Receiver

## SA-DX930

**Colour**

(K) ... Black Type

**Area**

Suffix for Model No.	Area	Colour
(E)	Europe	(K)
(EB)	Great Britain	
(EG)	Germany & Italy	

Manufactured under license from Dolby Laboratories Licensing Corporation. "Dolby", the double-D symbol and "PRO LOGIC" are trade marks of Dolby Laboratories Licensing Corporation.

This product is manufactured under licence from DTS, Inc. of America.

## Specifications

### AMPLIFIER SECTION

<b>Power output</b>		<b>Frequency response</b>	
DIN 1 kHz ( T.H.D. 1%)	2 X 100 W (6Ω)	PHONO	RIAA standard curve ± 0.8 dB
20 Hz - 20 kHz continuous power output		CD, TAPE, DVD, VCR, TV	10 Hz - 70 kHz, ± 3 dB
both channels driven	2 X 80 W (6Ω)	<b>Input sensitivity and Impedance</b>	
<b>Total harmonic distortion</b>		PHONO	3 mV / 47 kΩ
Rated power at 20 Hz - 20 kHz	0.05% (6Ω)	CD, TAPE, DVD, VCR, TV	200 mV / 22 kΩ
Half power at 1 kHz	0.03% (6Ω)	<b>S/N at rated power (6Ω)</b>	
<b>Power output at the Dolby Pro Logic operation</b>		PHONO	70 dB (IHF, A : 80 dB)
DIN 1 kHz ( T.H.D. 1%)		CD, TAPE, DVD, VCR, TV	75 dB (IHF, A : 85 dB)
Front	2 X 100 W (6Ω)	<b>Tone controls</b>	
Center	100 W (6Ω)	BASS	50 Hz, +10 to -10 dB
Surround	2 X 100 W (6Ω)	TREBLE	20 kHz, +10 to -10 dB
<b>Power bandwidth</b>		<b>Output voltage</b>	
both channel driven, -3 dB	10 Hz - 40 kHz (6Ω)	TAPE REC (OUT), VCR OUT	200 mV
<b>Damping factor</b>	30 (6Ω)	<b>Channel balance (250 Hz - 6.3 kHz)</b>	± 1 dB
<b>Load Impedance</b>		<b>Channel separation</b>	55 dB
Front		<b>Headphones output level and Impedance</b>	430 mV / 300 Ω
A or B	4 - 16 Ω	<b>Sub-Woofer frequency response</b>	7 - 100 Hz, ±3 dB
A and B	8 - 16 Ω		
Center	6 - 16 Ω		
Surround	6 - 16 Ω		
		<b>Digital input</b>	
		Optical	CD, DVD

### ⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

**FM TUNER SECTION**

Frequency range	87.50 — 108.00 MHz
Sensitivity	
S/N 30 dB	1.5 $\mu$ V / 75 $\Omega$
S/N 26 dB	1.3 $\mu$ V / 75 $\Omega$
S/N 20 dB	1.2 $\mu$ V / 75 $\Omega$
IHF usable sensitivity (IHF'58)	1.5 $\mu$ V / 75 $\Omega$
IHF 46 dB stereo quieting sensitivity	22 $\mu$ V / 75 $\Omega$
Total harmonic distortion	
MONO	0.2%
STEREO	0.3%
S/N	
MONO	60 dB (73 dB, IHF)
STEREO	58 dB (67 dB, IHF)
Frequency response 20 Hz - 15 kHz	+1dB, -2dB
Alternate channel selectivity $\pm$ 400 dB	65 dB
Capture ratio	1.5 dB
Image rejection at 98 MHz	40 dB
IF rejection at 98 MHz	70 dB
Spurious response rejection at 98 MHz	70 dB
AM suppression	50 dB
Stereo separation	
1 kHz	40 dB
Carrier leak	
19 kHz	-30 dB (-35 dB, IHF)
38 kHz	-50 dB (-55 dB, IHF)
Channel balance (250 Hz - 6.3 kHz)	$\pm$ 1.5 dB
Limiting point	1.2 $\mu$ V

