ORDER NO. MD9707066A8

Service Manual

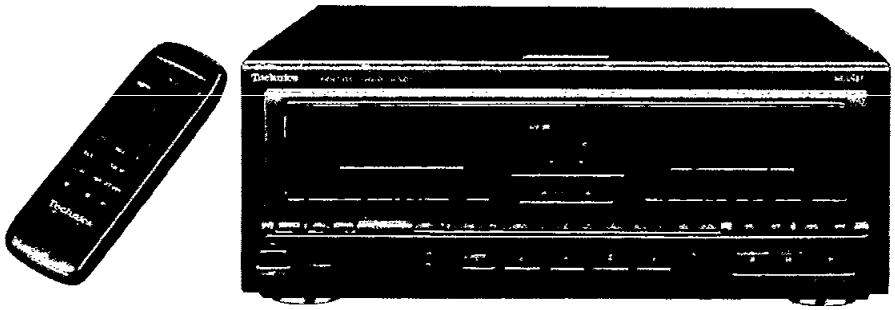
COMPACT disc DIGITAL AUDIO

MASH※ multi-stage noise shaping

※ • MASH is a trademark of NTT.

Compact Disc Changer

SL-MC410



Colour (K) .... Black Type

Areas

E ..... Europe.
EB ..... Great Britain.
EG ..... Germany and Italy.
GC ..... Asia, Latin America, Middle Near East and Africa.
GN ..... Oceania.

Traverse Deck: RAE0150Z Mechanism Series

Please file and use this manual together with the service manual for Model No. SL-MC410(P), Order No. MD9706050C1.

Note: • This simplified service manual is provided to indicate the main differences between the original model No. SL-MC410(P) and the subsequent model No. SL-MC410(E,EB,EG,GC,GN).
• Refer to Spcifications, Schamatic Diagram, Printed Circuit Board Diagram, Replacement Parts List, Cabinet Parts Location and Packing of this service manual.

CHANGES

Specifications (SL-MC410 Service Manual of cover page.)

■ AUDIO

No. of channels	2 (left and right, stereo)
Frequency response	2–20,000 Hz, ±1 dB
Output voltage	2 V (at 0 dB)
Dynamic range	92 dB
S/N	100 dB
Harmonic distortion	0.007% (1 kHz, 0 dB)
Wow and flutter	Below measurable limit
DA converter	※ MASH (1 bit)
Output impedance	Approx.1 kΩ
Load impedance	More than 10 kΩ

■ PICKUP

Wavelength	780 nm

■ GENERAL

Power consumption	
For continental Europe	14 W
For others	17 W
Power supply	
For continental Europe and Australia	AC 230-240V, 50/60 Hz
For others	AC 110V/127V/220V230-240, 50/60 Hz
Dimensions (W × H × D)	430 × 170 × 387 mm (16-15/16" × 6-11/16" × 15-1/4")
Weight	7.0 kg (15.4 lb.)

Note:
Specifications are subject to change without notice.
Weight and dimensions are approximate.

⚠WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Technics®

■ Precaution of Laser Diode

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.
Wave length: 780 nm
Maximum output radiation power from pickup: 100 μW/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

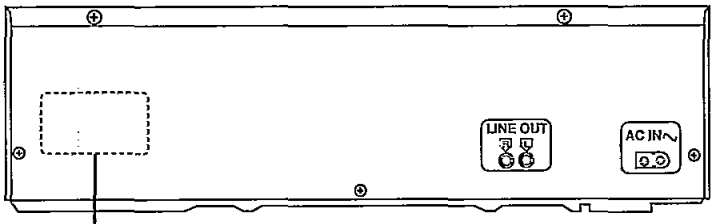
ACHTUNG: Dieses Produkt enthält eine Laserdiode. Im eingeschalteten Zustand wird unsichtbare Leserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 780 nm
Maximale Strahlungsleistung der Lasereinheit: 100 μW/VDE

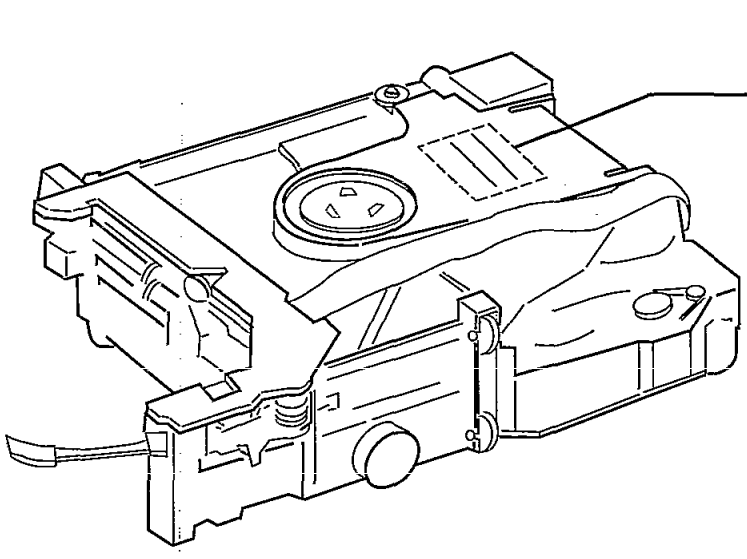
Die Strahlung an der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinhit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlines blicken.
4. Nicht über längere Zeit in die Fokussierlines blicken.

ADVARSEL: I dette a apparat anvendes laser.



CLASS 1
LASER PRODUCT



DANGER	INVISIBLE LASER RADIATION WHEN OPEN. AVOID DIRECT EXPOSURE TO BEAM.
ADVARSEL	USYNLIG LASERSTRÅLING VED ÅBNING, NÅR SIKKERHEDSAFBRYDERE ER UDE AF FUNKTION. UNDGÅ UDSÆTTELSE FOR STRÅLING.
VARO!	AVATTAESSA JA SUOJALUKITUS OHITETTAESSA OLET ALTTIINA NÄKYMÄTÖNTÄ LASERSÄTEILYLLE. ÄLÄ KATSO SÄTEESEEN.
VARNING	OSYNLIG LASERSTRÅLNING NÄR DENNA DEL ÄR ÖPPNAD OCH SPÄRREN ÄR URKOPPLAD. BETRAKTA EJ STRÅLEN.
ADVARSEL	USYNLIG LASERSTRÅLING NÅR DEKSEL ÅPNES OG SIKKERHEDSLÅS BRYTES. UNNGÅ EKSPONERING FOR STRÅLEN.
VORSICHT	UNSICHTBARE LASERSTRAHLUNG WENN ABDECKUNG GEÖFFNET. NICHT DEM STRAHL AUSSETZEN. RQLS0120

■ Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

* No sound is heard when the power is switched ON.
* Sound stops during a performance.

The function of this circuitry is prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if
speaker systems with an impedance less than the indicated rated impedance of this unit are used.
If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:
When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

[For (EB) area only.]

For your safety, please read the following text carefully.

This applicance is supplied with a moulded three pin mains plug for your safety and convenience.
Ad 5-ampere fuse is fitted in this plug.
Should the fuse need to be replace please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.
Check for the ASTAd mark ⓐ or the BSI mark ⓚ on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local dealer.

CAUTION!
IF THE FITTED MOULDED PLUG IS UNSUITABLED FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFETY.
THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.
If in any doubt please consult a qualified electrician.

IMPORTANT
The wire in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

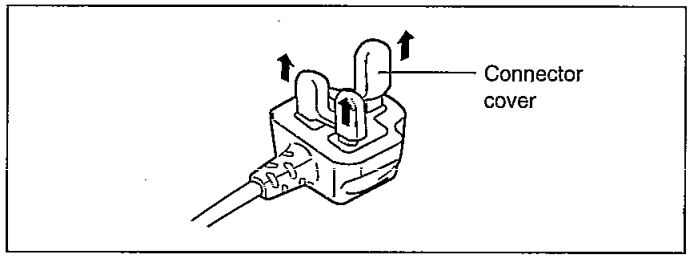
As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

This apparatus was produced to BS 800.

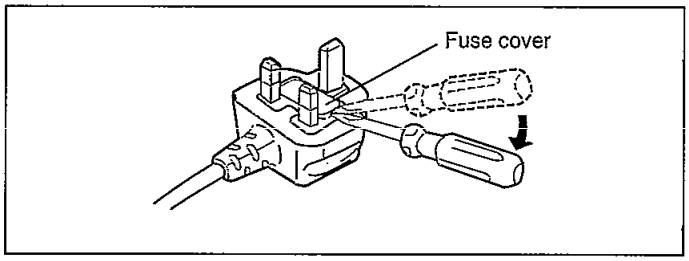
The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol ⏚ .

Before use
Removal the connector cover as follows.



How to replace the fuse
1. Remove the fuse cover with a screwdriver.



2. Replace the fuse and attach the fuse cover.

- **S701:** Rest detector.

- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis.
  Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.
  * The parenthesized are the values of voltage generated during playing (Test disc 1 kHz, L+R, 0 dB) ,others are voltage values in stop mode.
  * AC adaptor is used for power supply.

- : Signal lines.
  : Positive voltage lines and negative voltage lines.
  ⟹ : Audio signal lines.
- Important safety notice:
  Components identified by ⚠ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

Caution!

IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

■ Replacement Parts List (Packing, Accessories, Grease or Jig/Tool)

Notes: * Important safety notice:
Components identified by ⚠ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
* Warning: This product uses a laser diode. Refer to caution statements on page 2.
* ACHTUNG: Die lasereinheit nicht zerlegen.
Die lasereinheit darf nur gegen eine vom hersteller spezifizierte einheit ausgetauscht werden.
* [M] indicates in Remarks columns parts that are supplied by MESA.

■ Precautions

Cautions on moving this unit

Before moving the changer to another location, be sure to remove all discs from the slots and turn off the changer.

Failure to do so will expose the compact discs and the changer to the risk of severe damage.

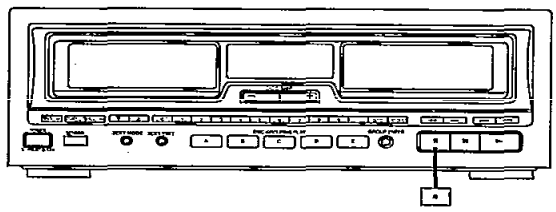
CAUTION

The changer mechanism automatically locks when power is turned off, to protect it against damage in transport. Therefore, always press POWER and make sure "OFF" appears on the display before you unplug the changer.

Other cautions

Outside light or noise may sometimes cause the changer to detect a disc when there isn't one. However, the changer always correctly detects the disc when in the play mode no matter what.

Do not leave the front panel open. Infiltrating dust or other matter may lead to damage or malfunctions.



When getting service

Before bringing in your changer for service, be sure to remove all discs first.

If the disc in play doesn't return to its slot when you press ■, hold the button down for about 4 seconds. The disc should return to the slot.

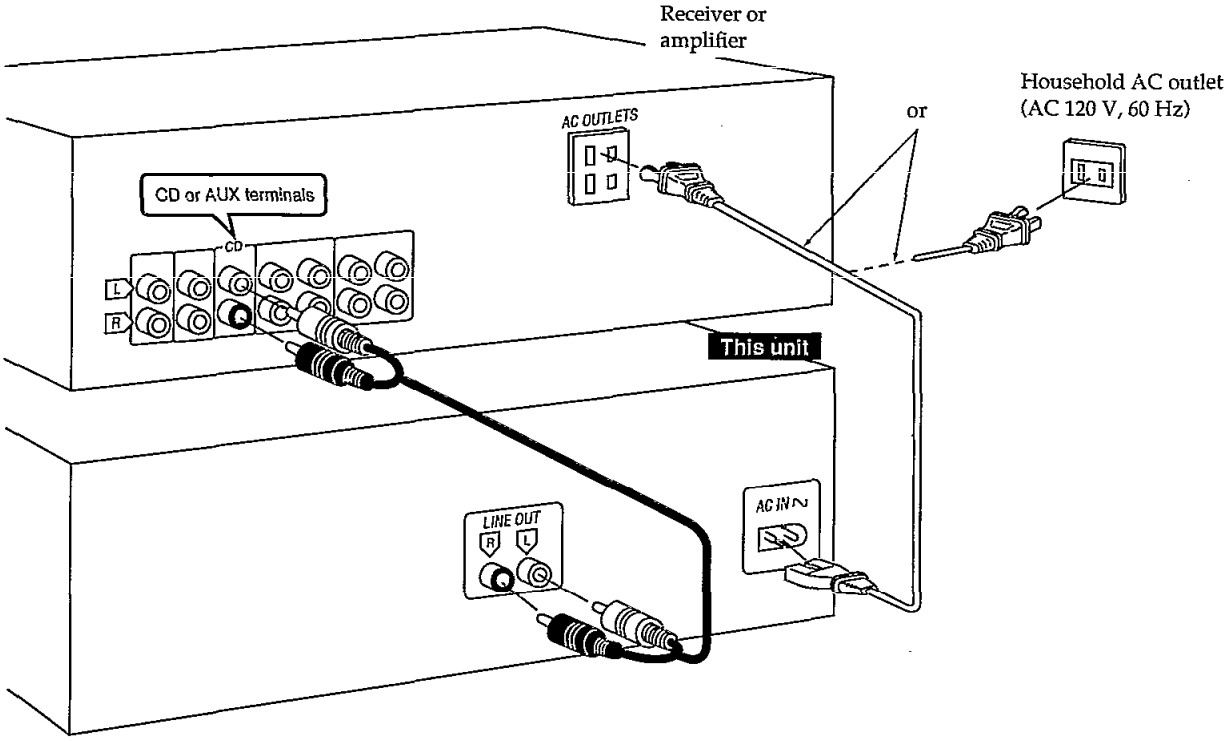
■ Connections

Note

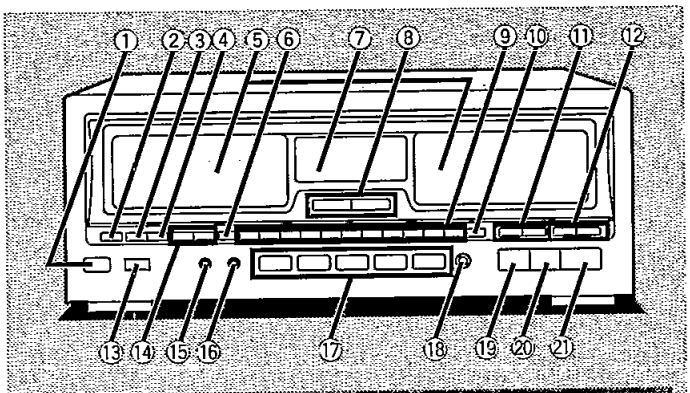
- Set the changer on a flat, level surface.
- Before connecting the changer to your audio system, make sure that the power of the changer and all other system components is turned off.

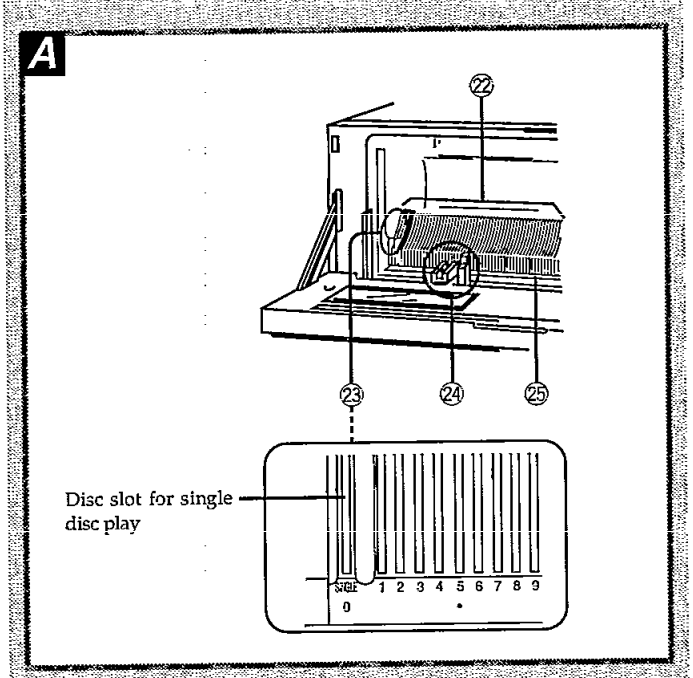
Stereo connection cable

White (L)
Red (R)



■ Front Panel Control





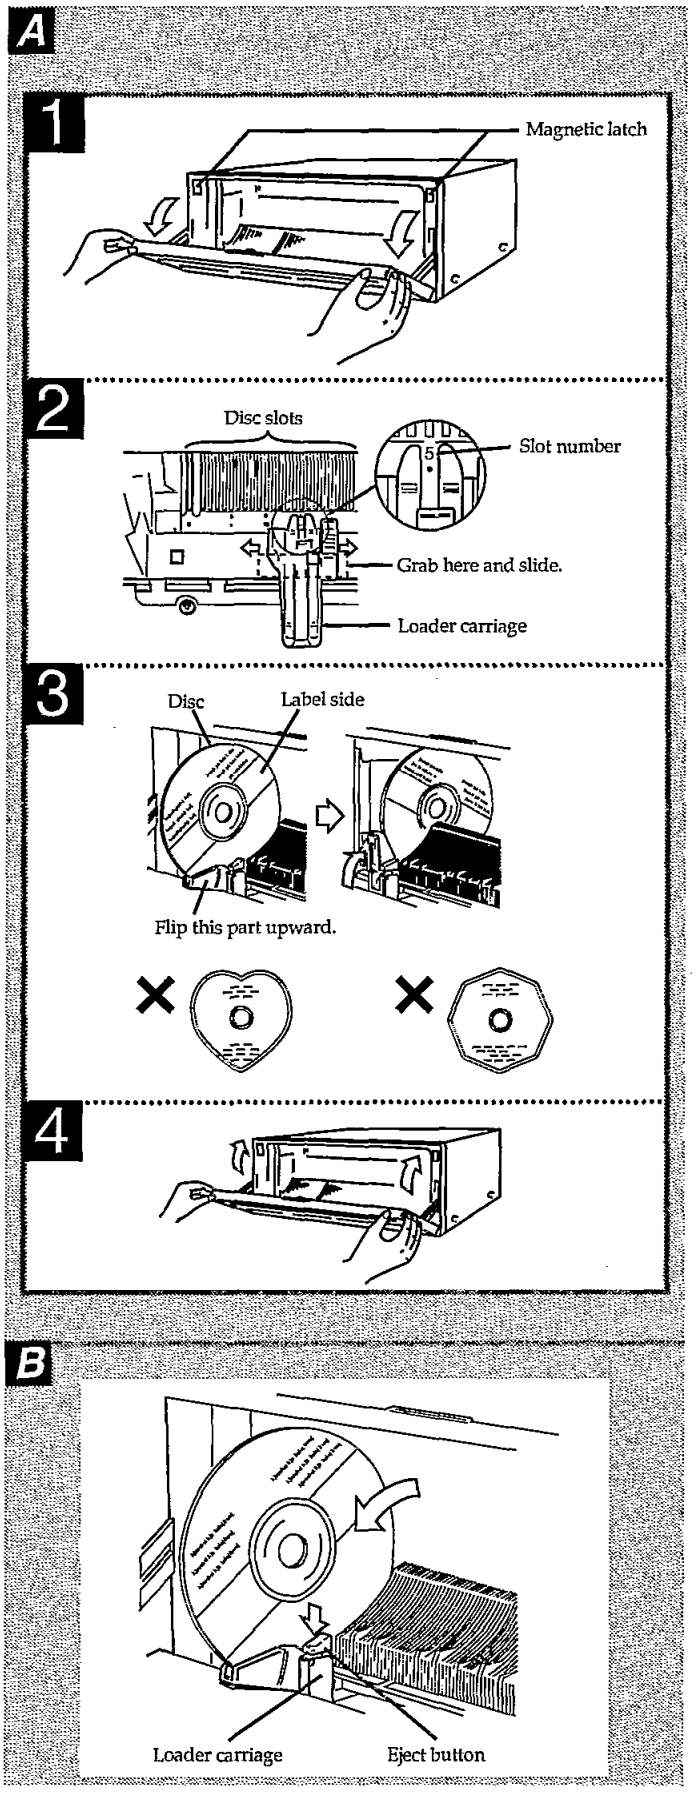
① **Power "STANDBY ⏻/ON" switch (POWER, STANDBY ⏻/ON)**
Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
② **Single disc play button (SINGLE ▶)**
③ **Direct programming button (DIRECT)**
④ **Programming button (PROGRAM)**
⑤ **Windows**
⑥ **Disc selector button (DISC)**
⑦ **Display**
⑧ **Disc skip buttons (DISC SKIP, –, +)**
⑨ **Numeric buttons (1-9, 0, ≥10)**
⑩ **Disc enter button (DISC ENTER)**
⑪ **Search/Text character select buttons (◀◀ , ▶▶ , SEARCH/CHARACTER)**
⑫ **Track skip/Text cursor removal buttons (|◀◀ , ▶▶|, SKIP/CURSOR)**
⑬ **Remote control signal sensor (SENSOR)**
⑭ **Text search buttons (▼, ▲)**
⑮ **Text mode button (TEXT MODE)**
⑯ **Text edit button (TEXT EDIT)**
⑰ **Disc group buttons (DISC GROUPING PLAY, A, B, C, D, E)**
⑱ **Group enter button (GROUP ENTER)**
⑲ **Stop button (■)**
⑳ **Pause button (❚❚)**
㉑ **Play button (▶)**

Disc slot section A

For an explanation on how to open the front panel, see page 7 "How to set discs".

