

Temperature & Humidity Controller

HUMIDITY CONTROLLERS AND TRANSMITTERS

- Included duct probe may be up to 1,000 feet from the controller
- Stainless steel probe (10" long, .75" diameter)
- State-of-the-art thin film polymer sensor
- Recorder outputs
- Two 5 Amp, 250 VAC SPDT relays for setpoint output
- 1/8 DIN metal enclosure with panel mounting bracket
- Digital display of setpoints, bandwidths, and measured values

The CSP Series measures and displays Relative Humidity (RH) and Temperature. It is also a setpoint controller. The controller output consists of two-5 Amp 250 VAC SPDT relays, one for RH and one for Temperature. The setpoint and dead band controls are independent of each other, which makes setting these parameters fast and simple. The CSP also has recorder outputs for RH and Temperature. The included probe can be duct or wall mounted up to 1,000 feet from the controller.