**Bandwidth**

IF amplifier	180 kHz
FM demodulator	1000 kHz
Antenna terminal	75 $\Omega$ (unbalanced)

**AM TUNER SECTION**

Frequency range	522 — 1611 kHz (9 kHz steps) 530 — 1620 kHz (10 kHz steps)
Sensitivity	20 $\mu$ V, 330 $\mu$ V/m
Selectivity (at 999 kHz)	55 dB
IF rejection (at 999 kHz)	50 dB

**VIDEO SECTION**

Output voltage at 1 V input	(unbalanced)	1 $\pm$ 0.1 Vp-p
Maximum input voltage		1.5 Vp-p
Input/output impedance		75 $\Omega$ (unbalanced)

**GENERAL**

Power consumption	240 W (In standby condition : 2 W)
Power supply	AC 230 - 240 V, 50 Hz
Dimensions (W x H x D)	430 x 158 x 324.5 mm
Weight	9.6 kg

**Notes :**

1. Specifications are subject to change without notice. Weight and dimensions are approximate.
2. Total harmonic distortion is measured by the digital spectrum analyzer.

**Accessories**

**Before Repair and Adjustment**

Disconnect AC power, discharge Power Supply Capacitors C703, C704, C705 and C706 through a 10 $\Omega$ , 5W resistor to ground. DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices. After repairs are completed, restore power gradually using a variac, to avoid overcurrent. Current consumption at AC 230-240 V, 50Hz in NO SIGNAL mode should be 300 ~ 400 mA.

**Protection Circuitry**

The protection circuitry may have operated if either of the following conditions are noticed :

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

**Note:**

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

## ■ Caution for AC Mains Lead

(For "EB" area code model only.)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover, the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

### CAUTION !

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OFF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted, please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

### IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral  
Brown: Live

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

**WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.**

**THIS PLUG IS NOT WATERPROOF—KEEP DRY.**

### Before use

Remove the connector cover.

### How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

Figure B

# Front Panel Controls

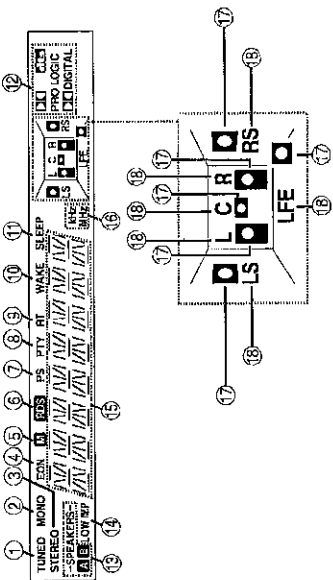

Main unit	
No.	Name
1	Standby/on switch (⏻/⏻)

Press to switch the unit from on to standby mode or vice versa.  
In standby mode, the unit is still consuming a small amount of power.

- 2 DSP mode selector (DSP)
  - 3 PTY selector (PTY SELECTOR)
  - 4 Input indicator
  - 5 Digital input select button/indicator (DIGITAL INPUT)
  - 6 Input selector (INPUT SELECTOR)
  - 7 Volume control (VOLUME)
  - 8 Speaker select buttons (A SPEAKERS B)
  - 9 Timer button (TIMER, -MODE, -TIME)
  - 10 Help/reset button (HELP, -RESET)
  - 11 Headphones jack (PHONES)
  - 12 Standby indicator (⏻)
- When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.

- 13 Wake indicator (WAKE)
- 14 Display section
- 15 Tape monitor button (TAPE MONITOR)
- 16 Bass control (BASS)
- 17 Treble control (TREBLE)
- 18 Balance control (BALANCE)
- 19 Digital signal processor on/defer button (-DSP ON/DEFEAT)
- 20 Subwoofer button (SUBWOOFER)
- 21 DVD 6CH INPUT select button (DVD 6CH INPUT)
- 22 RDS display mode select button (DISPLAY MODE)
- 23 EON button (EON)
- 24 PTY search button (PTY SEARCH)

- 10 Speaker channel select button (LEVEL)
- 11 Delay time button (DELAY)
- 12 TV volume buttons (TV VOL ^)
- 13 Processor standby/on button (PROCESSOR ⏻)
- 14 Muting button (MUTING)
- 15 Audio standby button (AUDIO ⏻)
- 16 Input select buttons (TV, VCR, TAPE, CD, TUNER/BAND, DVD)

# Preparatory Steps

## Speaker settings

These settings should be done to get the most from the unit's reproduction modes.

