

270 × 118.5 × 341.5 mm

Weight

4.2 kg

Notes:

Specifications are subject to change without notice.

Weight and dimensions are approximate.

Total harmonic distortion is measured by the digital spectrum analyzer.

System	Tuner/sound processor	Compact disc player	Amplifier	Cassette deck	Speakers
SC-CH530	ST-CH530	SL-CH530	SE-CH530	RS-CH730	* SB-CH530A

* Made in PAES

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.

Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

External Unit Connection	8	Packaging	22
Location of Controls	8		
Operation Check and Main Component Replacement Procedures	9, 10		

■ Before Repair

- (1) Turn off the power supply. Using a 10 Ω, 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V/240 V.

Power supply voltage	AC 230 V	AC 240 V
Consumed current 50 Hz	60 ~ 200 mA	60 ~ 200 mA

■ Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- * No sound is heard when the power is switched ON.
- * Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

■ Accessories

- AC power supply cord
(E), (EG) and (EP) areas : (RJA0019-2K) .. 1
(EB) area : (VJA0733) 1
- Flat cable
Long (REX0661) 1
Medium (REX0660) 1
Short (REX0608) 1
- Remote control transmitter
(RAK-CH144WH) 1
- Batteries
(UM-4, "AAA", R03) 2
Note: These are available on sales route.
- AM (LW/MW) loop antenna
(RSA0012) 1
- Antenna holder
(RMN0244) 1
- Mounting screw
(XTN3+12AFZ) 1
- FM indoor antenna
(RSA0007) 1
- Speaker cords
(REE0499) 2
- Power plug adaptor
for (EB) area only (SJP9009) 1

(E), (EG) and (EP)

(EB)

■ Caution for AC Mains Lead

[(EB) area code model only]

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

This apparatus was produced to BS 800.

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol \perp .

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

■ Stacking the Components

- Install the various components as shown in the illustration.
- To produce a better stereo sound, install both speakers away from the system.

Horizontal stacking **A**

Vertical stacking **B**

■ Connections

I

Connecting

Disconnecting

System connections **C**

Connect the AC power supply cord after you have connected all other cables.

I Connect the flat cables.

