December 16, 2005

Dear Valued Customer,

Thank you for purchasing Tektronix products and services. You are receiving this letter as notification of a change in the product configuration for Tektronix' Product Model P5200 High Voltage Differential probe.

Tektronix Product Model Number P5200 Option A3, normally ships with a wall mounted power supply. New standards require us to make a change from the existing supply to a different model. We will now be shipping with a desktop switch-mode power supply.

We feel it is important to continue deliveries of our P5200 series products in a timely manner; and, therefore, will be shipping the revised model power supply shown below. These new parts meet or exceed all ratings required for use with Tektronix High Voltage Differential Model P5200 Option A3. This letter serves as the manual insert identifying the change in this product until our manuals and associated documentation are updated.

"Existing P5200 Power Supply"
(Model 119-4238-XX)

"Revised P5200 Power Supply"
(Model 119-7224-00)

Should this product substitution not meet your measurement requirements, or if you have questions, please contact Tektronix as soon as possible using the information provided below.