### Front, center, and surround channel settings

Set the type (LARGE or SMALL) and presence of your speakers. Select "LARGE" if the speakers can produce bass (below around 100 Hz). Select "SMALL" if the speakers cannot produce bass. If you aren't using center or surround speakers select "NONE" so the sound is produced through the front speakers.

### Before proceeding:

The speaker channels are all set to "LARGE" before shipping. If all your speakers are LARGE, you may skip this operation.

- 1 Press [POWER].
- 2 Press [A] and [B] at the same time. "SETTING" appears on the display and then changes to "FRONT."
- 3 Press [B] to set the type of front speakers, "LARGE" or "SMALL." Each time the button is pressed the display switches as follows.
- 4 Press [A] to select "CENTER."
- 5 Press [B] to select the type or presence of the center speaker. Each time the button is pressed the display switches as follows.
- 6 Press [A] to select "SURROUND."
- 7 Press [B] to select the type or presence of the surround speakers. Each time the button is pressed the display switches as follows.
- 8 Press [A] to select "COMPLETE." The settings are now entered into the unit's memory. The previous display reappears after about 3 seconds. If you have made a mistake in the settings, start again from step 2.

.....  
 If you allow about 10 seconds to elapse between settings, the procedure is cancelled, all settings are returned to how they were, and the previous display is restored. Begin again if this occurs.

## Subwoofer channel setting

Press [SUBWOOFER] to select "ON" or "OFF". "SUB-WFR" appears on the display and the current setting, "ON" or "OFF", is shown. Press again to switch between "ON" and "OFF".  
**ON:** select if you are using a subwoofer.  
**OFF:** select if you are not using a subwoofer.

Select "OFF" also when you don't want sound to come from the subwoofer because you are listening to stereo sources.

### For your reference:

The settings remain as they are until changed by the above procedure, even after the power has been turned off.

## The speaker indicators

This part of the display indicates which speakers sound is coming from. If "NONE" or "OFF" is selected during the speaker settings procedure, the corresponding indicators do not light. The surround and center speaker indicators do not light when STEREO mode is selected.

# Basic Operations

Before operation, set VOLUME to the "MIN" position.

**1** Press [POWER].

**2** Press [A] and/or [B] to select the speaker system(s) to be used.  
A and B refer to the speaker terminals at the rear of the unit.  
If the button is pressed once more, the indicator will switch off and no sound will be heard from the speakers.

**3** Turn [INPUT SELECTOR] to select and start the desired source.  
(Refer to the appropriate operating instructions for details.)  
The indicator corresponding to the selected source lights and the source is shown on the display.

- TAPE (MONITOR): To listen to cassette tapes
- VCR: To watch video tapes
- TV/DSS: To watch TV or DSS
- DVD: To watch DVD
- CD: To listen to compact discs
- TUNER: To listen to radio broadcasts
- PHONO: To listen to phono discs

**NOTE**  
To watch a video (or DVD) or the TV, set the TV to either the TV mode or VIDEO mode.

**4** (only if you select TV/DSS, CD or DVD in the above step) Press [DIGITAL INPUT] to select "DIGITAL" or "ANALOG".  
Switches between "DIGITAL" and "ANALOG" each time the button is pressed.

The "DIGITAL INPUT" indicator lights when DIGITAL selected.

**5** Adjust the volume level.

.....  
For your reference  
• If the SURROUND, DTS or SFC mode has been selected  
After displaying the selected source, the display will then change to show the SURROUND, DTS or SFC mode.

If the source chosen was TUNER then the display will change again to show the frequency.

• If you are using VCR and you select TAPE, CD, TUNER, or PHONO  
The picture will remain on the screen.

**When you finish listening**  
Be sure to reduce the volume level, and switch the power to the standby condition by pressing [POWER].

For front speakers with an impedance under 8 Ω

Press and hold [A] or [B] until "LOW IMP" lights up on the display.