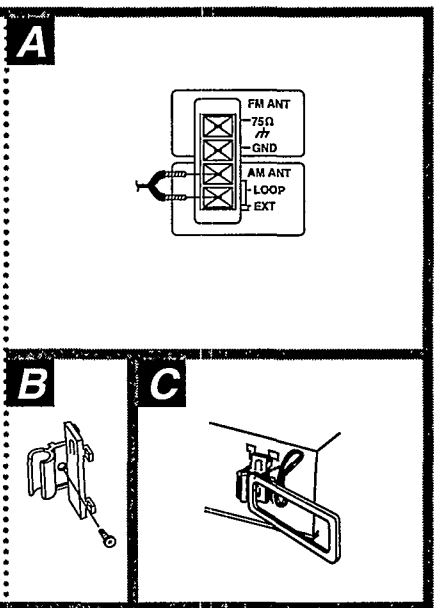

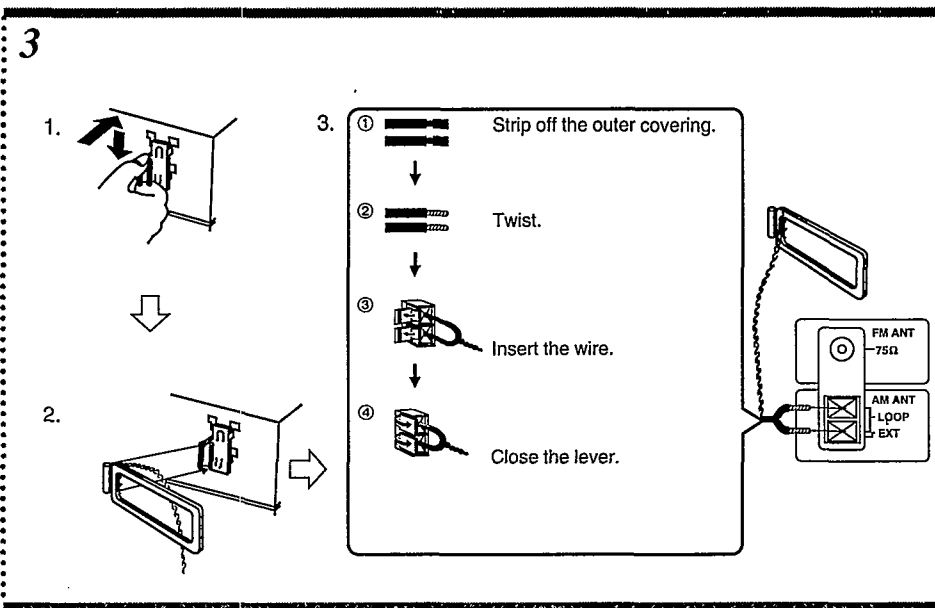

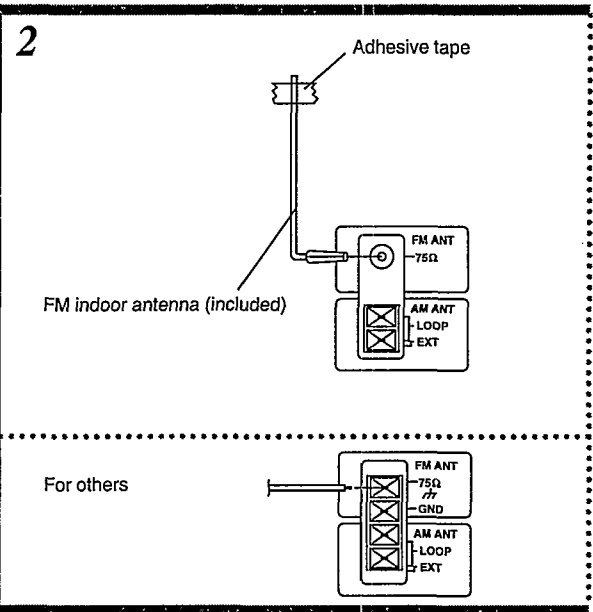

Hold the connector with the recessed part up and press in at the center until you hear a click.

1. Connect the shorter flat cable to the terminal of the A1 and A2.
2. Connect the longer flat cable to the terminal of the B1 and B2.
3. Connect the longest flat cable to the terminal of the C1 and C2.

To disconnect the flat cable, hold the connector as shown in the illustration, and pull it out.

After connection, fold and press the cable as flat to the back of the unit as possible. (To minimize noise pickup while listening an AM broadcast)

Do not try connecting or disconnecting the flat cables while the power is switched to ON.

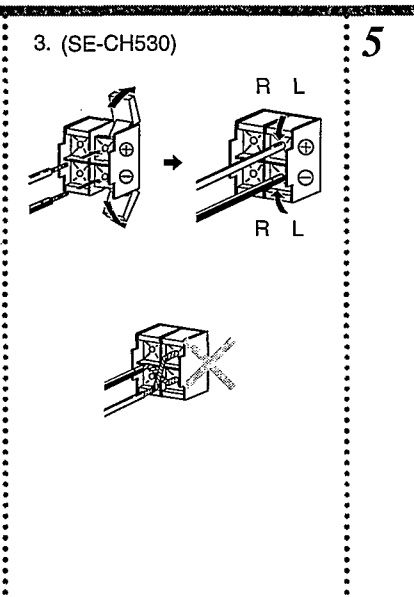

2 Connect the FM indoor antenna.
 The tip of the internal antenna wire should not come into contact with any metal objects.

Note
 When you cannot get a good reception of FM radio broadcast:
 • Install the antenna on a wall at a height and in a direction which result in the best reception.
 • When you cannot get a good reception with this FM indoor antenna, we recommend you install an FM outdoor antenna (not included).

3 Connect the AM (MW/LW) loop antenna.
 1. Attach the antenna holder to the rear panel of the tuner/sound processor. Press the antenna holder hard enough to get it fixed firmly in the place, with a click.
 2. Clamp the antenna with its cord come upward to the antenna holder.
 3. Connect the antenna terminal to the rear panel of the tuner/sound processor.
 • While listening to an MW/LW broadcast, position the loop antenna for the best reception.

For areas except Continental Europe: A
 You may attach the antenna holder to a rack or other structure. Use a screw (included) to attach as shown in the figure. **B**

Note
 To minimize noise pickup, bundle the loop antenna cord using a tape or so to keep the flat cables away from the AM loop antenna cord. **C**

4 Connect the right (R) left and (L) speaker cables.

Notes

- Be sure to connect speaker cables before connecting the AC power supply cord.
- The load impedance of any speaker used with this unit must be 6–8Ω.