㉒ **Disc slots**
㉓ **Disc slot for single disc play (SINGLE)**
㉔ **Loader carriage**
㉕ **Slot numbers**

■ Setting / Removing Discs



How to set discs A

1 **Pulling gently from both ends, open the front panel.**

Caution

- Except when setting or removing discs, keep hands out of the changer while open. You could injure yourself if somehow entangled in the internal mechanism.
- Keep cassette tapes away from the magnetic latches.

2 **Slide the loader carriage to the desired slot No. to insert a disc.**

Note

Slot No. 0 (SINGLE) is reserved for single disc play.

3 **Set the disc on the loader and flip the loader upwards.**

Caution

- Do not use 3" (8 cm) discs fitted with expander rings. Expander rings could damage the disc slots.
- Do not use cleaning discs or warped discs. All of these could damage your changer.
- Do not use discs with poorly attached labels or stickers. Adhesive protruding from peeled off stickers can cause the changer to malfunction.
- Do not put anything other than discs in the changer.
- Do not use irregular shape CDs (heart-shape, octagonal, etc.).

4 **Close the front panel gently.**

Note

If you leave the front panel open while a disc is in play, when the disc is over, the changer will stop.

How to remove discs B

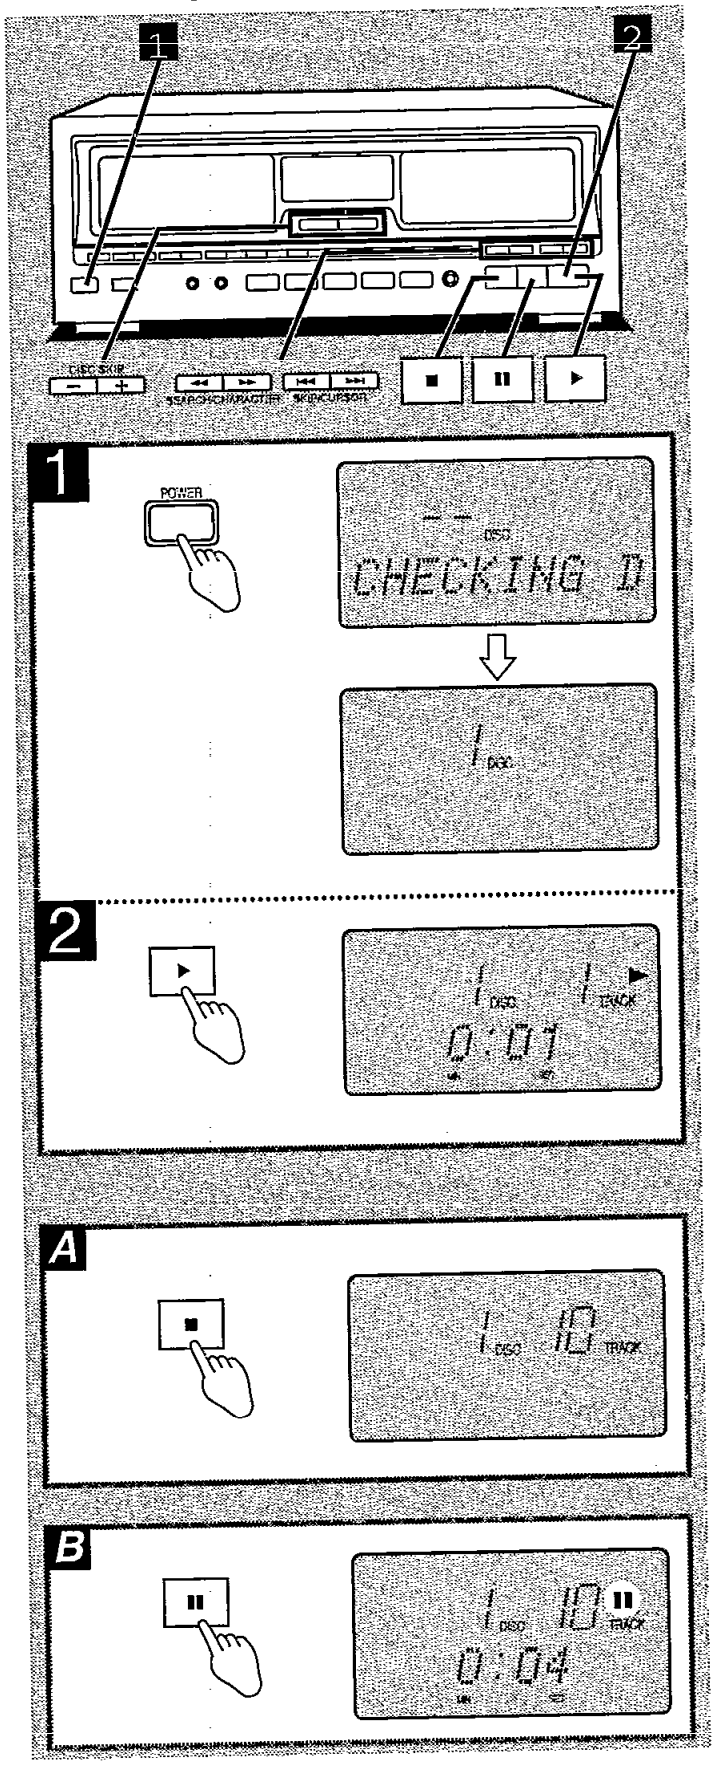
1. **Open the front panel.**
2. **Slide the loader carriage to the slot you want.**
3. **Press the eject button on the loader carriage.**

Special notes

You can set discs in the slots and remove them too, while playing discs.

- Do not set a disc in the slot of the disc being played (slot flashes). The disc in play is returned to its slot when finished. If two discs somehow jam in a slot, one or both could be damaged. When this happens, the message "TAKE OUT" will appear on the display. Remove the disc that doesn't belong in the slot and press the stop button.
- Do not open the front panel while the changer is changing discs.
- Sometimes the front panel cannot be opened while a disc is playing. It is a question of time. In such case, wait until you can open it.

■ Basic Operations



Sequential play

The changer plays all the tracks on all the discs in order and stops automatically when the last track on the last disc finishes playing.

Before starting, load your discs.

1 **Press POWER.**
The unit will switch on.
Momentarily, the message "CHECKING DISCS" will appear on the display.
When it goes out, the last disc played will be displayed.

2 **Press ▶.**
Play will begin.

The "▶" indication will illuminate.
The disc number, the track number and the elapsed play time will be displayed.
The disc number is the same as the slot number.

To search for the desired position	◀◀ ▶▶ SEARCH/CHARACTER
To skip tracks	⏮ ⏭ SKIP/CURSOR
To skip discs	DISC SKIP − +

To stop play A

Press ■.
The disc number and the total number of tracks of the current disc will be displayed.

The total playing time displayed includes the silent sections between tracks. For this reason, it may be a few seconds longer than the playing time indicated on the disc.
When you open the front panel, the total number of tracks and the total playing time go out.

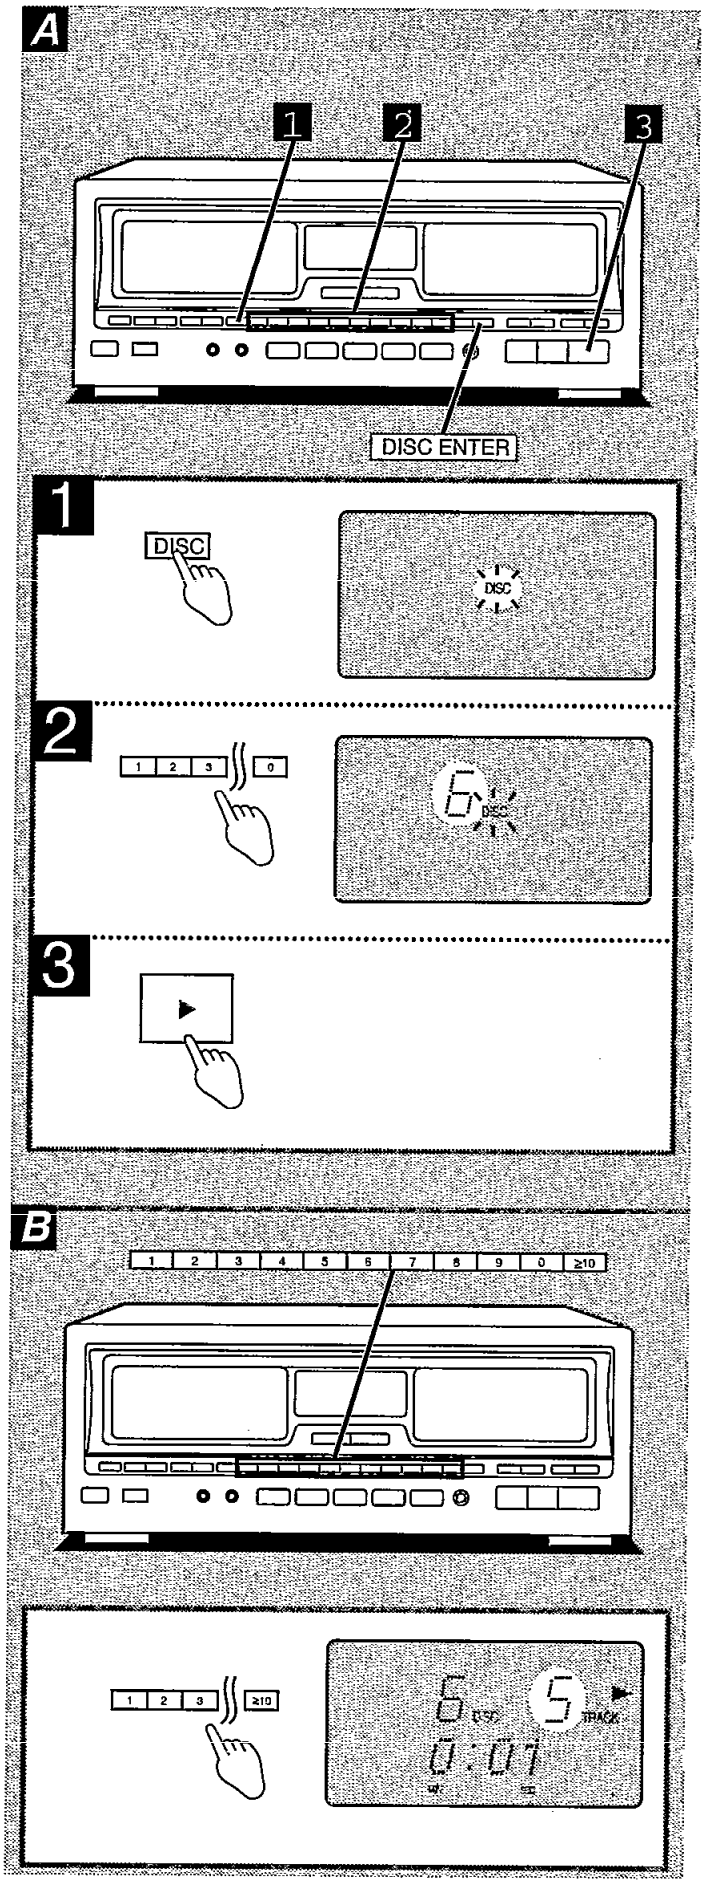
Press ▶ to re-start play.

Note
It takes roughly 3 seconds from the time you press ■ until the disc is returned to the slot.

To temporarily stop play B

Press ❚❚.

Press ▶ to resume play.



To directly access a specific disc A

1 **Press DISC.**

2 [Within 7 seconds]
Select the disc you want with the numeric buttons.

To select a disc from 1 to 9
For example: "6"
[6]
To select a disc from 10 to 110
For example: "19"
[1] → [9]
Push the buttons within 7 seconds of each other.

Note
When selecting discs, the ≥10 button does not respond to touch.

3 [Within 7 seconds]
Press ▶.
The changer will start playing the selected disc from the first track.

For your reference

- If you press DISC ENTER instead of ▶ to select a disc, the disc number will be displayed but play will not start automatically.
- When in the stop mode, if you select an empty slot, the message "NO DISC" will appear on the display.
- While a disc is playing, if you select an empty slot, the changer will automatically play the next disc available.
- If you select "0", the changer will switch to the single disc play mode.

To directly access a specific track B

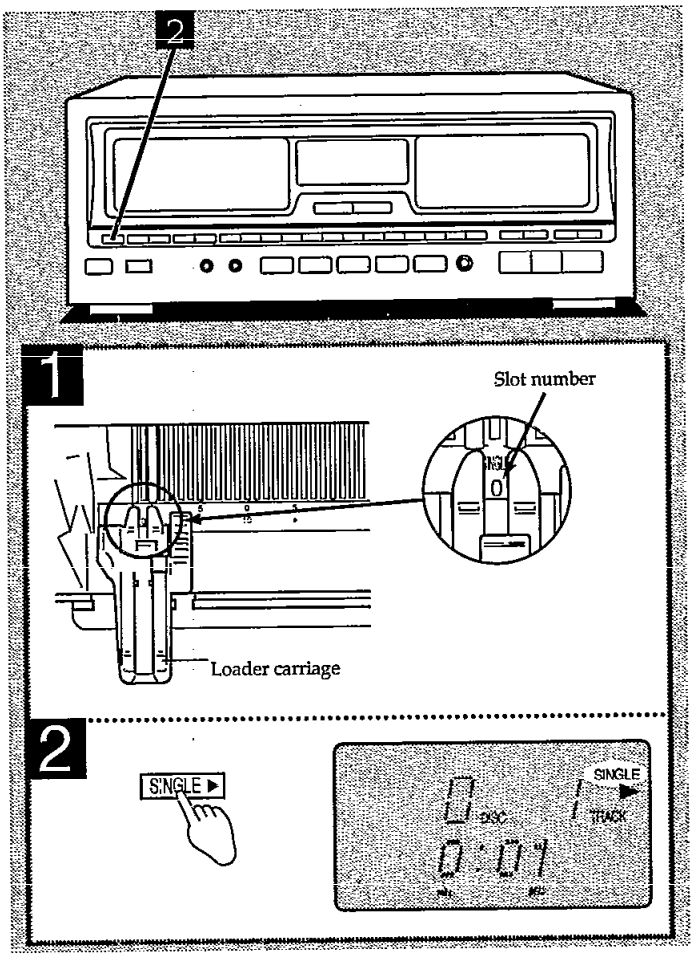
After selecting a disc, select a track with the numeric buttons.

Press the numeric button(s) to select the track.
Play will begin from the selected track.

To select a track from 1 to 9
For example: "6"
[6]

To select a two-digit track number 10 or higher
For example: "19"
[≥10] → [1] → [9]
Push the buttons within 7 seconds of each other.

■ Single Disc Play



Single disc play is convenient when wanting to playback a specific disc right away, without going through the usual selection procedure, for example, to listen to a disc you just bought.

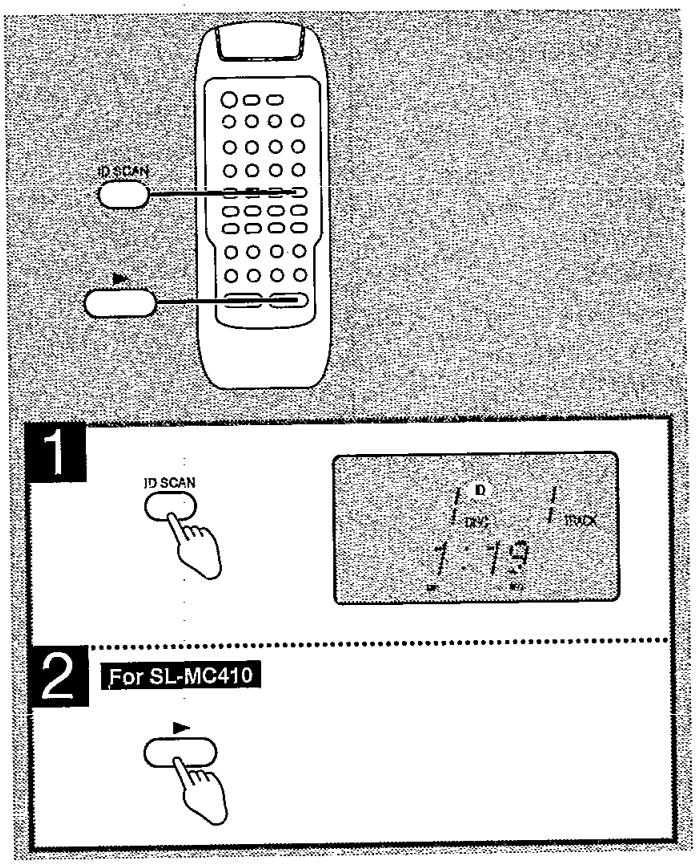
1 **Open the front panel, and set the disc in the slot No. 0.**
Face the disc label to the right and flip the loader upwards to set the disc.

2 **Close the front panel and press SINGLE ▶.**

The changer plays all the tracks in order and stops automatically when the last track finishes playing.

To cancel single disc play mode

- Select another disc with the numeric buttons.
- Skip to another disc with DISK SKIP (– or +).
- Select a group.



(Only available from the remote control.)

This function is convenient to use when searching for a desired track.
The function will search from the beginning of the track for a loud section, and will play 10 seconds of the track centering around that point.
The order of scanning is the same as for play mode.

1 **Press ID SCAN.**
ID scan will start.

2 [When the desired track has been found]
Press ▶.
The changer will play the track from the beginning.

To cancel ID scan

Press ID SCAN while this function is in operation.
The "ID" indicator will go out.

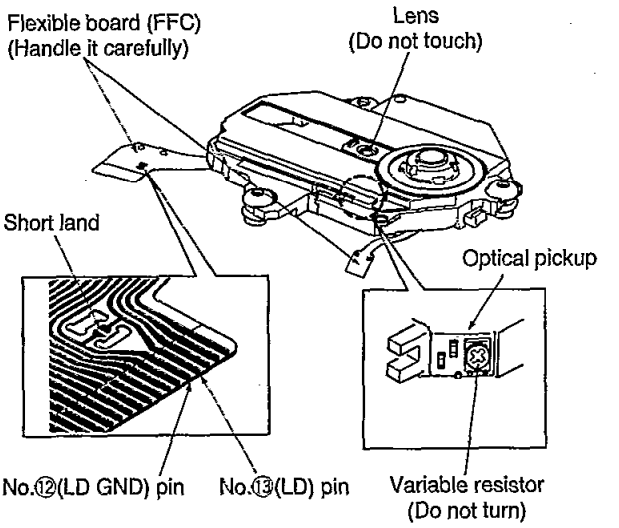
The changer will continue to play from the track being played.

■ Handling Precautions for Traverse Deck

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body.
So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

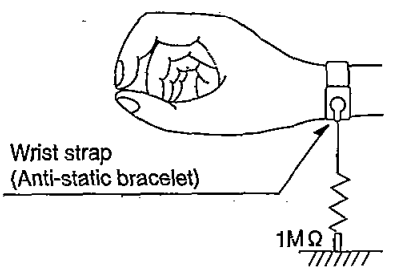
• Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. The short land between the No.⑫ (LD GND) and No. ⑬ (LD) pins on the flexible board (FFC) is shorted with a solder build-up to prevent damage to the laser diode.
   To connect to the PC board, be sure to open by removing the solder build-up, and finish the work quickly.
3. Take care not to apply excessive stress to the flexible board (FFC).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

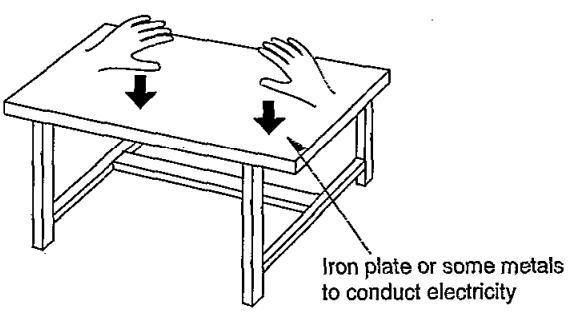


• Grounding for electrostatic breakdown prevention

1. Human body grounding
   Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
   Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

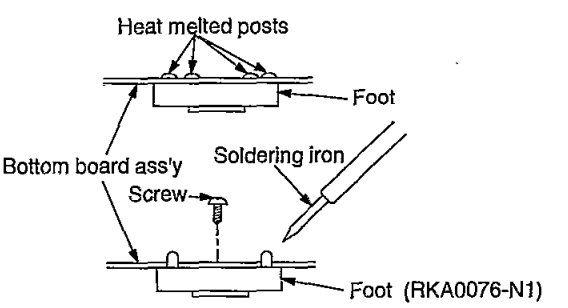


Caution:
The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).



