

Uniden 5.8GHz Cordless Phones

FACT SHEET

Uniden's newest cordless phone brings power, clarity, security and value to customers. Operating on the latest 5.8GHz frequency band, these Digital Spread Spectrum cordless phones bring communication to a whole new level.

Unmatched Range

Utilizing technological innovation, Uniden's 5.8GHz phones have a distinct range advantage:

- Digital Spread Spectrum (DSS) technology allows for the greatest range by spreading the transmission across several frequencies. DSS also allows for greater security, making the transmission nearly impossible to intercept.
- Uniden's patent-pending directional antenna is located in the base unit, and is two-and-a-half times more powerful than conventional antennas, giving the Uniden 5.8GHz superior range performance.

Exceptional Clarity

Uniden's 5.8GHz phones are the only cordless phones to offer **true** 5.8GHz technology:

- Unlike other 5.8GHz phones, the Uniden phones both transmit and receive data on the new 5.8GHz frequency band, resulting in less interference
- The open 5.8GHz frequency allows for maximum clarity and minimum interference, making audio quality superior in both urban and rural environments.

Technology Leadership

Building on its expertise in manufacturing cordless phones, Uniden designed the 5.8GHz cordless phone line emphasizing features that make the phones user-friendly and beneficial to consumers.

The 5.8GHz line includes:

TRU 5885-2

- Complete dual handset system (shown) includes second handset and charging cradle
- Speakerphone in each handset
- New message waiting indicator
- Caller ID/Call waiting
- Digital answering system
- Dual keypad and speakerphone in base
- New enhanced LCD for easy viewing
- 100 dynamic memory locations
- Handset-to-handset call transfer
- Headset jack
- Street Retail: \$229

(A single handset model is available as well, TRU 5885)

TRU 5865-2

- Complete dual handset system (shown) includes second handset and charging cradle
- Speakerphone in each handset
- Voice mail waiting indicator
- Caller ID/Call waiting
- Dual keypad and speakerphone in base
- New enhanced LCD for easy viewing
- 100 dynamic memory locations
- Handset-to-handset call transfer
- Headset jack
- Street Retail: \$199

(A single handset model is available as well, TRU 5865)

TXC 580

- One additional handset and charging cradle can be added to TRU 5865 or TRU 5885
- No phone jack is required for the second handset
- The automatic registration process allows the user to easily add this handset to their system
- Street Retail: \$79