Connection of speaker cables **A**

1. Strip off the outer covering, and twist the center conductor. Make sure the bare ends of the wires are not unraveled. (If they are, twist them tight again.)
2. ① Tilt the lever back and insert the wire.
② Close the lever and pull the cord gently to be sure that it is secured.
3. Insert the wire to the rear panel of the amplifier, and close the lever.

Notes

- To prevent damage to circuitry, never short-circuit positive (+) and negative (–) speaker wires.
- Be sure to connect only positive (red) wires to positive (+) terminals and negative (black) wires to negative (–) terminals.

Caution

Use this speaker only with the recommended system.

Failure to do so may lead to damage to the amplifier and/or the speaker, and may result in the risk of fire. Consult a qualified service person if damage has occurred or if you experience a sudden change in performance.

5 Connect the AC power supply cord after you have connected all other cables and cords.

Insertion of Connector **B**

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

For areas except for Continental Europe **C**

If the power plug will not fit your socket, use the power plug adaptor (included).

Optional Antenna Connections

FM outdoor antenna (not included) **A**

You may need an outdoor antenna if you use this system in a mountainous region or inside a reinforced-concrete building, etc. An outdoor antenna should be installed by a competent technician only.

For areas except Continental Europe: **B**

1. Remove a piece of the outer vinyl sheath from the end.
2. Bundle the shield braid, and remove a piece of the inner vinyl sheath covering the core wire.
3. Connect the core wire and the shield braid.

