October 2002

Welcome

This year's IBC in Amsterdam last month attracted over 40,000 visitors from the video industry. Tektronix' new product introductions attracted quite some interest and you can find out more about them below. You'll also find details about other European tradeshows in which we're participating - enjoy and feel free to pass on to your colleagues.

[PAST ISSUES](#)

NEW MPEG Transport Stream Monitor

Our key IBC launch was the [MTM400 MPEG Monitor](#), designed for easy integration into digital networks via SNMP protocol. Low cost per channel monitoring with the ability to add deeper analysis and optional RF interfaces for DVB-C or DVB-S systems too.

[Back to top](#)

WebMSM Management Software

Providing a clear user interface into networked monitoring devices such as the MTM400, [WebMSM](#) is the solution. SNMP open standards support allows flexibility and minimal staff training or expertise.

[Back to top](#)

Designing MHP equipment or software?

A [new software module](#) for our AD95x and AD960 MPEG Test Platforms provides easy-to-use Carousel generation capabilities for this fast-developing technology.

Need Analogue Video Test Signals?

Our [TG700](#) Modular Test Signal Platform now has two new members of its signal generator module family. For standard definition analogue signals the AVG7 provides full-frame test patterns, logos, circles and more. The AWVG7 provides similar facilities for wideband or HDTV applications. Suitable for design, manufacturing or service.
