53B-CCX CHAINED CARD CAGE

DESCRIPTION

The 53B-CCX Chained Card Cage is a CDS Smart Hardware System configured for adding additional Card Cages (2 through 10) to any 53/63 Series System configuration.

The configured 53B-CCX System consists of the following hardware and documentation items:

- 53B-003 Card Cage with Rack Mounting Brackets and Handles (pair) and Chassis Slides (Pair)
- 53A-123 Communications Card
- 53A-145 Chaining Card
- 53A-171 Control Card
- 53A-743 Data Cable (5 Meters)
- 53 Series Operating Manual in binder P/N 00000-10022
- 53 Series Service Manual in binder P/N 00000-20022

Each of the above hardware items is described in its respective Operating and Service Manual.

INSTALLATION

The 53B-CCX System is shipped with the card cage handles, the rack slides and rack mounting brackets (ears) attached to the 53B-003 Card Cage.

Instructions for installing the 53A-123 Communications Card, the 53A-171 Control Card, the 53A-743 Data Cable in the 53B-003 Card Cage are contained in the 53/63 portion of the Getting Started section of the 53/63 Series Operating Manual.

Rack Mounting

The portion of the rack slides that are to be installed in the 19 inch NEMA equipment rack where the 53B-CCX is to be mounted, are boxed as a separate item in the 53B-CCX shipping container. Included in the rack slide box are the hardware and extension brackets to attach the rack slides to the equipment rack. See the rack mounting instructions and diagram in the 53B-003 Operating Manual for a detailed description of how to rack mount the 53B-CCX System.