AM (MW/LW) outdoor antenna (not included) **C**

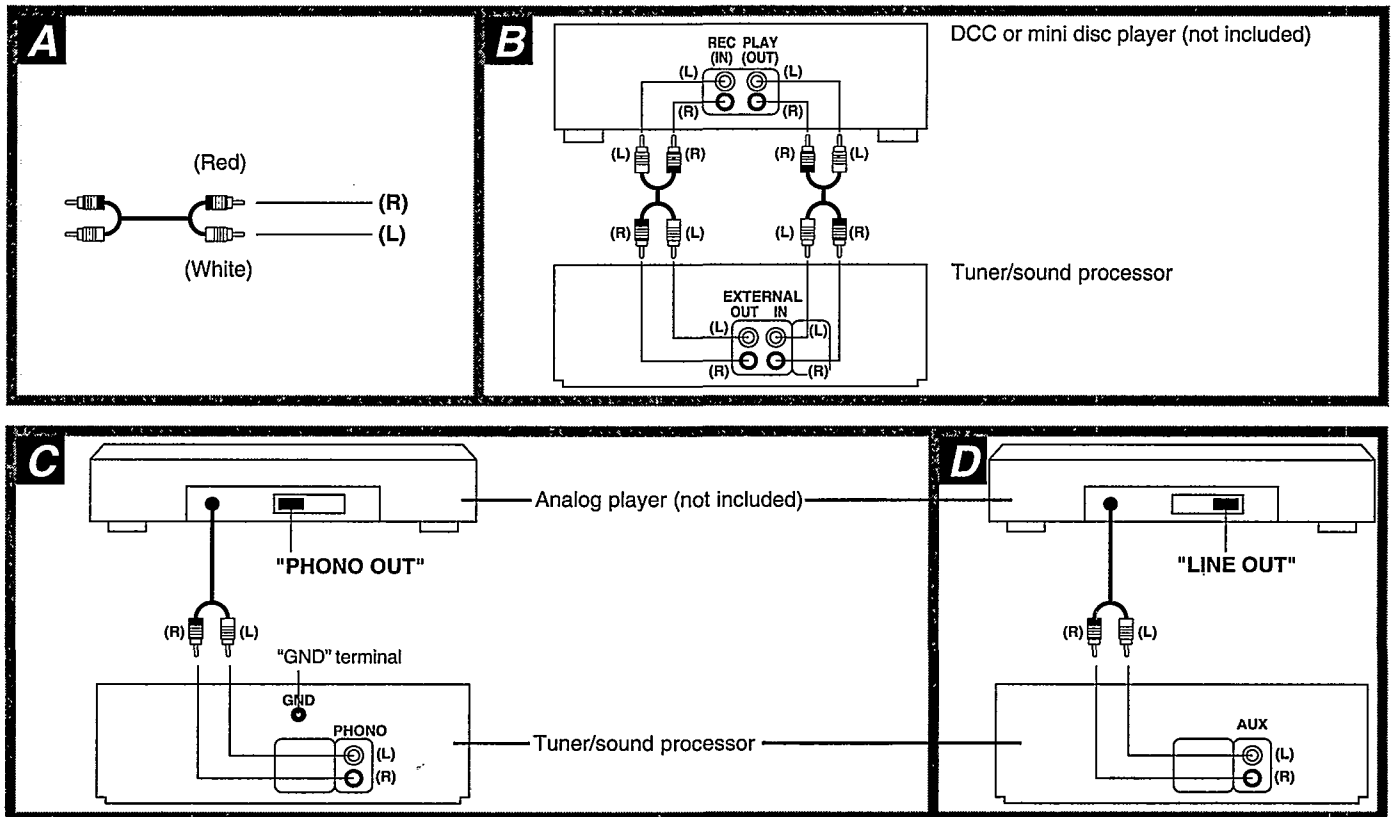

An outdoor antenna may be required in a mountainous region, or if this system is located inside a reinforced-concrete building, etc.

Connect the outdoor antenna without removing the AM loop antenna.

Run 5 to 12 m of vinyl-covered wire horizontally along a window or other convenient location.

For areas except Continental Europe: **D**

External Unit Connection

- For details, refer to the operating instructions of the units which are to be connected.
- When units other than those described below are to be connected, please consult with your audio dealer.

Connecting the stereo connection cable (not included) **A**

Connect the red plug to the right (R) connector.
Connect the white plug to the left (L) connector.

DCC (digital compact cassette deck) or mini disc player **B**

Analog player

This example shows how to connect the analog player with the PHONO OUT/LINE OUT switch.

For Continental Europe: **C**

"GND" terminal is for a ground wire use.

Set to the PHONO OUT position at the back of the analog player.

For others: **D**

Only an analog player with a built-in phono equalizer can be connected.

Set to the LINE OUT position at the back of the analog player.

Location of Controls

① Power "STANDBY" switch (POWER, STANDBY)

Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.

② Standby indicator (STANDBY)

When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.

③ Volume control (VOLUME)

④ Source direct indicator (SOURCE DIRECT)

⑤ Source direct button (SOURCE DIRECT)

⑥ EQ SPACE/flat button (EQ SPACE/FLAT)

⑦ V. bass button (V. BASS)

⑧ Headphones jack (PHONES) (ϕ 3.5, 32 Ω)

⑨ Microphone jack (MIC) (ϕ 6.3, 600 Ω)

⑩ Microphone volume control (MIC VOL)

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Illustrated screws are equivalent to actual size.
5. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

• Checking Procedures for each P.C.B.	Page.
1. Checking for the operation P.C.B..	9.
2. Checking for the main P.C.B..	10.
• Main Component Replacement Procedures	
1. Replacement for the power IC and regulator transistor.	10.

■ Checking Procedure for each P.C.B.

1. Checking for the operation P.C.B.

Step 2
b

Step 3
Remove the cabinet.

Step 1
a × 4

Step 5
Pull out the front panel ass'y.

Step 4
c × 2

• Check the operation P.C.B. as shown below.

Operation P.C.B.

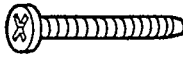

a
[RHD30007-K1] (Black)

b
[XTBS3+10JFZ1] (Black)

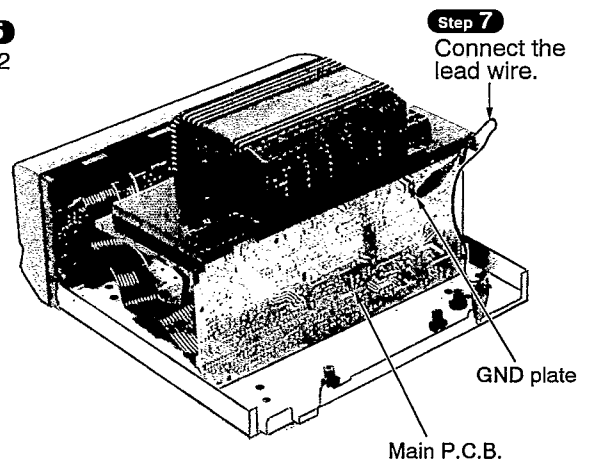

c
[XTBS3+8JFZ1] (Black)

2. Checking for the main P.C.B.

-  a
[RHD30007-K1] (Black)
-  b
[XTBS3+10JFZ1] (Black)
-  c
[XTB3+20JFZ] (Black)
-  d
[XTB3+10JFZ] (Black)

• Check the main P.C.B. as shown below.