■ REPLACEMENT OF THE FOOT

1. Remove the 4 heat melted posts on the Bottom board ass'y with a pair of nippers or similar tool.
2. To replace the foot (RKA0053-A) on the Bottom board ass'y melt the 4 posts with a soldering iron or install it with a screw (XTB3+6J).



■ Self-Diagnosis Mode

Self-diagnosis mode list

Mode	Procedure	Content	Use	Page
FL display mode	Turn ON power button with no disc loaded. ↓ Press the following 3 buttons simultaneously: PLAY(►),STOP(■),TRACK SKIP(⏮) ↓ FL all unlit ↓ Press DISC button ↓ Press specified button ↓ FL all lit	FL all unlit / all lit	Enables checking of whether FL and each SW are okay or not, before set disassembly.	P11
Mechanical mode	Turn ON power button with no disc loaded. ↓ Hold down the STOP (■) button for at least 2 seconds. ↓ Simultaneously press the TRACK SKIP (⏭) button for at least 2 seconds,while holding down the STOP (■) button. ↓ C (Appears on display)	Displays defective points while performing a series of mechanism operations. C F-15: PU rest SW etc. C F-27: Slide drive system C F-28/ C F-29: Loading system F26: Main IC defect (Automatically displayed when power is turned ON, regardless of mode setting.)	Enables fault to be diagnosed, before set disassembly.	P12 ~ P14
Test mode	Turn OFF power button once, with no disc loaded. ↓ Turn ON power while simultaneously holding down the following button: PLAY(►), STOP(■) ↓ TEST MODE (Appears on display) → Press A button → Press B button Mount disc in single (slot 0) position. → Press C button	A button: Results in independent operation of traverse deck.	Use to check correct operation after disassembly.	P15
		B button: Repeats loading / unloading operation.	Use to check correct operation after repair.	P16
		C button: Automatically repeats loading / unloading / slide operation.		P17
Servo adjustment mode	After mounting disc in slot, turn OFF power button once. ↓ Turn ON power while simultaneously pressing the following three buttons: PLAY(►),PAUSE(⏸),STOP(■) ↓ Press the PLAY(►) button.	Displays servo circuit status on FL. F T C	Enables checking of servo status. * F = Focus servo * T = Tracking servo * C = CLV servo	P18 • P19

Before set disassembly

Before set disassembly, perform **Self-diagnosis** (FL display mode and Mechanical mode) and **CD basic operation checking**, and develope an idea of the cause of the problem.

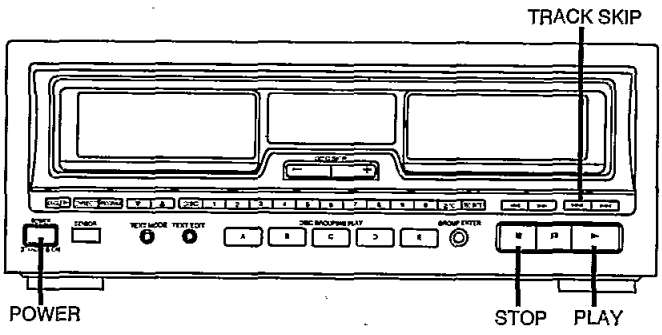
Self-diagnosis FL display mode

FL all unlit test

Press POWER with no disc loaded.

Press STOP(■),PLAY(▶),TRACK SKIP(◀◀) simultaneously.

FL is all unlit.

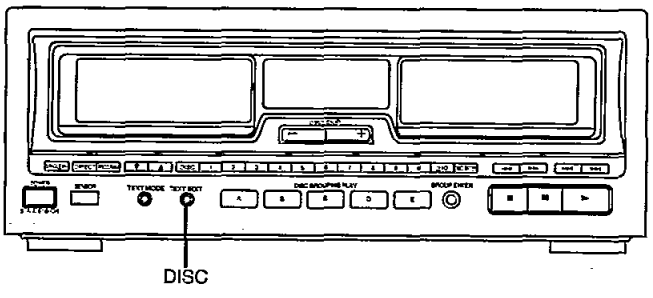


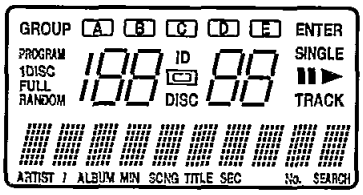
Previous display remains unchanged:
* Check switches(■ , ▶, ◀◀).
Characters remain displayed:
* Check the grid of the characters.

FL all lit test

Press DISC (FL remains all unlit)

Press all buttons except STOP(■), PAUSE(▮▮), PLAY(▶), SEARCH(◀◀, ▶▶), DISC, DISC ENTER and POWER.





Result	Handling
All lit	Normal (Pressed button and FL normal)
All remain unlit	Check all buttons pressed above
Missing letters	Check grid of missing letters

Cancellation

- Press STOP(■) or turn OFF/ON power button.

Self-diagnosis Mechanical mode

Setting

Turn ON the power button with no disc loaded.

↓

Loading unit moves to the right and left, and system reverts to standby mode.

↓

Hold down the STOP(■) button for at least 2 seconds.

↓

Simultaneously press the TRACK SKIP(▶▶|) button for at least 2 seconds, while holding down the STOP(■) button.

↓

"C" appears on display

↓

Self-diagnosis starts automatically

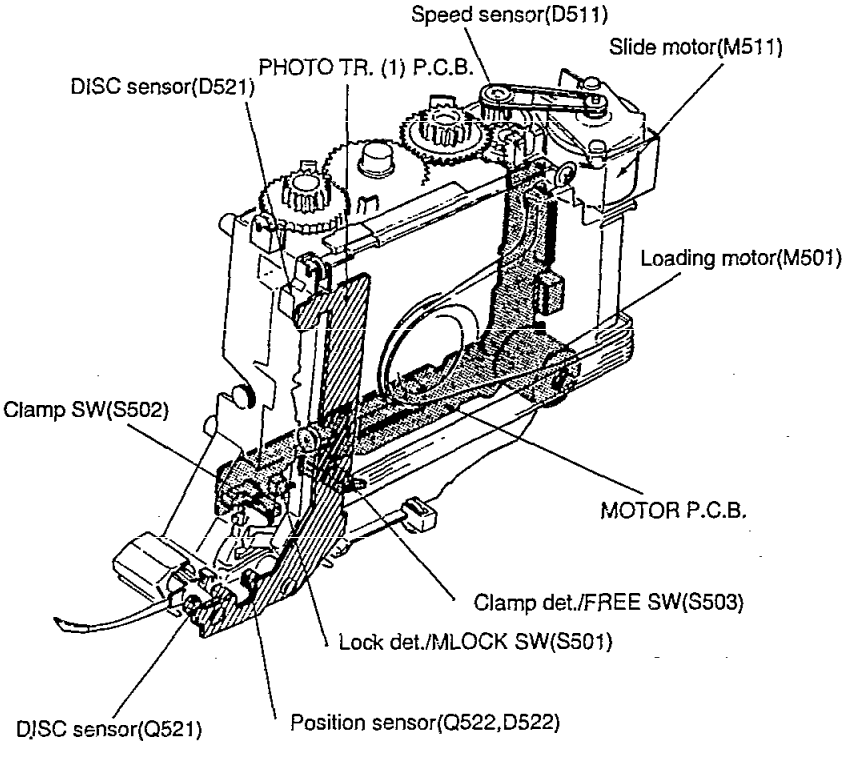
Display and handling

Display	Cause	Handling
F-15	The sympton is slow start-up of the CD when power is turned ON. The cause is defective contact of the OPU rest switch.	Abnormal rest detection switch (S701).
F-26 (Automatic display)	Sympton is that the unit does not operate when the play button is pressed, or the CD is skipping etc. The probable cause is defective system control IC. Lock det./MLOCK SW (S501) does not go ON/OFF in initial operation.	* Check system control (IC401) and servo IC (IC702). * Check each IC and the servo circuit. * Check Lock det./MLOCK SW (S501).
F-27	Sensor abnormal. Load on slide drive system is too great. Loading unit does not move to the right and left. Slide motor malfunction.	* Check slide motor (M511). * Check position sensor (Q522, D522) and speed sensor (D511). * Check gears of slide drive system. (Jammed by foreign matter or great teeth missing.)
F-28	Clamp det./FREE SW does not go OFF, and Clamp det.SW (S502) does not go ON within 5 seconds during loading.	* Check Clamp det./FREE SW (S503) and Clamp SW (S502). * Check loading motor (M501). * Check loading drive system. (Riding-up, shifting or foreign matter jamming of levers, missing gear teeth etc.)
F-29	Clamp det./FREE SW (S503) and clamp SW do not go ON within 5 seconds during unloading.	

<Method for returning from error display to normal display>

* C F-26: When repair is complete, the error display disappears automatically.
* C F-15/ 27/ 28/ 29: Power SW ON/ OFF.



Ref. No.	Part name (Part number)
IC401	System control IC (UPD78043F019)
IC702	Servo processor IC (MN662740RM1)

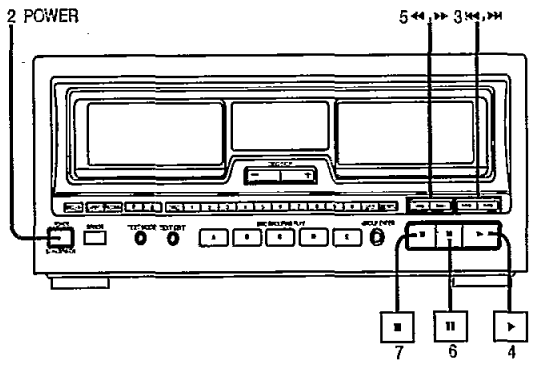
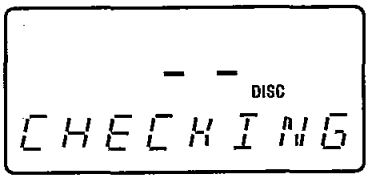
M511	Slide motor (RFKPLMC50PBK)

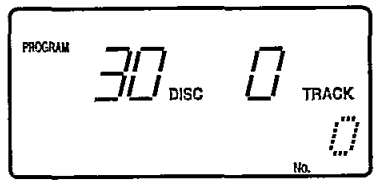
Check of basic CD operation



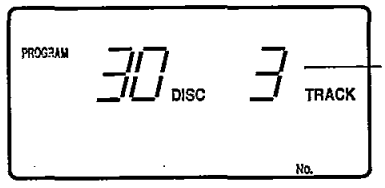
1 [With power supply OFF]
Place one disc in stocker. For example, place a disc in slot No.30.

2 POWER
Press power
[CHECKING DISCS] scrolls across the display, and the number of the slot containing the disc is displayed.



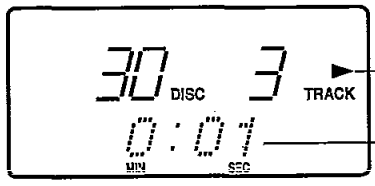


3 |◄◄ ►►|
Press either (|◄◄ or ►►|) until *you reach the desired track.*
|◄◄ : You can skip backward.
►►| : You can skip forward.



Track number at the playing position.

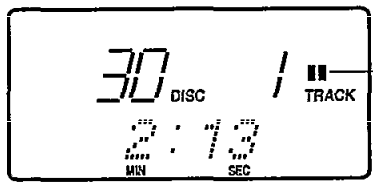
4 ►
Press PLAY (►).



Play indicator
Elapsed play time

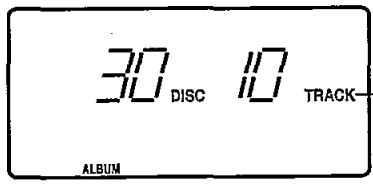
5 ◄◄ ►►
[In the play or pause mode]
Press and hold ◄◄ or ►►
◄◄ : you can search backward.
►► : You can search forward.

6 ❚❚
Press PAUSE (❚❚).



Illuminates

7 ■
Press STOP (■).



Total number of t

Result	Handling
No abnormalities in any operation	In accordance with the buttons operated in Self-diagnosis: FL display mode , all operation buttons (32 buttons) except the DISC ENTER button are normal. Perform PROGRAM and other operation.
Fails to play or play performance is poor.	Perform servo adjustment mode (p18, 19).
Failure of operation other than play. (Example) Does not skip tracks.	Check between button which does not work and servo module. Check for FFC catching of the OPU. Check for bending of the traverse deck worm gear.

Self-diagnosis Test mode A

Setting

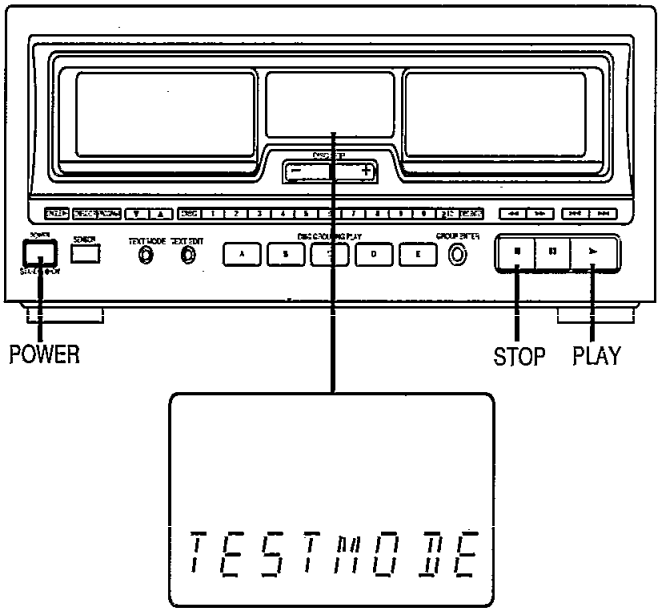
Turn OFF power button with no disc loaded.

↓

Turn ON power button while simultaneously pressing PLAY(►) button and STOP (■) button.

↓

"TEST MODE" appears on the display.

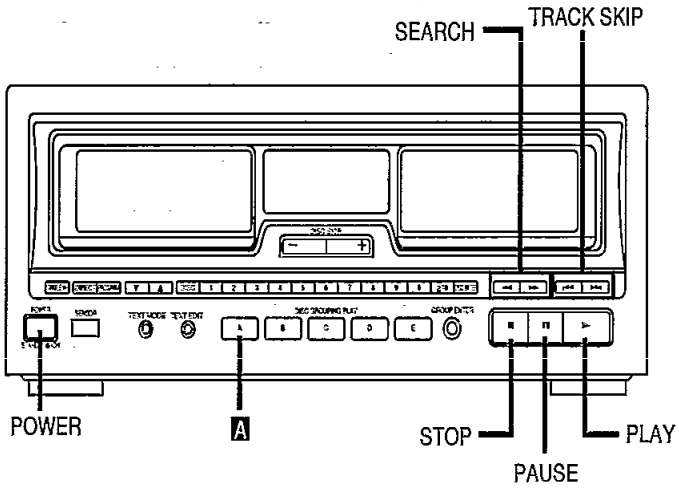


To independently operate the traverse deck,

Press the A button on the operation panel.

↓

The following buttons now work: PLAY (►), PAUSE (▮▮), STOP (■), SEARCH (◄◄ , ►►) and TRACK SKIP (|◄◄ , ►►|).



Cancellation

Turn the power button OFF/ON

Self-diagnosis Test mode B

To perform load and unload operations at the loading unit,

"TEST MODE" appears in the display.

Press the button B on the operation panel.

Has the loading unit been removed from the frame?

The slide motor spins for approx. 5 seconds.

Moves to transport lock position.

Moves to standby position.

Moves to slot No.15.

Loading operation

Stops for 1 second

Unloading operation

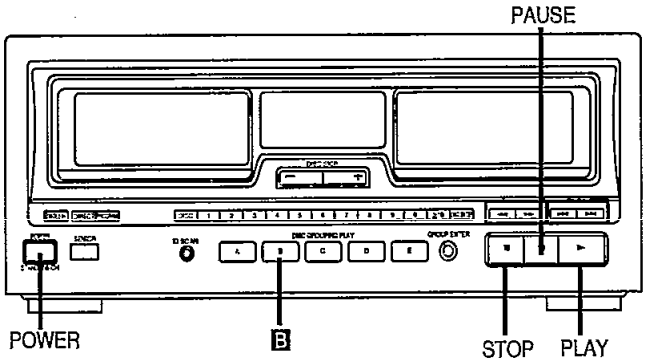
Stops for 1 second

This operation repeats until cancellation.

Setting the "TEST MODE"

Turn OFF power button with no disc loaded.

Turn ON power button while simultaneously pressing PLAY (►) button and STOP (■) button.



Cancellation

Turn the power button OFF/ON

Self-diagnosis Test mode C

To perform linked operation of the loading unit,

Setting the "TEST MODE"

Turn OFF power button with no disc loaded.

↓

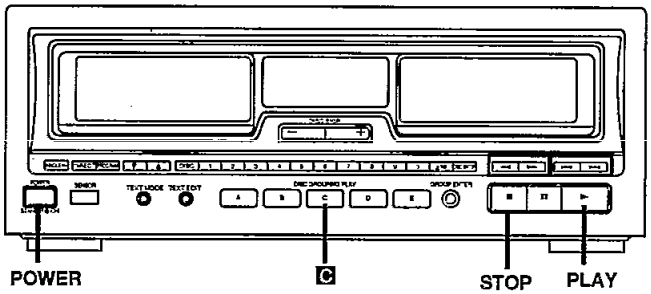
Turn ON power button while simultaneously pressing PLAY (►) button and STOP (■) button.

→ "TEST MODE" appears in the display.

Load disc at single (slot No.0) position.

↓

Press button C on the operation panel.



The follwing automatic operation begins.

↓

Starts the play the disc at slot No. 0 for a second, then stops the play.

↓

Moves one to the right (slot No.1).

↓

Unloads the disc to slot No.1.

↓

Loads the disc and plays for a second and stops.

↓

Moves one to the right (slot No.2)

↓

The same operation as above until slot No.110.

↓

Moves one to the left (slot No.109).

↓

The same operation as above until slot No.0.

Continue → Moves one to the right (slot No.1).

Cancellation

* Turn power button OFF/ON.

Self-diagnosis Servo adjustment mode

This function shows the operating status of the servo system circuits (focus, tracking, CLV) on the FL display.
The results of automatic adjustment of the servo circuit are also displayed, using error codes.

Check when assembled

Load CD into stocker.

Turn OFF the power button.

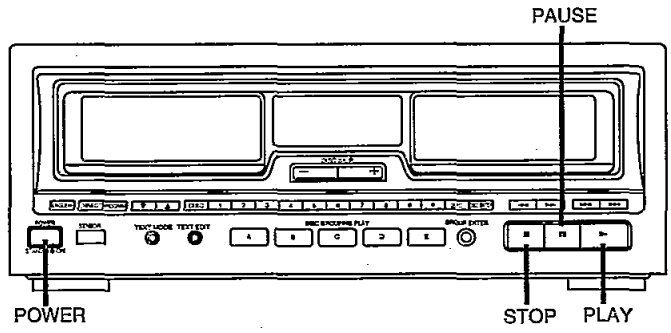
Turn ON the power button while simultaneously pressing STOP (■), PAUSE (▮▮) and PLAY (►).

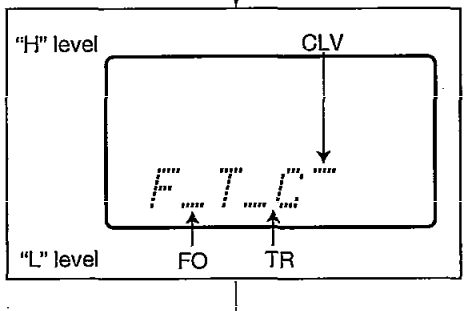
Check while disassembled

Set to S/M state.

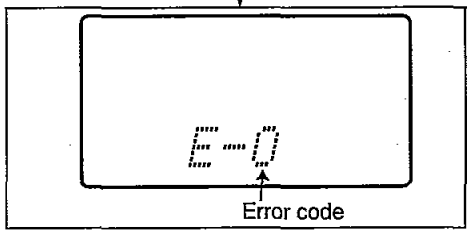
Perform "**To independently operate the traverse deck**" on p.15.

Press PLAY (►), and after playing for 10 seconds, press PAUSE (▮▮).



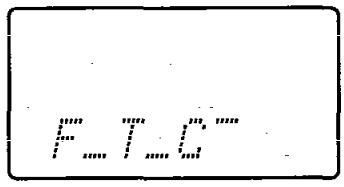


Press STOP (■).



Result	Handling
E - 00	Normal
Other display, (Example) E-1	Refer to p.19 to remedy.

How to read FTC.



