REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS
 You can help improve this manual. If you find any mistakes or if you know of any way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, U.S. Army Missile Command, ATTN: AMSMI-MMC-AM-I, Redstone Arsenal, AL 35898-5238. A reply will be furnished to you.

Section I. INTRODUCTION

1. SCOPE.

This Repair Parts and Special Tools List (RPSTL) lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of depot maintenance of AN/USM-620/U. It authorizes the requisition, issue, and disposition of spares, repair parts, and special tools as indicated by the Source, Maintenance, and Recoverability (SMR) codes.

2. GENERAL.

In addition to Section I, Introduction, this RPSTL is divided into the following sections:

a. Section II, Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed alphabetically by item name in FIG. BULK at the end of the section. A series of exploded views of assemblies and subassemblies are arranged in functional group and figure number sequence. All parts are identified with callout numbers placed in clockwise sequence. These exploded views reflect repair parts plus those parts which must be removed in the process of disassembly for replacement or repair of the authorized item.

b. Section III, Special Tools List. Not applicable.

c. Section IV, Cross-Reference Indexes. There are two cross-reference indexes in this RPSTL: the National Stock Number (NSN) Index and the Part Number Index. The NSN Index refers to the figure and item number. The Part Number Index refers to the NSN and figure and item number.

3. EXPLANATION OF COLUMNS (SECTION II).

a. ILLUSTRATION (Column (1)). This column is divided as follows:

- (1) *((a) FIG NO.) Figure Number.* Indicates the figure number illustrating an exploded view of a functional group.
- (2) *((b) ITEM NO.) Item Number.* Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance level authorization criteria, and disposition instruction, as shown in the following breakout:

<i>Source Code</i>		<i>Maintenance Code</i>		<i>Recoverability Code</i>
<i>1st position</i>	<i>2d position</i>	<i>3d position</i>	<i>4th position</i>	<i>5th position</i>
How you get an item		Who can install, replace, or use the item	Who can do complete repair* on the item	Indicates special handling requirements or who determines disposition action on an unserviceable item

*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) *Source Code.* The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow:

<i>Code</i>	<i>Application./Explanation</i>
PA PB PC** PD PE PF PG	Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the level indicated by the code entered in the 3d position of the SMR code. <p style="text-align: center;">**NOTE Items coded PC are subject to deterioration.</p>
KD KF KB	Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance level indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied.
MO - (Made at org/ AVUM level) MF - (Made at DS/ AVIM level) MH - (Made at GS level) ML-(Made at Specialized Repair Activity (SRA)) MD - (Made at Depot)	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) column and listed in the Bulk Material group of the repair parts list in the RPSTL. If the item is authorized to you by the 3d position of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.
AO - (Assembled by org/AVUM level) AF - (Assembled by DS/AVUM level) AH - (Assembled by GS level) AL - (Assembled by SRA) AD - (Assembled by Depot)	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3d position of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.
XA	Do not requisition an 'XA"-coded item. Order its next higher assembly. (Also refer to the NOTE below).
XB	If an "XB" item is not available from salvage, order it using the Commercial and Government Entity Code (CAGEC) and part number given.
XC	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturers part number.
XD	Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGEC and part number given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 750-1.

(2) *Maintenance Code.* Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

<i>Code</i>	<i>Application/Explanation</i>
C	Crew or operator maintenance done within organizational or aviation unit maintenance.
O	Organizational or aviation unit level can remove, replace, and use the item.
F	Direct support or aviation intermediate level can remove, replace, and use the item.
H	General support level can remove, replace, and use the item.
L	Specialized repair activity can remove, replace, and use the item.
D	Depot level can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following maintenance codes.

NOTE

Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.

<i>Code</i>	<i>Application/Explanation</i>
O	Organizational or aviation unit is the lowest level that can do complete repair of the item.
F	Direct support or aviation intermediate is the lowest level that can do complete repair of the item.
H	General support is the lowest level that can do complete repair of the item.
L	Specialized repair activity is the lowest level that can do complete repair of the item.
D	Depot is the lowest level that can do complete repair of-the item.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. No parts or special tools are authorized for the maintenance of a "B"-coded item. However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

(3) *Recoverability Code*. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

<i>Codes</i>	<i>Application/Explanation</i>
Z	Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3d position of SMR code.
O	Reparable item. When uneconomically repairable, condemn and dispose of the item at organization or aviation unit level.
F	Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support or aviation intermediate unit level.
H	Reparable item. When uneconomically repairable, condemn and dispose of the item at the general support level.
D	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
L	Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
A	Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

NOTE

See SPECIAL INFORMATION, paragraph 5a for additional explanation of Recoverability Code A.

c. *NATIONAL STOCK NUMBER (Column (3))*. This column lists the NSN assigned to the item. Use the NSN for requests/requisitions.

d. *CAGEC (Column (4))*. The CAGEC is a 5-digit code which is used to identify the manufacturer, distributor, or government agency/activity, etc., that supplies the item.

e. *PART NUMBER (Column (5))*. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or government agency/activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may-have a different part number from the part ordered.

f. *DESCRIPTION AND USABLE ON CODE (UOC) (Column (6))*. This column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) The physical security classification of an item, when applicable, is indicated by a parenthetical entry following the Controlled Item Inventory Code (CIIC), e.g., CIIC(C) means the item is classified Confidential.

