

# SURECAL

AUTOMATED CALIBRATION SOFTWARE

- Permanent data archiving
- Exporting of calibration results
- Streamlined user displays
- Previews of graphical hook-up instructions
- Easier manipulation of data files
- Easier setup of flexible standards
- Display of WORD documents
- Faster selection of calibration procedures

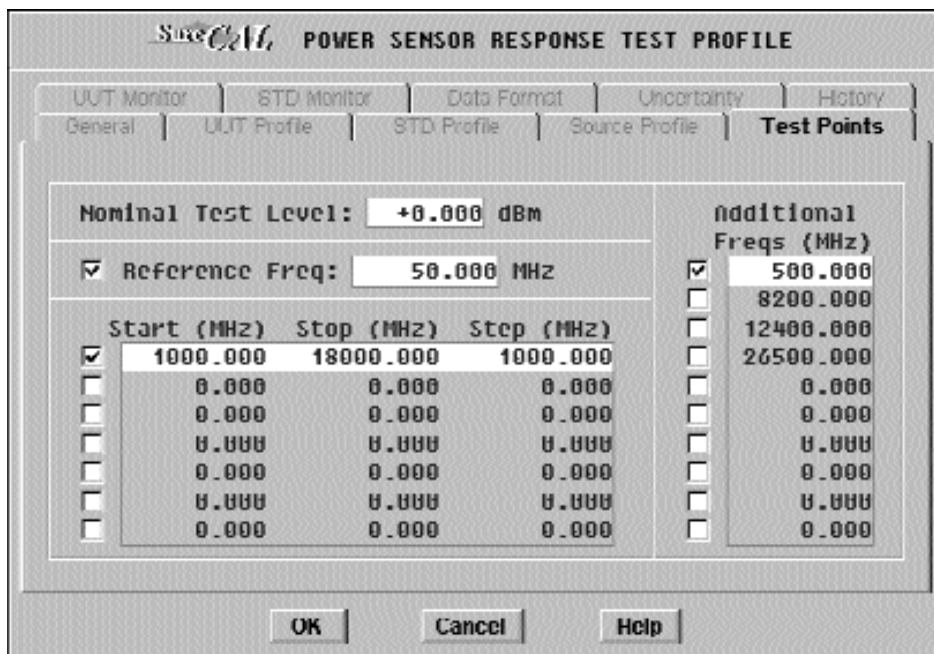

SureCAL was developed by calibration engineers and technicians who are determined to cut the high cost of manually calibrating and maintaining your equipment.

SureCAL is the complete TEGAM solution for all your automated testing needs. SureCAL has TEGAM drivers and procedures, which allow you to streamline your System IIA, and OCS2500 calibration with one software package.

SureCAL Test Manager for Windows lets you navigate easily with your flexible standards, including equipment from Fluke, Hewlett Packard, Keithley, TEGAM, and Tektronix.

Hundreds of SureCAL procedures are available to reduce your test time while assuring accuracy.

If you would like to include SureCAL Software with your purchase of a TEGAM instrument, call us at (440) 466-6100 for your FREE demonstration software CD.

**Upon receipt of the software...  
...you can download onto your workstations  
and start saving time immediately.**

... And here are some samples of time savings from SureCAL when combined with TEGAM instruments:

## OCS2500 Scope Calibration System

Test Equipment	Manual Test (minutes)	SureCAL Test (minutes)	SAVINGS (minutes)
Tektronix TDS Series Scopes	279	31	238

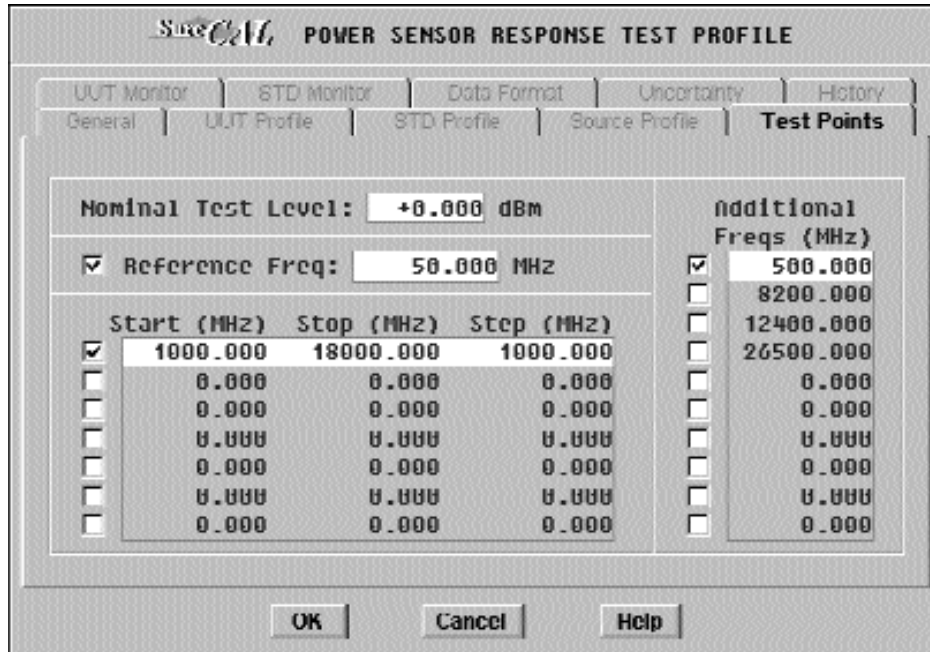

## System IIA Power Sensor Calibration System

Test Equipment	Manual Test (minutes)	SureCAL Test (minutes)	SAVINGS (minutes)
TEGAM 1807A	471	33	438
TEGAM F1119	371	22	349
TEGAM F1116	371	22	349
TEGAM F1117A	471	33	438

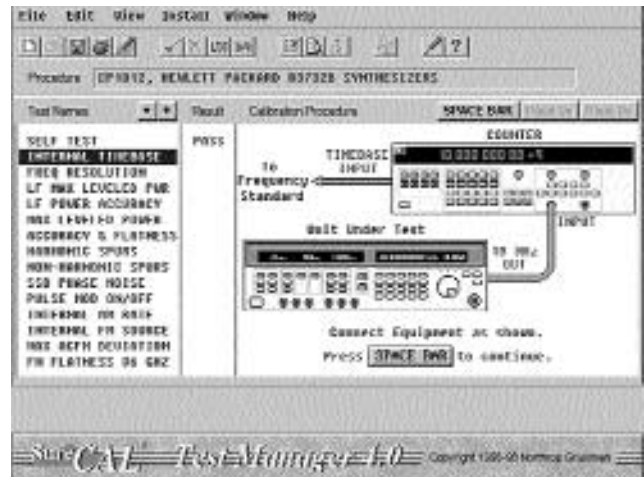

YOUR GLOBAL SOURCE FOR TEST AND MEASUREMENT SOLUTIONS

Customers with the most demanding test requirements can now tailor their own calibration profiles using our new flexible **POWER SENSOR RESPONSE TEST PROFILES.**

## SureCAL Test Manager provides:

- Tool bars for fast access
- Permanent data archiving
- Exporting of calibration results
- Streamlined user displays
- Graphical hook-up instructions
- Easier manipulation of data files
- Easier setup of flexible standards
- Capability to launch Word®, Excel®, Access® and other utilities
- Faster selection of calibration procedures

**Plus a host of other improvements to simplify its use and improve your productivity.**