= Normal

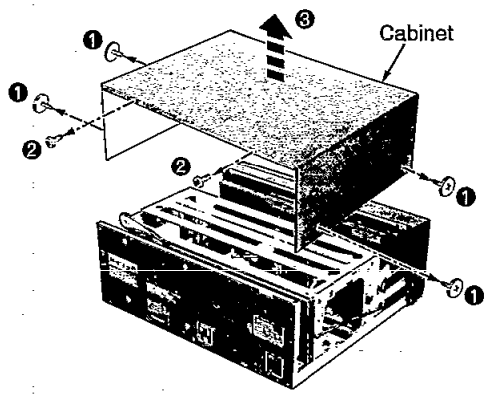
DISASSEMBLY/OPERATION CHECKS/REASSEMBLY PROCEDURES

■ COMMON • • • • • ITEMS FOR EACH PROCEDURE



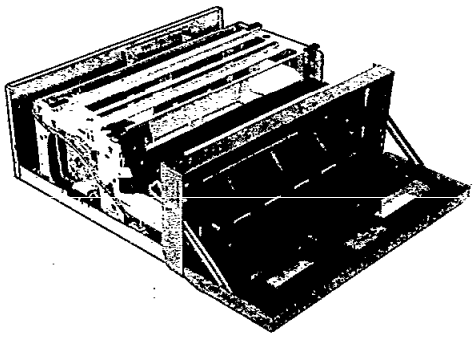
❶, ❷ Remove the 6 screws.

❸ Remove the cabinet.

※ The numbers reversed in white indicate the order of procedures.

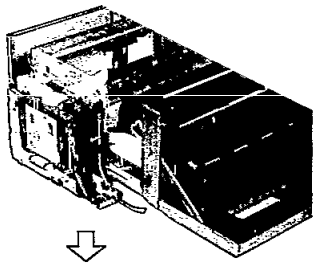
■ PRIOR TO THE OPERATION CHECKS

The following DISASSEMBLY/OPERATION CHECKS/REASSEMBLY procedures consist of 3 main items.
Follow the appropriate procedures to the failed block.

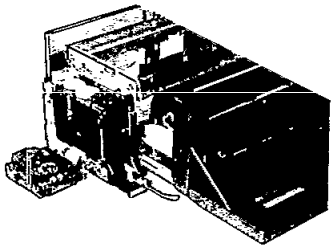


• Each block are described in order to the followings. DISASSEMBLY
➡ OPERATION CHECK
➡ REASSEMBLY

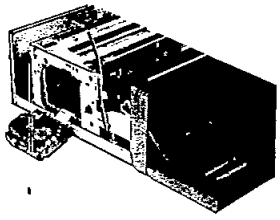
Act.1 ⇨ Loading unit (☞Refer to pages 22~29)



Traverse deck separation (☞Refer to pages 30~33)



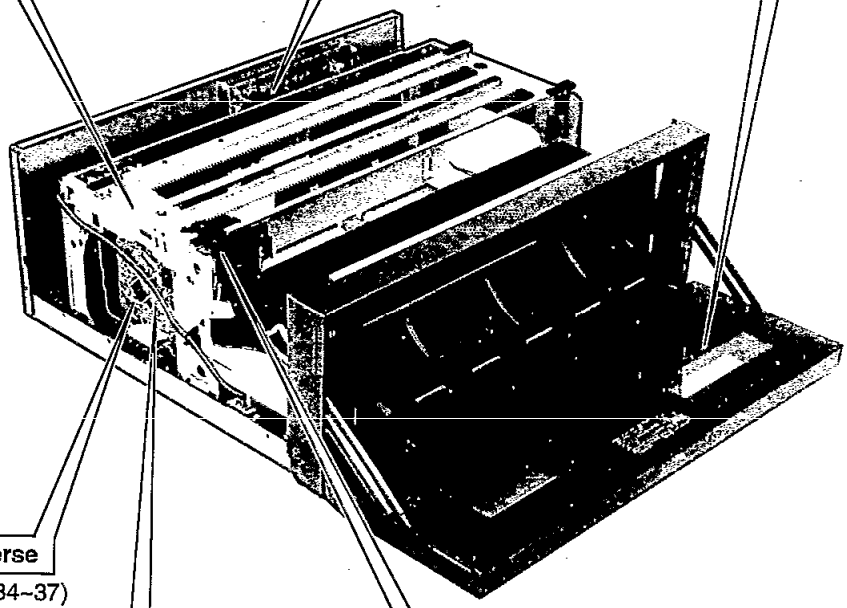
Act.2 ⇨ Traverse deck (☞Refer to pages 34~37)



Act.3 ⇨ Front panel (☞Refer to page 38)

Act.3 ⇨ Main P.C.B. (☞Refer to page 39)

■ Repair Guide



Removal for loading unit
(☞Refer to pages 22~29)
⬇
Traverse deck separation
(☞Refer to pages 30~33)

Removal for main P.C.B.
(☞Refer to page 39)

Removal for front panel
(☞Refer to page 38)

Removal for traverse
(☞Refer to pages 34~37)

Servo module diagnosis
- Mechanical mode setting (☞Refer to pages 12~14)
- Servo adjustment mode (☞Refer to pages 18,19)

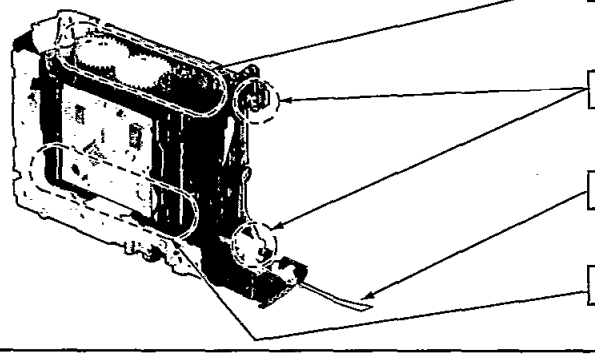
Operation checks for loading
- Mechanical mode setting (☞Refer to pages 12~14)
- Servo adjustment mode (☞Refer to pages 18,19)

Precaution
- Handling of the loading unit (☞Refer to pages 22)

Precaution

■ Handling of the loading unit

• During the loading unit disassembly/operation checks/reassembly, handle the following parts carefully .



Each travel gear

• Check each gear for rotating in assembly.

LED and Photo coupler

• Dust, incorrect position and etc.

Front feed lever

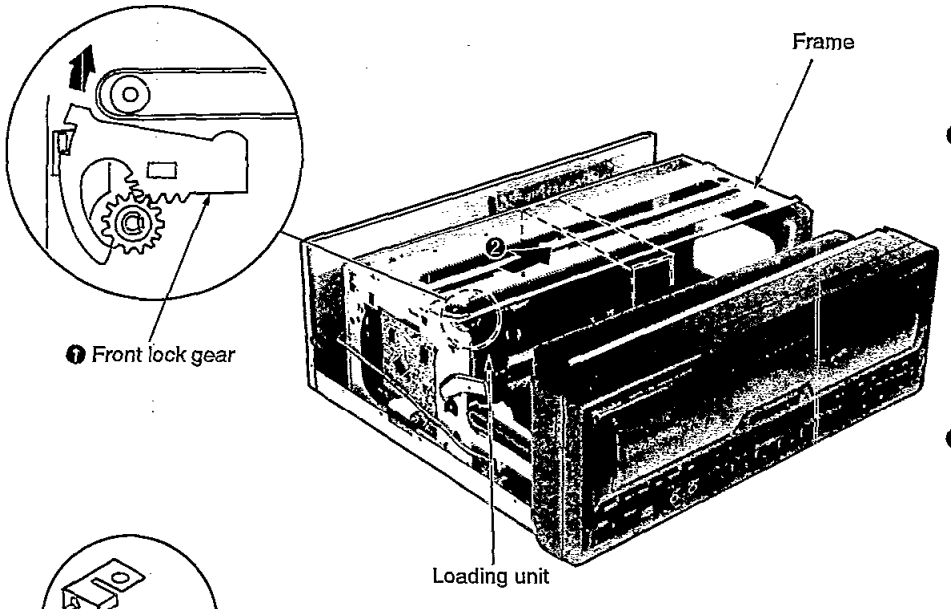
• Broken, deformation and etc.

Each loading gear

• Check each gear for rotating in assembly.

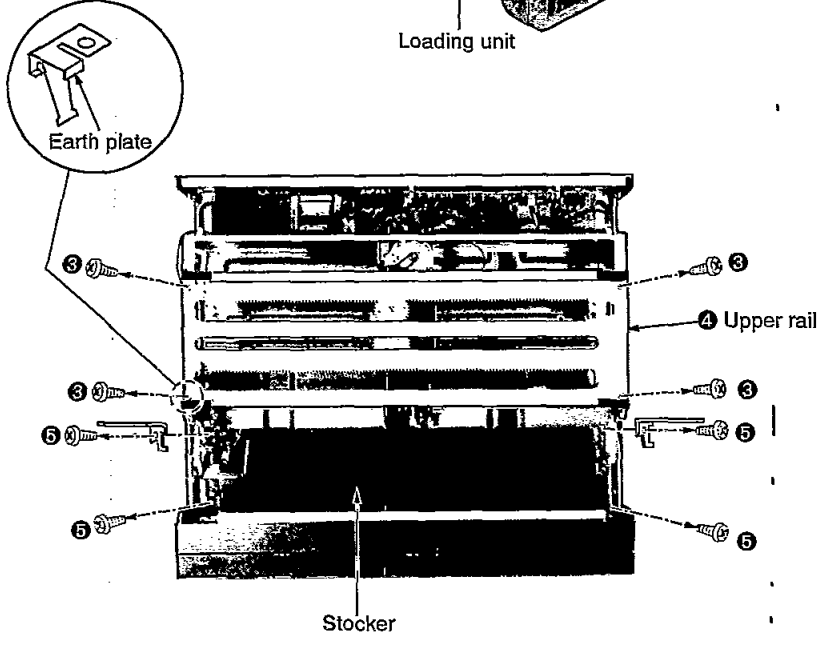
Act.1 | Loading unit | Disassembly

■ Handling of the loading unit



❶ Unlock the loading unit by moving the front lock gear manually in the direction of arrow.

❷ Move the loading unit manually in the right direction.
(Move the loading unit to the right direction beyond the center of the frame.)



❸ Remove the 4 screws for upper rail.

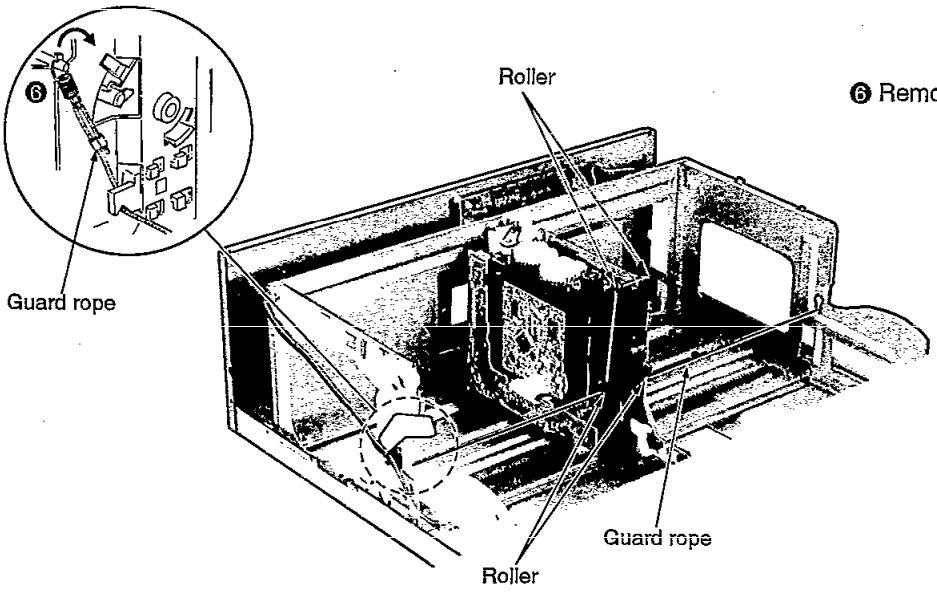
NOTE

When the upper rail is removed, the earth plate will also removed.

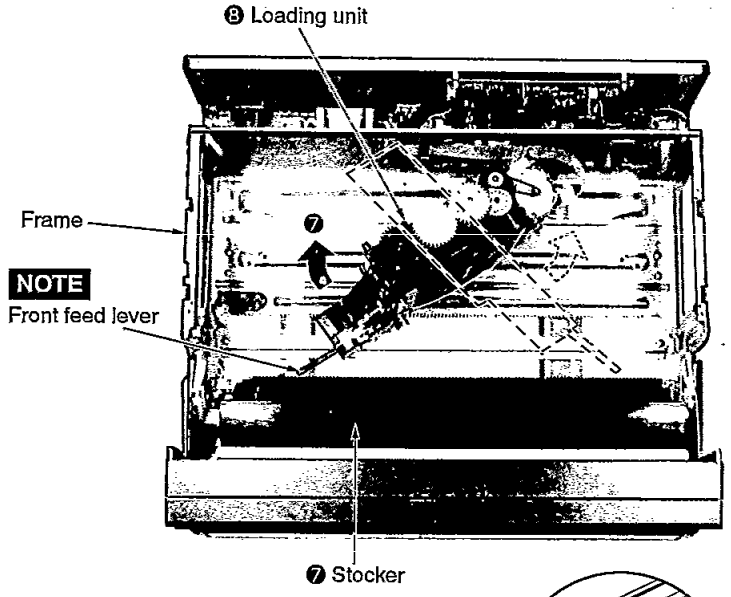
❹ Remove the upper rail.

❺ Remove the 4 screws for stocker.

Act.1 | Loading unit | Disassembly

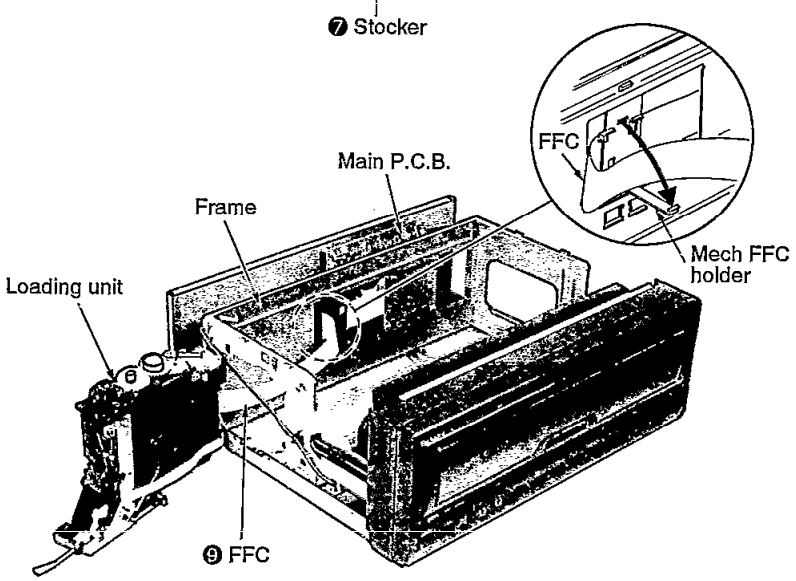


❻ Remove the guard rope.



NOTE
When removing the loading unit, make sure to avoid the front feed lever from the stocker and then, lift up the loading unit because the front feed lever is positioned under stocker.

❼ Rotate the loading unit to clockwise or counterclockwise with lifting the stocker and then,slide the front feed lever under the stocker.
❽ Remove the loading unit from frame.



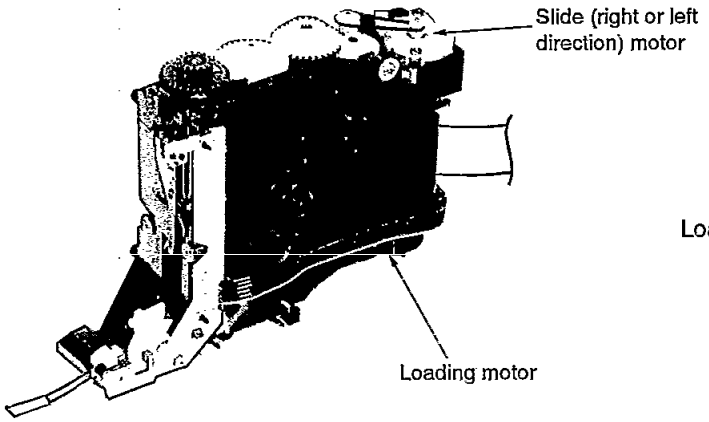
❾ Remove the mech FFC holder.

❿ Remove the FFC from loading unit. Then, reconnect the FFC to the loading unit through the opening of frame.

Preparation for operation checks is completed.

Act.1 | Loading unit | Operation checks

■ Test mode



※ This operation can be executed without traverse deck (including servo module).

❶ Set to the test mode and then, push the button [B] on front panel (☞Refer to page 16)
❷ The slide(right or left direction) motor rotates for approximate 20 seconds.
❸ Then, the loading motor rotates with repeating the following operation.

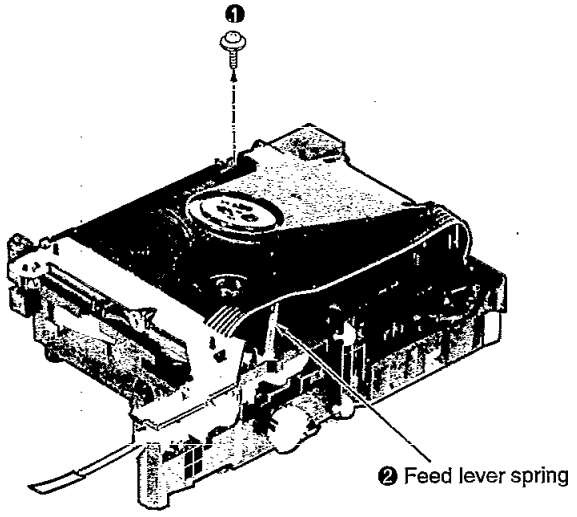
Load ➡ (Stop for 1 second) ➡ Unload ➡ (Stop for 1 second)

Make sure there are no unusual noise, binding or running over visually.

❹ To relieve the operation, set to the power off.

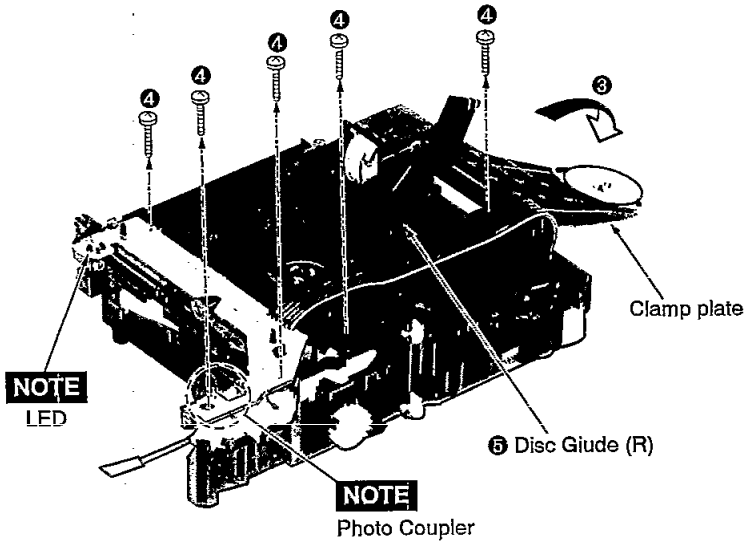
■ Manual operation

(For this operation, remove the parts described in "Test mode", and more the parts as follows.)



❶ Remove the 1 screw.

❷ Remove the feed lever spring.



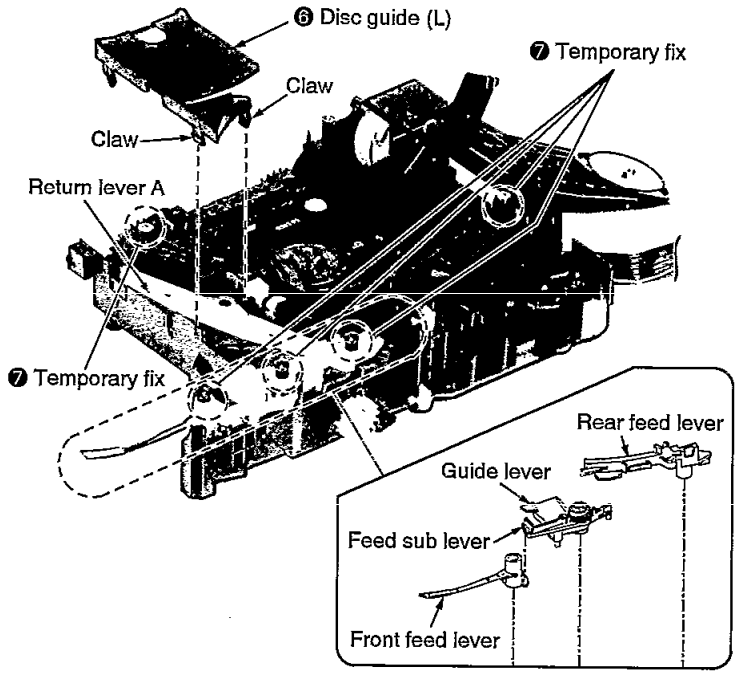
❸ Tilt the clamp plate backward.