(3) Items that are included in kits and sets are listed below the name of the kit or set.

(4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry or reference is made to the applicable figure/functional group.

(5) Part Numbers for bulk materials are referenced in this column in the line entry for the item to be manufactured/fabricated.

g. *QTY (Column (7))*. The quantity (QTY) (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration/figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and may vary from application to application.

4. EXPLANATION OF COLUMNS (SECTION IV).

a. *NATIONAL STOCK NUMBER INDEX.*

(1) *STOCK NUMBER Column*. This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN (e.g.,

NSN
 5305-01-574-1467).
 NIIN

When using this column to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) *FIG. Column*. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II.

(3) *ITEM Column*. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. *PART NUMBER INDEX*. Part numbers in this index are listed by part number in ascending alphanumeric sequence.

(1) *PART NUMBER Column*. Indicates the primary number used by the manufacturer (individual, firm, corporation, or government agency/activity), which controls the design and characteristics of the item by means of its engineering drawings, specification standards, and inspection requirements to identify an item or range of items.

(2) *FIG. Column*. This column lists the number of the figure where the item is identified/located in Section II.

(3) *ITEM column*. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. SPECIAL INFORMATION.

a. *RECOVERABILITY CODE A*. Items assigned recoverability code "A" require research to determine the appropriate special handling or condemnation procedures. The "A" recoverability code is utilized to identify items containing precious metal and/or hazardous material and items requiring special disposal instructions, such as, centralized recovery, due to unique management interests. If the item with a recoverability code of "A" cannot be identified as being an item under one of the above conditions, the item may require special cannibalization actions prior to disposal of the item. The "A" code is also utilized to denote selected repairable items which require lower generation spares/repair parts to be removed prior to the disposal of the repairable item. When these "A"-coded items are determined to be uneconomically repairable at the authorized 4th position level, the recoverability code of all lower generation items must be reviewed. Any lower generation items which have a higher recoverability code level than the SMR 4th position level of the uneconomically repairable item must be removed and forwarded to the appropriate level authorized for individual disposition prior to disposal of the uneconomically repairable item. The uneconomically repairable item is then authorized to be disposed of, with the higher level recoverability item missing, at the level denoted by the SMR 4th position.

b. *INDEX NUMBERS*. Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the National Stock Number/Part Number Index and the bulk material list in Section II.

c. National stock numbers (NSN) that are missing for "P" source coded items have been applied for and will be added to this manual by a change/revision when they are entered in the Army Master Data File (AMDF). Until the NSNs are established and published, submit exception requisitions to: Commander, U.S. Army Missile Command, ATTN: AMSMI-MMC-MM-DDT, Redstone Arsenal, AL 35898-5239.

- d. For requisitioning miscellaneous consumable maintenance supplies or expendable supplies, use CTA 50-970.
- e. To report quality deficiencies due to design, manufacturing, and maintenance, or recommendations for improvements to equipment, submit SF 368, Quality Deficiency Report (QDR), to: Commander, U.S. Army Missile Command, ATTN: AMSMI-QA-QM-QD, Redstone Arsenal, AL 35898-5290.
- f. *ASSOCIATED PUBLICATIONS.* The publications listed below pertain to AN/USM-620/U and their components.

<i>Publication</i>	<i>Short Title</i>
TM 11-6625-3278-12	Operator and Unit Maintenance AN/USM-620
TM 11-6625-3278-40	General Support Maintenance AN/USM-620

6. HOW TO LOCATE REPAIR PARTS.

- a. *When National Stock Number or Part Number is Not Known:*
 - (1) *First.* Using the Table of Contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups and listings are divided into the same groups.
 - (2) *Second.* Find the figure covering the assembly group or subassembly group to which the item belongs.
 - (3) *Third.* Identify the item on the illustration and note the illustration figure and item number of the item.
 - (4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.
- b. *When National Stock Number or Part Number is Known:*
 - (1) *First.* If you have the NSN, look in the STOCK NUMBER Column of the National Stock Number Index. The NSN Index is arranged in National item identification number (NIIN) sequence (see paragraph 4a). Note the figure and item number next to the NSN.
 - (2) *Second.* Turn to the figure and locate the item number. Verify that the item is the one you are looking for.

NOTE

If you have the part number, look in the PART NUMBER Column of the Part Number Index. Identify the figure and item number, look up the item in the applicable figure in Section II.

7. ABBREVIATIONS. Not applicable.