If even one of the speakers being used has an impedance under 8 Ω, press and hold down either [A] or [B] for 4 seconds or more to set the impedance on the main unit to LOW.

(Press and hold down once again for 4 seconds or more to turn it off.)

Note that when "LOW IMP" is illuminated, speakers A and B cannot both be used at the same time.

To change a speaker:  
e.g. To use speaker B, press [A] ( " " goes out), and then press [B] to activate speaker B.

### The TAPE (MONITOR) indicator

This indicator lights in the following two situations:  
1. While TAPE is selected.  
2. While TAPE MONITOR is in use.

To use the tape monitor:  
If [TAPE MONITOR] is pressed while a source other than TAPE is selected, the "TAPE (MONITOR)" indicator lights and the tape monitor comes on.

Sources other than tape can still be selected with [INPUT SELECTOR] while the "TAPE (MONITOR)" indicator is on.  
Press [TAPE MONITOR] again to turn the tape monitor off.

(See "Making a recording" for details on how to use the tape monitor during recording.)

### NOTE

- The tape monitor cannot be used when TV/DSS, DVD, or CD digital input is being used.
- If you are using the tape monitor and you select a digital input source, the tape monitor switches off.

## About the HELP function

If you make a mistake in operation or if sound output stops due to some operation which was performed, the HELP function displays information which can be useful for indicating the method by which this condition can be remedied.  
If "ERROR" or scrolling characters (for instance, "SPEAKER OFF NOW") appear on the display during operation, carry out the following operation.

Press [-HELP, -RESET].

The method for remedying this situation will be displayed.

### For your reference

If the above button is pressed for 2 seconds or more until "RESET" appears on the display, the operation settings for the unit will be initialized to the settings made at the time of shipment. However, any broadcasting stations which have been preset into memory will not be erased at this time.

# Digital Signal Processor and Other Sound Modes

You can take advantage of the following modes with this unit.

## STEREO mode

Use this mode when you want to listen to stereo sources, whether they are digital or analog, or when you want to playback Dolby Digital or DTS sources through two channels. The sounds usually fed through the other speakers are down-mixed so they are output through the left and right front speakers. There may be some change in the overall sound when surround sources are down-mixed.

## SURROUND mode

By selecting this mode while digital input is being used, the unit automatically determines the kind of digital source being used (Dolby Digital, Dolby Surround, or DTS), and processes it accordingly. Select this mode also when you are playing back an analog source, VCR for example, that has been recorded in Dolby Surround.

Software with the following mark can be played back in this mode.

## DTS mode

Select this mode if the DTS source you are playing back is not recognized by the SURROUND mode.

Software with the following mark can be played back in this mode.

## SFC mode

The SFC (Sound Field Control) function gives presence and spread thereby enhancing and enriching the music or movie. Read the following explanations better understand how to make your selection.

**NOTE**  
SFC is designed to add surround-like effects to stereo sources. Select the appropriate mode when playing back Dolby Digital, DTS, or Dolby Surround sources.

## HALL

This mode imparts a reflection and spread which will make you feel as if you are in a large concert hall.

## CLUB

Like a jazz club, this mode provides an exciting and intimate atmosphere. It simulates the sound field of a relatively small room having a low ceiling and hard reflective surfaces; for a "live" sound with enhanced presence to bring the performers up close.

## LIVE

Primarily for vocal pieces, this mode adds gloss to the vocals and you'll feel as though you were hearing a live stage performance.

## THEATER

You can clearly perceive the directions and source of the movie. Real ambience of sound can also be recreated naturally using this mode.

## SIMULATED (SIM SURR)

Choose this mode if little or no sound will be heard from the surround speakers. You can feel as if you were in a more expanded space adding to the actual sound from the source. This mode also adds effect to monaural sources by outputting sound from surround speakers.

**If reception is weak or "TUNED" fails to light completely while playing the radio**

Press and hold [-DSP ON/DEFEAT] until "DEFEAT" appears on the display. Press and hold again to turn DSP on. The STEREO mode is selected.

This allows you to play back sound without it passing through the digital signal processor (DSP). When this is selected, no sound will go through the center or surround speakers or the subwoofer.