❹ Remove the 5 screws.

❺ Remove the disc guide (R).

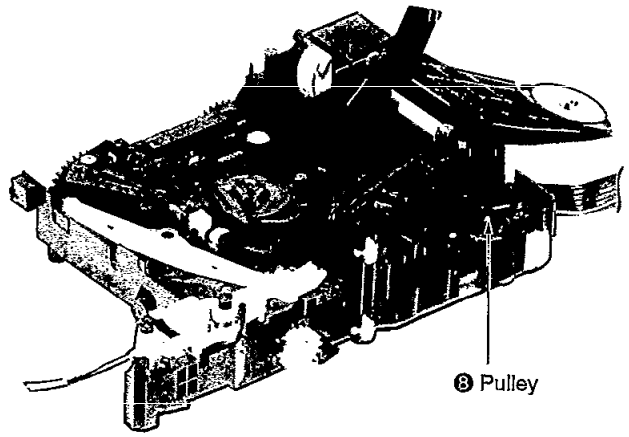
NOTE
Take care not to touch the LED or photo coupler by hand.

Act.1 Loading unit Operation checks



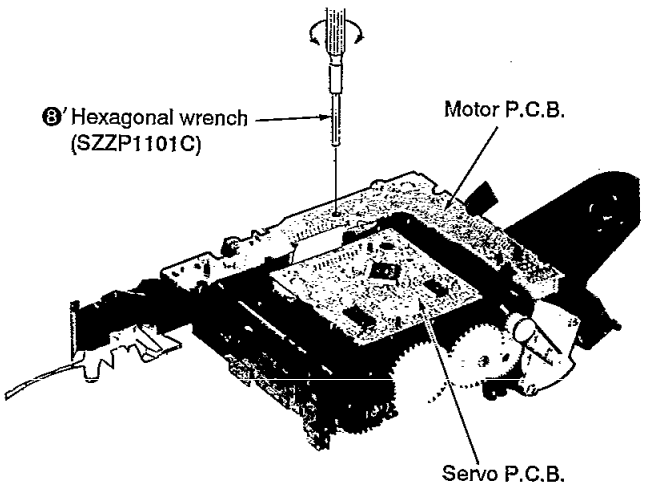
❻ Release the 2 claws and then, remove the disc guide (L).

❼ In this manual operation, the rear/front feed levers, guide lever ass'y, etc. may be removed because the disc guides(L/R) are removed already.
Tempoarary fix those levers with 5 screws.



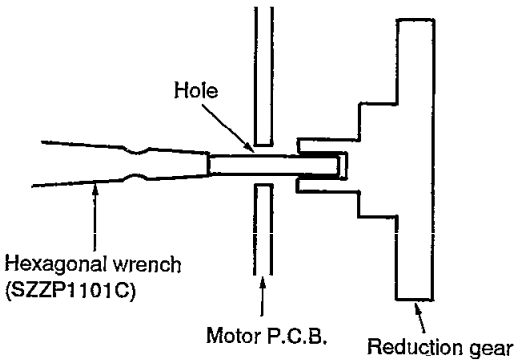
❽ In case of confirmation manually, rotate the pulley as shown left.

- Rotate clockwise : Loading operation
- Rotate counterclockwise : Unloading operation



❽′ Or rotate with 2 mm hexagonal wrench (SZZP1101C).

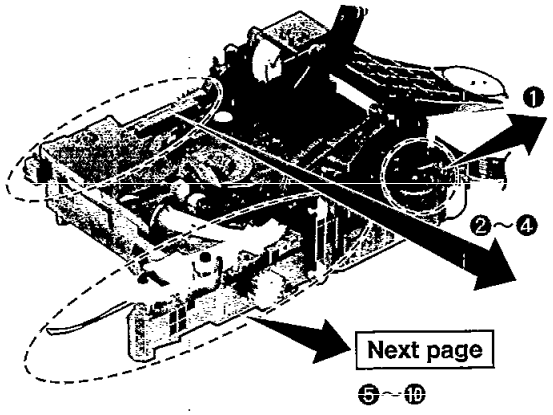
- Rotate clockwise : Unloading operation
- Rotate counterclockwise : Loading operation



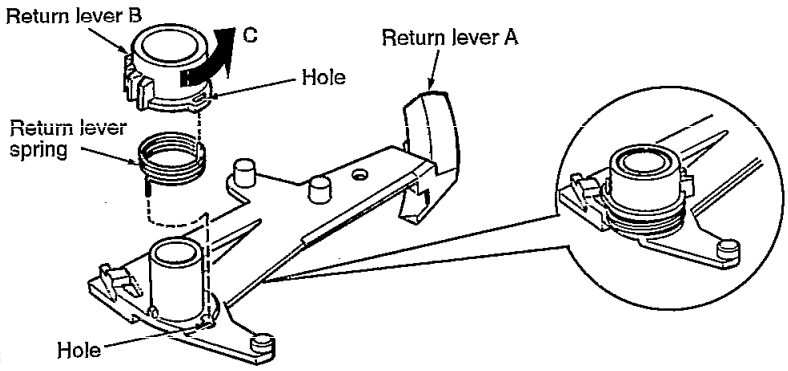
Act.1 | Loading unit | Reassembly

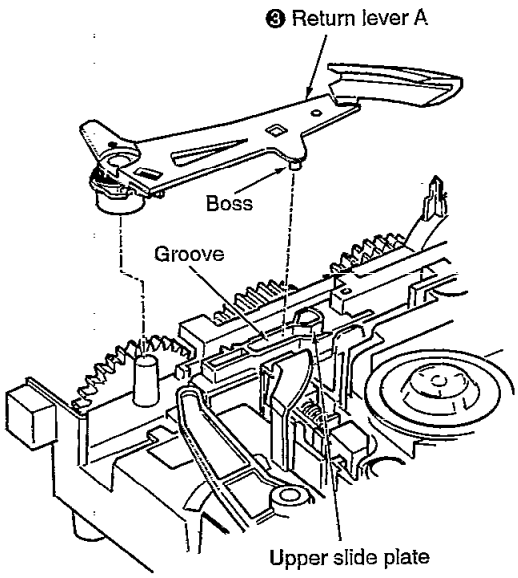
■ In Test mode ····· Follow the items ⑯ ~ ㉒.

■ In Manual operation ····· In case that the parts fixed temporary are removed, the perform the items ❶ ~ ⑩ and then, follow the items ⑪ ~ ㉒.



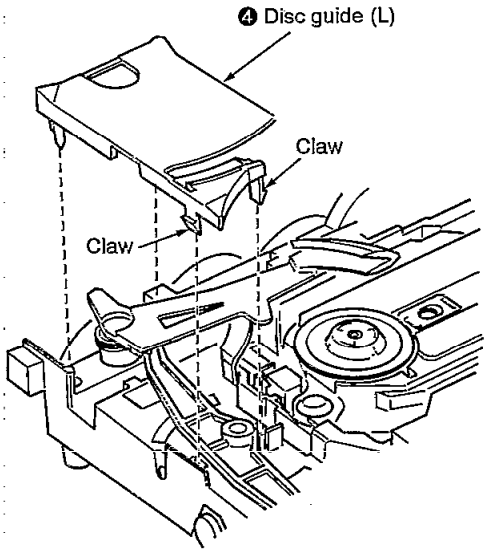
❶ Rotate the pulley clockwise fully.





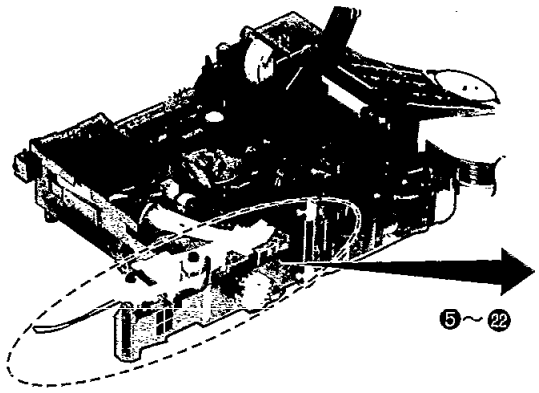
❷ Align the both ends of the spring with the holes of return lever A and B and then, install the return lever A with rotating the return lever B in the direction of arrow (➡) C.

❸ Install the return lever A.
(Align the boss of return lever A with the groove of upper slide plate.)

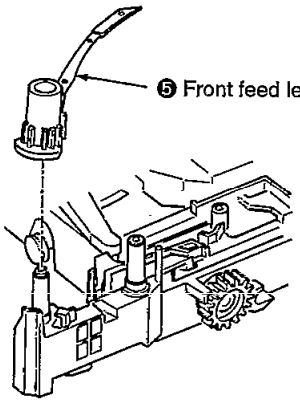


❹ Install the disc guide(L).
(Press the disc guide (L) untill the claws are hooked completely.)

Act.1 | Loading unit | Reassembly

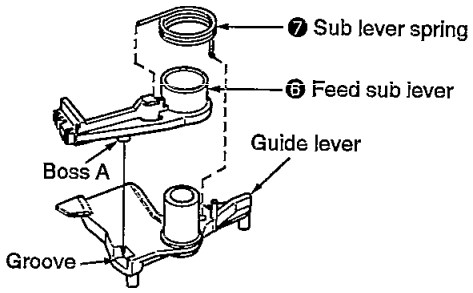


[The state of pulley rotated clockwise fully.]



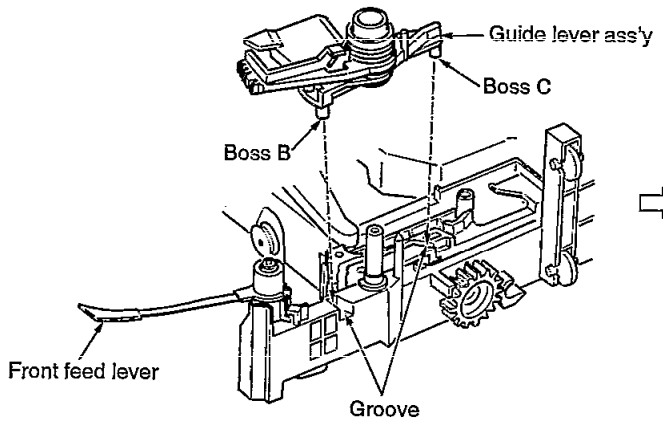
❺ Install the front feed lever.

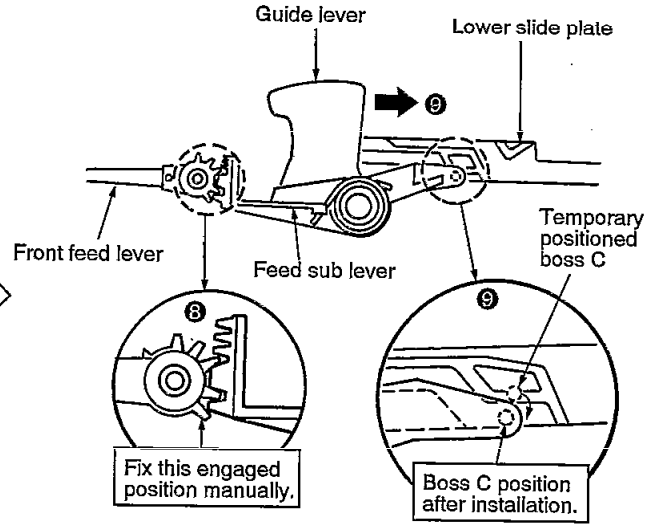
NOTE
Avoid the front feed lever to deform or bend.



❻ Install the feed sub laver to the guide lever.
• Align the boss A of feed sub lever with the groove of the guide lever.

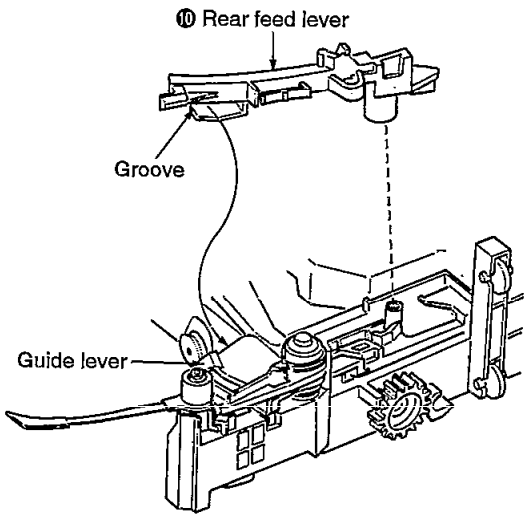
❼ Install the sub lever spring.





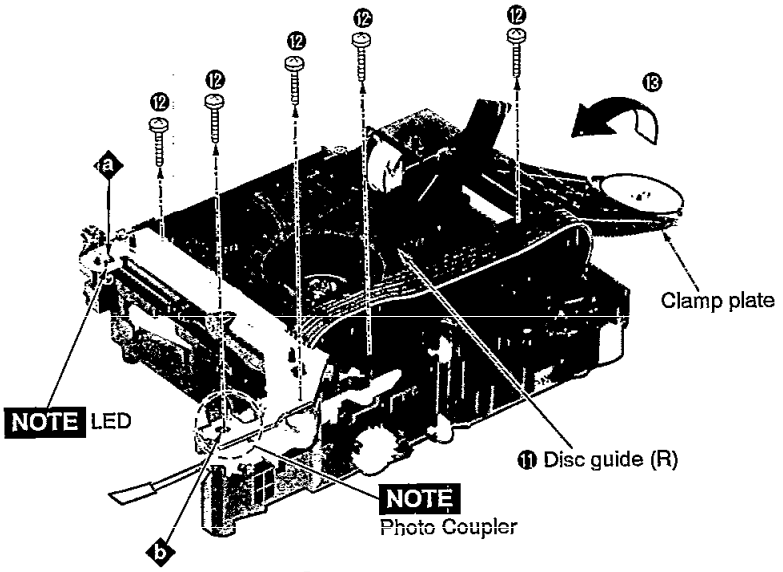
❽ Engage the gear of guide lever ass'y with the gear of front feed lever temporary.
• Boss B must be placed in the groove.
• Boss C must be run over the lower side plate.

❾ With fixing the gear by finger not to slip off the gear clench, rotate the guide lever in the direction of arrow.
• The boss C will fit in the groove.



❿ Install the rear feed lever.
(Align the guide lever with the groove of rear feed lever.)

Act.1 | Loading unit | Reassembly



⑪ Install the disc guide(R).

NOTE

Align the claw of disc guide with the slot ◆ⓐ.

⑫ Install the 5 screws.

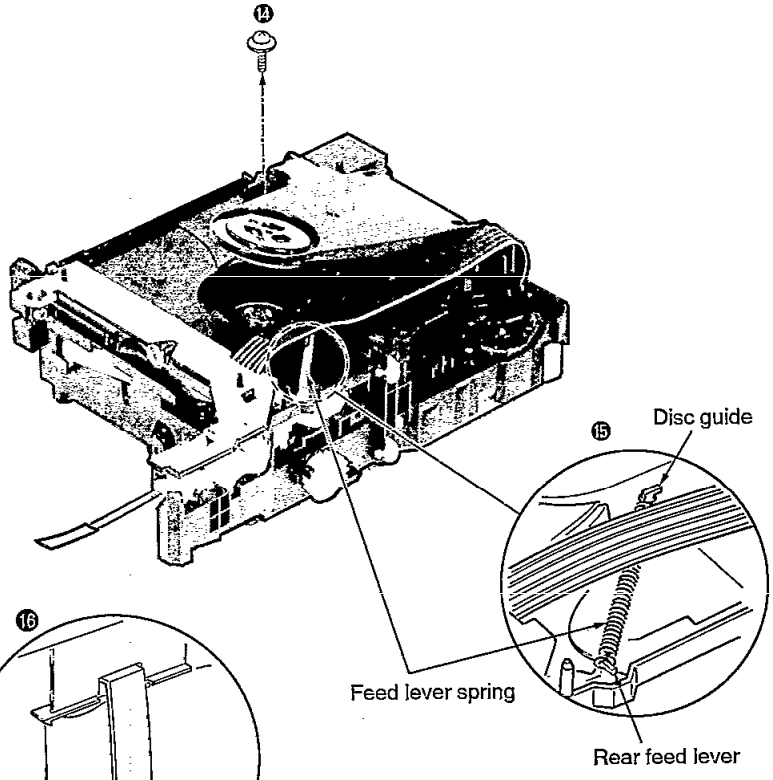
NOTE

Align the upper portion of boss inserted sensor holder with the slot ◆ⓑ, and then tighten screw.

⑬ Tilt the clamp plate forward.

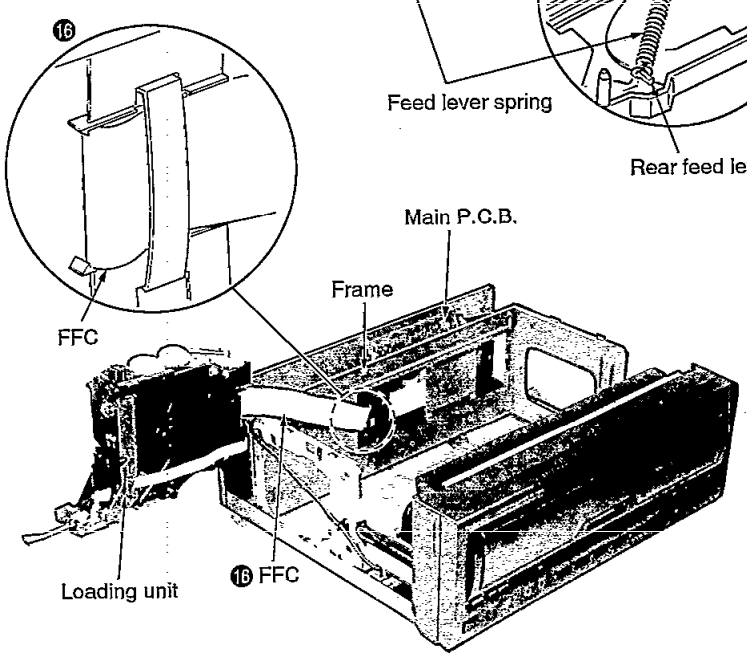
NOTE

Take care not to touch the LED or photo coupler by hand.



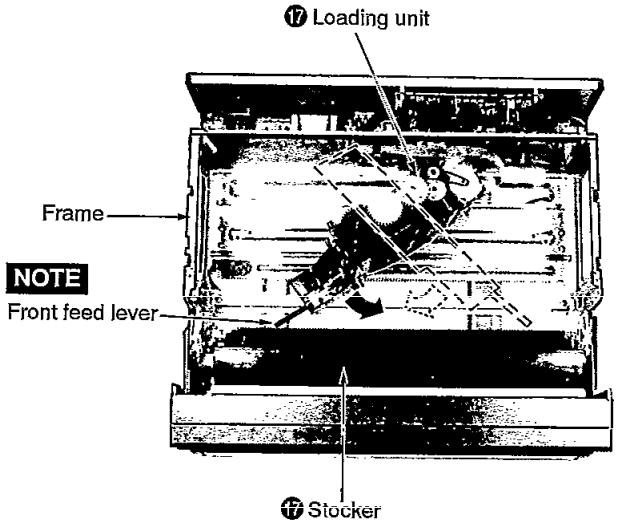
⑭ Install the 1 screw.

⑮ Install the feed lever spring.



⑯ Remove the FFC from loading unit. Then, reconnect the FFC to the loading unit over the frame.