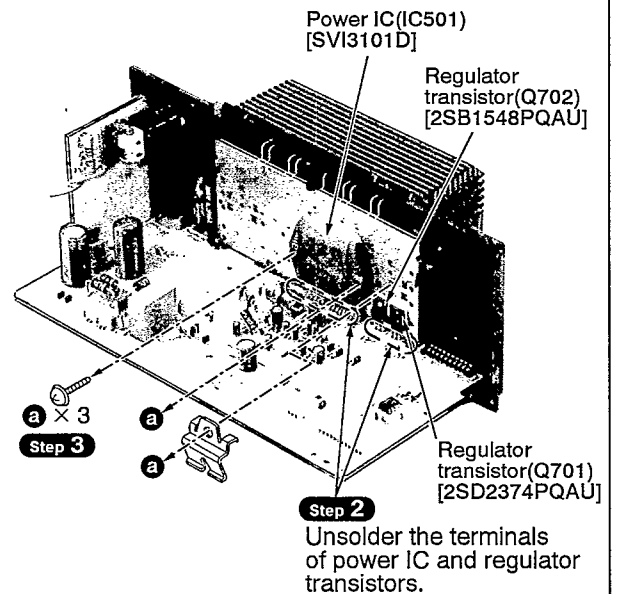

■ Main Component Replacement Procedures

1. Replacement for the power IC and regulator transistor

NOTE

When mounting the power IC or regulator transistor, apply silicone compound (RFKX0002) to the rear side of power IC or regulator transistors.

• Follow the item 2 (Step 1 ~ Step 6) checking procedures for each P.C.B..

■ Power Source ON/OFF of This Unit

1. Connect the AC power cord of this unit to an AC outlet and turn it on.
(This unit comes to stand-by mode.)
2. Make test point **TP701** short as shown in Fig. 1.
POWER indicator lights and this unit comes to power ON mode.

Operation Check

1. Set this unit to power ON mode.
2. Input a signal (1 kHz, 100 mV) to the section between the jumper **J603** (LINE IN for L-ch) and the jumper **J308** (LINE IN GND) as well as the section between the jumper **J604** (LINE IN R-ch) and the jumper **J308**.
3. Connect the speaker to the speaker terminals and check if it sounds from the speaker.

A OPERATION CIRCUIT	12
B MAIN CIRCUIT	12, 13
C POWER TRANSFORMER CIRCUIT	13
D AC IN TERMINAL CIRCUIT	13

- This schematic diagram may be modified at any time with the development of new technology.

Notes:

- **S601** : Power "STANDBY ϕ /ON" switch (POWER STANDBY ϕ /ON)
- **S606** : SOURCE DIRECT switch
- **S607** : EQ SPACE/FLAT switch
- **S608** : V. BASS switch
- **VR401** : Microphone volume control (MIC VOLUME)
- **VR601** : Volume control (VOL)

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
No mark: Power ON

Important safety notice:

Components identified by \triangle mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