## NOTE

When "DEFEAT" is selected the sound mode indicators (STEREO, SURROUND, DTS and SFC) go out and these modes can not be selected.

### Preparing for surround sound

Do these steps to get the most from your home theater system.

#### Adjusting speaker output level

by remote control only

Adjust speaker level so the output from all the speakers is the same apparent level when sitting where you would normally enjoy a source.

#### Preparation

- Turn ON the speakers with [SPEAKERS A].
- Adjust front speaker balance with [BALANCE].

- 1 Press [SURROUND] to select "SURROUND".  
"SURROUND" appears on the display.

**Note**  
This procedure must be done in the SURROUND mode.

- 2 Press [TEST] to output the test signal.

The "TEST" appears on the display.  
The signal is output from each speaker in order for about two seconds each.

- L: Front speaker (left)
- C: Center speaker
- R: Front speaker (right)
- RS: Surround speaker (right)
- LS: Surround speaker (left)
- SW: Subwoofer

Speakers set as "NONE" or "OFF" are skipped.

- 3 Press [VOL (- or +)] to set the volume level normally used for enjoying the source.

- 4 Press [LEVEL] to select the speaker channel to adjust.

The current level appears on the display.  
Press again to change the speaker channel.

Speakers set as "NONE" or "OFF" are skipped.

- 5 Press [-] or [+] to adjust the level to the same apparent level as the front speakers.

The four channels can be adjusted between -10 dB and +10 dB, with zero being the current level of the front speakers.

- 6 Repeat 4 and 5 for each speaker channel.

To stop the test signal

Press [TEST].

### Adjusting the delay time

by remote control only

By adjusting the delay time, the difference in the distance from the viewing and listening position to the front speakers and the distance to the center speaker and surround speakers can be offset and made equal. This achieves better sound localization and makes a more like-like reproduction of the sound field possible.

#### Preparation

Prepare the unit in this manner even if you intend to playback analog sources.

- Select "DVD" with [INPUT SELECTOR] but ensure the source itself is off.
- Press [DIGITAL INPUT] to select "DIGITAL".

#### Note

Please note that following occurs if delay time is adjusted while playing back a source or analog input is selected:

- Adjustment is not possible if the source is DTS format.
- While the DOLBY DIGITAL indicator is alight, the center channel cannot be adjusted and 15 ms are added to the delay times listed for surround channel.

- 1 Press [SURROUND] to select "SURROUND".  
"SURROUND" appears on the display.

- 2 Press [DELAY] to select the channel to be adjusted.

The current delay time is displayed.

Press again to change the speaker channel.  
C (Center speaker) → S (Surround speaker)

Speakers set as "NONE" are skipped.

- 3 Press [-] or [+] to set the delay time.

The delay time changes with each press.

The increments depend on the channel being adjusted.

Speaker	Available delay time setting (ms)
Center	0, 1, 2, 3, 4, 5
Surround	0, 5, 10, 15

The display is restored if a button isn't pressed for 4 or more seconds.

## Enjoying sound modes

**1 Turn [INPUT SELECTOR] to select the desired source.**

**2 Start the desired source.**

**3 Turn the sound mode selector to select the desired mode.**  
The selected reproduction mode appears on the display.

STEREO: STEREO  
SURROUND: SURROUND

One of the following indicators lights to indicate the source.

- ① **DIPRO LOGIC:** Lights if the source is Dolby Surround format.
- ② **DTS:** Lights if the source is DTS format.
- ③ **DIGITAL:** Lights if the source is Dolby Digital Format.

DTS: DTS  
SFC: HALL, CLUB, LIVE, THEATER or SIM SURR

### Note

Select the mode to suit the source's format. Dolby Digital and DTS, for example, cannot be played back in an SFC mode. If either **DIPRO** or **DIGITAL** appear while using SFC, use SURROUND instead.

**4** (only if you select SFC in the above step)  
**Turn [MODE] to select the desired SFC mode.**

### For your reference

You can set the sound mode for each source. Each source will retain the selected mode.