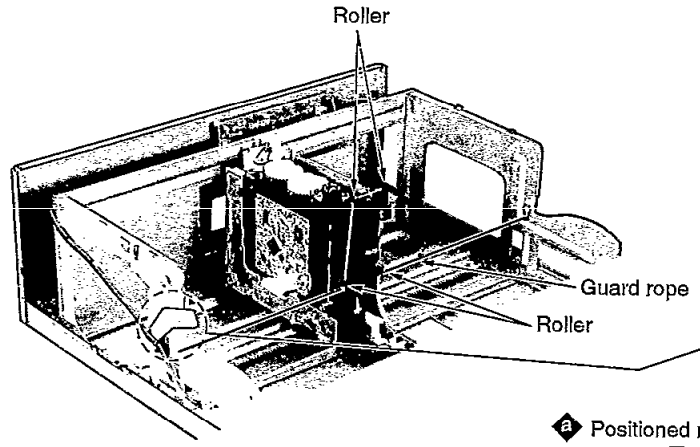
Act.1 Loading unit Reassembly



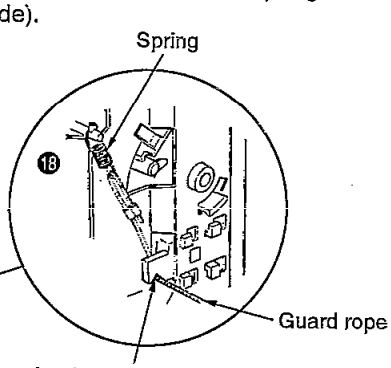
NOTE

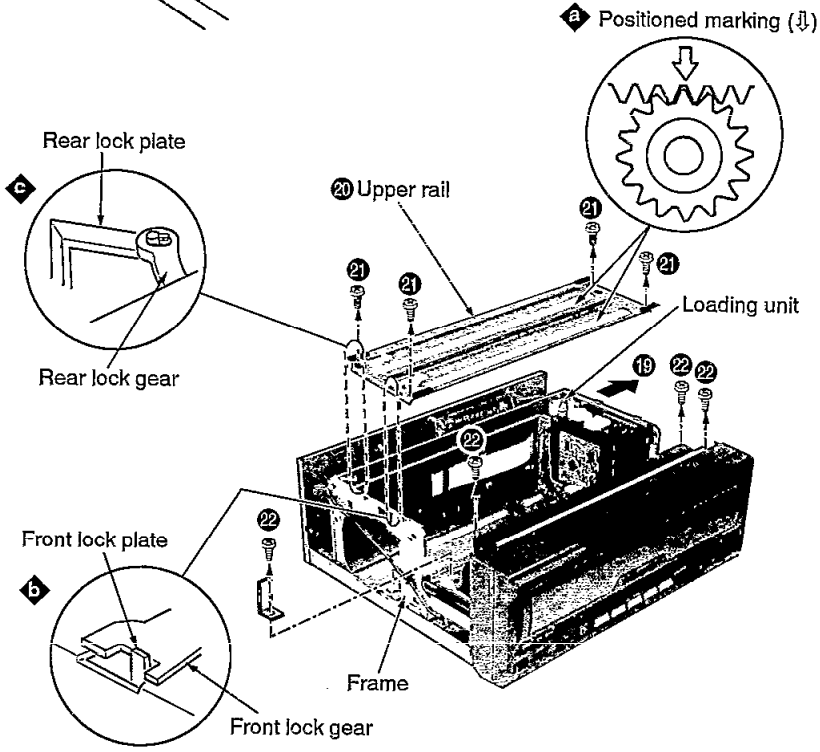
When reassembling the loading unit, make sure to avoid the front feed lever from the stocker and then, install the loading unit because the front feed lever is positioned under stocker.

⑰ Rotate the loading unit counterclockwise or clockwise with lifting the stocker and then, place the front feed lever under the stocker.



⑱ Hang the guard rope with the spring side (left side).





⑲ Move the loading unit to the right end of frame.

⑳ Install the upper rail to the frame. Then, make sure to perform the following operations.

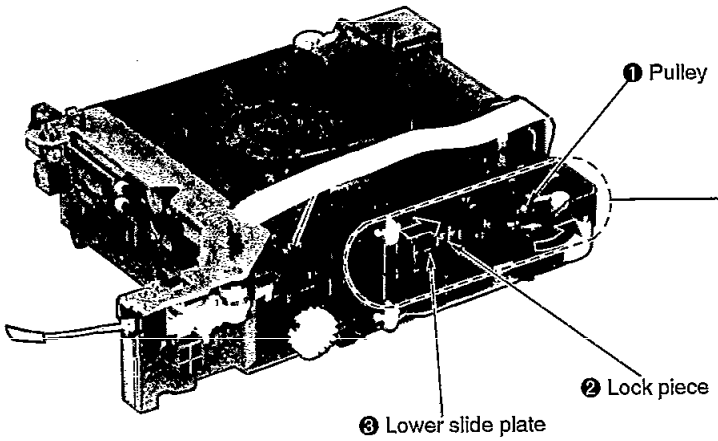
- ⓐ Align the front travel gear and rear travel gear with the marked position of upper rail.
- ⓑ Engage the front lock gear with the front lock plate.
- ⓒ Engage the rear lock gear with the rear lock plate.

㉑ Install the 4 screws for upper rail.

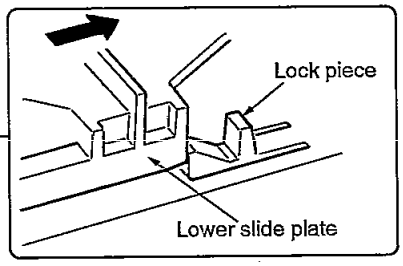
㉒ Install the 4 screws for stocker.

Act.1 Traverse deck separation Disassembly

The followings are described the procedures to make the traverse deck part from loading unit after removed the loading unit block from the frame.

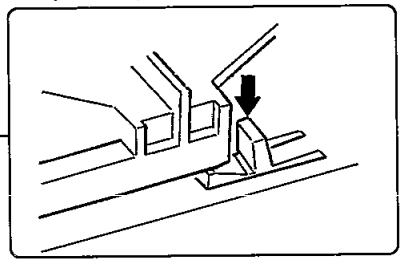


❶ Rotate the pulley counterclockwise.



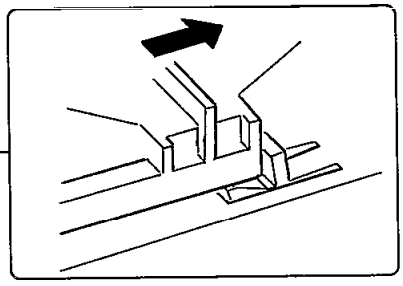
Rotate the pulley until the lower slide plate is moved in the direction of arrow and then touched to the lock piece.

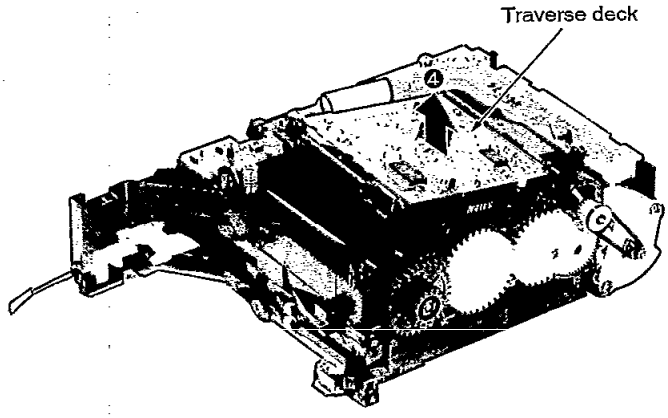
❷ Rotate the pulley counterclockwise fully with pressing the rib of lock piece.



The lower slide plate runs over the lock piece.

❸ Slide the lower slide plate manually in the direction of arrow until the lower slide plate touches the rib of lock piece

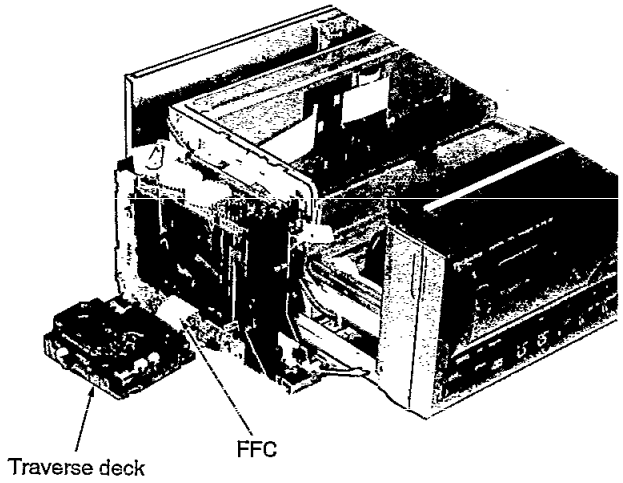




❹ Upset the loading unit and then, lift up the traverse deck.

Act.1 | Traverse deck separation | Operation check

■ Focus operation confirmation



❶ Set the switch to TEST MODE.
(☞Refer to page 15)

❷ Press the button A on the operation panel.

Standby the traverse deck to individual operation.

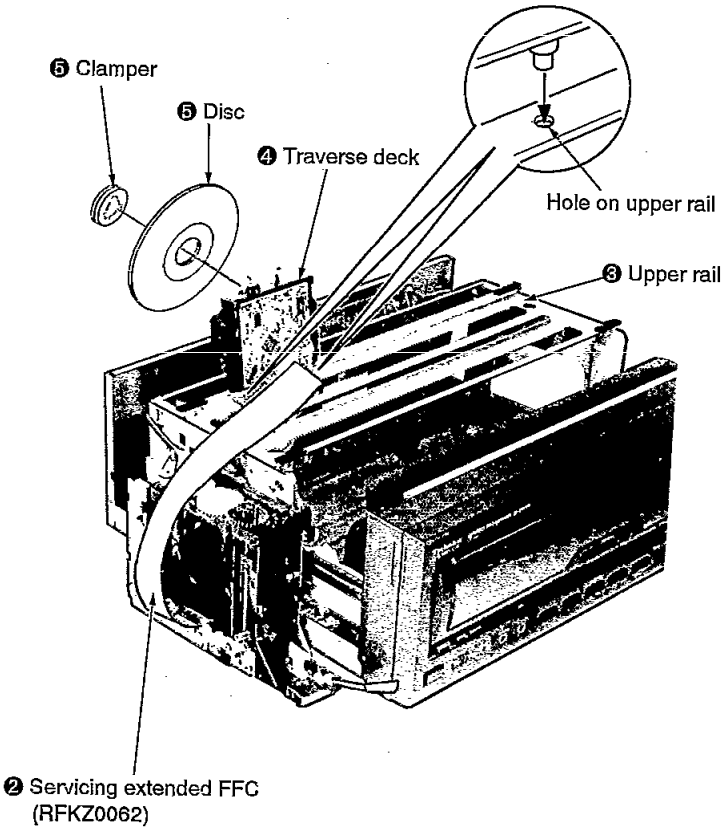
⇩

Press the PLAY(▶)button.

⇩

Confirm the focus operation visually.

■ Servo module confirmation



❶ Remove the FFC between the traverse deck and loading unit.

❷ Connect the servicing extended FFC between the traverse deck and loading unit.

❸ Install the upper rail.
(The screws are not necessary for fixing.)

❹ Locate the servo module faced to you and then, align the traverse deck with the hole on upper rail.

❺ Attach the disc to the clamper with magnet.

⇩

Preparation for operation checks is completed.

❻ Set the switch to TEST MODE.
(☞Refer to page 15)

❼ Press the button A on the operation panel.

⇩

Standby the traverse deck to individual operation.

⇩

Press the PLAY(▶)button.

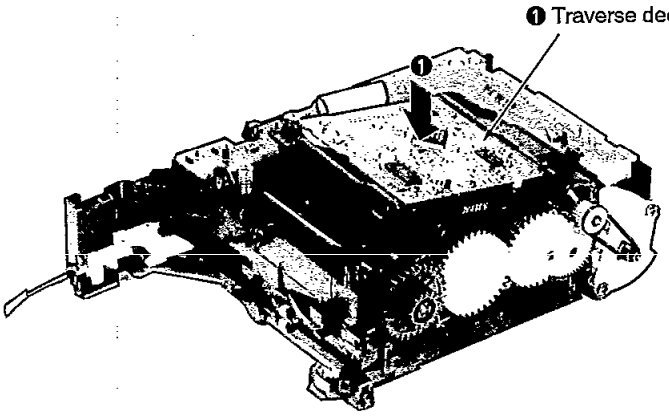
⇩

CD play starts.

⇩

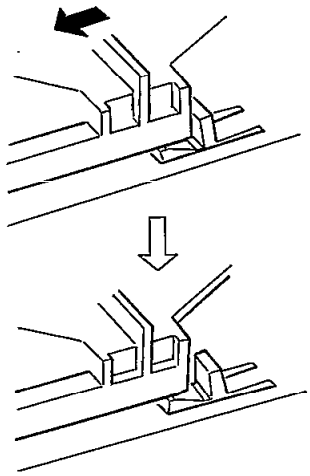
Check the servo module.

Act.1 | Traverse deck separation | Resassembly

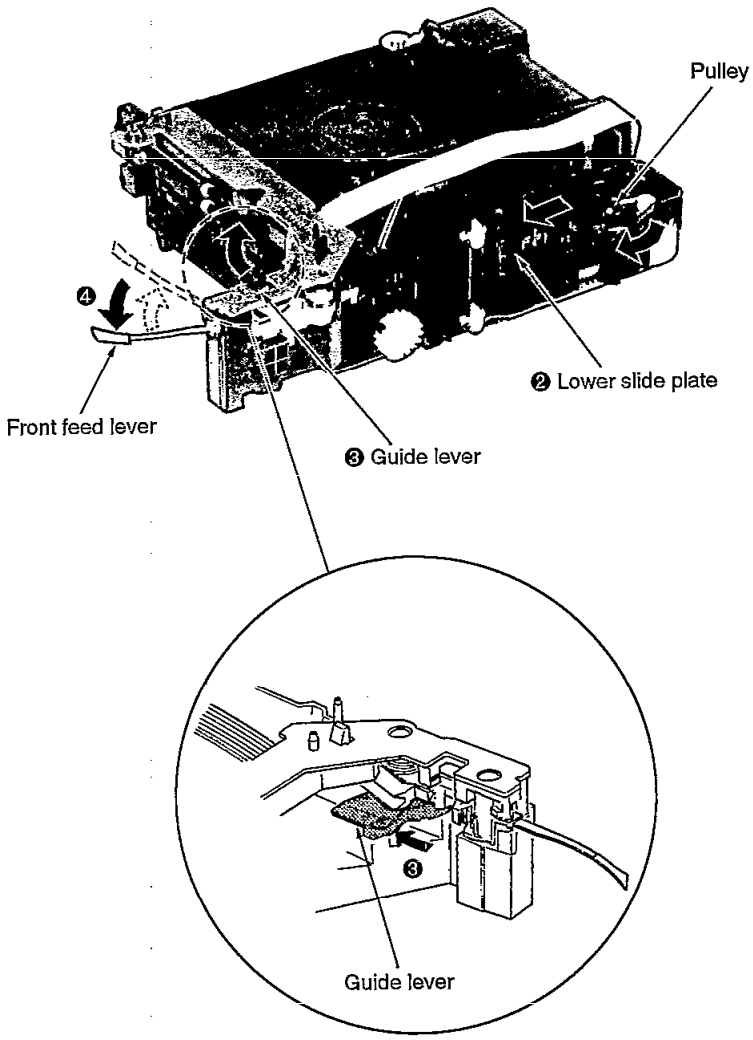


❶ Equip the traverse deck with the loading unit.

❷ Slide the lower slide plate in the direction of arrow with supporting manually not to be fall free the traverse deck.



The traverse deck will not fall free as shown above.



❸ While pushing the guide lever in the direction of arrow, rotate the pulley clockwise.

To easy installation loading unit into the frame, raotate the pulley fully clockwise.

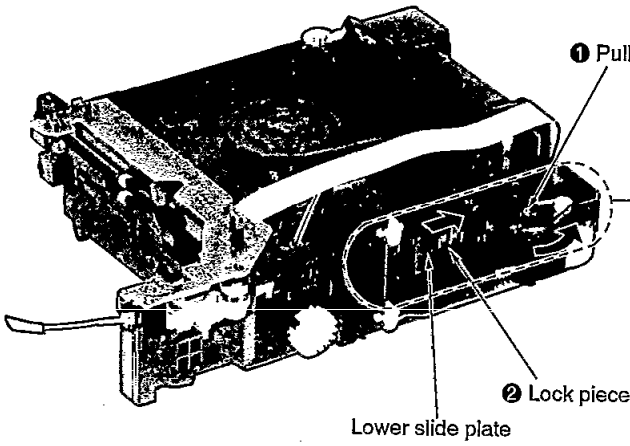
Confirmation

During the above operation , make sure that the front feed lever rotates to clockwise (Dot line) once and then, return to original position(Full line).

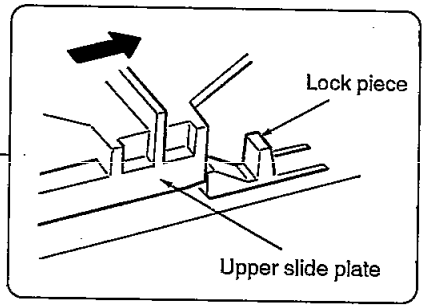
Act.1 | Traverse deck separation | Reassembly

■ In case that the operations described in item "Confirmation" are not to be performed.

• In case that the operations described in item "confirmation" are not to be performed (The front feed lever will not return to original position (Full line) and is fixed at position indicated with dot line), perform the following operations.

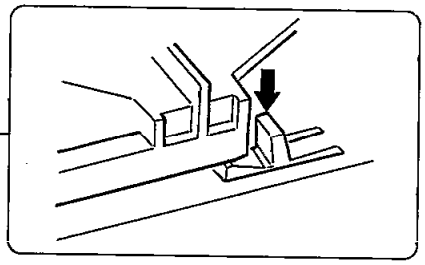


❶ Rotate the pulley counterclockwise.

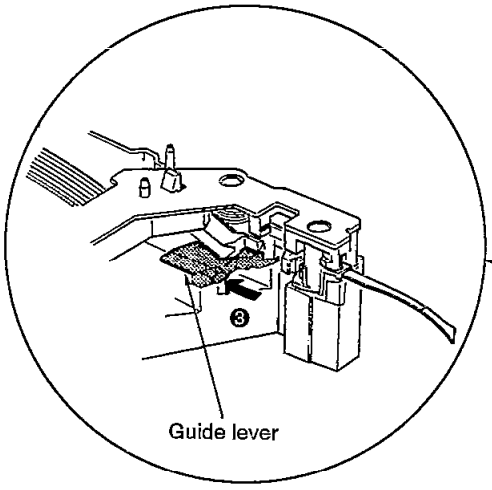


Rotate the pulley until the lower slide plate moves in the direction of arrow and touches the lock piece.

❷ With pushing the rib of lock piece, rotate the pulley counterclockwise fully.



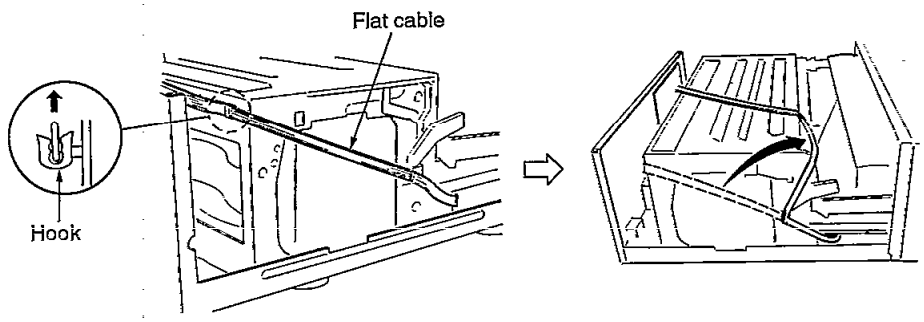
The lower slide plate runs over the lock piece.



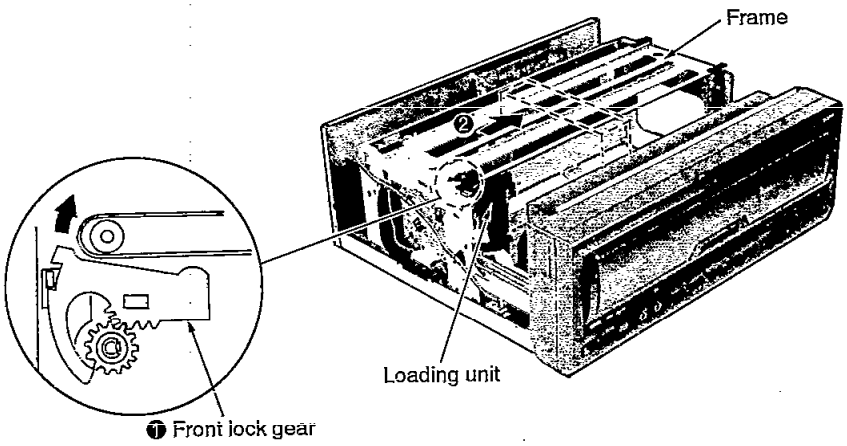
Rotate the pulley counterclockwise with pushing the guide lever as shown item ❸ on page.

Act.2 | Independent traverse deck | Disassembly

- The traverse deck can be removed individually without removal of loading unit.
- It is very convenient to perform the operation checks for traverse deck quickly.

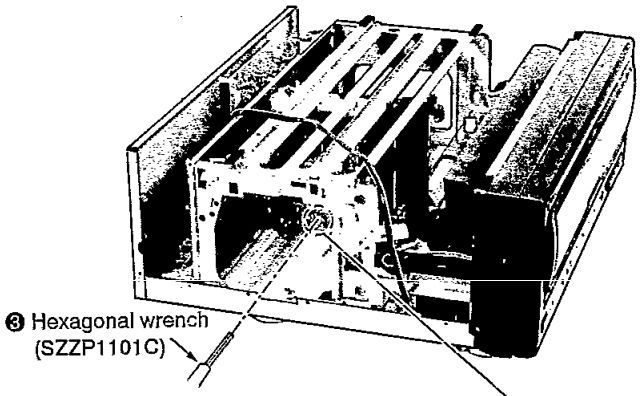


※ Release the flat cable from the hook and then, arrange it as shown right.

