

SYSTEM IIA

TRADE-IN PROGRAM

- For a limited time, you can save up to \$3,500 on the purchase of new wider frequency range RF Transfer Standards by trading in your older standards!
- New RF Power Transfer Standards do the work of two older standards!
- New RF Power Transfer Standards save time and money!

RF Standards Trade-In Program

TEGAM or Weinschel, old or new, feedthrough or terminating, your Coaxial RF Power Transfer Standards may qualify for trade-in credit on the purchase of new F1130, F1135, M1130, and M1135 RF Power Transfer Standards.

The F1130 & M1130 Coaxial RF Power Transfer Standards measure RF power from 100 kHz to 18 GHz. The F1135 & M1135 Coaxial RF Power Transfer Standards measure from 10 MHz to 26.5 GHz. These products each allow the use of only one standard in applications that previously required two. A tremendous value to laboratories that regularly calibrate RF devices, they drastically improve calibration labs' productivity and efficiency by eliminating time spent changing standards and by cutting annual calibration costs in half. The F/M1130 & F/M1135 are so accurate, they achieve the quality of results normally found only in primary standards laboratories. See their individual

data sheets for additional details and specifications

All units come with ANSI/NCSL Z540-1-1994 NIST traceable calibration data. A2LA Accredited Calibrations are optional.

If you meet the trade-in criteria, you can save up to \$3,500 on the purchase of these new wider frequency band RF Power Transfer Standards by trading in your older standards. A credit of \$1,750 toward the purchase of a new standard will be offered for each trade-in unit. Maximum trade is two qualified units for each new unit purchased (\$3,500 credit). Trade-ins must be in good working order. Purchase orders should be issued for the list price and credit will be issued when the trade-in has passed inspection at TEGAM.

Be sure to take advantage of this time and money-saving opportunity! Contact TEGAM at 440-466-6100 or 1-800-666-1010 for details.