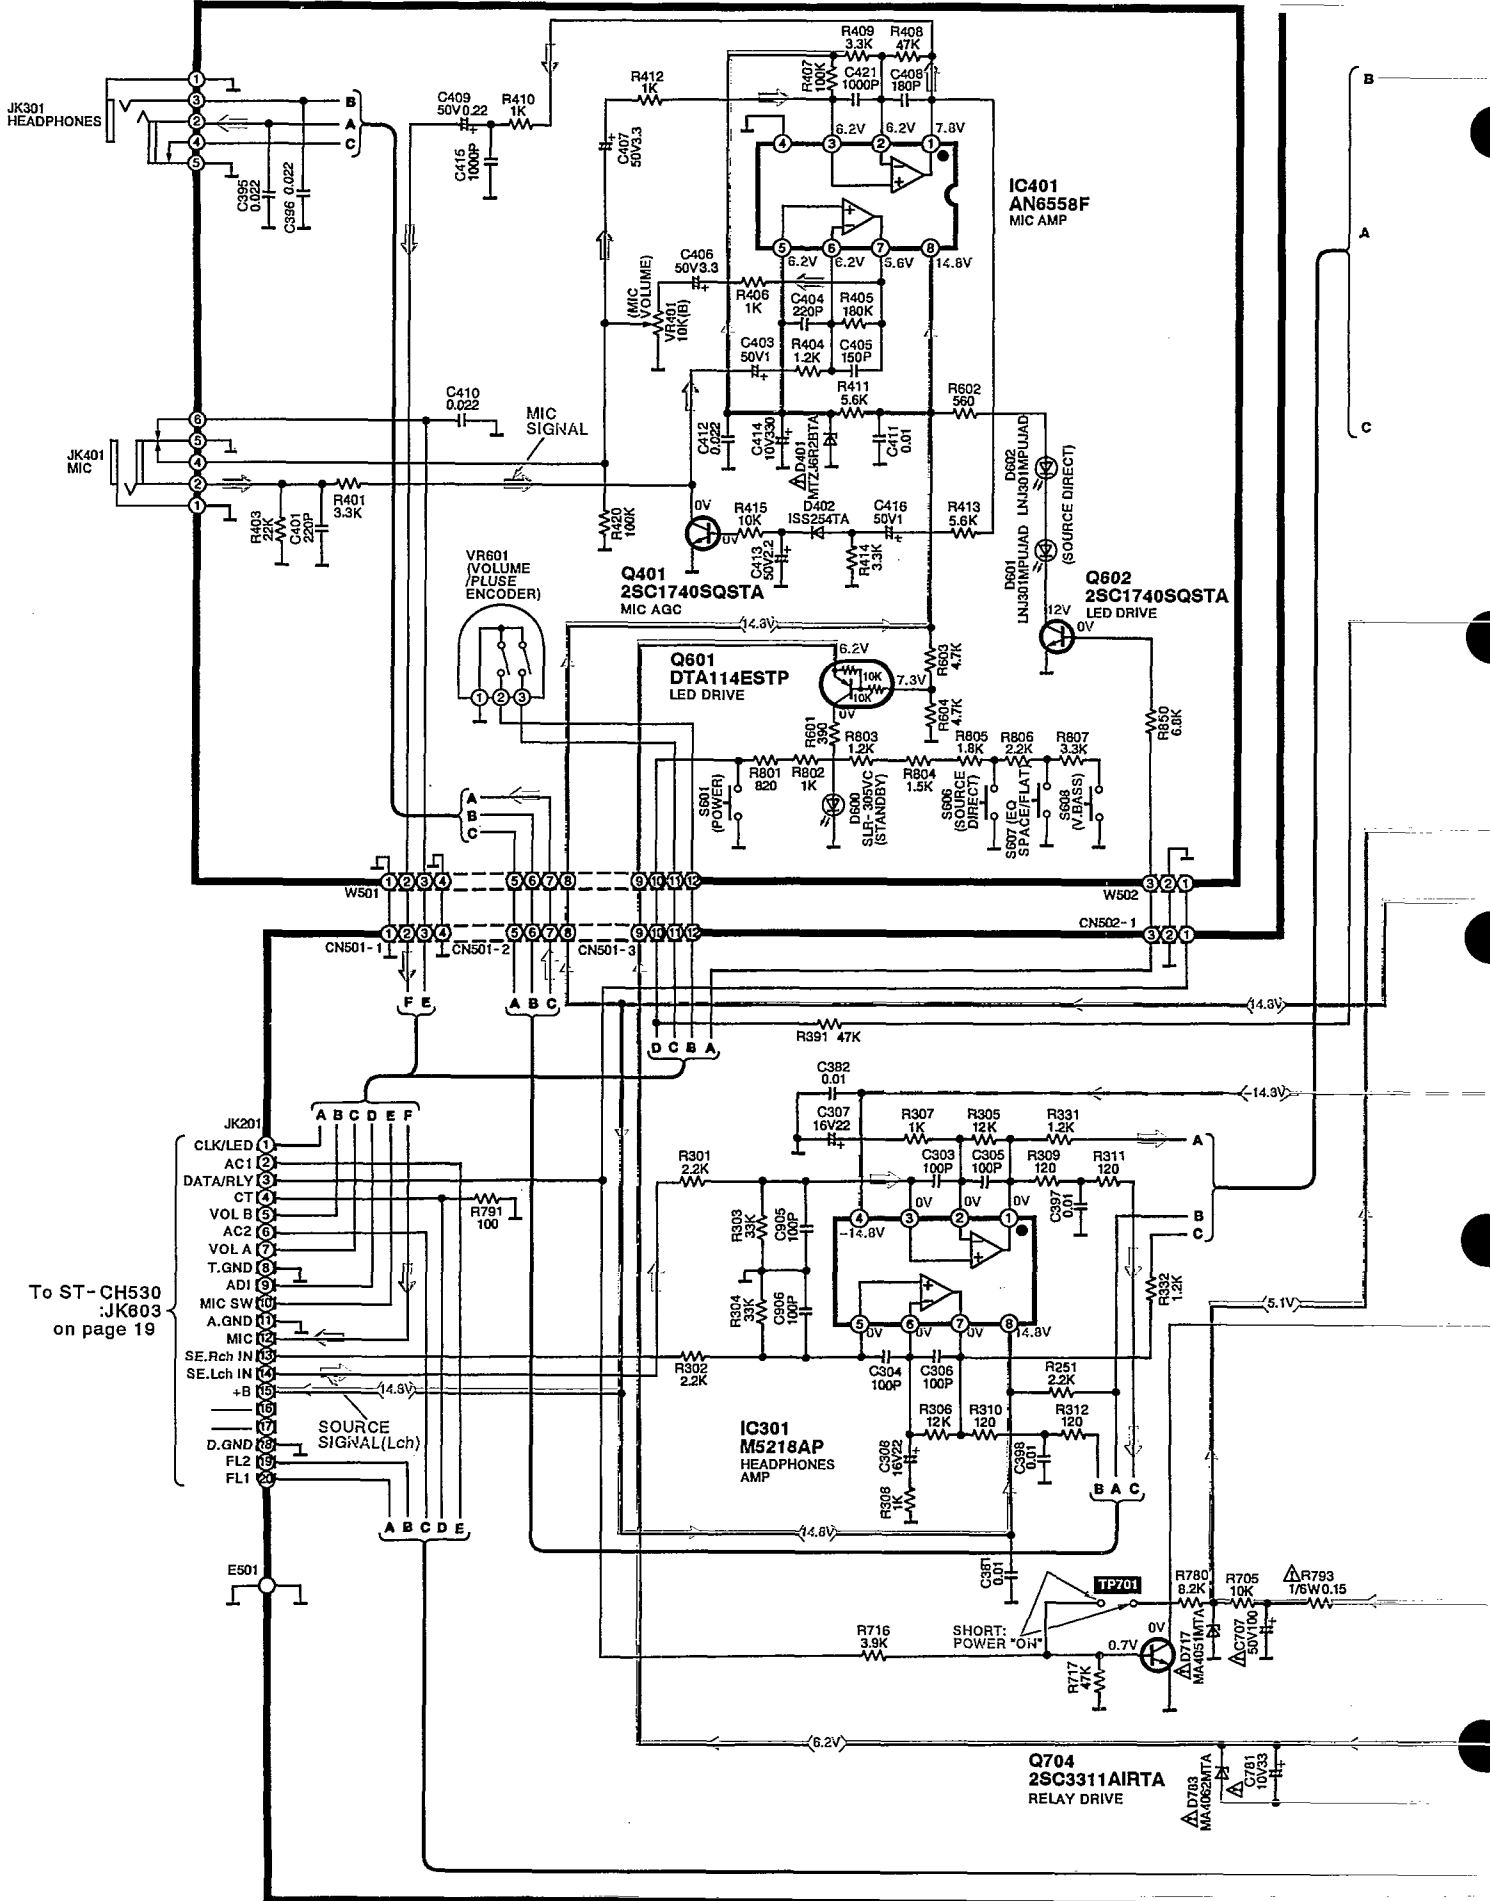

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

*Remote Control Ass'y: Supply period for three years from termination of production.

*The "(SF)" mark denotes the standard part.

*<VRD>: indicates parts that are supplied by Video Recorder Division.