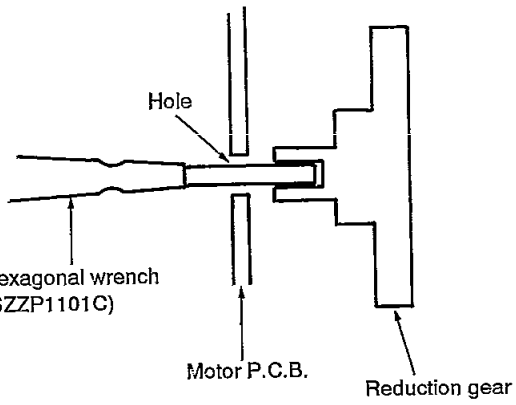


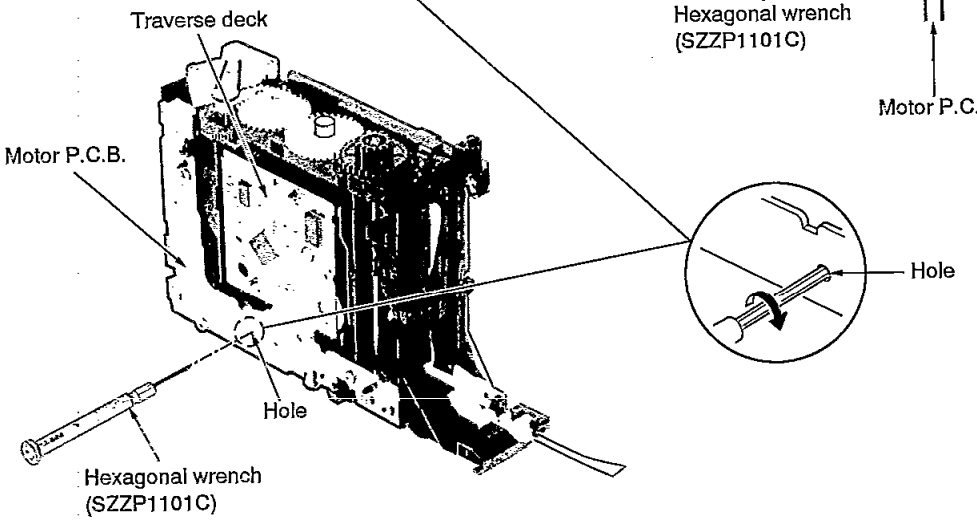
❶ Move the front lock gear manually in the direction of arrow and then, unlock the loading unit.

❷ Move the loading unit to the right end manually.
(Move the unit to the right direction beyond the center of the frame.)

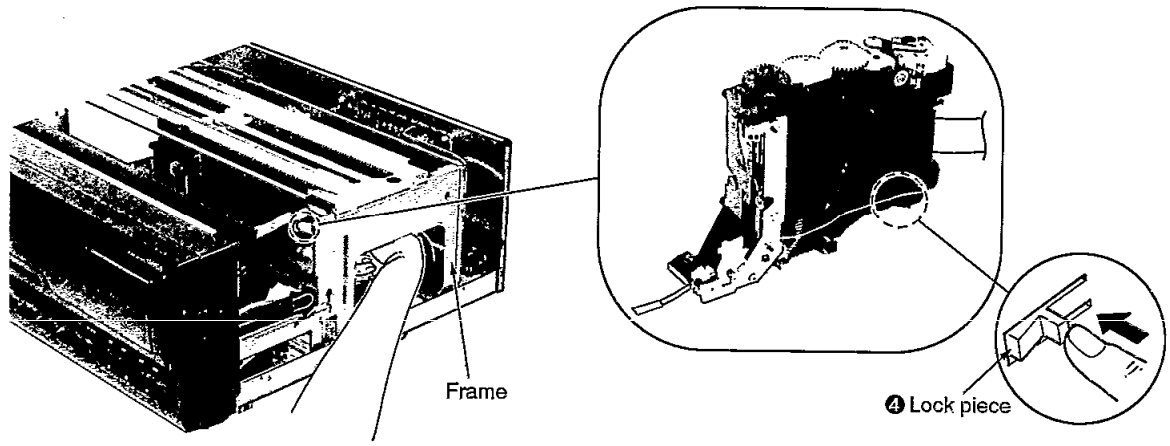


❸ Rotate the reduction gear B clockwise with 2mm type hexagonal wrench (SZZP1101C).



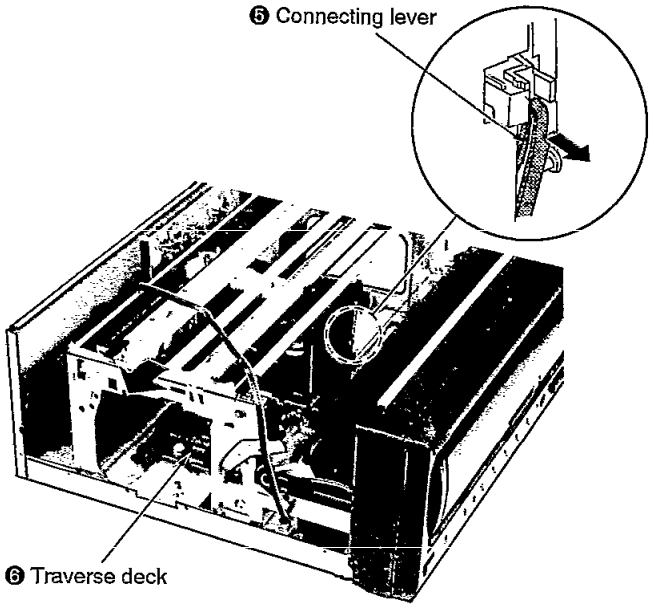


Act.2 | Independent traverse deck | Disassembly



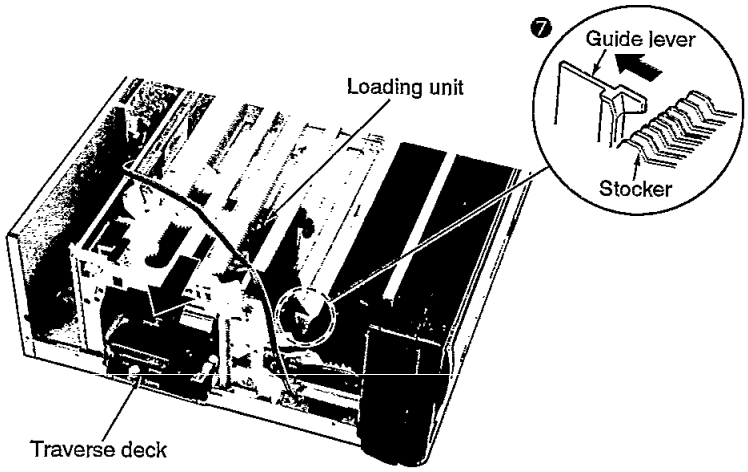
NOTE
Handle the edge of frame with care.

❹ Put the right hand into the right side of frame and then, pressing the lock piece, rotate the hexagonal wrench to clockwise.



❺ Pull the connecting lever in the direction of arrow.

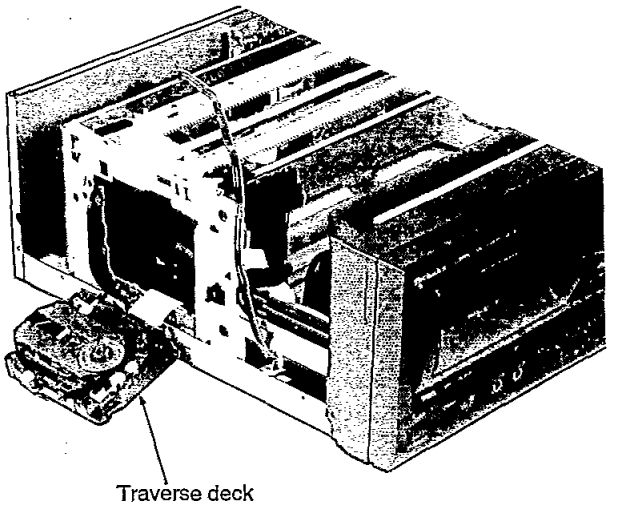
❻ Separate the traverse deck from the loading unit.



❼ Move the guide lever in the direction of arrow and then, move the loading unit to the left end with relieving the engagement to stocker.

Act.2 | Independent traverse deck | Operation checks

■ Focus operation confirmation



❶ Set the switch to TEST MODE.
(☞Refer to page 15)

❷ Press the button A on the operation panel.

⇩

Standby the traverse deck to individual operation.

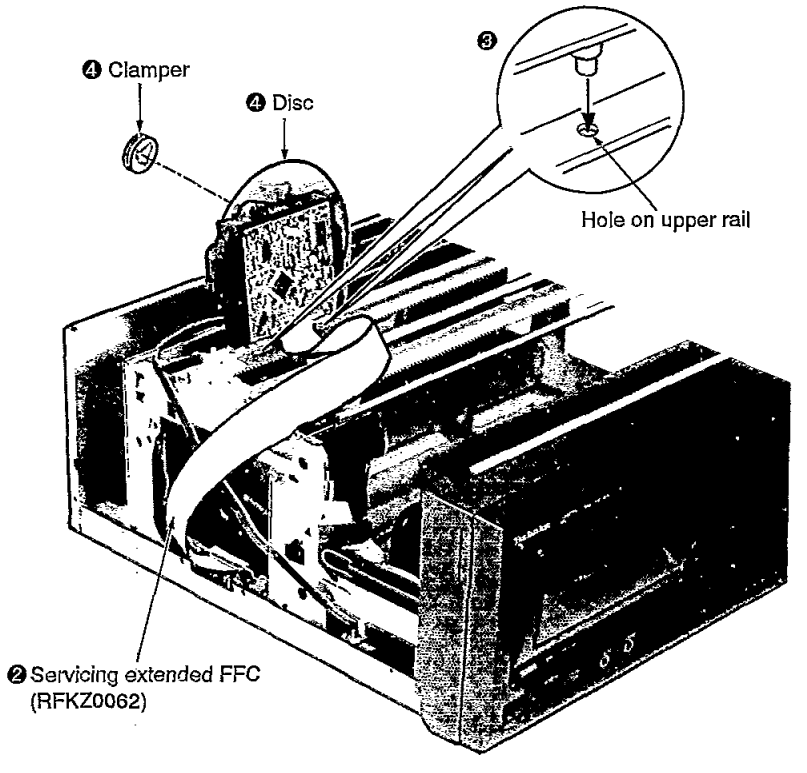
⇩

Press the PLAY(▶)button.

⇩

Confirm the focus operation visually.

■ Servo module confirmation



❶ Remove the FFC between the traverse deck and loading unit.

❷ Connect the servicing extended FFC between the traverse deck and loading unit.

❸ Locate the servo module faced to you and then, align the traverse deck with the hole on upper rail.

❹ Attach the disc to the turn table with clamper (magnet).

⇩

Preparation for operation checks is completed.

❺ Set the switch to TEST MODE.
(☞Refer to page 15)

❻ Press the button A on the operation panel.

⇩

Standby the traverse deck to individual operation.

⇩

Press the PLAY(▶)button.

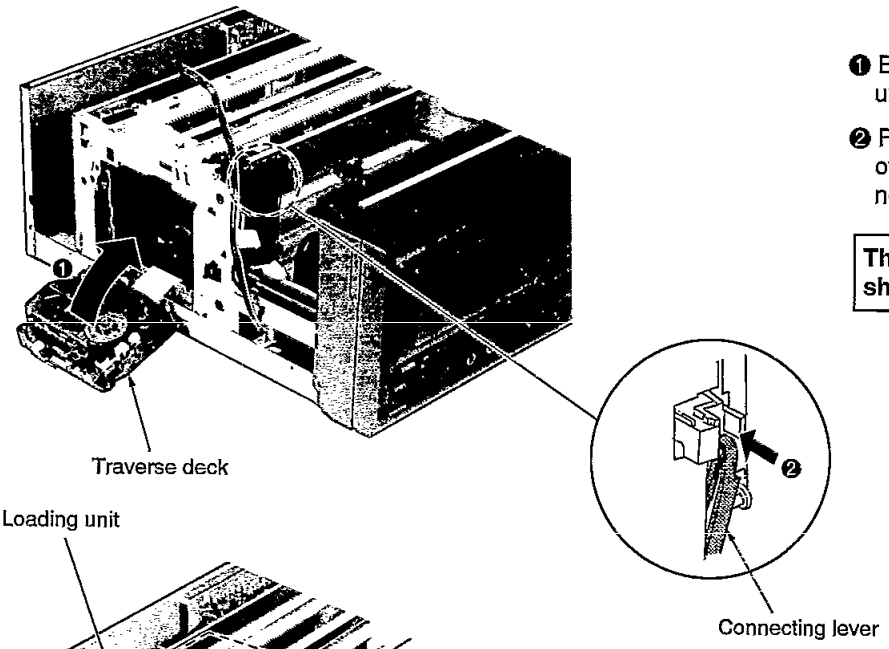
⇩

CD play starts.

⇩

Check the servo module.

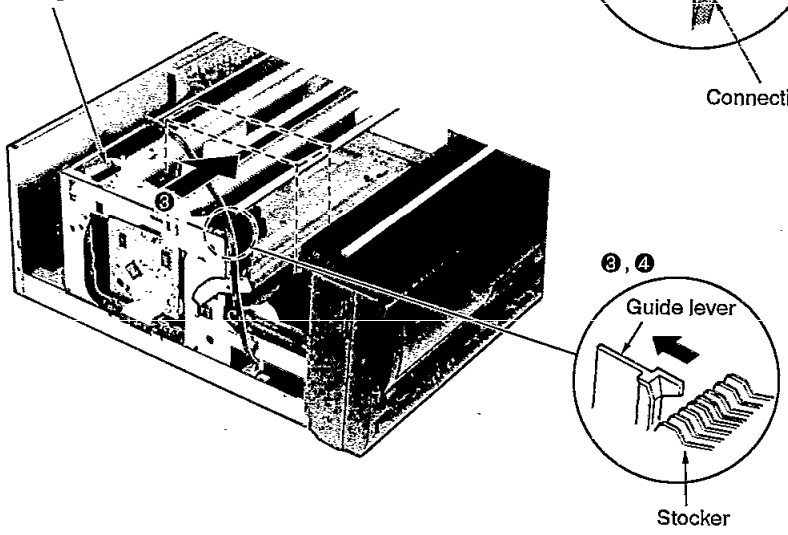
Act.2 Independent traverse deck Reassembly



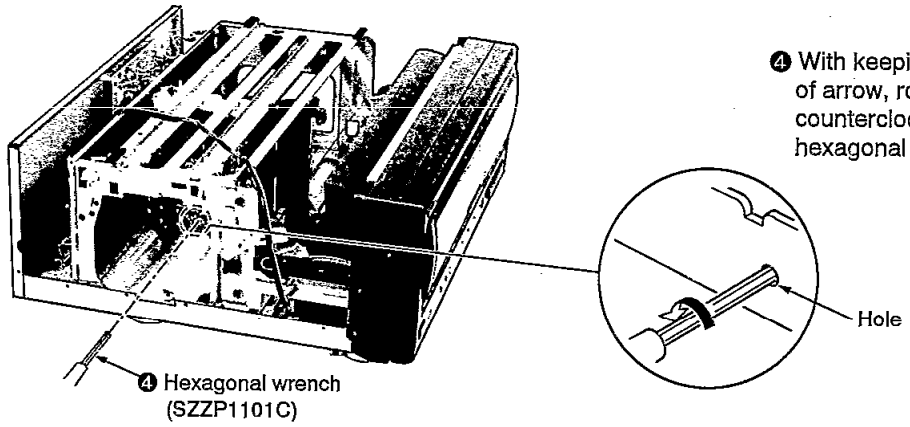
❶ Equip the traverse deck with the loading unit.

❷ Push the guide lever in the direction of arrow with supporting manually not to be fall free the traverse deck.

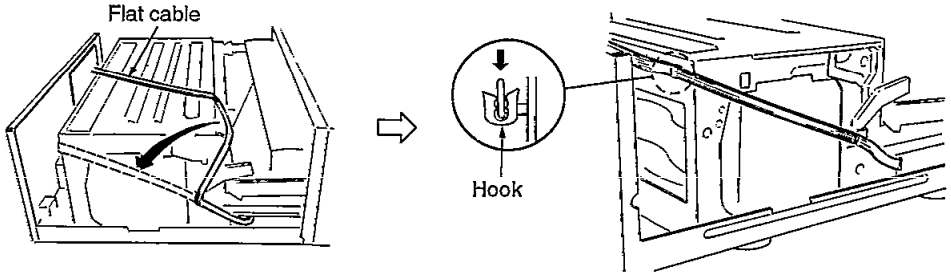
The traverse deck will not fall free as shown above.



❸ Move the guide lever in the direction of arrow and then, move the loading unit to the center with relieving the engagement to stocker.

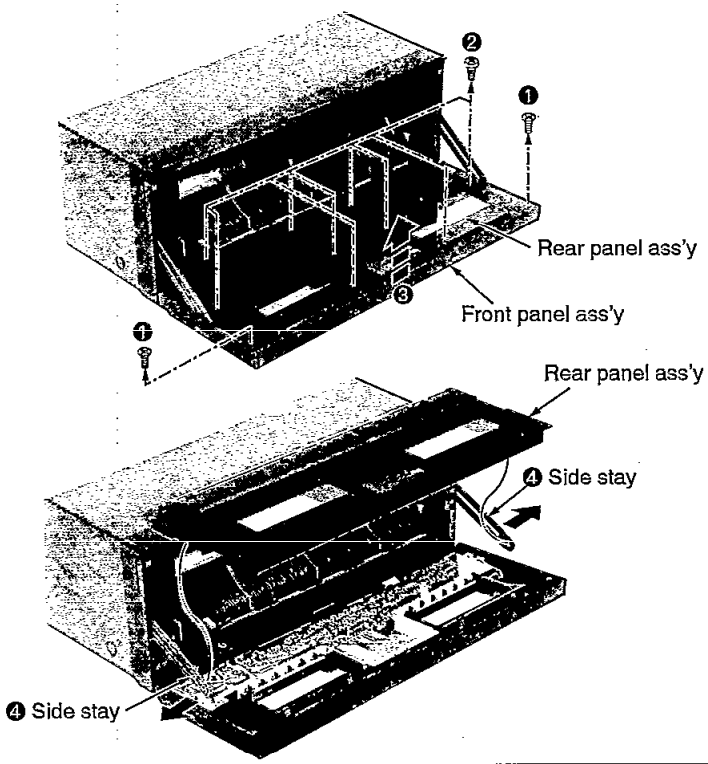


❹ With keeping the guide lever in the direction of arrow, rotate the reduction gear to counterclockwise fulley with 2mm type hexagonal wrench(SZZP1101C)



※ Arrange the flat cable in original form.

Act.3 | Front panel | Disassembly



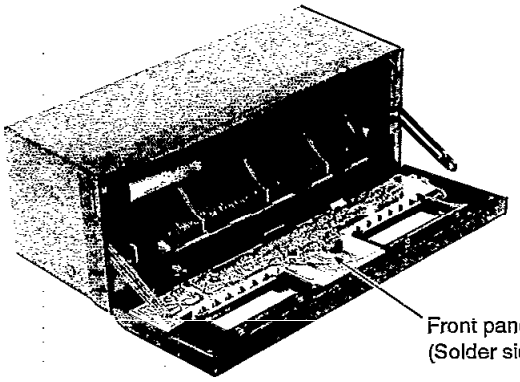
❶ Remove the 2 countersunk screws.

❷ Remove the 10 screws.

❸ Lift up the rear panel ass'y.

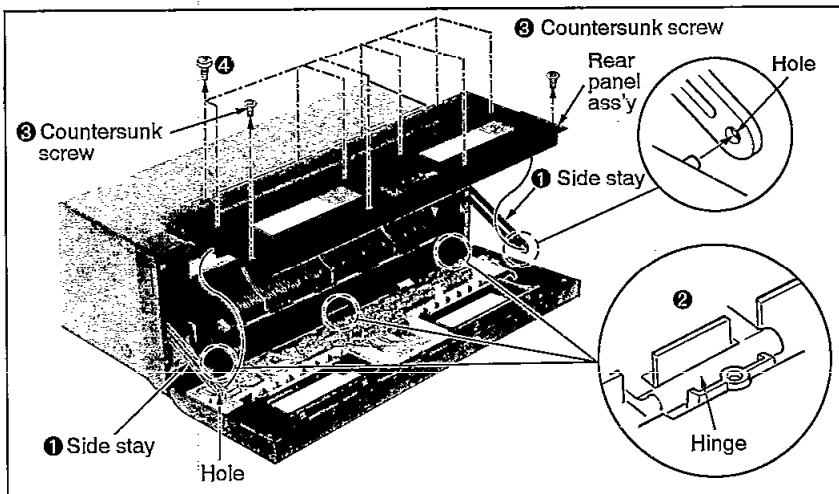
❹ Remove the rear panel ass'y with releasing the both side stays.

