MPEG Test System Installation Software, Version 4.0

This CD ROM contains software installation executable and data files for the Tektronix MPEG Test System family of products. Use this disc to install new software products and upgrades, or to reinstall the software for all products, should it become necessary.

If you received this disc with a software product or software upgrade kit, follow the instructions provided with the product or kit to install the software.

If you received this disc with an MTS205, MTS210, or MTS215 MPEG Test System, store the disc in a safe place. The software has been installed and configured during test system manufacture; however, you may need the disc to install test system options or future upgrade kits or to reinstall the MPEG Test System software.

> **NOTE.** *Save this disc: you may need this disc to install test system options or future upgrade kits or to reinstall the MPEG Test System software.*

To use this disc to reinstall software, follow the instructions in the *Software Repair* appendix of the MTS200 Series MPEG-2 DVB/ATSC System Analyzer, Real-Time Analyzer, or Stream Creation Applications user manuals that accompanied your system or upgrade to version 4.0.
