

## TRC 2000 H/V/UHF Digital Receiver

**TRC 2000** is a VLF/HF, V/UHF or VLF/HV/UHF digital receiver. Thanks to its advanced digital technology, **TRC 2000** can achieve outstanding technical performance and offer new devices (NOTCH, PASSBAND filters, etc.) which will allow better performances.

The **TRC 2000** equipment provides a very good level of EMC protection.

**TRC 2000** can thus be used for general search operations, surveillance, and monitoring applications in the most severe of operational environments for monitoring centers, armed forces, air force or navy tactical applications.

**Multirange:** 9 KHz to 3000 MHz,

**Modular and compact size:** 1 to 4 channels in 3U/19" rack,

**Exploitation PC Windows-NT™,**

**Real time data transmissions technical analysis and decoding (with TRC 641)**

**Outstanding operational performance,**

**Easy system integration.**