### Note

Ensure the front speakers are connected to the A terminals when you use SURROUND, DTS and SFC modes. The SURROUND, DTS and SFC modes cannot be turned on if "SPEAKERS B" is selected.

Only Dolby Digital, DTS or PCM signals \* can be reproduced through the digital terminal.

- \* The digital input signal of sampling frequencies 96 kHz and other signal formats such as MPEG cannot be reproduced on this unit.
- When playback is started, the sound may be cut or interrupted before the input source is confirmed as Dolby Digital or DTS.

\* PCM signal: This refers to the recording format of signals (44.1 kHz, linear 16 bits) used for audio CDs.

## Adjusting field of sound in the SFC mode

By remote control only

With this unit, you can adjust speaker volume. Adjust the field of sound while listening to a source.

**To adjust the volume of each speakers**

**1 Press [LEVEL] to select the speaker channel to adjust.**  
The output level appears on the display.

Each time the button is subsequently pressed, the speaker whose level is to be set is selected in the listed sequence.

C → RS → LS → SW

Speakers for which "NONE" or "OFF" has been set are skipped.

**2 Press [-] or [+] to adjust the output level.**

Channels C, RS, LS, and SW can be adjusted between -10 dB and +10 dB.

**To adjust the delay time of the surround speakers**

**1 Press [DELAY].**

**2 Press [-] or [+] to adjust the delay time.**

Select a delay time to suit your individual needs. Delay time can be set at 10 milliseconds (ms) intervals between 10 and 100 ms. The factory settings for each mode are 50 ms.

### For your reference

Settings for volume level and delay time can be done for each SFC mode.

# Making a recording & using the remote control

**Note**  
You cannot record a source connected through a digital terminal.

**A**  
**Recording on a tape deck**

Before recording, prepare the tape deck. See the tape deck's operating instructions for details.

**1 Turn [INPUT SELECTOR] to select the source to be recorded.**  
Any source can be selected except TAPE.

**2 Begin recording on the tape deck.**  
Follow your tape deck's operating instructions.

**3 Begin the source to be recorded.**  
Follow your equipment's operating instructions.

**To monitor the recorded sound**

It is possible to check the sound being recorded if your tape deck is a 3 head system.

**Press [TAPE MONITOR] on this unit and set the monitor button on the tape deck to "TAPE".**

Press [TAPE MONITOR] once again to turn it off.

**C**  
**Recording on a VCR**

Before recording, prepare VCR. See the VCR's operating instructions for details.

**1 Turn [INPUT SELECTOR] to select the source to be recorded.**  
Any source can be selected except VCR and TAPE.

**Note**  
Recording from the tape deck is not possible.

**2 Begin recording on the VCR.**  
Follow your VCR's operating instructions.

**3 Begin the source to be recorded.**  
Follow your equipment's operating instructions.

Basic operations	
To turn the unit ON/OFF	→ <p>Once the unit has been set to ON, it can be turned ON and OFF simply by pressing [TUNER BAND].</p> <p><b>Note</b> After turning the TV, VCR or DVD player ON or OFF, always press [TUNER BAND] before pressing [ ] when turning the receiver ON and OFF.</p>
To select an input source and switch the remote control to each operation mode	<p><b>Note</b> • PHONO can not be selected with this remote control. • TAPE MONITOR cannot be controlled with the [TAPE] button.</p>
To turn on the STEREO mode	
To turn on the SURROUND mode	
To turn SFC on and select the mode	<p>Changes as follows each time the button is pressed. HALL → CLUB → LIVE → THEATER └─ SIM SURR (SIMULATED) ─┘</p>
To output a test signal	<p>When the SURROUND mode is on</p> <p>Press once more to stop the test signal.</p>
To select the speaker channel and adjust its output level	<p>When the SURROUND, DTS or SFC modes are on</p> → <p><b>Note</b> The last channel to be adjusted is remembered so you can adjust it again without having to press [LEVEL].</p>
To select the speaker channel and adjust its delay time	<p>When the SURROUND or SFC modes are on</p> → <p><b>Note</b> The last channel to be adjusted is remembered so you can adjust it again without having to press [DELAY].</p>
To mute the sound level	<p>The message "MUTING ON NOW" runs repeatedly from right to left across the display as long as the muting function is on. Press once more to return to the original volume.</p>
To adjust the volume level	

Point the remote control toward the receiver

## ■ Operation Checks

**"ATTENTION SERVICER"** Some chassis components may have sharp edges. Be careful when disassembling and servicing.

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following Index when checks or replacement are required.