Act.3 | Front panel | Operation checks



• Perform the operation checks in the state as shown left.

Act.3 | Front panel | Reassembly



❶ Align the both of back panel with the hole of side stays.

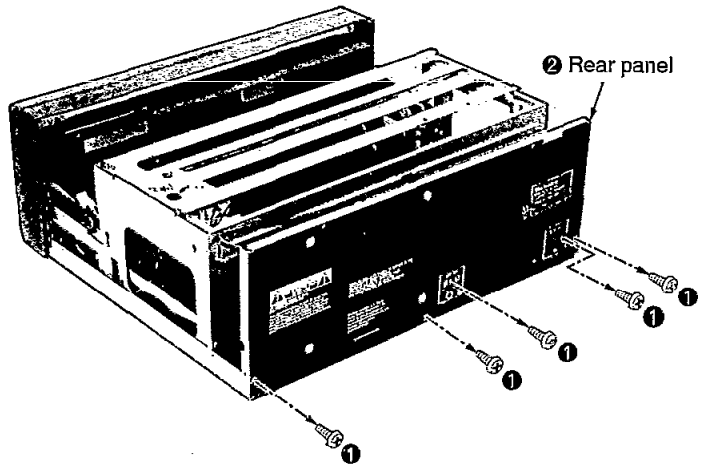
❷ Install the hinges to the rear panel ass'y.

❸ Install the 2 countersunk screws.

Make sure that the countersunk screws are in correct position.

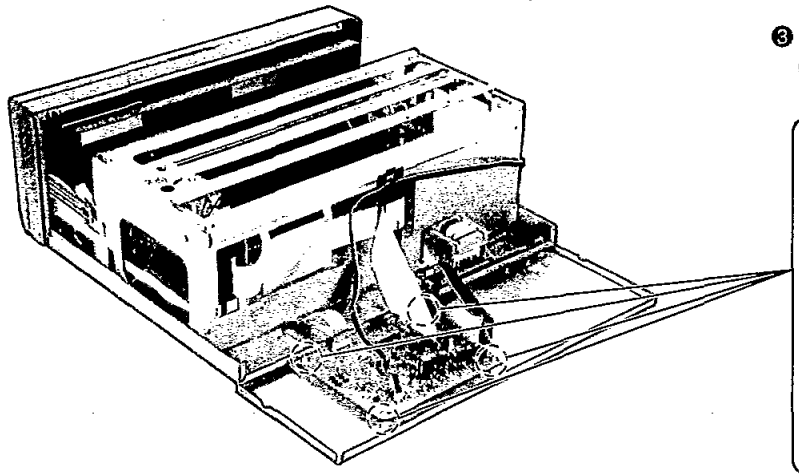
❹ Install the 10 screws.

Act.3 | Main P.C.B. | Disassembly

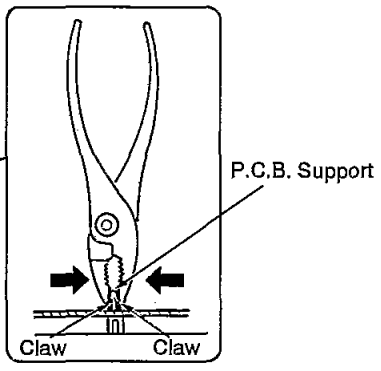


❶ Remove the 5 screws.

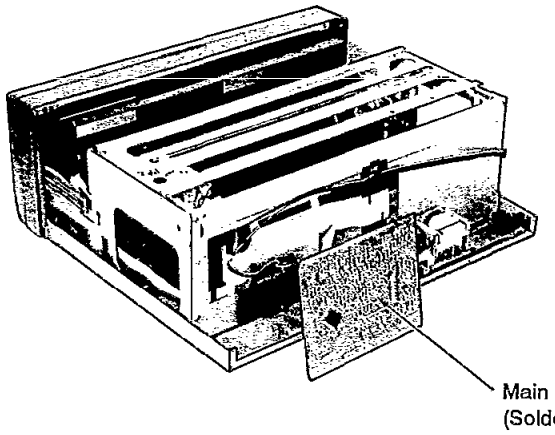
❷ Remove the rear panel.



❸ Release the P.C.B. supports from the main P.C.B.. (Pinch the claws of P.C.B. supports with plier as shown below.)



Act.3 | Main P.C.B. | Operation checks



• Perform the operation checks in the state as shown left.

Act.3 | Main P.C.B. | Reassembly

For reassembly after operation check, perform in reverse order of disassembly (❶–❸).

■ Measurements And Adjustments

Warning: This product uses a laser diode. Refer to caution statements on page 2.

Measuring Instruments and Special Tools

- Test discs
1. Playability test disc (SZZP1054C)
2. Uneven test disc (SZZP1056C)

- Musical program disc (ordinary)
- DC electronic voltmeter (EVM)

PREPARATION

1.Remove the loading unit as shown in Fig. 1.
(Refer to "Handling of the loading unit" on pages 28, 29.)
2.Set the unit in the test mode as follows: hold the STOP and PLAY keys on and set the POWER switch to ON.
(Refer to "Test mode setting" on page 21.)
3.Follow the adjustment procedure.

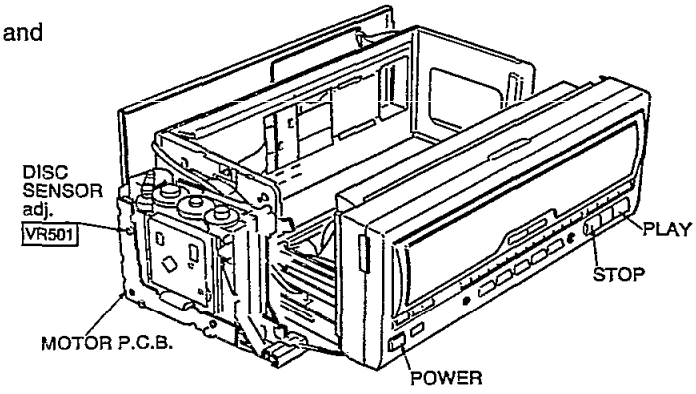


Fig.1

(1)DISC SENSOR ADJUSTMENT

1.Connect the DC electronic voltmeter across **TP501** (+) and **TP502** (−) on the motor P.C.B. as shown in Fig. 2.

2.Adjust **VR501** so that the DC electronic voltmeter read **2.8±0.1V.**

(2)CHECK OF PLAY OPERATION AFTER ADJUSTMENT

＊ Checking Skip Search

1.Play an ordinary musical program disc.
2.Press the skip button to check for normal skip search operation (in both the forward and reverse directions).

＊ Checking Manual Search

1.Play an ordinary musical program disc.
2.Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).

＊ Checking Playability

1.Play the 0.7 mm black dot and the 0.7 mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2.Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

■ Terminal Function of IC's

● IC702 (MN662740RM2): Servo processor/ digital signal processor/ digital filter/ D/A converter

No.	Mark	I/O Division	Function
1	BCLK	O	Serial bit clock output (Not used, open)
2	LRCK	O	L/R discriminating signal output (Not used, open)
3	SRDATA	O	Serial data (Not used, open)
4	DVDD1	I	Power supply (digital circuit) terminal
5	DVSS1	—	GND (digital circuit) terminal
6	TX	O	Digital audio interface signal
7	MCLK	I	Command clock signal
8	MDATA	I	Command data signal
9	MLD	I	Command load signal ("L" : LOAD)
10	SENSE	O	Sense signal (OFT, FESL, NACEND, NAJEND, POSAD, SFG)
11	/FLOCK	O	Optical servo condition (focus) ("L" : lead-in)
12	/TLOCK	O	Optical servo condition (tracking) ("L" : lead-in)
13	BLKCK	O	Sub-code block clock (f=75 Hz)
14	SQCK	I	Sub-code Q register clock
15	SUBQ	O	Sub-code Q data
16	DMUTE	—	Muting input ("H" : MUTE) (Not used, connected to GND)
17	STAT	O	Status signal (CRC, CUE, CLVS, TTSTOP, FCLV, SQCK)
18	/RST	I	Reset signal ("L" : reset)
19	SMCK	—	System clock (f=4.2336 MHz) (Not used, open)
20	PMCK	—	Frequency division clock signal ($f=\frac{1}{192}\times$ Crystal OSC(16.9344MHz) = 88.2 kHz) (Not used, open)
21	TRV	O	Traverse servo control
22	TVD	O	Traverse drive signal

No.	Mark	I/O Division	Function
23	PC	O	Turntable motor drive signal ("L" : ON)
24	ECM	O	Turntable motor drive signal (Forced mode)
25	ECS	O	Turntable motor drive signal (Servo error signal)
26	KICK	O	Kick pulse output
27	TRD	O	Tracking drive signal output
28	FOD	O	Focus drive signal output
29	VREF	I	D/A drive output (TVD, ECS, TRD, FOD, FBAL, TBAL) normal voltage input terminal
30	FBAL	O	Focus balance adj. output
31	TBAL	O	Tracking balance adj. output
32	FE	I	Focus error signal (analog input)
33	TE	I	Tracking error signal (analog input)
34	RFENV	I	RF envelope signal
35	VDET	I	Oscillation det. signal ("H" : det.)
36	OFTR	I	Off track signal ("H" : Off track)
37	TRCRS	I	Track cross signal input
38	/RFDET	I	RF detection signal ("L" : detection)
39	BDO	I	Dropout detection signal ("H" : dropout)
40	LDON	O	Laser power control ("H" : ON)
41	TES	O	Tracking error shunt output ("H" : dropout)
42	PLAY	O	Play signal ("H" : play) (Not used, open)
43	WVEL	O	Double velocity status signal ("H": double) (Not used, open)
44	ARF	I	RF signal input

No.	Mark	I/O Division	Function
45	IREF	I	Reference current input
46	DRF	I	DSL bias terminal (Not used, open)
47	DSLF	I/O	DSL loop filter terminal
48	PLLF	I/O	PLL loop filter terminal
49	VCOF	I/O	VCO loop filter terminal (Not used, connected to GND)
50	AVDD2	I	Power supply (analog circuit) terminal 2
51	AVSS2	—	GND (analog circuit) terminal
52	EFM	O	EFM signal (Not used, open)
53	PCK	O	PLL extract clock (f=4.3218MHz) (Not used, open)
54	PDO	O	Phase comparated signal of EFM and PCK (Not used, open)
55	SUBC	O	Sub-code serial output clock
56	SBCK	I	Sub-code serial input data
57	VSS	—	GND terminal
58	X1	I	Crystal oscillator terminal (f=16.9344MHz)
59	X2	O	
60	VDD	I	Reset signal ("L": reset)
61	BYTCK	O	Byte clock signal (Not used, open)
62	/CLDCK	O	Sub-code frame clock signal (f CLDCK=7.35KHz: Normal)
63	FCLK	O	Crystal frame clock (Not used, open)
64	IPFLAG	O	Interpolation flag terminal (Not used, open)

No.	Mark	I/O Division	Function
65	FLAG	O	Flag terminal (Not used, open)
66	CLVS	O	Turntable servo phase synchro signal ("H": CLV, "L": Rough servo) (Not used, open)
67	CRC	O	Sub-code CRC check terminal ("H": ON, "L": NG) (Not used, open)
68	DEMPH	O	De-emphasis ON signal ("H": ON) (Not used, open)
69	RESY	O	Re-synchronizing signal of frame sync. (Not used, open)
70	/RST2	I	Reset terminal after "MASH" circuit (Not used, connected to power supply)
71	/TEST	I	Test terminal (Normal: "H") (Not used, connected to power supply.)
72	AVDD1	I	Power supply (analog circuit) terminal (1)
73	OUTL	O	Lch audio signal
74	AVSS1	—	GND (analog circuit) terminal (1)
75	OUTR	O	Rch audio signal
76	RSEL	I	Polarity direction control terminal of RF signal (Not used, connected to power supply)
77	CSEL	I	Frequency control terminal of crystal oscillator (Not used, connected to GND)
78	PSEL	I	Test terminal (Normal: "L") (Not used, connected to GND)
79	MSEL	I	"SMCK" terminal frequency select ("L": SMCK=4.2336MHz) (Not used, connected to GND)
80	SSEL	O	"SUBQ" terminal mode select ("H": Q code buffer) (Not used, connected to power supply)

● IC401 (UPD78043F019): System control

No.	Mark	I/O Division	Function
1 ∫ 7	NONE	—	Connected to GND
8	VDD	I	Power supply terminal
9	SBCK	I	Sub-code serial input data
10	NC	—	Not connected
11	SUBC	I	Sub-code serial input clock
12	OPCS	O	Chip select terminal
13	DMUTE	O	Muting control signal
14	SQCK	O	Sub-code Q register clock
15	NC	—	Not connected
16	SUBQ	I	Sub-code Q data
17	/RESET	O	Reset signal output
18	OPREQ2	O	Request signal 2 output
19	OPDTIO	I/O	Data signal input / output
20	AVSS	—	GND terminal
21	OPCLK	O	Clock signal output
22	OPREQ1	O	Request signal 1 output
23	DIR	O	Motor control signal
24	SLIDE	O	Motor control signal
25	LOAD	O	Motor control signal
26	RSTSV	O	Reset signal output
27	SEL1	I	Connected to GND
28	VSS	—	Connected to GND

No.	Mark	I/O Division	Function
29	AVDD	I	Power supply terminal
30	AVREF	I	Power supply terminal (Not used, connected to GND)
31	XT1	—	Not used, connected to GND
32	XT2	—	Not used, open
33	VSS	—	GND terminal
34	X1	I	Crystal Osc terminal (f=4.2336MHz)
35	X2	O	
36	MCLK	O	Command clock signal
37	MDATA	O	Command data signal
38	MLD	O	Command load signal ("L" LOAD)
39 ∫ 42	VSS	—	Connected to GND
43	PWM	O	Motor control signal
44	POFF	I	Power det. terminal
45	POSITION	I	Rotary tray position det. terminal
46	SPEED	I	Loading motor speed sensor signal
47	BLKCK	I	Sub-code block clock
48	IC	—	Not used, connected to GND
49 ∫ 51	VSS	—	Connected to GND
52	VDD	I	Power supply terminal
53	POWER	O	Power ON/OFF output terminal

No.	Mark	I/O Division	Function
54	VSS	—	Connected to GND
55	VSS	—	Connected to GND
56	SINGLE	I	Disc slot det. terminal for single play
57	DISC	I	Disc control signal
58	MLOCK	I	Mechanism det. terminal (S501)
59	CLAMP	I	Mechanism det. terminal(S502)
60	FREE	I	Mechanism det. terminal (S503)
61	PHSEL1	—	Connected to GND
62	STAT	I	Status signal (CRC,CUE, CLVS, TTSTOP,FCLV, QCK)
63	REST	I	Rest position det.

No.	Mark	I/O Division	Function
64	PHSEL2	—	Connected to GND
65	STP1	—	Not used, connected to GND
66	STP2	—	Not used, connected to GND
67 ~ 70	NONE	—	Not connected
71	VPP	I	Power supply terminal (Not used, connected to GND)
72 ~ 80	NONE	—	Not connected

• IC703 (AN8389SE1): Focus coil/ tracking coil/ traverse motor/ spindle motor drive

No.	Mark	I/O Division	Function
1	Vcc	I	Power supply terminal
2	VREF	I	Reference voltage input terminal
3	IN4	I	Motor driver (4) input
4	IN3	I	Motor driver (3) input
5	GND	—	GND terminal
6	NC	—	Not used, connected to GND
7	NRESET	O	Reset terminal (Not used, open)
8	GND	—	GND terminal
9	IN2	O	Motor driver (2) input
10	PC2	I	Turntable motor drive signal ("L" : ON)
11	IN1	I	Motor driver (1) input
12	PC1	O	Not used, connected to GND

No.	Mark	I/O Division	Function
13	PVcc1	O	Driver power supply terminal (1)
14	PGND1	—	Driver GND terminal (1)
15	D1-	O	Motor driver (1) output terminal (-)
16	D1+	O	Motor driver (1) output terminal (+)
17	D2-	O	Motor driver (2) output terminal (-)
18	D2+	I	Motor driver (2) output terminal (+)
19	D3-	I	Motor driver (3) output terminal (-)
20	D3+	I	Motor driver (3) output terminal (+)
21	D4-	O	Motor driver (4) output terminal (-)
22	D4+	O	Motor driver (4) output terminal (+)
23	PGND2	—	Driver GND terminal (2)
24	PVCC2	I	Driver power supply (2)

● IC701 (AN8835SBE1): Servo amp

No.	Mark	I/O Division	Function
1	PDA	I	Focus signal input terminal 1 (Ach)
2	PDB	I	Focus signal input terminal 2 (Bch)
3	VCC	I	Power supply terminal
4	LPD	I	Laser PD signal
5	LD	O	Laser power auto control output
6	RF	O	RF amp terminal
7	RF IN	I	AGC input terminal
8	CAGC	I	AGC detection capacitor input
9	ARF	O	RF signal
10	CSBRT	I	OFTR capacitor connection terminal
11	CEA	I	HPF-AMP capacitor connection terminal
12	BDO	O	Dropout detection control
13	LDON	I	LD APC ON/OFF ("H": ON, "L": OFF)
14	GND	—	GND terminal

No.	Mark	I/O Division	Function
15	/RFDET	O	RF det. signal output terminal ("L" : det.)
16	CROSS	O	Tracking error zero cross output
17	OFTR	O	Off track detection ("H" : det.)
18	VDET	O	Oscillation det. signal ("H" : det.)
19	ENV	O	Envelope signal output terminal
20	TEBPF	I	Oscillation detect input terminal
21	CCRS	I	CROSS capacitor connection terminal
22	TE	O	Tracking error signal
23	FE	O	Focusing error signal
24	TBAL	I	Tracking balance adj. input
25	FBAL	I	Focus balance adj. input
26	VREF	O	Reference voltage output terminal
27	PDE	I	Tracking signal input terminal 1 (E ch)
28	PDF	I	Tracking signal input terminal 2 (F ch)

■ Schematic Diagram(Parts list on pages 63~66,70,71)

Notes:

- **S501:** Lock det. switch (MLOCK) .
- **S502:** Clamp det. switch (CLAMP) .
- **S503:** Clamp det. switch (FREE).
- **S601:** Stop (■) switch.⏻ /ON"(POWER, STANDBY ⏻ /ON)
- **S602,603:** Disc skip switches.(S602:+,S603:-)
- **S604:** Programing (PROGRAM) switch.
- **S605:** Single play (SINGLE ▶) switch.
- **S606:** Pause (❚❚) switch.
- **S607,608:** Track skip switches.
- **S609:** Direct programming (DIRECT) switch.
- **S610:** Power /timer set (CLOCK/TIMER) switch.
- **S611:** Record timer/play timer (◴ REC/◴ PLAY) switch.
- **S612,613:** Deck1 open (DECK1/▲ OPEN) switch.
- **S614:** Deck2 open (DECK2/▲ OPEN) switch.
- **S615:** Super woofer ON/OFF (SUPER WOOFER) switch.
- **S616~620:** Level (LEVEL) switch.
- **S621~631:** Memory set (MEMORY SET ▶▶/▶▶❙) switch.
- **S632:** Text search (TEST SEARCH) switch.
- **S633:** Disc selector (DISC) switch.
- **S634:** Disc enter (DISC ENTER) switch.
- **S635:** Test mode (TEST MODE) switch.
- **S636:** Test edit (TEST EDIT) switch.
- **S637:** Test search (TEST SEARCH) switch.
- **S701:** Rest detector.

- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis.
  Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.
  * The parenthesized are the values of voltage generated during playing (Test disc 1 kHz, L+R, 0 dB) ,others are voltage values in stop mode.
  * AC adaptor is used for power supply.
- : Signal lines.
  ▭▭▭ : Positive voltage lines and negative voltage lines.
  ⇨ : Audio signal lines.
- Important safety notice:
  Components identified by ⚠ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

Caution!

IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

FUSE CAUTION

⊟⊠ This symbol located near the fuse indicates that the fuse used is slow operating type. For continued protection against fire hazard, replace with same type fuse. For fuse rating, refer to the marking adjacent to the symbol.

⊟⊠ Ce symbole indique que le fusible utilisé est à trot. Pour une protection permanente, n' utiliser que des fusibles de mêne type. Ce dernier est indiqué là qù le présent symbole est apposé.

Replacement Parts List

Notes: * Important safety notice:
Components identified by ⚠ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)
Parts without these indications can be used for all areas.
* Warning: This product uses a laser diode. Refer to caution statements on page 2.
* [M] indicates in Remarks columns parts that are supplied by MESA.

Resistors and Capacitors

Notes: * Capacity values are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF) F=Farads (F)
* Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM)
* [M] indicates in Remarks columns parts that are supplied by MESA.

Replacement Parts List

Notes: * Important safety notice:
Components identified by ⚠ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)
Parts without these indications can be used for all areas.
* Warning: This product uses a laser diode. Refer to caution statements on page 2.
* [M] indicates in Remarks columns parts that are supplied by MESA.
