

Uniden®

evōlo™ SERIES

WNP1000

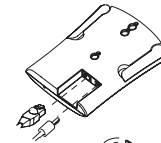

PACKAGE CONTENTS INCLUDE

- evōlo WNP1000 Wireless Access Point
- Stand
- Easy Start Guide
- Owner's Manual

2 STEPS TO GET STARTED

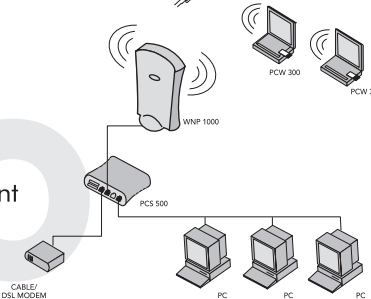

1 HARDWARE INSTALLATION

- Plug in your AC power adapter and your ethernet cable into the WNP1000 Wireless Access Point.

2 CONNECT THE AP

- Connect the WNP1000 Wireless Access Point to your switch, router, or cable modem.

NOTE: Configuration is not needed when using other Uniden evōlo products. Your WNP1000 Wireless Access Point has default settings that will work with other Uniden evōlo products, just out of the box.

If you need to configure your WNP1000 Wireless Access Point, you can access the browser based Configuration Utility at <http://192.168.1.10>. See the Owner's Manual for more information.

EASY START GUIDE