### • Contents

	page
• Checking Procedure For Each Major P.C.B. ....	11 ~ 13
• Main Component Replacement Procedures .....	13 ~ 14

## ■ Checking Procedure For Each Major P.C.B.

**To remove Front Panel and check Panel P.C.B., Operation P.C.B. and Headphone Jack P.C.B.**

**Step 1**

Remove the top cabinet.

**Step 2**

**b** X 3

**b**

**Step 3**

Remove the Front Panel in the direction of arrow.

**Operation P.C.B.**  
(Component Side)

**Panel P.C.B.**  
(Component Side)

**Headphone Jack P.C.B.**  
(Component Side)

**Step 7**

Pull out the Headphone Jack P.C.B.

**Step 4**

Remove all Knobs and Nuts from Front Panel.

Nut Knobs

**c**

**Step 5**

**c** X 13

**c**

**d** X 1

**Step 6**

[XTBS26+10J]

[RHD26016]

**To remove Rear Panel and check Main P.C.B. and Power P.C.B.**

**Step 4**

Release the AC In/Out P.C.B. catches and the fan motor connector, then pull out the rear panel in the direction of arrow.

**AC In/Out P.C.B.**

Catch

Connector

**Step 1**

Remove the top cabinet.

**Step 2**

Remove the front panel.

[XTBS3+8JFZ1] (Black)

**Step 5**

**f** X 12

**Step 3**

**b** X 17

**b**

**Step 6**

**e** X 2

**f**

**f**

**f**

**■ Main Component Replacement Procedures**

**1. Replacement of the Power IC and Regulator Transistor**

**Step 1**  
Remove the top cabinet.

**Step 2** Cut the joints as shown below. (8 joints)

**Step 3** Fold the joints. (8 joints)

**Step 4**  
Desolder the terminals of Power IC and Regulator Transistor.

**Step 5**

Remove all screws (b) for the Tuner, AC-3 and Pro Logic P.C.B.'s at the Rear Panel and pull out these P.C.B.'s from the Main P.C.B.

**Step 7**

(g) X 3

•The PROTO Offset Screwdriver No. 34-1/4 is recommended for use in the application above.

**Installation of the bottom cover after replacement**

**Step 1**

Flip over the bottom cover

**Step 3**

Screw (XTB3+8J)  
(Prepare this screw to fix the bottom cover.)

**Step 2**

Align the ribs of bottom cover into the lugs.

**CAUTION**

1. After replacing the power IC or regulator transistor, apply a sufficient quantity of compound grease (RFKX0002/SZZ0L15) between the heat sink and the power IC or regulator transistor (Radiation of power IC).
2. Tighten enough the screws (g) after replacing the power IC and regulator transistor. Otherwise, the heat radiation works little.
3. When installing or removing the power IC or transistor holder, be sure to use an offset screwdriver.

- A long straight screwdriver cannot be used for removing or mounting the screws since its long grip interferes with the neighbouring P.C.B. (See Fig.1)
- A short straight screwdriver may be used for removal, but cannot be used for mounting because the limited space in the unit will not allow sufficient tightening torque.(See Fig.2)

A long straight screwdriver

Fig.1

A short straight screwdriver

Fig.2

- Insufficient tightening will cause poor heat dissipation from the power IC and regulator transistor and, in the worst case, may lead to their thermal breakdown.

