

VHF/FM Transmitter T 3270

Highlights of VHF/ FM TRANSMITTER T 3270

- Simple operation utilising clearly arranged menu guided control on graphical display
 - Easy maintenance as result of modular design, 3 HU, 19"
 - All control functions are displayed on the graphical display
 - Integrated deviation limiter
 - All reserve concepts according IEC 864, part 1, can be realised
 - Direct modulated synthesizer
 - Channel grid 10 kHz
 - Integrated stereo encoder
 - Proven MOSFET technology

- Excellent reliability due to low junction temperature (less than 90°C at 25°C ambient temperature)
 - Outstanding quality data in terms of signal-to-noise ratio, stereo cross-talk attenuation, frequency response, non-linear distortion
 - Protection against over-current, failure of cooling ventilator and any VSWR
 - Output power: settable continuously between 5 and 100 W
