Before Powering on the MTX100A or RTX100A

NOTE. *Before powering on the MTX100A or RTX100A for the first time, you must make the following connections in order to initialize the operating system. If you need assistance, contact Tektronix Technical Support in North America (by calling 1-800-833-9200 and pressing 3) or go to www.tektronix.com to find a Tektronix contact in your area.*

Before you power on the MTX100A or RTX100A for the first time:

1. Connect the supplied keyboard (Tektronix part number 119–B146–00) to the right USB port on the MTX100A or RTX100A front panel as shown.

2. Connect the supplied mouse (Tektronix part number 119–6936–00) to the USB port (right-side port when keyboard is facing you).

Proper USB connections before powering on for the first time

3. Connect power to the instrument and power on the instrument.

4. Follow the "Welcome to Windows XP" initialization instructions. After initialization is complete, you can use a different USB keyboard and mouse.