## ■ Terminal Functions Of ICs

### • IC901 (M38B57M6127F) System Microprocessor

Pin No.	Mark	I/O	Function
1~2	KEY2~KEY1	I	Key Input 1 ~ 2
3	THERM/OVLD	I	Thermal/Over load input
4	KEY4	I	Key Input 4
5	OVERLOAD2	I	Over load input 2
6	FMST	I	Stereo signal detect terminal
7	WAKE	-	Wake up timer LED
8	RDS_DI	-	Control of RDS IC (Not used,open)
9	REMOTE	I	Remote control terminal
10	RESET	I	Reset detect terminal
11	RDS_CK	-	Control of RDS IC (CK) clock signal
12	RDS_DT	-	Control of RDS IC (DT) data signal
13	GND	-	GND terminal
14	XIN	I	Crystal oscillator terminal ( 4 MHz )
15	XOUT	O	Crystal oscillator terminal ( 4 MHz )
16	VDD (+5V)	-	Power supply terminal +5V
17	LED_CK	O	LED driver IC (CK) clock signal
18	LED_DATA	O	LED driver IC (DT) data signal
19	SFC1	I	SFC mode encoder input 1
20	SFC2	I	SFC mode encoder input 2
21	SEL1	I	Selector encoder for input 1
22	HOLD	I	Blackout detection terminal
23	SEL2	I	Selector encoder for input 2
24	D.PASS	O	DSP signal selector
25	RLY	-	Relay control output
26	LOUDNESS	O	Loudness control output
27	-	-	Not used.
28	VEE	-	Power supply for FL driver
29	S/C_SP	O	Surround/Center speaker control output

Pin No.	Mark	I/O	Function
30	SP_B	O	Speaker B control output
31	SP_A	O	Speaker A control output
32	AF_MUTE	O	Muting control output
33~48	SEG16~SEG1	O	FL segment signal output
49~58	DEG1~DEG10	O	FL digit signal output
59	INIT_IN	I	Diode input initial settings
60	VOL_DOWN	O	Volume control output (Down)
61	VOL_UP	O	Volume control output (Up)
62	-	-	Not used.
63	IF_DATA	I	Serial data signal
64	LIMITER	O	Power limiter control output
65	T.CE	O	Tuner control (CE) chip enable signal
66	T.CK	O	Selector/Tuner (CK) clock signal
67	T.DT	O	Selector/Tuner (DT) data signal
68	SUR1	I	Encoder of surround mode selector input1
69	SUR2	I	Encoder of surround mode selector input2
70	COM_CK	O	Common clock signal
71	COM_DO	O	Common digital output signal
72	COM_DI	I	Common digital input signal
73	AVSS	-	GND for A-D converter
74	VREF	-	Reference voltage for A-D converter
75	SD	I	SD signal detect input
76	COM_REQS	O	Common serial request output
77	HELP_LED/RDS_CE	O	Help LED control output
78	COM_REQM	O	Common mechanical request output
79	VIDEO_B	O	Video selector control output B
80	VIDEO_A	O	Video selector control output A

	: - B Line		: FM Signal Line
	: FM/AM Signal Line		: FM OSC Signal Line
	: AM Signal Line		
	: AM OSC Signal Line		

- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis. Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.

< > : FM

### • Importance safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

### Caution !

IC, LSI and VLSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminium foil.
- Ground the soldering iron.
- Do not touch the pins of IC, LSI or VLSI with fingers directly.
- Put a conductive mat on the work table.

# Cabinet Parts Location

## ■ Replacement Parts List

**Notes:** \* Important safety notice :

 Components identified by  $\triangle$  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

\* The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indication can be used for all areas.

\* [M] in Remarks column indicates parts that are supplied by MESA.

## ■ Resistors & Capacitors

**Notes :** • Important safety notice:

 Components identified by  $\triangle$  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indication can be used for all areas.

- [M] in Remarks column indicates parts that are supplied by MESA.

- Capacitor values are in microfarad ( $\mu$ F) unless specified otherwise, P=Pico-farads (pF) F=Farads (F)

- Resistors values are in ohms, unless specified otherwise, 1k=1,000(OHM), 1M=1,000k(OHM)

## ■ Packing Materials & Accessories

- Notes :**
- \* Important safety notice : Components identified by  $\triangle$  mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
  - \* The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)
  - \* Parts without these indication can be used for all areas.
  - \* The "(SF)" mark denotes standard part.
  - \* [M] in Remarks column indicates parts supplied by MESA.
  - \* Remote Control Unit : Supply period for three years from termination of production.
  - \* Reference for O/I book languages are as follows :
